Every effort has been made to ensure that this catalog is accurate and current. Information in the catalog is correct according to information available to the Rocky Mountain College administration at the time of publication. Rocky Mountain College reserves the right to withdraw courses at any time, change the fees, change the rules and calendar, regulate admission and graduation requirements, and change any other regulations affecting the student body. Changes shall become effective whenever the proper authorities so determine and shall apply not only to prospective students but also to those who at the time are matriculated in the College.

Master of Physician Assistant Calendar

In addition to fall and spring semesters, physician assistant students have an initial summer term and a full summer semester.

**Initial Summer Semester 2011**
- Validation must be complete (confirm attendance and make payment arrangements; Classes begin) - July 5, 2011
- Independence Day – No classes - July 5
- Last day of classes - July 12

**Full Summer Semester 2011**
- Validation must be complete (confirm attendance and make payment arrangements; Classes begin) - May 7
- Break - AAPA Conference - No classes - May 28-June 1
- Independence Day – No classes - July 4
- Last day of classes - Aug. 10
- Final Examination - Aug. 13-15

Master of Educational Leadership Calendar

**Fall 2011**
- Classes begin - Aug. 1
- Initial seminar at Rocky Mountain College - Aug. 1-5
- Application for May 2011 graduation due - Oct. 31
- Last day of classes for fall term - Dec. 20
- Final grades due - Jan. 10, 2012

**Spring 2012**
- Classes begin - Jan. 3
- Baccalaureate - May 4
- Commencement - May 5
- Capstone seminar at Rocky Mountain College - June 11-15
- Final grades due - June 22, 2012
History of Rocky Mountain College

Rocky Mountain College is the oldest college in Montana. Its history demonstrates a commitment to excellence and an openness to all points of view. Adversity has led to strength through the joining of a liberal arts tradition and the heritage of practical training for specific careers. The union of three distinct religious traditions has resulted in a church-related college that considers all questions in an open and non-sectarian manner.

In 1877, a small group of Methodists met in Bozeman to establish a school in a principal area of the Territory. The committee included former Governor Benjamin J. Potts and minister-missionary Brother William Van Orsdel. The committee encountered roadblocks along the path to success, so a contingent from Deer Lodge, Montana decided to establish the Montana Collegiate Institute in 1878 with three faculty, about two dozen students, and tuition of only $15 to $25 (payable in advance, of course).

Four years later, the Presbyterian Church assumed control and chartered the College of Montana with three brick buildings and an initial student population numbering 160. Tuition had risen to $5 per month. Meanwhile, in 1889, the Methodist Episcopal Church opened Montana University, later changed to Montana Wesleyan University, located in Helena. The assets, organizations, and traditions of these Presbyterian and Methodist institutions merged in 1923 under the aegis of Intermountain Union College in Helena. In 1904, two decades prior to the founding of Intermountain Union College, two brothers from Maine, Lewis T. and Ernest T. Eaton, leased the abandoned campus at the College of Montana and renamed it the Montana College and School of Manual Arts. In 1908, the brothers moved to Billings and established the Billings Polytechnic Institute, using the same blend of practicality, cultural arts, and civic and religious training of youth in its curriculum. Earthquakes seriously damaged the Intermountain Union College buildings in 1935, and after a brief move to Great Falls, Intermountain Union College accepted an invitation to relocate on the Billings Polytechnic Institute campus. As affiliates, the institutions developed integrated programs and then merged into a single college named Rocky Mountain College by student vote in 1947.

The College maintains this proud blend of traditions as part of its heritage. One enduring tradition, the Candlelight Supper, heralds the anniversary of the day Billings Polytechnic Institute moved from downtown Billings to its present location. The event was so named because on moving day in 1910, there was no electricity in the buildings. A supper of cold sliced meat, cold boiled potatoes, cold baked beans, and doughnuts was served by candlelight. Since then, that first meal has been honored each year with a Candlelight Supper. The tradition is observed nationwide and in foreign countries as Rocky Mountain College alumni from far and wide convene for their Candlelight Suppers approximating the atmosphere, if not the menu, from that first supper.

Another more recent but equally popular tradition is the Yule Log Dinner and the Lighting of Losekamp. This Christmas ceremony involves the College community in a celebration of the beauty, spirituality, and sentiment of the season.

Since the merger of Intermountain Union College and Billings Polytechnic Institute in 1947, Rocky Mountain College has been fortunate to have the following presidents as leaders:

- William D. Copeland – 1947-1951
- Herbert W. Hines – 1951-1958
- Philip M. Widenhouse – 1958-1966
- Lawrence F. Small – 1966-1975
- Bruce T. Alton – 1975-1986
- James J. Ritterskamp, Jr. – 1986-1987
- Arthur H. DeRosier, Jr. – 1987-2002
- Thomas R. Oates – 2002-2005
- Michael R. Mace – 2005-Present

Rocky Mountain College continues its tradition of joining practical skills and the liberal arts. All the strains of our history are valued as students are prepared to be leaders in the 21st century.

Mission

Rocky Mountain College educates future leaders through liberal arts and professional programs that cultivate critical thinking, creative expression, ethical decision making, informed citizenship, and professional excellence.

Church Relations

Rocky Mountain College is affiliated with the United Church of Christ, the United Methodist Church, and the Presbyterian Church (USA). The College is non-sectarian in spirit and program. The College actively upholds the importance of religious faith and the necessity for religious tolerance and free inquiry. It encourages classroom discussion of the religious roots and implications of academic questions whenever relevant. Students are encouraged to develop and/or strengthen their religious beliefs, while the religious convictions and questions of all members of the College community are taken seriously.

Peace Studies

David Burt, Director
Cindy L. Kunz, Administrator

Founded in May of 1990, the Institute for Peace Studies at Rocky Mountain College operates under a 28-member board of advisors, with the administrator and the board chair reporting directly to the Rocky Mountain College board of trustees. Its administrator, assisted by part-time staff, work-study, and community volunteers, works year round to bring programs like the Festival of Cultures, Peace Village, and “We Are Women” conferences to the region. Outreach includes going into the classroom with Rocky Mountain College’s international students and sharing a diversity pro-
gram, bringing the “Second Step” conflict resolution curriculum to rural and reservation elementary schools, and designing a recently completed program (Russian Farming - A New Day) that involves working with Russian farmers as they privatize agriculture in the Kuzbass region of southern Siberia. The Institute facilitates an upper-division political science class (“Bross Peace Seminar”) during each spring semester, challenging students to review areas of current conflict and also areas where peace has been successfully maintained or restored. Each year, on the stage of the Alberta Bair Theater, the Institute presents the prestigious Jeannette Rankin Peace Award and the Edith Gronhovd Peace Essay Awards, and features a noted peacemaker along with outstanding entertainers who come together for an evening “In Praise of Peace.” The Institute’s mission, “to seek through education to examine and promote alternatives to violence in the behavior of individuals, groups, organizations, communities, and nations,” continues to attract members from a wide variety of ethnic, political, and socio-economic backgrounds.

Speakers are available, and visitors are welcome. The Peace Institute is located in 103 Alden Hall. Contact the Institute via email at peacetudies@rocky.edu or at (406) 657-1042.

The Campus
The campus of Rocky Mountain College occupies approximately 60 park-like acres in a residential section of Billings. Deciduous and evergreen trees, shrubs, and perennials make the campus particularly welcoming.

Alden Hall, 1937. This attractive stone and stucco building, the gift of the Alden Trust and founded by the late George Alden, Worcester, Mass., served as a residence hall for men until 1973. Currently, it houses faculty offices and the Institute for Peace Studies.

Anderson Hall, 1970; 1998. Anderson Hall offers traditional residence hall housing for 72 students, with common restrooms, showers, and kitchens. One of the campus’s most popular spots, the ASRMC lounge, is located in the basement. Yoder Lounge, a comfortable space for study, computer use, and relaxation, connects Anderson to Widenhouse Hall. Anderson is named for Lula Anderson, a member of the first graduating class of Billings Polytechnic Institute.

Bair Family Center for the Sciences, 1981. Named for the family of Montana pioneer and rancher, Charles M. Bair, Rocky Mountain College’s major science facility houses the science and mathematics disciplines and is complete with classrooms, laboratories, seminar rooms, and faculty offices. It also houses the Nuclear Magnetic Resonance (NMR) Spectrometer. The facility was made possible by a major gift from Alberta M. Bair, daughter of Charles M. Bair, together with gifts from other donors to the Second Century Fund.

Bair Family Student Center, 1961; 1997. Located in the center of the campus, north of the Rocky Green, this structure houses the dining room, snack bar, bookstore, game room, Fraley Lounge, campus mail services, the offices of ASRMC, career services, and the office of the dean for student life. The building has been extensively expanded and remodeled.

Lillis Chapel, 2007. Located in the lower level of the Bair Family Student Center.

Billings Studio Theatre, 1971. This building affords an excellent facility for dramatic productions as well as a commodious lecture hall, seating 250. It was built in cooperation with the Billings Studio Theatre community drama group.

Rocky Mountain College Bookstore, 1961; 1997. The College bookstore, stocked to meet students' needs for books and supplies, is located in the Bair Family Student Center.

Eaton Hall, 1909. Originally known as Science Hall, this building, the gift of a group of pioneer businessmen in Billings, houses administrative offices. The hall is named for the founders of Billings Polytechnic Institute, Lewis T. and Ernest T. Eaton.

Educational Resource Center, 1958; 1999. This building houses the Paul M. Adams Memorial Library, computer equipped writing, data, and business classrooms, and a distance learning center. The library, now the largest part of the ERC, contains a collection of over 85,000 books and periodicals accessible via the library’s computer catalog. The ERC also houses the Alice Giddings King Memorial Archives, the College’s Heritage Archives and collections belonging to the United Methodist Church and the United Church of Christ.

Flight Training Operations, 2007. Aircraft with modern navigation and avionics systems provide basic training resources for students. The location at the Billings Logan International Airport provides close access to flight training and Class C airport operations.

Fortin Education Center, 1969. Fortin Education Center houses several academic programs, a gymnasium, auxiliary exercise areas, a swimming pool, a health suite, a large lecture hall, classrooms, laboratories, and offices for faculty and administrators. It is named for Philip Fortin, a Billings businessman and philanthropist.

Intermountain Equestrian Center. Located nine miles from campus, Rocky Mountain College contracts facilities that include two large heated indoor arenas, two extensive outdoor arenas, round pens, numerous trails for pleasure riding, and top-notch stabling for 75 horses.
Jorgenson Hall, 1964; 1998. This residence hall consists of 48 apartment units with private entrances. On the west end of campus, Jorgenson is a fine retreat for our upper-class, nontraditional, and married students, as well as students with families.

Kimball Hall (see Morledge-Kimball Hall)

Losekamp Hall, 1917. This sandstone building, in a modified Collegiate Gothic style, was a gift of the late John D. Losekamp, a pioneer merchant of Billings. It houses the music and theatre arts programs and the Ruth and Vernon F. Taylor Auditorium, which is used for drama productions, recitals, and other special events. Losekamp houses studios, practice rooms, and classrooms.

Morledge Facility Services Building, 2001. This structure, provided by a generous gift from Dr. Charles and Patti Morledge, houses equipment used to maintain the campus buildings and grounds.

Morledge - Kimball Hall, 1914, 2009. This stone and stucco building, part of which formerly served as a residence hall for women, was named for the principal donors, the Morledge Family, Billings, Montana, and the late Mrs. Flora Kimball, Portsmouth, New Hampshire. This lovely facility houses twenty-two faculty offices and seven classrooms.

Prescott Hall, 1916; 2001. This stone building was erected through the generosity of the late Amos L. Prescott of New York City. The commons, a large paneled room with a wood-and-beam ceiling, has large fireplaces at each end. Before 1961 it served as the College’s dining hall. Extensive renovation and expansion were completed in fall 2001. It currently houses administrative offices and serves as a gathering place for the campus community.

Rimview Hall, 2004. Located on the western edge of campus, this residence hall provides 200 private rooms within a suite-style complex (four students with private sleeping quarters per suite). Each suite is equipped with a microkitchen and 1.5 baths. Occupancy of this facility is restricted to students with sophomore status or higher.

Rocky Hall, 1989. This stucco building, located on the corner of Rimrock Road and Augusta Lane, houses the aviation program and a daycare center.

Rocky Village, 1973. Rocky Village is a business and housing development on the south campus.

Technology Hall, 1922. This sandstone structure contains offices, classrooms, an art gallery, art studios, laboratories for the computer science program, and the College’s maintenance department.

Tyler Hall, 1930. This beautiful sandstone building in the Collegiate Gothic style is architecturally one of the finest on campus. This gift of Mrs. G. W. Mehaffey, Brookline, Mass., is a memorial to her father, the late W. Graham Tyler. It served until 1971 as a men's residence hall. It now houses faculty offices, and facilities for the teacher education program.

Widenhouse Hall, 1961; 1998. Dedicated in 1973 to the memory of Philip M. Widenhouse, third president of Rocky Mountain College, this residence hall provides traditional and suite-style accommodations for 176 students. Each room has a private bathroom and kitchenette with refrigerator, sink, and microwave with adjoining storage rooms and personal laundry facilities.

Accreditation
Rocky Mountain College is accredited by the Northwest Commission on Colleges and Universities, 8060 165th Avenue NE, Suite 100, Redmond, Washington 98052-3981, and by the Office of Public Instruction for the State of Montana for the preparation of elementary and secondary teachers. The physician assistant program is accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), and the aviation program is accredited by the Aviation Accreditation Board International.
Requirements for Admission

Admissions
The College invites applications for admission from students who demonstrate academic ability and who are seriously interested in the total development of character, intellect, leadership, and skills. Admission is based upon a careful review of the credentials presented by an applicant. Selection is made without regard to race, color, gender, age, religion, national or ethnic origin, physical or mental disability, sexual orientation, or familial status.

All applications for admission are reviewed on an individual, rolling basis. Criteria for admission to Rocky Mountain College are listed below. Exceptions are clearly identified for each group of applicants. Once an applicant's file is complete, the admissions committee will make a decision on the student's application for admission. It is in the student's best interest to apply early for admission.

Students seeking admission must submit:
1. completed Rocky Mountain College application for admission;
2. official transcripts (high school, GED, and any from post-secondary institutions);
3. results of ACT and/or SAT tests for traditional freshman students;
4. non-refundable application fee of $35 (international students, $40); this fee is waived for online applications; and
5. an essay and two letters of recommendation may be required.

Traditional freshman applicants are encouraged to follow a college-preparatory curriculum.

The following may also be considered in reviewing applications for admission:
1. community service and work experience;
2. extracurricular activities;
3. special circumstances (e.g., health or personal);
4. recommendation information; and
5. a personal essay

Freshman Student

Admission Criteria
• High school diploma and a cumulative GPA of 2.50 or higher and an ACT/SAT score of 21/1000 or higher.
• The admissions committee, composed of staff and faculty, will consider students with a cumulative GPA below 2.50 or a GED and an ACT/SAT score below 21/1000 for admissions.
• A student who does not meet the normal requirements for admission must submit a personal essay and two letters of recommendation to the admissions office for review by the admissions committee, who will make a decision on that application. Appropriate references include teachers, professors, counselors, employers, clergy, etc.
• High school students may be considered for admission with grades reported through their junior year in high school. Final official transcripts noting certification of graduation and class rank must also be submitted before a student enrolls. Those students earning a GED must submit an official record of their scores directly from the granting agency to the College.

Nontraditional Freshman Student
Nontraditional students are those students who are at least 25 years old and have not attended a post-secondary institution.

Admission Criteria
• Students with a high school diploma and a cumulative GPA of 2.50 or higher meet the requirement for regular admission. ACT/SAT scores are not required for an admissions decision, but are helpful for placement into the appropriate college-level English and mathematics courses.
• Students with a GED or a cumulative high school GPA of less than 2.50 are reviewed according to the same criteria for admission by the admissions committee as outlined above. ACT/SAT scores are not required for an admissions decision, but are recommended.
• Students are required to submit an essay and solicit two letters of recommendation from references.

Transfer Student
Transfer students must have official transcripts from all colleges, vocational schools, and other post-secondary schools previously attended sent directly from their previous institutions to Rocky Mountain College. Transfer students must complete all College degree requirements to graduate.

Admission Criteria
• Students who have completed, at an accredited institution, a minimum of 27 semester hours that count toward Rocky Mountain College general education requirements and/or a Rocky Mountain College established major; and who have a minimum of a 2.00 GPA, meet the requirement for regular admission.
• Students who have attempted 27 or more semester hours but have less than 27 semester hours that count toward Rocky Mountain College general education requirements and/or a Rocky Mountain College established major, will be reviewed by the admissions committee and may be required to submit additional materials.
• Students who have attempted less than 27 semester hours are reviewed according to the same criteria for admission as new freshmen (see Freshman Student Admission).
• Any student, regardless of the number of credits transferring, who has been dismissed, placed on probation, or documented as not in good standing with any prior institution will be reviewed by the admissions committee and may be required to submit additional materials.

Note: Although the College reserves the right to refuse incoming transfer credits, credits from equivalent accredited colleges normally will be accepted, subject to these conditions:
a. No junior- or senior-level credit is allowed for courses from two-year colleges.
b. No “D” or “F” grades are accepted.
c. No preparatory/developmental classes below the 100 level are accepted.

Failure to reveal records of previous college attendance is grounds for dismissal. The office of student records makes final determination concerning acceptance of credit.

Requirements for International Admissions

International applicants are required to submit original or certified copies of official secondary school transcripts in native language, accompanied by a certified English translation. Those applying as transfer students must submit original or certified transcripts from each post-secondary institution attended. Additional admissions materials for first-year applicants include official SAT or ACT results.

International applicants meeting the following criteria will be offered regular admission: A cumulative secondary school grade point average of 2.5 or higher and a critical reading and math section total on the SAT of 860 or an enhanced version composite score of 18 on the ACT.

Those applicants who completed secondary school three or more years prior to applying to the College, who are unable to submit SAT or ACT scores and whose native language is not English will be required to submit official results of English-language testing, such as TOEFL or IELTS. The following English-language test result minimums will be considered: TOEFL score of 525 (paper-based), 197 (computer-based) or 72 (Internet-based); or IELTS result of 5.5/6.

For admission to a graduate program, the following English-language test score minimums are required: TOEFL – 570 (paper), 230 (computer), 88 (Internet); IELTS – 6.5. Depending on the program, official GRE or GMAT results are required.

The admissions committee will consider undergraduate applicants with a cumulative grade point average below 2.5 and/or SAT or ACT scores below 860 or 18, respectively. These applicants will be required to submit a letter from a secondary school official, attesting that the student was in the upper 50% of his or her graduating class.

Accepted students are required to present confirmation of financial support. Submitted documentation will demonstrate the student, a benefactor, or a third-party sponsor has sufficient funds to support the student’s educational expenses for the first year. Such expenses may include tuition, fees, room, board, books and other living expenses. Confirmation of financial support typically consists of a bank statement and an affidavit of support. The minimum amount of financial support is determined annually. The Office of International Programs should be consulted prior to submitting documentation.

International Admissions Checklist:
- Official or certified copies of transcripts from all secondary and post-secondary institutions attended
- Official or certified SAT or ACT results
- English-language test scores (waived if submitting SAT or ACT):
  - TOEFL:
    - Paper – 525
    - Computer – 197
    - Internet – 72
  - IELTS – 5.5/6
- Graduate program admission:
  - TOEFL
    - Paper – 570
    - Computer – 230
    - Internet – 88
  - IELTS – 6.5

Upon acceptance to Rocky Mountain College, international students will be forwarded an admissions packet consisting of the following:
1. Official acceptance letter
2. Certificate of Eligibility: I-20 or DS-2019 (to obtain a visa)
3. Pre-arrival information packet
4. Housing information and application
5. Insurance guide and form
6. Student health form
Items 4, 5 and 6 above should be submitted to the Office of International Programs after receipt of the acceptance packet.

For more information, contact the Office of International Programs at international@rocky.edu or (406) 657-1107.

International Transfer Student

If transferring from a college or university within the United States, Intent to Transfer Form must be completed and submitted. This form is provided by the Office of International Programs upon acceptance. Refer to the transfer student section for additional requirements. If transferring from a college or university outside of the United States, an evaluation of non-U.S. post-secondary credentials will be required.

Admission Criteria
- Students who have completed 27 or more transferable semester credit hours from an accredited college or university and who have a cumulative college GPA of 2.00 or higher and evidence of academic language proficiency meet the requirements for regular admission.
- Students transferring from colleges or universities in another country may have to pay an additional fee to have their credentials evaluated by an independent agency.
International Exchange Student
These students are not seeking degrees from the College, but are enrolled as visiting students for one or two semesters with the goal of exploring the region, American culture, and taking courses of interest to them.

Admission Criteria
- The usual requirements for admission are waived for visiting international exchange students. Instead, articulation agreements between partner institutions or organizations will establish mutual requirements.
- Students are screened by committees at the partner institutions or meet criteria set by the consortia through which exchanges are facilitated. Typically, students must be "C+" or better students and must have English language proficiencies near that of the College’s requirement. Standardized test scores are not required. Students receive letter grades unless otherwise specified in the exchange agreements.

Readmission Guidelines
Students who previously attended Rocky Mountain College but were not enrolled during the previous semester must apply for readmission. Applications for readmission may be downloaded from the Rocky Mountain College website or from the office of student records. Students must submit the application along with all transcripts from institutions attended since their last enrollment at Rocky Mountain College.

Admission Criteria
Students who left Rocky Mountain College in good academic standing will be approved for readmission if they
- have a minimum of 2.00 GPA on a 4.00 scale from any institution attended since their last enrollment at Rocky Mountain College;
- are in good standing at that/those institution(s); and
- have not been convicted of a criminal offense.

The admissions committee will consider any student for readmission who does not meet these criteria, including students with a Rocky Mountain College cumulative GPA below a 2.00. In addition to the readmission application, students are required to submit an essay for review by the committee. The essay should address the following:
- an explanation of past performance;
- strategies the student will employ to improve his or her academic standing; and
- changes in the student's personal life which will contribute to academic success.

Veterans Admission
Veterans of the armed services are encouraged to apply for admission and should follow the guidelines for "Freshman Admission" or "Transfer Admission." The College will give appropriate credit for college-level courses taken while in the armed services. Credit evaluation is based on American Council of Education guidelines and is awarded after successful completion of one semester (see the "Academics" section of the catalog). Veterans and children of deceased veterans who are eligible for veteran’s administration (VA) funding must secure a certificate of eligibility through a regional VA office. The financial aid office serves as the campus VA representative.

Early Admission
Students who wish to complete their senior year in high school concurrently with their freshman year in college may apply for early admission. Students who apply for early admission are required to submit material outlined in the "Freshman Student Admission" section in this catalog. In addition, the following items are required:
1. a letter of approval from parent or legal guardian; letter from the student's high school principal recommending early admission; and
2. a letter from the student's high school counselor or teacher indicating the level of student's academic ability, emotional maturity, and social development.

A student accepted under the early admission policy is not required to show evidence of having earned a high school diploma. Upon request, the College will attempt to arrange a freshman-year curriculum for the student with coursework that parallels the high school classes for which credit is needed. Through this procedure, the student may earn a high school diploma while attending college. The student's principal and/or local school board must approve such an arrangement.

"Explore College During High School"
High school juniors or seniors who wish to take college courses while still in high school need to complete the application for admission (high school) and submit a letter of recommendation from a high school counselor or principal. There is no application fee for this program. Students may enroll for up to six semester hours each semester while they are juniors and seniors, including summer session between their junior and senior years. Students wishing to continue their education at Rocky Mountain College after high school must follow the guidelines outlined in the "Freshman Student Admission" section.

Audit Student
Individuals may attend classes without receiving credit by auditing the course. There are no admission requirements; however, students are required to pay an audit fee in addition to any materials fees. Audit class availability is dependent on space and permission of the instructor. Contact the office of student records for more information.

Students with Disabilities
Admissions Process
There is no separate admissions process for students with disabilities. Students apply through the regular admissions process and must meet the College's admissions criteria. For
services, refer to "disability services" and "services for academic success (SAS)" in the "support services" section.

**Process of Confirmation**

The College will make a decision on a student’s application for admission after required credentials have been presented. Admissions decisions are made on a rolling basis throughout the year, and students may be admitted any semester. After a decision has been made regarding a student’s application for admission, the student will be notified immediately.

Upon acceptance to Rocky Mountain College, students will be sent a letter of acceptance, as well as the following forms:

1. Residence hall contract or off-campus residency application
2. News and information form
3. Student health service form
4. Services for academic success (SAS) application form
5. Family Education Right to Privacy Act (FERPA) form

Students are asked to submit a $250 non-refundable tuition deposit (non-refundable after May 1). The deposit will be held in a subsidiary account and refunded upon graduation subject to any outstanding amount a student owes Rocky Mountain College. The deposit will guarantee enrollment in the student’s chosen major.

The College reserves the right to deny admission to any applicant whose academic history or personal qualifications are judged to be unsuitable for college work and living at Rocky Mountain College.

For information and application material, contact:
Rocky Mountain College
Director of Admissions
1511 Poly Drive
Billings, MT 59102-1796

**Master of Physician Assistant Studies**

Robert Wilmouth, MD
Program Director

Admission to the physician assistant program is highly competitive and multi-faceted. Application through the CASPA system is required. Applicants are selected based on their academic preparation, health care experience, maturity, interpersonal skills, and knowledge of the physician assistant profession and its role in health care delivery.

Preference is given to applicants who graduate from high schools in rural areas and who are residents of Montana, Wyoming, Colorado, North Dakota, South Dakota, Idaho, or Utah.

**Applicants need the following to be considered:**

1. bachelor’s degree required upon matriculation to MPAS
2. science GPA of 2.7. No science courses with a “C-” or below.
3. cumulative GPA of 3.0
4. a one-year sequence in general/organic/biochemistry, or 2 semesters of organic chemistry, or 1 semester of organic chemistry and 1 semester of biochemistry
5. biology coursework to include 12 credits of:
   a. 2 semesters of anatomy & physiology with laboratory (from a biology or physiology, zoology department) 8 credits
   b. 1 semester of microbiology, with laboratory 4 credits
6. 4 credits of biology or chemistry coursework at the 200 or higher level
7. Prerequisite biology and chemistry may not be taken by an on-line or correspondence format.
8. medical terminology (on-line course acceptable)
9. minimum combined score (verbal + quantitative) of 900 on the Graduate Record Examination
10. TOEFL required of all applicants when English is not the first language
11. Mathematics to include a pre-calculus course (function, trigonometry, exponents, and logarithmic functions) or higher and a statistics/probability course (6 credits)
12. 1 semester of Psychology (developmental or abnormal highly recommended) 3 credits
13. 1 semester Social Science other than Psychology (3 credits)
14. 1 semester English composition (3 credits)
15. 1000 hours of direct, hands-on patient care experience when you submit your CASPA application. We highly encourage 1 year of undergraduate physics or additional quantitative courses and/or laboratory experiences. We also recommend additional writing classes.

Students must use CASPA—the computerized application service—so that all student profiles look similar. Early submission of applications is highly encouraged as we will interview students on a rolling basis. CASPA applications must be electronically submitted by October 1 to be considered.

**Patient care experience**

1000 hours of patient care experience. The higher the quality of patient care experience, the more competitive the applicant will be judged. However, all applicants with direct patient care and high quality patient interactions are encouraged to apply. (CNA, MA, AT, ERT, RN, LPN, paramedic, phlebotomist)

Graduates of Rocky Mountain College who have met all the prerequisites and have earned a bachelor’s degree will be granted an automatic interview. Please note, this interview DOES NOT guarantee acceptance into the program—Rocky Mountain College graduates will compete with all other interviewing students for matriculating status.

**Note:** In addition to completing the CASPA application process, individuals who are seeking admission to the physician assistant program are required to complete and submit the fol-
Requirements for Admission

lowing supplemental information. Applications will be considered incomplete and will not be evaluated by the program if any of the required application information is not provided by the application deadline of October 1st.

The supplemental application requires that applicants provide an electronic document that addresses how you plan to meet the academic pre-requisites prior to the start of the PA program.

No transfer credit or advanced placement is allowed to replace any portion of the MPAS curriculum.

Applications are only valid for the admissions cycle during which they are submitted. Individuals who wish to re-apply during the admissions cycle of a subsequent year are required to submit a new and complete application.

All applicants who are accepted for admission to the Rocky Mountain College Master of Physician Assistant Studies program are required to submit official copies (i.e., not copies issued to the student) of their transcripts from all institutions of higher education previously attended (including non-U.S. schools). This set of transcripts is in addition to those submitted to CASPA.

Master of Educational Leadership
Stevie Schmitz, Director
Jo Swain, Associate Professor
Christine Unquera, Program Assistant

Admission to the master of educational leadership program is competitive and will be based on the following requirements for admission. Complete the following if applying to the educational leadership program for certification only. A master's degree must have been earned at another institution:

• Complete a separate application for admission
• Submit a current resume to include educational degrees/professional experiences as well as relevant awards, publications, presentations or other achievements;
• Submit an official transcript from the institution that granted your most recent degree.
• Submit three professional reference forms (Rocky Mountain College reference forms must be used) completed by:
  1. the applicant's principal
  2. a teacher the principal chooses, and
  3. a teacher of the applicant's choice. If the applicant is not currently teaching, a supervisor must be chosen who can describe the applicant's work.
• Submit a photocopy of the applicant's valid (current) teaching certificate.
• Submit a photocopy of a valid (current) teaching certificate. If the applicant's certificate has expired, he or she will be required to submit a renewed certificate before applying for the principal certificate.

Acceptance into the program for either certification or completion of a master's degree will also include a successful interview prior to admission.

Master of Accountancy Program
Traditional Graduate Admission
Anthony R. Piltz, Professor
Sandra L. Barz, Professor
Rockland J. Tollefson, Visiting Assistant Professor

Applicants for the program who possess undergraduate degrees will be considered for admission based on the following:
• Possession of an earned bachelor’s degree from an accredited institution. The candidate’s major field of study must be a field other than accounting.
• Cumulative undergraduate GPA of 3.0, or above
• Completion of the GMAT Exam
• Completion of the following nine prerequisite courses. The cumulative GPA for the courses must be 3.0, or above
  1. BSA201 Principles of Accounting I (or equivalent)
  2. BSA202 Principles of Accounting II (or equivalent)
  3. ECO201 Principles of Macroeconomics (or equivalent)
  4. ECO202 Principles of Microeconomics (or equivalent)
  5. MAT210 Probability and Statistics (or equivalent)
  6. BSA351 Financial Reporting I (or equivalent)
  7. BSA352 - Financial Reporting II (or equivalent)
  8. BSA311 - Principles of Finance

3-2 Program Admission
Current RMC undergraduate students and undergraduate transfers to RMC are subject to a two-tiered admission process. Students are first admitted to the Accounting Program for the fourth year of study then, contingent upon sufficient academic progress, to the Master of Accountancy Program for the fifth year of study. The specific admission
requirements are:
• For admission to the Accounting Program, candidates must have completed 90 semester-hours of college-level credit with a cumulative GPA of 2.75, or above. The 90 earned credits must include: BSA201, BSA202, ECO201, ECO202, MAT210, BSA351, BSA352, and BSA311. The cumulative GPA for these eight courses must be 3.0, or above.
• Upon completing 124 college-level credits, candidates are eligible for formal admission to the Master of Accountancy Program. To be admitted, candidates must:
  1. Complete the GMAT Exam
  2. Be currently enrolled in the Accounting Program and be in good academic standing.

Course Sequence
Courses are taught on a four semester rotating cycle. Therefore, the program will take a minimum of four semesters to complete. Current RMC students will generally begin the program in the first semester of the senior year (see 3-2 admission above). The program is designed to avoid any sequencing problems, so a student may begin the program in any individual semester. The only prerequisite for any of the master’s level courses is BSA352 (Financial Reporting II).
Financial Assistance

Jessica Francischetti
Director of Financial Assistance

Students who intend to apply for financial assistance must be accepted for admission to Rocky Mountain College (see the "admissions" section of the catalog). If a student is applying for federal financial assistance, Rocky Mountain College will also need results from a completed Free Application for Federal Student Aid (FAFSA). With this form, the student's financial need and eligibility for the federal student financial aid programs and many Rocky Mountain College scholarships/grants are determined. The FAFSA is available online, or a paper FAFSA can be requested at the College's financial aid office. The preferred method for completing the FAFSA is online. The College will receive the results electronically when a student lists Rocky Mountain College as a college choice. Students who wish to be considered for federal financial assistance will need to complete the FAFSA each academic year that they attend Rocky Mountain College.

When a student's financial assistance eligibility has been determined, a financial assistance award notice will be mailed to new students. Returning students' award notices will be made available online. A postcard with instructions about accessing the online award will be mailed when the award is complete. All consumer information regarding the award is also available online.

Satisfactory Academic Progress

The federal government and Rocky Mountain College require students to maintain satisfactory academic progress toward a degree in order to continue receiving both federal and institutional financial aid. The following requirements are consistently applied to all students, full-time or part-time, who are receiving financial assistance:

1. Students must maintain a cumulative GPA of at least 1.75 until they have completed 26 credits, including transfer credits;
2. Students must maintain a cumulative GPA of at least 2.00 after completing 27 credits, including transfer credits.
Transfer students must also maintain a cumulative GPA of 2.00 in the credits attempted at Rocky Mountain College.
3. Students must complete at least 67 percent of all credits attempted, including transfer credits.

Grades of "I," "W," "P," "X," and "NP" are counted as courses attempted but not successfully completed and will be counted as such in the determination of completion ratios. If a student completed a class with a grade of "I" during a probationary semester, the actual grade will be registered, the student will receive credit for the course, and the grade will be factored into the qualitative component. It is up to the student to notify financial aid personnel of this change in order to re-examine the student's probationary status. Noncredit remedial courses are not considered when determining satisfactory academic progress. When a student repeats a course, the grade for the last course attempted will be used to compute the academic record.

Institutional and federal financial assistance is available to full-time students up to the number of semesters it would take to normally receive the degree they are seeking. If a student is in a four-year program, institutional aid will be granted for four years. Federal guidelines expect students to complete their degree objective within 150 percent of the published length of the educational program. For instance, a student enrolled in a bachelor's degree program requiring 124 semester credits in order to graduate could attempt up to 186 credits before federal student financial aid would be terminated. Transfer credits will be included in the overall number of attempted and completed credits.

Satisfactory academic progress is reviewed at the end of each semester, including summer terms. Students who fail to maintain satisfactory academic progress during the semester will be placed on financial aid probation for the next semester enrolled. Students on probation may receive all financial aid except for federal or Rocky Mountain College work-study aid for one semester and must meet the conditions of probation. Students who fail to meet the conditions of their financial aid probation will be suspended from further financial aid at Rocky Mountain College.

Suspensions from work-study may be appealed to the director of financial assistance within 15 days of notification of suspension. A written appeal must include an explanation of probationary status, a plan of action to meet the conditions of probation, and why working will not jeopardize that plan. A decision regarding the appeal will be sent by mail to the student in a timely manner. Any student who earns a GPA of 1.00 or less during any term, regardless of his or her cumulative GPA, will be placed on academic probation or may be suspended. If the student's cumulative GPA is at least a 2.00 after earning less than a 1.00 GPA during any term, the student will be put on financial aid probation. The student must meet satisfactory academic progress by completing at least 67% of credits attempted with at least a 2.00 GPA during the probationary semester in order to remove the financial aid probation. The student may be suspended from all financial aid if the conditions of probation are not met, regardless of that student's cumulative GPA.

Financial assistance suspensions may be appealed to the director of financial assistance within 15 days of notification of suspension. Generally, appeals will be granted for extraordinary circumstances beyond the student's ability to control, such as prolonged illness or injury or death of an immediate family member. The appeal must be in writing and be documented to the extent that proof exists. A decision regarding the appeal will be sent to the student in a timely manner.

Students on financial aid suspension may regain eligibility for financial assistance by re-establishing the required GPA.
and/or completion ratios using their own resources. A student who repeatedly violates the standards for satisfactory academic progress may be suspended from further financial aid eligibility at Rocky Mountain College without a probationary period. It is the responsibility of the student to notify financial aid personnel when he or she has re-established satisfactory academic progress.

If a student does not maintain a cumulative GPA of at least 2.00 after completing his or her second academic year at Rocky Mountain College (four semesters of attendance), the student will be suspended from all financial assistance without a probationary period until the cumulative GPA is at least 2.00.

Types of Financial Assistance
There are three types of financial assistance available to students attending Rocky Mountain College:

1. grants and scholarships
2. loans
3. work opportunities

Grants and Scholarships
Federal Pell Grant: Based on the demonstrated financial need of the student as determined by the federal government when a student submits the Free Application for Federal Student Aid (FAFSA).

Federal Supplemental Educational Opportunity Grant (FSEOG): Based on the demonstrated financial need of the student and awarded by the financial aid office as long as funds are available.

Federal Teacher Education Assistance for College and Higher Education (TEACH) Grant provides $4000 annual grants to students who plan to become teachers. Candidates must agree to serve as full time teachers at certain schools within certain high-need fields for at least four academic years within eight years of completing the course of study for which a grant was received. If a grant recipient does not meet that obligation, the TEACH grant funds received convert to a Direct unsubsidized loan (see below) that must be repaid with interest. A student must not only fill out a FAFSA but an agreement to serve as well. To qualify a student must have a grade point average of at least 3.25 or a qualifying score on admissions testing.

Institutional Grants and Scholarships: Rocky Mountain College provides institutional grants and scholarships from the College’s financial resources based on financial need and/or merit. A student is not required to apply for federal student assistance in order to be eligible for Rocky Mountain College financial assistance. The maximum institutional amount for which a student is eligible is awarded to the incoming student and is guaranteed to the student within institutional packaging policy requirements. The student must be making satisfactory academic progress toward his or her degree and must maintain a cumulative GPA of at least a 2.00 in order to keep academic scholarships. The complete awarding policy is located in the financial aid office.

Athletic Grants are available for football, men’s/women’s basketball, men’s/women’s alpine skiing, men’s/women’s cross country, women’s volleyball, men’s/women’s golf, mens/women’s soccer, and cheerleading. Awards are made by the office of financial assistance in consultation with each sport’s coach. Annual renewal of grants is determined by the coach.

Merit-Based Scholarships: These scholarships include but are not limited to:

- Trustee scholarship, Presidential scholarship, Deans scholarship: These scholarships are based on academic performance and on a calculated index based on an ACT/SAT score and high school GPA for incoming freshmen. Transfer students are awarded academic scholarships based on prior academic performance at their former school(s).
- Students are eligible for only one institutionally funded merit scholarship each year. Students falling below a cumulative GPA of 2.00 will lose their merit scholarship. Reinstatement of a merit scholarship is at the discretion of the office of financial assistance and is dependent upon the availability of institutional funds.

Other Grant and Scholarship Opportunities
Annually Funded and Endowed Scholarships: Rocky Mountain College funds students through the generosity of many donors. Students will be considered for these scholarships based on the information provided on their admissions application.

Scholarship Eligibility: Rocky Mountain College students obtaining their first baccalaureate degree who are in good academic standing and enrolled full-time are eligible for institutionally funded financial assistance for up to four years unless they are enrolled in a five-year program. Students enrolled in a master’s degree program are not eligible for institutionally funded financial assistance. Contact financial assistance personnel for complete policies and procedures regarding financial assistance.

Scholarships not administered by Rocky Mountain College provide many students with aid to attend college. In most cases the student must apply directly to the donor group. These grants must be reported to the office of financial assistance. Many Rocky Mountain College students have received help from such organizations as the Veterans Administration, Indian Health Service, Social Security Administration, fraternal organizations, service clubs, and
local and national churches.

**Loans**

The **Federal Perkins Loan** program is awarded to students who have a high unmet need after all grant aid is awarded. Because this is a federal program, the student must complete the Free Application for Federal Student Aid (FAFSA). This loan is granted to the student by Rocky Mountain College. A student accepting a federal Perkins loan will sign a promissory note and complete an online loan counseling session before classes start. Loan funds are limited so the federal Perkins loan is awarded to students on a first-come, first-served basis. Repayment of the loan and accumulation of the 5% interest does not begin until nine months after the student graduates, drops below half time or withdraws from college. Cancellation provisions exist for students performing certain types of volunteer work, teaching, military service, or law enforcement.

The **William D. Ford Direct** loan program provides low-interest loans to students in order to pay for their educational expenses. The Direct Loan program offers both subsidized and unsubsidized loans. Students must complete a Free Application for Federal Student Aid (FAFSA) in order to determine the type of student loan for which the student qualifies.

Subsidized Direct Loans are awarded on the basis of financial need as determined by the Free Application for Federal Student Aid (FAFSA) to students enrolled at least half time. No interest is charged while the student is in school, but interest will start accruing once the student goes into repayment or during periods of forbearance.

Unsubsidized Direct Loans are awarded to students who file the Free Application for Federal Student Aid (FAFSA). It is not necessary to demonstrate financial need to receive this loan. Awarded by Rocky Mountain College Financial Aid Office to students enrolled at least half time. Unlike the Subsidized Direct Loan, the Unsubsidized Direct Loan accrues interest while the student is in school.

Independent students and those dependent students whose parents have been denied a parent loan may be eligible to borrow additional unsubsidized Stafford loan amounts. The financial aid office determines eligibility for either of the above loans. The type of loan for which the student is eligible will be included with the financial aid award letter.

Federal regulations require all students borrowing a Direct Loan for the first time to participate in loan counseling before receiving the first disbursement of their loan. In order to borrow a Federal Direct Loan a student must also complete a Master Promissory Note (MPN). The MPN is a legal agreement to repay your loan to the U.S. Department of Education. Students do not need to fill out an MPN every year. Once an MPN is completed it the first year, it is good for ten years.

The **Direct Parent Loan (PLUS)** is also part of Direct Loan program. As the name states, the parent is the borrower. This loan is not based on need and all families are eligible to apply. The parent must be credit worthy or have a credit worthy endorser. The Free Application for Federal Student Aid (FAFSA) does need to be completed for this loan as well. The maximum amount available is determined by subtracting total financial assistance from the cost of attendance. The interest rate is fixed at 7.9%. Repayment begins 60 days after the loan is fully disbursed. For more information regarding this loan, please contact the financial aid office.

The **Grad PLUS** loan is available to graduate students. The student must be credit worthy or have a credit worthy endorser. The maximum amount available is determined by subtracting the total financial assistance from the cost of attendance. The interest rate is fixed at 7.9%, and repayment begins 60 days after the loan is fully disbursed. For more information, contact the office of financial assistance.

**Work Opportunities**

Work opportunities are available to qualified students in the form of work-study. Work-study will be awarded to eligible students as part of their financial aid package. Work-study is available in various areas on campus or with off-campus community service jobs such as reading and math tutors. Although every effort is made to provide students with work-study jobs, the College cannot guarantee a student will be able to earn the amount of money initially awarded. Job availability, funding issues, and class schedules can prevent a student from participating in work-study.

There are two types of work-study programs available.

1. The Federal College Work-Study program is a federally funded, need-based program. Students who complete a FAFSA and have need may be awarded federal work study.

2. The Rocky Mountain College Work-Study program also offers work-study to those students who do not apply for or qualify for federal assistance.

Off-campus employment is available throughout the Billings area. The career services office receives inquiries for all off campus job opportunities.
Tuition and Fees

The board of trustees of Rocky Mountain College reserves the right to change the fee schedule without prior notice. For the 2010-2011 academic year tuition and fee schedule, see the office of the chief financial officer.

Miscellaneous Fees

Housing Fees (per semester)

Widenhouse Hall
Single 1849.00
Double 1632.00
Triple 1413.00
Quad 1215.00

Anderson Hall
Large single 1591.00
Small single 1114.00
Double 1114.00
Triple 849.00

Jorgenson Hall
Apartment deposit 450.00

Cost differs for each unit. Refer to the housing office.

Rimview Hall
Private room (4-room suite) 1977.00
Forfeiture (residence hall contract penalty) 150.00

The above housing fees include a $10 per semester residence life fee.

Residence Board Meal Plans (per semester)
19 meals/week (the carte blanche meal plan) 1816.00
10 meals/week 1604.00
100 meals total 807.00
50 meals total 445.00

Insurance for athletics (per year) 160.00
Foreign student health and accident insurance (per semester) Varies
Private music fee (per semester hour) 200.00
P.E. activities (refer to course schedule)

Education Program Fees
Field practicum fee 52.00
Student teaching fee (K-12) 283.00
Student teaching fee (Elementary) 250.00
Student teaching fee (Secondary) 250.00

Equestrian Fees
Equestrian boarding deposit (per semester; paid against boarding fee)
Returning students 300.00
New students 500.00
Equestrian boarding fee (per semester) 2780.00
Equestrian summer boarding fee 1000.00

Aviation Lab Fees
Private Pilot Flight Lab AVS153 10200.00
Winter Survival AVS 243 60.00
Instrument Rating flight Lab AVS253 9200.00
Commercial Pilot Flight Lab I AVS272 4200.00
Commercial Pilot Flight Lab II AVS273 5200.00
Commercial Pilot Flight Lab III AVS274 6600.00
Altitude Chamber Training AVS 343 175.00
Certified Flight Instructor Flight Lab AVS361 (FAA part 141) 6000.00
Instrument Flight Instructor AVS362 (FAA part 141) 3300.00
Multi-Engine Flight Instructor AVS363 (FAA part 61) 8700.00
Certified Flight Instructor Flight Lab AVS371 (FAA part 61) 4200.00
Instrument Flight Instructor AVS372 (FAA part 61) 1600.00
Multi-Engine Flight Instructor AVS373 (FAA part 61) 2700.00
Multi-Engine rating Flight Lab AVS376 5900.00
Crew Resource Management with Lab AVS404 450.00
Air Transportation & Flight Operations AVS 405 50.00
Intercollegiate flight team 400.00

Cost per flight hour
Piper Archer III 130.00
Beechcraft Bonanza 170.00
Piper Seminole 220.00

In the event of a significant increase in the price of fuel, a fuel surcharge could be added to the cost of each hour of flight to reflect current prices.

Other Fees: Fees for supplies and services will be charged to the student as necessary in certain programs.

There are inherent risks involved in the athletic programs offered by the College. Students are required to carry extra secondary insurance coverage to participate and to sign a waiver indicating their understanding of the risk.

The student pays the equestrian boarding fee to Rocky Mountain College. A non-refundable student deposit paid by the student to Rocky Mountain College on or before July 1 guarantees stalls. The College requires full payment of the boarding fee within five days of the beginning of the semester. The boarding fee (per semester, per horse) is $2380.00 for a stall. The vet/farrier deposit is also required at the beginning of each semester. The equestrian stall schedule for each semester begins two days prior to registration for classes and ends the last day of finals week.
Physician Assistant Studies
Rocky Mountain College's regular fees apply to students in the physician assistant program except as noted below:

Master of Educational Leadership
Students can elect to pay the semester's tuition and fees in full at registration or may sign up for a payment plan through the College. Contact the student accounts representative at 406-657-1016 to enroll in the payment plan option. Financial aid is available to those who qualify. Call the financial aid office at 406-657-1031 for more information.

Payment Policies

Deposits
The admissions deposit (non-refundable) for all Rocky Mountain College students, including physician assistant students, is applied toward the student's account and is valid for the next academic year.

The residence hall deposit will be refunded within 60 days of termination of the housing contract, provided satisfactory evacuation conditions have been met.

Validation and Payment Terms
Validation is the process of paying tuition and fees and confirming enrollment at Rocky Mountain College. Validation occurs in the student accounts office before the beginning of each semester. All students must validate regardless of whether fees are paid by financial aid or scholarships. A late validation fee is assessed to students not validated by 5 p.m. on the validation deadline (see the academic calendar for dates and fee amounts). A student may attend classes only if he or she is validated.

The College offers two payment methods:
1. Full payment at time of validation.
2. Installment Payment Plan Agreement – The College will divide the semester’s tuition, fees, and room and board charges into four payments. The total balance due is determined by calculating the student's total charges for the semester less all approved financial aid funding for the semester. The first payment (25% of balance due), signed Payment Agreement Promissory Note, and required $35 payment agreement application fee is due in full at the time of validation.

Three subsequent monthly payments are due by the 10th day of each month. A $25 late fee will be charged to the student account each month payment is received after the due date. Failure to make monthly payments may result in declaring all remaining installments due and payable, as outlined in the terms and conditions of the payment agreement. If the student withdraws from school and the payment plan agreement is not paid in full, any refund due the student is applied first to the unpaid balance of the payment plan contract. Withdrawal from school does not void the contract.

Student Account Policies
No student is allowed to validate or attend classes if he or she currently has a balance due to the College, excluding the amount due Rocky Mountain College as it relates to the federal Perkins loan program.

It is the student's responsibility to remain current in payment of charges to his or her account.

The privilege of attending classes may be denied for failure to pay account balances or failure to make payments in accordance with the installment payment plan contract. A hold is placed on a student's transcripts with account balances due and removed only when the obligation is cleared. Rocky Mountain College will not release the transcript of anyone subject to such a hold.

Past due accounts can result in financial suspension and/or the account being turned over to a collection agency or attorney. The College reserves the right to add to the debt any collection and court costs subsequently associated with collection of the debt.

Return of Title IV Funds - Return of Institutional Funds
When a student withdraws before 60% of the semester elapses, the College must return to the Department of Education any unearned federal financial aid funds up to the unearned percentage of institutional charges for the portion of the period the student did not complete. Federal dollars which need to be returned will be applied in the following order: unsubsidized federal Stafford loan, subsidized federal Stafford loan, federal Perkins loan, federal PLUS loan, federal Pell grant, federal Supplemental Education Opportunity Grant, and Leveraging Educational Assistance Partnership program funds. The calculation of the return of these funds may result in the student owing a balance to either the College and/or the federal government.

If the student owes a balance to the College, the amount is due at the time of withdrawal. Arrangements for monthly payments may be set up if the student cannot pay the total amount. The student will not be able to validate his or her enrollment, attend future classes, or obtain transcripts or
diplomas until the balance is either paid in full or satisfactory payment arrangements have been made. If the student owes an overpayment to the Department of Education, the College will report the amount owed to the Department of Education through the National Student Loan Data System (NSLDS). The student will not be eligible for future federal financial aid funds until payment arrangements have been set up with the Department of Education or until the overpayment has been paid in full.

The withdrawal calculation for those students receiving institutional assistance or those receiving no assistance, who withdraw from the College before they have completed 60% of the term will be evaluated in the same manner as a student receiving federal financial aid.

Other Refunds after the "Add" Deadline
No financial adjustment is made for credit load reduction after the last day to add a course, unless the academic vice president has ordered the reduction.
Campus Life

Brad Nason, Vice President
Dean of Student Life

The primary responsibility of college students is academic achievement. However, the broadly educated citizen requires non-academic experiences also. Rocky Mountain College, through its co-curricular program, offers each student an opportunity for personal and social growth outside of the classroom.

The College recognizes the educational value of these co-curricular activities. Through them, the student may gain an understanding of fellow students, increase his or her desire to serve the world, and acquire the technique of living and working with others.

Cultural Opportunities
The cultural advantages of the Billings metropolitan area can make an important contribution to the student's educational progress. The Billings Symphony, the Symphony Chorale, and the Billings Studio Theatre (on campus) afford opportunities for participation by qualified students as well as an aesthetic appreciation gained by attending concerts and productions. The Alberta Bair Theater regularly presents nationally touring musicals and performances of classical and contemporary music and theater. The galleries at the Yellowstone Art Center and Western Heritage Center are open to students and provide a basis for the exploration and appreciation of Western art. The Audubon lecture series, special programs at other educational institutions, and varied presentations of civic-minded groups are among the finest in Montana.

Cultural Series
The cultural series events held on campus supplement the College's objectives as a church-related, liberal arts school concerned with the development of the student in every facet of his or her personality.

Students are encouraged to augment their formal instruction with a wide variety of programs, including chapel, concerts, lectures, and similar performances. Cultural events stimulate an appreciation of the role of aesthetic values and of moral and spiritual qualities in contemporary life. Speakers on campus include authorities in areas not included in the College's curriculum as well as those individuals especially qualified to speak on critical contemporary issues.

Student Activities
The Concert Band
The concert band is a combination wind ensemble and pep band. The wind ensemble rehearses and performs selected band literature; the pep band supports the athletic functions of the College.

The Concert Choir
The concert choir is the foundation of choral study at the college. Choristers rehearse daily, sing for church services, and present special programs. The choir tours annually.

The Jazz Ensemble
The jazz ensemble performs in a variety of big band styles. The ensemble tours annually.

Other Groups
Other performing groups such as the opera workshop, brass quintet, woodwind quintet, four-hand and eight-hand piano ensemble, and jazz quintet are often formed during the year to supplement the program.

Publications
The College newspaper, the Top of the Rock, is printed monthly, and staff membership is open to all interested students. Soliloquy, a collection of students' poetry, fiction, and artwork, is published each spring, and all students are invited to submit their work. A yearbook is published each spring by interested student staff membership (open to all).

Student Government
The Associated Students of Rocky Mountain College (ASRMC) consists of all students who register for six or more credit hours and such others as choose to pay the membership fee. ASRMC operates under a constitution available here or from the office of the vice president/dean for student life. The ASRMC governing council is the executive board of the associated students, duly elected and appointed in accordance with the ASRMC constitution. The executive committee consists of the president, vice president, financial administrator, and secretary. The student senate consists of 12 senators representing various campus constituencies. Three standing committees, appointed by the executive council, are responsible for social, cultural/political, and publication activities and events.

Theatre
Students perform as many as three mainstage shows per year, often using the 260-seat Billings Studio Theatre on campus. A number of student-directed plays are also performed in Losekamp Hall's Taylor Auditorium throughout the year.

Clubs and Organizations
Alpha Chapter, Pi Kappa Delta-National Honorary Forensics Fraternity
Rocky Mountain College's chapter, established in 1920, was the first Montana chapter.

Alpha Eta Rho National Aviation Fraternity
This fraternity provides students majoring in aviation an opportunity to become more knowledgeable about careers in aviation by sponsoring activities and programs of interest to the aviation student. Scholarships are available to members.

Ambassador's Club
The Ambassador's Club members assist the admissions office and represent the College to prospective students and their families.

American Indian Cultural Association (AICA)
AICA provides a social outlet to ease the transition into both the academic and social aspects of the College experience. The club strives for unity of purpose in promoting and preserving American Indian values, beliefs, and traditions.
American Indian Science and Engineering Society (AISES)
AISES is a private, nonprofit organization that nurtures the building of community by bridging science and technology with traditional native values. The society helps American Indian students with the academic, financial, and social challenges of college life.

Aviation Ambassadors
Students provide tours to prospective students, speak in schools, represent the Rocky Mountain College aviation program at state aviation conferences, and promote the program to the public.

BACCHUS
The Rocky Mountain college BACCHUS (Boosting Alcohol Consciousness Concerning the Health of University Students) focuses on alcohol abuse prevention and other student health and safety issues. Through education and activities designed to increase awareness of changing student health and safety issues, BACCHUS focuses on the development and promotion of positive lifestyles and decision-making skills.

Chemistry Club
The purpose of the chemistry club is to bring awareness of chemistry and science to the Rocky Mountain College and Billings communities. Members participate in on-campus activities (mole day activities, demonstrations, etc.) and in outreach activities with local school children. And we eat a lot of pizza. The chemistry club is open to all students at Rocky Mountain College, not just chemistry majors and minors.

Equestrian Club
This club enables members to become better horse people through events, live competition, horse shows, and fundraising activities to promote equestrian studies.

Geology Club
The purpose of the Geology Club is to learn about and enjoy geology outside of the formnal classroom setting. Members participate in field trips to places of geologic interest and enjoy other activities related to geology. Geology Club is open to all students, not just Geology majors and minors.

InterVarsity Christian Fellowship
The mission of this organization is to build a collegiate fellowship that will engage the campus in its ethnic diversity with the gospel of Jesus Christ and develop disciples who embody Biblical values.

Investing Club
Students assist in managing an endowment of approximately $200,000. This endowment was funded through the generous gift of a Rocky Mountain College alumnus. Students apply financial management concepts acquired in investing courses. These concepts include stock analysis and asset allocation. Proceeds from the endowment fund student scholarships.

Latter-Day Saint Student Association (LDSSA)
The goal of this club is to help all Latter-Day Saint college students stay closely affiliated with their church, succeed in their studies, and achieve a balanced life while on campus. LDSSA provides Latter-Day Saint students with meaningful activities which are consistent with church standards.

Music Club
Music club members receive an opportunity for professional development, learn about the privileges and responsibilities of the music education profession, and become acquainted with leaders in music education.

Newman Club
The Newman Club affords Catholic students an opportunity to get together for prayer and discussion. Mass and dinner is held once a month, usually at a faculty home. The club encourages students to become involved in community and church activities.

Non-Traditional Students Club
The goal of this club is to develop a community of students who have had other life experiences before returning to college. Members receive an opportunity to support one another via social activities and using their combined wisdom about the everyday demands on the nontraditional student. Non-trads meet regularly to plan activities and events to meet the interests of the group.

OISTERS
The Rocky Mountain College OISTERS (Organization of Interested Students Toward Environmentally Responsible Solutions) strives to raise environmental awareness on campus with activities throughout the year and special events on Earth Day. The club also coordinates a campus-wide recycling program. Open to anyone interested in environmental issues.

Intercollegiate Flight Team
The flight team gives students in the aviation program an opportunity to compete in the National Intercollegiate Flying Association regional and national flight meets with other collegiate aviation programs.

Residence Hall Association (RHA)
RHA serves to encourage the College's residents to voice concerns, suggestions, and feedback; get involved in decision making; govern themselves; create policies and programs to educate themselves about current issues; and help create a learning community within the residence halls.

Ski Club
The ski club provides a basis for students with similar ski interests to meet socially. It also teaches non-skiing students how to ski downhill and cross-country each academic year. The ski club familiarizes students with the role of skiing in tourism and recreation in Montana and the Northwest.

Sojourner Club
The Sojourner Club promotes intercultural understanding within the College and in the community. The club, composed of international and domestic students, sponsors various activities and events on campus that relate to international and intercultural issues.
Student Theater Association of Rocky (STARS)

STARS provides additional opportunities beyond mainstage shows to students interested in theater. In addition, it sponsors various events. STARS provides sound and entertainment for many campus events.

Student Alumni Association

The mission of the SAA is to nourish the relationship between current and future alumni. To that end, SAA strives to establish contact between the two groups by providing networking opportunities and utilizing alumni as on- and off-campus resources. The SAA also produces the College directory in conjunction with ASRMC.

Students in Free Enterprise (SIFE)

SIFE provides Rocky Mountain College students the opportunity to develop leadership, teamwork, and communication skills through learning, practicing, and teaching the principles of free enterprise. Members may attend a regional college competition and career fair to demonstrate their abilities.

If students are interested in becoming involved in any of these clubs or activities or want more information, contact Brad Nason, vice president/dean for student life, or the ASRMC office.

Campus Ministry

Rocky Mountain College is committed to the concept that faith development and academic achievement go hand-in-hand. To that end, the College – along with students, faculty, and staff – will strive to provide a variety of opportunities for people to study and grow. Throughout the College, the Christian spirit and Christian ideals are affirmed. Special emphasis is placed on the ministries of the three supporting denominations: the Presbyterian Church (USA), the United Methodist Church, and the United Church of Christ.

In collaboration with student leaders, faculty, and staff members, opportunities for worship, study and discussion groups, retreats, lectures, and community and international service are provided. Participation and leadership in all activities are open to everyone. Rocky Mountain College strives to provide an atmosphere in which students, faculty, and staff can grow in Christian discipleship, or can shape their own religious perspective and grow in personal and social awareness as well as service.

Support Services

As an institution grounded in the liberal arts, Rocky Mountain College is interested primarily in the development of the whole person. A caring, personal atmosphere fosters this development. Students are encouraged to seek the counsel of any faculty member, and special counseling services through the vice president/dean of student life office and services for academic success (SAS). Residence hall staff also provides support in educational, vocational, social, and personal matters.

Academic Advising

The primary purpose of the Academic Advising program is to assist students in the development of meaningful educational plans that lead to the successful completion of a degree and the development of an interest in lifelong learning. More information is available in the Rocky Mountain College Advising Manual.

Counseling Services

Rocky Mountain College counseling services are available to all students. The counseling center provides support for students experiencing personal, social, or adjustment difficulties. The campus counselors also sponsor special events and programming within the College community and provide referrals to community resources.

Career Services

The career services office provides assistance to students in career awareness and decision-making, career-educational planning, and job searching. In addition, the career services office maintains a current list of full and part-time jobs, internships, and seasonal work available to Rocky Mountain College students. Information is accessible from the career services website. Career services assists students in establishing credentials, developing resume-writing and interviewing skills, and making contact with employers.

Internships facilitated by career services provide students at the junior and senior level an opportunity to work off-campus for a qualified employer and earn college credit in their major or minor fields. Upon successful completion of the internship, students will have:

- applied theory to practical work situations;
- tested their aptitude and interest in a particular field;
- used skills in a work environment directly applicable to a career; and
- demonstrated characteristics of professionalism required in a specific career field.

An internship usually lasts a full semester (3.5 months), depending on the position. For every 45 hours worked during the internship, one semester hour is earned. General requirements for the internship program include the following:

- Students must have achieved at least a 2.00 cumulative GPA and achieved a 2.25 GPA within the major;
- Students are required by faculty to complete both an assignment that coincides with the internship experience, as well as an internship orientation;
- Students may register for up to 15 semester hours of internship credit with the approval of a faculty member; and
- Students must be registered for an internship by the first day of classes for the semester in which they will be interning.

The following is a guide for students to use to plan for the internship experience:

- Discuss the internship with an academic advisor and decide on an appropriate time to register for the internship.
- If the student plans to register for a fall internship, he or she should meet with career services by March 15 of the previous academic year. If the student plans to register for a spring or summer internship, he or she should meet with career services by October 15.
Some internship opportunities require extensive advance planning (one year or more in advance). It is the responsibility of the student to arrange for housing and transportation if the student plans to intern outside of Billings.

**Disability Services**

Rocky Mountain College is committed to assuring an equal educational opportunity for students with disabilities. The dean of students serves as the Section 504/ADA coordinator for the College. Undergraduate students should request accommodations through the services for academic success (SAS) office (657-1070).

Graduate students should request accommodations through the office of the dean of students (657-1018). These offices provide accommodations in accordance with Section 504 and ADA regulations to ensure that all courses, programs, services, and facilities are accessible to students with disabilities. Students are responsible for identifying themselves, providing documentation, and requesting reasonable accommodations. (For further details see the disability services section under "general policies.")

**Admissions Process**

There is no separate admissions process for students with disabilities. Students apply through the regular admissions process and must meet the College's admissions criteria.

**International Student and Scholar Services**

The office of international programs provides services for foreign students and scholars, including pre-departure information, orientation programs upon arrival, a resource handbook, initial academic advising, and assistance with employment and internships. The office also provides events and activities through which the culture of Montana can be explored.

**Student Health Service**

The College maintains a health service office in Fortin Center on a half-time basis under the direction of a nurse practitioner and consulting physician. Examinations, the diagnosis of minor illness, and the primary treatment of injuries are available to all students at no charge. Prior to enrollment, every student must submit a completed medical history form and provide documentation of two MMR inoculations.

The student must assume the cost of illness and injury requiring hospitalization or other referrals. The College is not responsible in the case of accidents incurred by students in pursuit of their work, on field trips, involved in athletics, or participating in any other student activity.

**Student Insurance**

All students are encouraged to carry personal health insurance. The College does not offer an institutional health policy; therefore, students should contact an independent insurance agent to secure health insurance coverage. A free brochure on college student health insurance is available in the student services office.

International students are required to have adequate medical/health insurance. After a student is admitted to the College, a packet describing minimum benefits will be provided.

**Services for Academic Success**

Services for academic success (SAS) is a federally funded TRIO program providing the skills and support needed for eligible students to successfully complete college. SAS provides a comprehensive support program tailored to meet a student's individual needs. Services are free to participants and include tutoring; academic, career, and personal counseling; supplemental instruction; cultural and academic enrichment opportunities; use of computer labs; graduate school counseling; and accommodations for students with physical and/or learning disabilities. SAS also offers developmental coursework in mathematics, writing, and study skills.

To be eligible for the program, participants must meet one of the following criteria:
1. a low-income threshold;
2. a first-generation college student (neither parent completed a baccalaureate degree);
3. a physical disability or a learning disability.

Participants must also be U.S. citizens and demonstrate an academic need for the program.

The program is located in the Fortin Education Center and is staffed by a director and four academic specialists. Enrollment is limited to 250 participants. To determine eligibility and/or apply, contact SAS at (406) 657-1070 and ask for an application form.

**Housing and Residence Life**

The office of housing and residence life serves to ensure that residence life facilities allow students to live in safe, comfortable surroundings that are conducive to the pursuit of academic excellence; develop programs which address students' cultural, emotional, intellectual, occupational, physical, social, and spiritual needs; integrate residence life with students' academic experiences and self-awareness; and encourage opportunities that permit students to interact with residents of different lifestyles and cultural backgrounds.

As a residential College, all first- and second-year students enrolled in nine semester hours or more are required to live on campus. This requirement is based upon long-term research that indicates greater success among on-campus students. Exceptions to this policy include married students, students 21 years of age or older on the first day of fall semester classes, or students living in the Billings area with their parents.

The above mentioned residency requirements imply a contractual agreement between the student and the College for the academic year, while school is in session. In addition, students living in College housing must participate in an approved board plan in order to promote healthy eating habits. There will be no financial adjustment for room changes after the sixth week of the semester.
Residence Halls
The Anderson-Widenhouse complex is comprised of two co-educational residence halls for freshman, joined by an annex. Rimview Hall residents must have at least sophomore status.

Applications for room reservations for new students are made through the office of admissions in connection with other admissions procedures. Assignments are made and further correspondence relating to room assignments are handled through the office of housing and residence life. Assignments are made in the order in which room deposits are received. Returning students make their room reservations in the spring of the year preceding occupancy, and new students are assigned in early summer with notification letters sent in July and August. The College reserves the right to change a student's room assignment.

Rooms are furnished with bunkable beds, mattresses, dressers, desks, closets, and chairs. Students furnish blankets, sheets, pillows, pillowcases, towels, rugs, and other personal items. In addition, a microwave and refrigerator are provided for Rimview and Widenhouse suites. Laundry facilities are available in each of the residence halls free of charge.

Apartments
Jorgenson Hall apartments offer an alternative to students eligible to live off campus. These apartments, typically 728 square feet, are unfurnished and include a living room, kitchen, bathroom, bedroom, and study area. Units are leased to an individual student, who in turn may share the costs with a roommate or live with his or her family. Leases are available through December 31, or June 30, of any year. Information about prices and applications are available at the office of housing and residence life.

Food Service
Several options are available for all members of the Rocky Mountain College community. The McDonald Commons is open from 6:30 a.m. to 10:00 p.m. Monday through Thursday, 6:30 a.m. to 7:00 p.m. Friday, and 9:00 a.m. to 12:30 p.m. and 5:00 p.m. to 6:00 p.m. Saturday, Sunday, and holidays when classes are in session. The Commons features hot entrees, soups, salads, bagels, cereals, sandwich bars, beverages, baked goods, and ice cream. The carte blanche meal plan (recommended) allows unlimited access to the Commons when it is open. The 10-meal plan allows the user any ten visits to the Commons each week. Students who live off-campus or in Jorgenson or Rimview may purchase a block of 50 or 100 meals to be used over the course of the year. To encourage healthy eating habits, Anderson and Widenhouse residents are required to purchase the carte blanche or the 10-meal plan. These plans are available through the office of housing and residence life.

In addition, the "munch money" program allows individuals to purchase a declining balance plan at a 10% discounted rate. "Munch money" can be used in the McDonald Commons or in the Sodexho Grill and can be purchased directly through the food service office.

Intramural and Outdoor Recreation
Rocky's intramural and outdoor recreation programs provide students with experiences that encourage the development of a healthy balance between physical and mental needs, both in the present and for a lifetime. The recreational experiences permit students to discover goals experientially while becoming more aware of themselves and their environment.

Outdoor Recreation Activities
The outdoor recreation program includes organized outings, a resource center, academic classes, seminars, and lectures. Among activities offered are skiing trips to Red Lodge and Big Sky; river rafting, kayaking, and canoeing on the Yellowstone River; and hiking in the Beartooth Mountains.

Intramural Athletics
The intramural athletics program offers both individual and team sport activities that include soccer, basketball, tennis, golf, racquetball, softball, and volleyball. Leisure and informal recreation such as open swimming, an indoor climbing wall, and kayak pool sessions are also offered.

Intercollegiate Athletics
Rocky Mountain College is a member of the National Association of Intercollegiate Athletics and the Frontier Conference. Rocky Mountain College's approximately 180 student athletes participate in eight varsity sports, including football, men's and women's basketball, volleyball, men's and women's ski racing, men's and women's golf, men's and women's cross country and men's and women's soccer. All student athletes are required to purchase insurance (see the "Tuition and Fees" section of the catalog). A primary goal of Rocky intercollegiate sports is to encourage success on the athletic field and in the classroom, carrying on the Rocky Mountain College tradition of the scholar-athlete.

General Policies
Rocky Mountain College does not discriminate on the basis of race, color, sex, religion, national origin, citizenship, age, disability or sexual orientation in admissions or its policies and/or programs, employment or other activities.

Harassment and Discrimination Policy
Members of the Rocky Mountain College community have the right to work and study in an environment free of harassment and discrimination. Rocky Mountain College strongly disapproves of and forbids the harassment of students. The College will not tolerate discrimination or harassment, which includes discrimination or harassment based on race, color, sex, religion, national origin, citizenship, age, disability, or sexual orientation.

Student claims of harassment and discrimination should be reported to the vice president of student life/dean of students or campus counselor, who will determine an appropriate course of action based on the nature of the claim, which may include filing a charge of harassment via the complaint resolution procedure outlined below.
Any student who has a question or concern that he or she is being or has been harassed or discriminated against should contact the vice president of student life (657-1018) or one of the liaisons listed below. The liaisons can help identify the types of behavior, verbal or physical, that constitute harassment and discrimination and will assist in determining an appropriate response to an alleged incident. For more information on what constitutes harassment, please refer to the “No Harassment Policy” located in the student handbook and on the College’s homepage under “current students/student tools”.

Students may contact one of the following College community members if they have questions or concerns about harassment and discrimination:
- Vice President for Student Life . . . . . . . . . . . . . 657-1018
- Campus Counselor . . . . . . . . . . . . . . . . . . . . . 657-1049
- Executive Director of Human Resources . . . . . . . 657-1160

Complaint Resolution Procedure
The following represents the procedure for resolving incidents where harassment or discrimination has been alleged.

Informal Resolution
In most instances, the College strives to resolve complaints informally. Students are encouraged to work with the liaisons mentioned above to accomplish this. As part of this process, individuals will be encouraged to contact the offending party directly if they are comfortable doing so. If, however, an individual is not comfortable talking to the offending party directly, the formal complaint procedure is available.

Formal Complaint
1. Students may bring formal complaints to the vice president for student life. Other investigative officers may be designated by the president of the College as needed.
2. The complainant may have another person present at discussions of the complaint.
3. After discussion with the vice president for student life or other designated officer, the complainant submits a signed petition describing the complaint and requesting a formal investigation. In some cases it may be appropriate for the designated officer to draft the petition.
4. The petition will be shown to the accused person, who may then file a written response within five working days. This response will in turn be shown to the complainant.
5. The proceedings described here are not those of a court of law and the participation of legal counsel is not permitted during these discussions.

The Complaint Process
The timetable set forth below is approximate. The investigative officer (ordinarily the vice president for student life) may, at his or her discretion, allow additional time for any of the steps noted.

1. Within three working days of receiving the written complaint, the vice president for student life will consult with the relevant parties, including the complainant and the accused, and others if appropriate, in order to ascertain the facts and views of both parties.
2. Within fourteen working days from the filing of the complaint the investigative officer will conduct an inquiry and prepare a report, in confidence, summarizing the relevant evidence.
3. When a complaint is brought, either the complainant, the accused, or the investigative officer (if other than the vice president for student life) may choose to refer the matter to be formally heard by the vice president for student life/or by a five-person panel appropriate to the position of the accused.
4. The report of the vice president for student life or panel will be sent to the complainant and to the accused. Within five working days thereafter, the complainant and the respondent may each submit a final statement to the vice president for student life concerning the report.
5. The vice president for student life or panel may at any point dismiss a complaint if it is found to be clearly without merit. The complainant may appeal this determination to the AVP.
6. Within five working days after the submission of any final statements from the complainant and the accused, the vice president for student life will decide whether a violation of this policy has occurred, and if so what the consequences shall be. These may range from reprimand, suspension or probation, to termination or expulsion.
7. If the accused individual is the investigative officer, or an administrator at the College, or if the president of the College believes it appropriate in any case, the College may employ an independent investigator. Such an independent investigator will report directly to the president of the College.
8. If the accused is the president of the College the matter shall be referred to an independent investigator and reported to a special committee of the board of trustees for final determination.

Appeals Related to Harassment or Discrimination
Following the disposition of a case, any student who is dissatisfied with the decision may appeal by submitting a statement to the AVP within 10 working days stating with specificity the reasons for his or her dissatisfaction. The AVP, within 30 days of submission of such a request, shall either affirm or overturn the decision.

Appeals will be based upon the record made before the AVP and will not constitute a rehearing of the evidence. The person accused will be given the opportunity to present oral argument on such review provided, however, that nothing in the foregoing will be construed to prevent the reviewing committee in its discretion from hearing newly discovered evidence. The written response of the AVP will constitute the final determination of the complaint.
Sanctions for harassment or discrimination will be appropriate to the nature and severity of the offense and will be consistent with relevant College policy guidelines. Sanctions may include, but are not limited to, an oral reprimand, a written reprimand, a warning added to the accused person’s file, or the suspension or expulsion of a student.

Protection of Rights
Both parties will be informed of the facts developed in the course of the investigation and will be promptly informed about the final outcome of the proceedings.

To the extent reasonably possible, all proceedings will be conducted in a way calculated to protect the confidentiality interests of both parties. Moreover, all reasonable action will be taken to ensure that the complainant and those testifying on behalf of either party will suffer no retaliation as a result of their actions.

In the event that the allegations are not substantiated, all reasonable steps will be taken to restore the accused if he or she may have been damaged by the proceedings. If a complainant is found to have been intentionally dishonest in making the allegations or to have made allegations maliciously, the complainant is subject to institutional discipline.

Sexual Harassment Policy
It is the policy of the College to provide a working, learning, and teaching environment free from unlawful harassment of any kind, including sexual harassment. Sexual harassment of any student, on or off campus, is prohibited and will not be tolerated. Retaliation against a person who reports or complains about harassment, or who participates in the investigation of a harassment complaint, is also prohibited.

The director of human resources will distribute copies of this policy to all current students and to all those who join the College community. A periodic notice will be sent to faculty, staff, and students to remind them of the policy. A copy of the policy will be distributed at new student orientation, and copies of the policy will be available at appropriate campus centers and offices. A “no harassment” policy notice will be posted in residence halls, instructional buildings, and administrative office areas.

Disability Documentation Requirements
Disability Services
The College offers a comprehensive program of individualized services to accommodate the needs of all undergraduate or graduate students with disabilities. Typical services may include advocacy, test taking accommodations, and tutoring.

The College provides a variety of services which allows disabled students access to all College programs. Classes and programs located in inaccessible areas will be relocated to accommodate individual needs. Academic support services include counseling, tutoring, note taking, testing, and general advocacy for all disabled students.

Students with disabilities are responsible for identifying themselves, providing appropriate documentation, and requesting reasonable accommodations. Diagnostic services are not available through the College.

Disability Documentation Requirements
The following documentation is needed to determine eligibility for modifications or accommodations:

- A detailed evaluation from a professional qualified to diagnose a disability. The evaluation should have been completed within the last three years.
- Evaluations from a licensed clinical psychologist, school psychologist, LD specialist, medical doctor, and/or neuropsychologist.
- For learning disabilities, evaluations which include test results, with composite and subtest scores, for intelligence, reading, math, written language, processing skills, and speech and language, when appropriate.
- Reports that state the disability as a diagnosis.
- Recommended, but not required: A current IEP or 504 Plan that states modifications and accommodations.

Policy and Procedures for Accommodations
1. All students must submit documentation of a disability to the appropriate office (SAS for undergraduate students or the dean of students for graduate students) and have it approved before any accommodations can be granted (see “documentation requirements”).
2. The documentation provided by the student must support the need for the academic adjustments or accommodations that the student requests.
3. Undergraduate students must meet with their SAS advisor at least three days prior to the date of the test for testing accommodations. The SAS advisor will fill out and sign a test taking accommodations form (“green sheet”). The student will take the form to the professor for instructions on the level of proctoring needed, how the test will be delivered to SAS, and how it will be returned to the professor.
4. SAS staff will reserve a testing room for the student and be responsible for the appropriate monitoring or proctoring.
5. For students needing extra time on tests, the standard is double time, unless documentation indicates that the student needs more time.
6. Failure to abide by these procedures may result in a loss of accommodations.
7. Graduate students should request these services through the dean of students.
Guidelines for Documentation of Attention Deficit Disorder
Both undergraduate and graduate students who seek support services from Rocky Mountain College on the basis of Attention Deficit Disorder are required to submit documentation to verify eligibility. Students with ADD are responsible for identifying themselves, providing appropriate documentation, and requesting reasonable accommodations. Diagnostic services are not available through Rocky Mountain College or the SAS program.

The following documentation is needed to determine eligibility for modifications or accommodations:

- A current ADD assessment, preferably within the last three years, with the exact DSM-IV diagnosis.
- The assessment must be from an individual qualified to diagnose ADD, such as a medical doctor. Diagnostic reports must include the name and title of the evaluator as well as the date(s) of testing.
- A list of the questionnaires, interviews and observations used to identify the ADD behaviors.
- A summary of information regarding the onset, longevity and severity of the symptoms.
- Medication history and current recommendations regarding medication.
- Recommendations for appropriate accommodations for the college setting (such as testing in a quiet place free from distractions).
- Information concerning co-morbidity.
- Recommended but not required: A complete psycho-educational evaluation, including test results with composite and subtest scores, for: intelligence, reading, math, written language, processing skills, and speech and language, when appropriate.

All documentation is confidential.

Undergraduates should submit documentation to:
Rocky Mountain College
Services for Academic Success
1511 Poly Drive
Billings, MT 59102

Graduate students should submit documentation to:
Rocky Mountain College
Dean of Students
1511 Poly Drive
Billings, MT 59102

Complaints concerning accommodations for disabilities follow the process outlined in the section "complaint resolution procedure" under "harassment and discrimination policy."

Immunization Policy
Entering students must present documentation of immunization as part of the enrollment process at Rocky Mountain College. Montana state law requires proof of two measles and rubella immunizations for all students unless born before Jan. 1, 1957. Prior to enrollment at Rocky Mountain College, prospective students must complete the immunization section of the health service form. If adequate documentation is not available, immunization must be performed at the Rocky Mountain College health service upon arrival.

Students with incomplete immunization records will not be allowed to register for classes.

Alcohol and Drug Policy
Rocky Mountain College believes the key to successful control of alcohol abuse lies in education, providing healthy alternatives, and supporting and promoting healthy lifestyles. To this end, the College is committed to providing students the most current information available regarding alcohol and alcohol use; developing and implementing alcohol-free social programming; and encouraging and supporting those students who choose to abstain from use.

Alcohol is not permitted in the College's residence halls. Further, the use or possession of illegal drugs and conduct deemed unlawful by the state or federal government is prohibited on campus.

Other Policies
Motor Vehicles
All motorized vehicles owned or operated by Rocky Mountain College students are subject to campus regulations.

Firearms and Weapons
Firearms and weapons are not permitted on campus.

Pets
Students may not bring or keep pets on campus.

Student Right to Know Act and Campus Information
The Department of Education (DOE) and federal regulations require all colleges and universities to make available to students, prospective students, faculty, and staff information regarding campus crime rates (Clery Act), freshmen retention and graduation rates (Student Right-to-Know Act), and athletics programs (Equity in Athletics). This information is available in the dean of students office.

Directory Information Policy
Directory information will be released upon inquiry unless a request to withhold this information is filed by the student in the office of student records by the last day to add a class each semester. Directory information includes name of student, local address, local phone, Rocky Mountain College e-mail address, hometown, class, major, dates of attendance, degree and date awarded, honors, and/or varsity sport participation.

Currently, registered students have the right to request that the College not release this information. Any student wishing to withhold directory information must inform the office of student records in writing. Students must submit a request to withhold information each semester they are enrolled. Students should be aware that a request to withhold information would preclude release of verifications of enrollment or graduation. More information about this policy is available from the office of student records.
Please notify the office of student records of any change of name (requires legal proof), address, and/or phone number either in person or via CampusPortal.

**Student Records**

Official academic records of students are kept only in the office of student records. The information is of three types: personal information supplied by the applicant; educational records, including records from previous institutions, including high school and/or colleges attended; and scholastic records as supplied by the student's college teachers.

Information pertaining to the student's scholastic records is kept in permanent records available only to the academic vice president, the student records director, and others with the student's written consent; and in an academic profile, which includes grades, semester and cumulative averages, and progress toward the completion of degree requirements. Particularly helpful at the time of registration, the latter records are available to the student and those serving as the student's academic advisors.

Other items (for example, copies of letters sent to students regarding academic and/or social disciplinary action) are placed in the student's personal file. This information is periodically destroyed after the student has left the College and when the files are sorted for storage.

Students have the right to request the privilege of looking at their files. However, the College reserves the right to delay access to a student's personal file for a period of up to 45 days in accordance with the provisions of the Buckley/Pell Amendment. Transcripts of records will be sent only upon the individual student's written request except where grades determine eligibility for a scholarship, which the student has accepted or for which the student has applied.

Final grades will be available on Campus Portal approximately one week after the end of each term. Students may request that grades be mailed to an address of their choice by notifying the office of student records before the beginning of finals week.

Rocky Mountain College has the responsibility and the authority to establish standards for scholarship, student conduct, and campus life. The policies which govern these standards recognize the College as part of the larger community bound by federal, state, and local legislation; as a unique academic enterprise, the College embraces regulations which are intended to create, preserve, and foster the freedom to learn.

**Academic Standards Committee and Student Appeals**

The academic standards committee is the body of original jurisdiction for student requests to be granted exceptions to the standard academic policies of the College. The academic standards committee has jurisdiction over all such matters unless specifically noted otherwise in this document (see waivers and substitutions of program requirements, academic standing, and academic integrity). Common examples of student requests appropriate to the academic standards committee involve exceptions to the general education requirements and other requirements for graduation, exceptions to the College's drop/add policy, and exceptions to the College's policy related to participation in graduation ceremonies.

Requests for exceptions must be submitted in writing to the office of student records. Most requests should be accompanied by a letter of support from the student’s academic advisor or an appropriate faculty member. Students should take steps to ensure that their requests reference specific policies to which they are seeking exceptions and specific desired remedies.

Decisions of the academic standards committee may be appealed to the academic vice president/provost. Any appeal must be submitted, in writing, within 10 days of receipt of the academic standards committee's decision.

In some cases, requests made of the academic standards committee may be referred to an appropriate faculty member and/or academic division chair for informal resolution. In such cases, students should provide documentation of the results of said attempts should they desire to reinstate their request with the committee.

**Judicial Council**

This council is comprised of four students appointed by ASRM and five faculty members elected by their colleagues. The council adjudicates matters of academic and due process on campus. The council or a subcommittee of the council may also act to assign consequences in cases where regulations of the College have been violated.

In the event that a violation of campus regulations occurs, students are guaranteed their right to due process and appeal. Students are reminded that the act of enrollment is interpreted as a contractual agreement to accept and abide by the regulations and disciplinary structures of the College.
Academic Information

Anthony Piltz
Academic Vice President/Provost

General Academic Information

Degrees
Rocky Mountain College offers two baccalaureate degrees—the bachelor of arts degree and the bachelor of science degree. Other degrees include the associate of arts degree, the master of accountancy, the master of physician assistant studies, and the master of educational leadership.

The Semester Plan
College credit is offered on a semester basis. Courses offered in the summer session meet more frequently and for a longer period of time at each meeting. Enrollment is always for a semester or a summer session except in the case of a special workshop.

Course Hours
In general, a course for one semester hour of credit meets for a 50-minute period once a week for the semester. For each class session, the student is expected to spend at least two hours in preparation. In studio, laboratory, or activity courses, at least two hours of attendance are required weekly for one semester hour of credit. In the case of seminars or independent study courses, less class attendance may be required and a proportionately larger amount of time spent in preparation. For regularly enrolled students, the usual class load is 15 to 16 semester hours per semester.

Levels of Courses
It is recommended that students take courses at the level of their class standing (freshman 100-level, sophomore 200 level, junior 300-level, senior 400-level) provided that specific prerequisites have been met. Taking a course two levels or more above or below the level of class standing is not permitted, except with the approval of the instructor. All courses are further classified as either lower-division, upper-division, or graduate-level. The former are courses numbered 100 to 299; upper-division courses are those numbered 300 to 499. Courses numbered 500 to 699 are graduate level. A minimum of 40 semester hours must be completed in upper-division courses, at least twelve of which must be in the student’s major. If a student chooses a minor, six upper-division credits must be completed in the minor.

Rocky Freshman Experience (RFE)
The concept of the Rocky Freshman Experience (RFE) grew from research compiled by Rocky Mountain College professors Dr. Ron Cochran and Dr. Jay Cassel, who concluded that Rocky Mountain College students who associated with small groups enjoyed more academic and social success during their first year of college than those who did not. These findings suggested that small learning communities would benefit incoming freshmen. As a result, the RFE was established and is required of all new freshmen. Incoming freshmen choose from a variety of RFE groups ranging from six to eight semester hours and typically limited to around 20 students per RFE group. The discipline-specific courses from which students may choose often fulfill a general education requirement.

Faculty teaching the courses within each RFE group develop their classes together and attend each other’s courses. Students meet with their cohorts for both classes, which are frequently scheduled back-to-back, allowing flexibility for shared activities.

The primary RFE goals are to challenge students to think across disciplines, to use the liberal arts as a catalyst for improving writing, to create a sense of academic community, to engage in classroom activities that encourage collaboration in small groups, and to be exposed to campus policies and resources. In addition to the RFE, freshmen are required to attend an orientation seminar called Campus Compass designed to assist new students in adjusting to college. These seminars are taught by a variety of staff members, thereby providing freshmen access to student service personnel and exposure to college policies and resources.

Regular Courses
All regular course offerings are listed in this catalog. Courses cross-listed at a lower-division and upper-division level may be taken only once for credit unless otherwise noted.

The course schedule is available on CampusPortal and in the office of student records. Courses for which there is small demand are typically offered alternate years or on demand. A course designated as on demand will be offered when there is sufficient number of students requesting the course, usually five or more, and if suitable arrangements can be made. Students should plan their schedules carefully with their advisors to take required courses when they are offered. The course schedule is subject to change.

Special Courses
Guidelines: Special courses use the following workload standards for a credit: 45 hours of student time for each semester hour; or completion of certain prescribed amounts of work or readings, determined at the beginning of the course.

The faculty member in charge is responsible for evaluating the student through oral or written tests, through the presentation of a paper or completed project, or by any other sound means of evaluation.

All special courses are to be taken seriously as academic courses based on advanced planning. They are to be completed by the end of the semester or term when they are started, just as regular classes. Incomplete grades will be given only under unusual circumstances and with the instructor’s consent. See “grades” under “academic policies” in the “academics” section of this catalog.

Note: Under special circumstances a student may take a regular course by arrangement with a member of the faculty if the student is legitimately unable to attend the regular class sessions and has the instructor’s approval. In this case the student should enroll in the course under its regular number, not under directed reading or any other special course number. The guidelines for special courses, however, must be followed when regular courses are taken by arrangement.
Special Topics 180, 280, 380, 480, 580, 680
Faculty members may arrange, with the approval of the academic vice president, to offer under a special topics number courses not regularly listed in the catalog.

Independent Study 299
Offered to freshmen or sophomores only by initiation of a faculty member and approval of the academic vice president. Its purpose is to allow work outside of the regularly offered course schedule in exceptional circumstances.

Field Practicum 291, 391
All programs may offer a field practicum for 1 to 3 semester hours, with the possibility of being repeated up to a total of 12 semester hours. There must be a faculty evaluation of the student’s performance, with a statement of the evaluation to be kept with the student’s records. Practicum courses are graded on a pass/no pass basis.

Directed Reading 399
Directed reading courses are authorized for each program, to be offered at the discretion of the instructor and subject to the approval of the academic vice president. Each professor offering directed reading is responsible for providing a reading list or series of study questions, or a syllabus to the student, so the course is indeed directed reading, not just reading. This course may be taken for 1 to 3 semester hours.

Internship 450:
An internship offers a learning experience in a workplace setting for juniors and seniors in any major. To be eligible for an internship, a student must have a cumulative GPA of at least 2.00 and a major GPA of at least 2.25. All internship credits required by a major may be completed for a letter grade; additional internship credits up to a total of 12 may be completed on a pass/fail basis and applied toward a degree. Internships should be related to the student’s major or minor area of study and are arranged among a faculty member, the student, and an employer with assistance from the career services office. In majors that do not require an internship, a maximum of 3 credits of internship may be completed for a letter grade; additional internship credits up to a total of 12 may be completed on a pass/fail basis and applied toward a degree. A completed internship learning contract is required prior to registration. Contracts and more information about internship requirements are available from the career services office.

Seminar 490, 590, 690
Many academic programs offer a seminar as a capstone course carrying two to three semester hours of upper-division credit. Admission is restricted to juniors and seniors or master program students.

Independent Study 499, 599, 699
The purpose of Independent Study 499 is to allow a superior student to devise and pursue independent study in an area agreed upon in consultation with a faculty member who will supervise the study, subject to approval of the academic vice president. In order to qualify for such study, a student must 1) major or minor in the program, 2) be a junior or a senior or master program student, and 3) carry a GPA of at least 3.00. Each independent study is 1 to 3 semester hours.

Nontraditional Credit
Recognizing that valuable learning often takes place outside the classroom, the College offers the opportunity to obtain academic credit for nontraditional learning experiences within certain guidelines. Nontraditional credits are not accepted in transfer from another institution and may apply to no more than 31 semester hours for a baccalaureate degree or 15 semester hours for an associate’s degree.

Nontraditional credit is posted on the transcript after successful completion of one semester of full-time enrollment. Students may apply for non-traditional credit up to the end of their second term of attendance at Rocky Mountain College for work completed prior to enrolling at the college. Applications after the second term of attendance will not be accepted; non-traditional credit will not be granted for work done while enrolled at Rocky.

Non-traditional credits granted are indicated on student transcripts with a grade of “P.” There is a $40/credit transcripting fee. In all cases of nontraditional credit, it is the responsibility of the student to provide sufficient evidence to clearly show that he or she has earned the credit. For further information concerning the application process for non-traditional credit, including guidelines for the specific materials that need to be submitted for each type of non-traditional credit, and associated fees, contact the office of student records (657-1030). Details about the types of non-traditional credit that can be earned at Rocky Mountain College follow.

Challenge of a Course
Students may challenge courses not previously taken. Approval of the faculty in the discipline and the academic vice president must be obtained, and written notification of successful challenge must be filed with the office of student records. A challenge of a course involves a process whereby faculty members can effectively evaluate the student’s knowledge and skills in the content area. Examples of methods faculty may use to evaluate a challenge include exams, having the student write a paper or give a presentation, and/or having the student demonstrate skills in relevant activities.

CLEP and DANTES
Rocky Mountain College recognizes, for college credit, successful completion of one or more of the general examinations or subject examinations of the College-Level Examination Program (CLEP). Credit may also be earned through the Defense Activity for Traditional Educational Support (DANTES) program. Any CLEP or DANTES examinations for credit must be completed by the end of the second semester of enrollment at Rocky Mountain College. More information is available at the student records office (657-1030).
Credit for Military Experience and Training (non ROTC course work)
Credit is evaluated based on the American Council on Education (ACE) recommendations for credit for military experience. Students should submit their information to ACE for evaluation. Once the ACE evaluation is returned, it should be brought to the office of student records who will then evaluate the ACE recommendations and make determinations about which credits will transfer to Rocky Mountain College and how those credits will count toward graduation requirements.

Credit for Advanced Learning in High School
College credit is awarded for advanced work in high school through the advanced placement test of the College Entrance Examination Board and International Baccalaureate diplomas.

Advanced Placement Program
In order for credit to be granted by Rocky Mountain College, the institution must have a copy of the student’s score sheet sent directly from the College Board advanced placement program. Use 4660 as the Rocky Mountain College code.

Rocky Mountain College uses the American Council on Education (ACE) guidelines for determining the minimum score requirements for college credit on each AP exam.

Although Rocky Mountain College accepts the ACE recommendation for minimum scores (which, for most subjects, is a 3), students often struggle in higher level courses at Rocky if they do not achieve at least a score of 4 on the AP exam. Academic advisors may advise students to take the Rocky Mountain College equivalent course even though they have already received credit through AP. Students are only encouraged, not required, to take this advice.

International Baccalaureate Program
Rocky Mountain College recognizes the standards set by the International Baccalaureate program for awarding college credit. For more information about the program, link here. Contact the student records office (657-1030) for more information on how IB credits transfer to Rocky Mountain College.

Credit for Prior Learning
This category of non-traditional credit is only appropriate under restricted and unusual circumstances; it applies to situations where students can document college-level learning in disciplines for which there is no corresponding course to challenge at Rocky Mountain College or any appropriate external examination, such as CLEP or DANTES.

Evidence is presented in the form of a portfolio and typically includes performance tests, essay examinations, and samples of student work. Interviews with faculty or outside experts may also be appropriate.

There is a fee of $200 for the development and evaluation of the portfolio. Credits granted are subject to a $39/credit transcripting fee. Students wishing to pursue this option should consult with the office of student records (657-1030) to begin the process.

Waivers and Substitutions of Program Requirements
In exceptional circumstances specific program requirements may be waived or substituted. If the requested waiver or substitution pertains to requirements of a student’s major or minor area of study, an exception to the stated requirements may be granted at the discretion of the faculty in the relevant discipline subject to the approval of the Academic Vice President. Waivers or substitutions related to the general education requirements are, like other exceptions to stated academic policy beyond those already noted, the purview of the academic standards committee (see academic standards committee and student appeals elsewhere in this catalog).

A waiver or substitution may be granted, for example, if a student unexpectedly does not have the opportunity to meet a program requirement because of an unavoidable conflict or because of a course cancellation. Substitutions are preferred over waivers so that the student will have an opportunity to learn most or all of the material by taking another course or combination of courses. When waivers or substitutions are approved, the student must still meet the minimum credit requirement for the major or minor – the student may need to take additional elective courses in the discipline. Students are not awarded credit for waivers. Waivers and substitutions are not appropriate in cases in which a student believes he or she has already learned the material necessary for the requirement. In such cases, the student should challenge the course (see “challenge of a course” in the non-traditional credit).

Cancellation of Courses
The College reserves the right to cancel any course at any time. Courses are sometimes cancelled if enrollment is low: when enrollment is not at least six for fall or spring semester courses, or at least four for summer session courses.

International Learning Experiences
Study, Intern, Work, or Volunteer Abroad
The office of international programs helps students choose an international experience that best enhances their educational and career goals. Students may choose from semester or year-long exchange programs, short-term faculty-led programs, and courses in which students study on campus for the majority of the semester and travel abroad to culminate the experience. With good planning, an international experience will not delay graduation. The office of international programs also assists students to find internships, work, or volunteer opportunities abroad.

- Guangxi Normal University, China

Academic Policies
Family Educational Rights and Privacy Act
The Family Educational Rights and Privacy Act (FERPA) (20U.S.C. 1232g; 34 CFR Part 99) protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the US Department of Education.

FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level. Further information can be found here. Schools may disclose, without consent, "directory" information such as a student's name, address, telephone number, date and place of birth, honors and awards, and dates of attendance unless a student requests a "directory hold."

Rocky Mountain College asks that each student fill out a FERPA form indicating a waiver of his or her right, so that staff and faculty can speak to parents or other individuals that the student identifies on the form. A student also has the right to indicate that he or she does not waive these FERPA rights and thus does not give permission for staff and faculty to share academic information. FERPA waiver forms are available in the office of student records.

Attendance
Students are expected to be in class regularly and promptly. They are responsible for all assignments, including but not limited to written papers, quizzes, class tests, midterm tests, and/or final examinations, even when ill or representing Rocky Mountain College officially in extracurricular activities such as sporting events.

After warning students who have excessive absences (in writing) and notifying the academic vice president of this warning, instructors may drop such students from courses with grades of "F" by notifying the office of student records. The academic vice president may, by written notice, place such students on a "no-cut" basis in some classes or in all classes. If, after this notice is given, students are absent from class without adequate reason, the academic vice president may dismiss such students from the College. In the event students are dismissed under the terms of this paragraph, a grade of "F" will be recorded in each course for which the students are registered.

Examinations
Final examinations are given at the close of each semester. No change in the stated schedule may be made, except by the academic vice president.

Faculty members shall report the final grade for each student missing a final examination as "F" unless the academic vice president has excused this absence.

Requesting a Change in the Final Examination Schedule
Students may request exceptions to the published final exam schedule in cases where adherence to the published schedule would cause undue academic hardship. For example, a student may request the rescheduling of a final exam when the published schedule would require the student to take more than two final examinations on a single day. Since the final examination schedule is published well in advance, exceptions related to personal/travel reasons will not be granted.

Requests for exceptions to the published schedule are initiated through the office of the academic vice president/provost, and an official request form may be obtained therefrom. Requests will be granted only upon the approval of the academic vice president and the course instructor. Completed forms indicating instructor approval must be returned to the office of the academic vice president/provost prior to the earlier of the scheduled examination time or the requested alternate examination time.

Dead Week
With the exception of performance and laboratory examinations, no examinations may be scheduled during the final academic week of classes. The academic vice president must approve any exceptions.

Course Load
A normal load is considered to be 15 to 16 semester hours. Students in good academic standing may register for up to a total of 19 semester hours with the approval of their primary academic advisor. The advisor and the academic vice president must approve all other overload registrations. For each semester hour over 19, a student is charged an overload fee.

Note: A student must average 15.5 semester hours for eight semesters to complete the required minimum of 124 semester hours.

Part-time Enrollment
Once a student has enrolled at Rocky Mountain College, all coursework in the major or to be applied to the degree and/or certificate must be done in residence at Rocky Mountain College. If coursework is to be done at another university or college, prior approval should be obtained from the director of advising. Courses submitted in transfer must have a grade of "C" or better.

Addition of a Course or Change of Section
Necessary registration changes, such as a change in a course or section, may be made within two weeks of the beginning of the fall or spring terms. Students may not earn credit in any course for which they have failed to register.
Academic Information

Withdrawal from a Course
A student may withdraw from a course with a grade of "W" up to and including the last day to drop a class as published in the academic calendar. An exception to this date occurs for classes that only meet for part of the semester. For these classes, the student may withdraw from the course with a grade of "W" up to and including the day of the 50% point in the course. After that day a student who withdraws from a course shall receive a grade of "F" in that course. (Students who officially withdraw from the College are not subject to this regulation.) It is required that both the student's advisor and the instructor concerned initial the withdrawal form obtained from the office of student records. Failure to withdraw in the official manner will result in a grade of "F." No withdrawal is official until the proper form has been filed in the office of student records.

Withdrawal from College
Students contemplating withdrawing from the College must meet with the vice president/dean of student life (or the director of degree completion, if applicable) to discuss the academic and financial implications associated with withdrawing from the College before the end of a semester. The office of the vice president/dean of student life is located in the Bair Family Student Center. Office hours are 8:00 a.m. to 5:00 p.m. Monday through Friday. Failure to withdraw in the official manner will result in a grade of "F" for each course.

The official withdrawal date will be the date the student notifies the vice president/dean of student life (or the director of degree completion, if applicable) of his or her intent to withdraw. If the student provides official notification of withdrawal to the College by sending a letter to the designated office stating his or her intention to withdraw, the official withdrawal date is the date the College receives the letter. The College has the option of using a later date if it has evidence of attendance by the student at an academically related activity after that date. An academically related activity includes, but is not limited to, a lecture, a lab, an exam, a tutorial, academic counseling, turning in a class assignment, or attending a study group assigned by the institution.

If a student leaves without official notification, the College will attempt to determine a last day of attendance. Although not required to take attendance, many faculty members do take attendance, thus allowing the College to document an academically related activity. If a last day of attendance cannot be identified, the College can verify the student attended at least one class during the semester, the 50% midpoint of the semester will be used as the withdrawal date. Rocky Mountain College does not have a leave of absence policy.

Grade Points and Grade Point Average
In order to determine students' scholastic averages, grades points are awarded for each hour of credit as follows: "A" – 4 points; "B" – 3 points; "C" – 2 points; "D" – 1 point; "F" – 0 points. Grades of "I," "P," and "W" are not used in calculation of the grade point average (GPA). A plus (+) or minus (-) does not change the value of the grade for calculation of the GPA.

GPA is determined by dividing the number of earned grade points by the number of attempted credit hours. The GPA is used in determining academic probation and suspension, eligibility for intercollegiate athletics, determining scholastic honors, and granting of degrees.

GPA is understood to mean cumulative GPA unless indicated for one semester. Grade point average for all uses in the college shall be based on all courses accepted in transfer and all courses attempted at Rocky Mountain College. When a student repeats a course, the most recent grade will count toward GPA calculation.

Course Grades
Grades in courses are recorded as follows: "A" – outstanding; "B" – above average; "C" – average; "D" – below average; "P" – pass; "NP" – no pass; "F" – unsatisfactory; "I" – incomplete; "X" – no grade received from the instructor, and "W" – withdrawn. All grades except "I" and "X" become a matter of permanent record.

The "I" grade is given only under unusual circumstances and with the instructor's consent. The instructor must file a completed "request for grade of incomplete" form in the office of student records before the assignment of a grade as "I." An "I" must be made up within one year. After one year it will be permanently recorded as an "F."

Courses may be repeated, however, the original grade is not removed from the permanent record, but is removed from the GPA calculation. The most recent grade becomes the permanent grade.

Grades not received from faculty by 10 days after the grade due date will be recorded as "F." Grades submitted to the office of student records are final and may not be changed except upon request of the instructor. No grade change can be made more than one year after the end of the semester in which the course was taken.

If a student believes that their grade is incorrect, the student should first discuss the matter with the instructor. The student has the right to appeal their case to the academic standards committee in care of the vice president for enrollment services if talking to the faculty member does not resolve the issue.

Pass/No Pass Grading Option
Junior and senior students may elect to take one course on a pass/no pass basis each semester of their last two years in residence at Rocky Mountain College. The student must indicate (to the office of student records) a decision to enter a course on a pass/no pass basis within two weeks of the beginning of the semester. Faculty will turn in letter grades to the office of student records. To receive a grade of "Pass" in this context, the student must achieve a grade of "C" or better. Students are warned that many graduate and professional schools equate a grade of "P" with a grade of "C" in determining admission to the school.
The following courses are graded on a pass/no pass basis only: COM247/447, IDS220, music recital courses (MUS020, MUS030, MUS040), varsity sports (PEH100), physical education activity courses (PAC), THR291, all practicum courses. All other courses will be graded on the regular basis (“A”, “B”, “C”, “D”, “F”), unless noted. The academic vice president must approve any exceptions. A grade of pass/no pass is not used in computing GPA.

Report of Grades
Mid-semester grade reports are progress reports and thus provide students with excellent opportunities to consult with instructors and advisors about problems they may be having. Mid-semester grade reports are available on Campus Portal after mid-term break. These grades are not recorded on transcripts. Only final grades are recorded on transcripts in the office of student records.

Final grades are available on Campus Portal approximately one week after the end of the term. Students may request that grades be mailed to an address of their choice by notifying the office of student records before the beginning of finals week. Grades are mailed by request only.

Dean’s List
Students who carry a full load (12 or more semester hours) of work graded with grade points and who earn a GPA of 3.60 or higher for the semester are placed on the Dean’s List. Those with a GPA of 4.00 for the semester are recognized with high honors.

Only students who complete all credits attempted for the semester are eligible for these lists.

Graduation with Honors
Honors at graduation are designated for associate of arts, bachelor of arts, and bachelor of science degrees as follows: summa cum laude, GPA 3.80 or above; magna cum laude, GPA 3.60-3.79; cum laude, GPA 3.40-3.59. An honors designation is not calculated for those earning the master's degree.

The grade point average for graduation with honors is computed on the basis of all courses attempted, both at Rocky Mountain College and at any other college. The GPA for all work taken at Rocky Mountain College must be above the level for the honor awarded.

Honors listed in the graduation program are calculated through the December prior to graduation ceremonies. Honors at the point of graduation will be noted on both the diploma and on the student's transcript.

Application for Graduation
All students intending to graduate in May during the current academic year must file an application for graduation by October 31. There is a $100 graduation application fee. Applications received after October 31 and on or before February 15 will incur an additional late graduation application fee of $25. All students filing an application for graduation will not be allowed to participate in the graduation ceremony.

All students intending to graduate in December must file an application for graduation by April 30 of the previous academic year ($100 fee). Applications received after April 30 and on or before August 15 will incur a late graduation fee ($25). Graduation ceremonies for the academic year are in May.

Students will be permitted to participate in graduation ceremonies under the following conditions:

• Applications must be received by the respective deadline. See above for timeline.
• All coursework must be scheduled for completion by the end of the last term of enrollment. Students applying for spring graduation may complete a maximum of six credits in the summer term if a plan and enrollment documentation is submitted to the student records office by March 1.
• Student accounts must be in good standing by April 1.

Transcripts
Transcripts are available upon the student's written request to the office of student records. Each official transcript costs $7.00, which must be paid before transcripts will be issued.

No transcripts will be issued within two weeks of commencement. Transcripts will not be issued for students who are not in good financial standing with the College.

Diplomas
Official diplomas are awarded upon completion of all degree requirements at Rocky Mountain College. Individuals who wish to order replacement copies of previously awarded diplomas may do so by submitting a written, signed request to the office of student records. A replacement fee of $35.00 is required along with the request.

Replacement diplomas will reflect the date in which the degree was awarded, however, it will include the signatures of current officers of the College.
Academic Information

Academic Standing: Probation and Suspension
Students at Rocky Mountain College are expected to make progress toward attaining their degree. The criteria for good academic standing are as follows:

<table>
<thead>
<tr>
<th>If ...</th>
<th>Then ...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Semester GPA 1.00 - 1.75 and ≤ 26 credits completed</td>
<td>Academic Probation for next semester (P)</td>
</tr>
<tr>
<td>Semester GPA &lt; 1.00 and cumulative GPA is &lt; 2.00</td>
<td>Academic Suspension for next semester (S)</td>
</tr>
<tr>
<td>Semester GPA &lt; 1.00 and cumulative GPA is ≥ 2.00</td>
<td>Academic Probation for next semester (P)</td>
</tr>
<tr>
<td>Cumulative GPA between 1.00 and 2.00 and more than 27 credits completed</td>
<td>Academic Probation for next semester (P)</td>
</tr>
<tr>
<td>Cumulative GPA &lt; 2.00 27+ credits completed</td>
<td>Academic Probation for next semester (P)</td>
</tr>
<tr>
<td>Semester GPA 0.00</td>
<td>Academic Suspension for next semester (S)</td>
</tr>
<tr>
<td>While on Probation and semester GPA ≥ 2.00 and cumulative GPA &lt; 2.00</td>
<td>Academic Probation continues for next semester (P)</td>
</tr>
<tr>
<td>While on Probation and semester ≤ 2.00 and cumulative GPA &lt; 2.00</td>
<td>Academic Suspension for next semester (S)</td>
</tr>
</tbody>
</table>

Note: Each major has a minimum cumulative GPA required for graduation. Check with your academic advisor.

A student may appeal an academic suspension by indicating in writing the reasons why he or she did not make satisfactory academic progress, submitting a letter of support from a faculty member or academic advisor and submitting a plan for improvement. The appeal must be made within 15 days of notification of suspension and directed to the office of student records. The office of student records will forward the appeal to the academic progress committee for review.

Students on probation must follow specific steps to remove probationary status. These include enrolling for no more than 13 credits, meeting weekly with his or her academic advisor and seeking assistance from other resources.

Academic Dismissal
If a student is suspended a second time, the student is dismissed with no further opportunity to enroll at Rocky Mountain College. Probation, suspension, and dismissal are permanently recorded on the student’s transcript.

Academic Integrity
Academic integrity at Rocky Mountain College is based on a respect for individual achievement that lies at the heart of academic culture. Every faculty member and student belongs to a community of learners where academic integrity is a fundamental commitment. This statement broadly describes principles of student academic conduct supported by all academic programs. It is the responsibility of every member of the academic community to be familiar with these policies.

Basic Standards of Academic Integrity
A student's registration at Rocky Mountain College implies agreement with and requires adherence to the College's standards of academic integrity. These standards cannot be listed exhaustively; however, the following examples represent some types of behavior that violate the basic standards of academic integrity and which are, therefore, unacceptable:

1. Cheating: using unauthorized notes, study aids, or information on an examination; altering a graded work after it has been returned, then submitting the work for re-grading; allowing another person to do one's work and submitting work under one's own name; submitting identical or similar papers for credit in more than one course without prior permission from the course instructors.

2. Plagiarism: submitting material that in part or whole is not entirely one's own work without attributing those same portions to their correct source; not properly attributing words or ideas to a source even if not quoting directly; quoting from another author's writing without citing that author's work, including material taken from the World Wide Web, books, and/or papers; citing, with quotation marks, portions of another author's work but using more of that work without proper attribution; taking a paper, in whole or part, from a site on the Web or a "library" of already-written papers, copying work from another student.

3. Fabrication: falsifying or inventing any information, data or citation; presenting data that were not gathered in accordance with standard guidelines defining the appropriate methods for collecting or generating data and failing to include an accurate account of the method by which the data were gathered or collected.

4. Obtaining an unfair advantage: (a) stealing, reproducing, circulating or otherwise gaining access to examination materials prior to the time authorized by the instructor;
(b) stealing, destroying, defacing or concealing library materials with the purpose of depriving others of their use; (c) unauthorized collaboration on an academic assignment; (d) retaining, possessing, using or circulating previously given examination materials, where those materials clearly indicate that they are to be returned to the instructor at the conclusion of the examination; (e) intentionally obstructing or interfering with another student's academic work; or (f) otherwise undertaking activity with the purpose of creating or obtaining an unfair academic advantage over other students.

5. Aiding and abetting academic dishonesty: (a) providing material, information, or other assistance to another person with knowledge that such aid could be used in any of the violations stated above, or (b) providing false information in connection with any inquiry regarding academic integrity.

6. Falsification of records and official documents: altering documents affecting academic records; forging signatures of authorization or falsifying information on an official academic document, grade report, letter of permission, petition, drop/add form, ID card, or any other official College document.

7. Unauthorized access to computerized academic or administrative records or systems: viewing or altering computer records, modifying computer programs or systems, releasing or dispensing information gained via unauthorized access, or interfering with the use or availability of computer systems or information.

Due Process and Student Rights
Enforcement of the standards of academic integrity lies with the faculty and the academic division. In all cases involving academic dishonesty, the student charged or suspected shall, at a minimum, be accorded the following rights:
1. be apprised of the charge(s) against him or her;
2. be provided with an opportunity to present information on his or her behalf;
3. be given the right to appeal any decision of an individual faculty member or the academic progress committee to the academic vice president or judicial council. Appeals to the academic vice president must be submitted in writing within 48 hours of the student being formally sanctioned.

Appeals utilizing the Rocky Mountain College judicial process should follow the procedures outlined in the student handbook.

Sanctions
All proven cases of academic dishonesty will be penalized as appropriate under the circumstances. Individual faculty members may take the following actions:
• issue a private reprimand;
• issue a formal letter of reprimand;
The Curriculum

Baccalaureate Degree Programs
Students may earn a bachelor degree in the following programs. Some majors have several options; see the department description for details.

Bachelor of Arts
Art
Communication Studies
Education
English
Environmental Studies
History
Individualized Program of Study
Music
Philosophy and Religious Thought
Theatre

Bachelor of Science
Aviation
Biology
Business Management
Chemistry
Computer Science
Education
Environmental Management and Policies
Environmental Science
Equestrian Studies
Geology
History and Political Science
Individualized Program of Study
Managerial Accounting
Math
Physical Education and Health
Psychology
Sociology and Anthropology

Minors
Minors are offered in all of the major programs listed above. In addition, minors are also offered in the following programs:

Organizational Leadership
Physics
Pre-Law
Reading
Writing

Masters
Master of Accountancy (MAcc)
Master of Physician Assistant Studies (MPAS)
Master of Educational Leadership (MED)

Individualized Program of Study (IPS)
An individualized program of study allows students to design a program that is not regularly offered by Rocky Mountain College. A student determines, with the help of faculty advisors, a program of study tailored to meet individual needs and interests. An IPS can be developed for either a major or a minor. All other graduation requirements must be completed, including all general education requirements.

An IPS must be a pre-planned program of study; therefore, IPS proposals should be submitted to the curriculum committee by the end of the sophomore year.

Proposals offered after the sophomore year require approval of submission to the committee by the academic vice president.

IPS proposals are reviewed by the curriculum committee for approval. Applications should include the educational rationale behind the program along with a list of all courses to be applied toward the program. The application should also include requirements of similar programs from at least two other accredited institutions. All IPS majors and minors must meet the minimum criteria listed in the requirements for a baccalaureate degree. Proposals are evaluated on the basis of whether or not an IPS provides a coherent program of study, whether the proposed program is similar in breadth and depth to programs at other institutions, whether such a program can better meet the needs of the student, and whether or not the student can offer evidence of the ability to plan and carry out such an individualized program. To be eligible for consideration, the student must be available for regular on-campus contact with the major advisor. Please contact the office of student records (657-1030) for further guidance on the preparation of an IPS proposal.

Teaching Licensure
For information about licensure, see "education" in the "academic programs" section of the catalog.

Associate of Arts Degree Requirements
A minimum of 62 semester hours is required, of which at least the last 31 have been taken at Rocky Mountain College; the general education requirements listed below must be met, except for BSA 365, reducing the social science requirements to six credits. A candidate must have a cumulative GPA of 2.00 ("C") for all courses applying to the degree.

Baccalaureate Degree Requirements
A minimum of 124 semester hours (certain programs may require more) is required. No more than 64 semester hours (96 quarter hours) are acceptable in transfer from a two-year college. Unless being counted toward a major, a maximum of eight credits in applied music, eight credits in ensemble, eight credits in theatre production, or eight credits in physical education activity courses (only two courses in the same physical education activity) may be counted toward graduation. Unless being counted toward the major, no more than a total of 12 of these activity credits can count toward the total credit requirement.

The general education requirements listed below must be met:

• A candidate must have a cumulative grade point average (GPA) of at least 2.00 for all courses applying to the degree, and a cumulative GPA of at least 2.00 in all courses taken at Rocky Mountain College.

• Students must complete a major with a GPA of at least 2.25 in courses in the major. The specific requirements for a particular major are listed in the catalog under the program concerned. The student must complete at least three courses in their major field at Rocky Mountain College.
Forty semester hours must be earned in upper-division courses, including at least 12 in the major field. If a minor is chosen, it must include a minimum of six upper-division semester hours.

A candidate for a baccalaureate degree must complete a minimum of 30 semester hours at Rocky Mountain College, including at least 20 upper-division semester hours (toward the required 40 semester hours of upper-division credits).

Twenty-four of the last 30 semester hours required for graduation must be earned in residence. This requirement may be waived in exceptional cases upon approval of the academic vice president.

Master of Accountancy Degree Requirements
The accountancy program at Rocky Mountain College is designed to prepare students for careers in public, governmental, not-for-profit, or industrial accounting. The program is designed to allow students to build on skills and knowledge developed through undergraduate coursework to become skilled, entry-level professional accountants upon graduation. The curriculum is based on the American Institute of Certified Public Accountants (AICPA) core competencies and prepares students to sit for the certified public accountant exam. In its entirety, the program is comprised of both undergraduate and graduate study, which leads, ultimately, to the master of accountancy degree.

Students who begin the accountancy program as undergraduate will graduate, upon completion of all requirements, with both a bachelor of science in business management and a master of accountancy. The entire curriculum consists of 150 semester hours for both the bachelor of science and master of accountancy.

Students who enter the accountancy program as baccalaureate degree holders from an institution other than Rocky Mountain College must meet only the Master of Accountancy requirements and graduate only with the Master of Accountancy. These students should consult with their academic advisor to ensure that, in total, their academic preparation makes them eligible for the CPA exam. Depending upon the student's academic background, additional courses may be necessary to become eligible for the CPA exam.

Master of Physician Assistant Studies Degree Requirements
Fulfilled by successfully completing:
- • MAT100 – College Algebra
- • MAT110 – Elementary Functions
- • MAT104 – Mathematics for Elementary School Teachers II
- • MAT131 – Trigonometry and Applied Calculus

Mathematics
The curriculum at Rocky Mountain College is designed to prepare educational leaders for a career as a principal or superintendent. This cohort-based program begins in the early fall and completes in late spring over a course of eleven months. The program follows the state and national standards for educational leadership and is rooted in Effective School Research. Blending theory and practice through coursework and an intensive internship, candidates will be prepared to be instructional leaders at the K-12 level. The program is 34 credits in length depending on previous coursework. This program has a minimal residency requirement.

General Education Requirements
Students must complete the following general education requirements (GERs) to earn a baccalaureate degree at Rocky Mountain College. Methods of completing each requirement are explained below. From time to time, special topics courses may be offered that can satisfy a particular GER. Contact the student records office to confirm if a given special topics course is appropriate as a GER.

Mathematics
Students are introduced to college level mathematics and the role and relevance of mathematics in our increasingly complex and diverse society. There are two requirements in mathematics. For the first requirement, students must demonstrate the mathematical skills and quantitative and logical reasoning ability needed for informed citizenship and success in the workplace. For the second requirement, students must demonstrate basic knowledge of the infinitesimal or stochastic elements in mathematics and apply advanced mathematical methods to modeling and problem solving.

Requirement 1: Math Skills (3 semester hours) Fulfilled by successfully completing:
- • MAT100 – College Algebra
- • MAT110 – Elementary Functions
- • MAT104 – Mathematics for Elementary School Teachers II
- • MAT131 – Trigonometry and Applied Calculus

or
- • a satisfactory score on a math achievement test (at least 26 on ACT-math, at least 610 on SAT-math, or at least a 41 on the trigonometry portion of the COMPASS math test (can be taken at Rocky Mountain College).

Requirement 2: Mathematical Thought (3 semester hours) Fulfilled by successfully completing one of the following courses:
- • MAT152 – To Infinity and Beyond
- • MAT175 – Calculus I
- • MAT176 – Calculus II
- • MAT210 – Probability and Statistics

Advanced placement credit may not be used to satisfy this requirement.

Writing
Effective writing serves as a means for individuals to communicate clearly and persuasively. Upon completing the writing requirement, students should be able to write effectively in terms of both form and style. Furthermore, students should be positioned to develop their writing skills throughout the rest of their academic careers and beyond.

Requirement: (6 semester hours) Students must successfully complete both ENG119 – First Year Writing and ENG120 – Critical Reading and Evaluative Writing. Advanced placement courses may not be used to satisfy this requirement.
Communication
Communication is one of the most important skills required by employers and, for that matter, to lead a successful life. Upon completing the communication requirements, students will be able to competently speak in front of an audience. Also, students will be able to practice the communication skills necessary to discuss and decide upon contemporary issues.

Requirement 1: Public Speaking (3 semester hours) Fulfilled by successfully completing COM102 – Public Speaking.

Requirement 2: Group Communication Skills (3 semester hours) Fulfilled by successfully completing either:
• COM250 – Small Group Communication; or
• COM260 – Debating Contemporary Issues

Health and Wellness
The ability to make informed choices regarding one's health is a key element of living a fulfilled life. To this end, the health and wellness requirement is designed to afford students the opportunity to discover lifestyle approaches that lead to enhanced health and well-being.

Requirement: (1 semester hour) Fulfilled either by successfully completing PEH 115 – Introduction to Wellness Concepts, or by achieving a satisfactory score on a challenge exam. The challenge exam is offered once each semester. Contact the student records office for the scheduled time and location of the exam. This requirement should be completed by the end of a student's second semester of attendance at Rocky Mountain College.

Fine Arts
An educated person must be able to employ creative processes to solve problems, develop new ideas, and communicate effectively to varying audiences. Through this GER, students learn skills and techniques necessary to employ creative processes in the fine arts, as well as to apply aesthetic judgment to evaluate creative works and describe the interrelationship between the fine arts, history, and culture.

Requirement: (6 semester hours) Fulfilled by successfully completing two courses of at least three semester hours each in art, theatre, or music. The two courses must be in different disciplines. Six semester hours in choir (MUS271/371) and/or concert band (MUS283/383) can substitute for one of the two fine arts requirements.

Humanities
Study of the humanities provides students with the critical perspective to examine the human condition and the nature of the world, address compelling social issues through reflection, and synthesize ideas into new forms. An education in the humanities requires reading significant works in various disciplines, gaining an exposure to a variety of methodologies, and learning to apply these via written and oral forms of communication. An education in the humanities is a necessary part of becoming a citizen with a broad knowledge of the diversity of cultures with well-considered moral, philosophical, aesthetic, and intellectual convictions.

Requirement 1: History (3 semester hours) Students must successfully complete a course in history of at least three semester hours.

Requirement 2: Literature (3 semester hours) Students must successfully complete a course in literature of at least three semester hours. Options include:

Requirement 3: Philosophy and Religious Thought (3 semester hours) Students must successfully complete a course in philosophy and religious thought of at least three semester hours.

Social Sciences
A study of the social sciences leads to a better understanding of how human beings behave as individuals and in organizations. Key elements of such an understanding are the recognition of the forces that shape behavior and the ability to assess the impact of those forces using the methods of scientific inquiry.

Requirement 1: Economic Decision Making (3 semester hours) Fulfilled by successfully completing either:
• a major or minor in business administration, managerial accounting, equine business, aviation management, sports management, or applied management
• BSA356 – Economic Decision Making

Requirement 2: (6 semester hours) Students must complete two courses of at least three semester hours each in psychology, sociology and anthropology, or political science. These two courses must be in different disciplines. Courses satisfying this GER include:
• in psychology: PSY101, PSY205, or PSY206
• in sociology/anthropology: SOC101, SOC242
• in political science: POL101, POL225, POL313, POL318, POL321, or POL343.

Natural Sciences
Through this GER, students explore the natural world, seeking to understand science as a way of knowing. A thorough understanding of the process of science, experimental design, and the scientific method are essential for evaluating scientific information used in decision making, informed voting, and good citizenship.

Requirement: (7 semester hours) Fulfilled by successfully completing two courses in biology, chemistry, environmental science, geology, or physics. At least one of the courses must have a lab component. Both courses can be in the same discipline. Courses that satisfy this GER include:
• in biology: any course of at least three semester hours in biology.
• in chemistry: CHM100*, CHM101*, CHM102*, and CHM260.
• in environmental science: ESC105*, ESC207*, ESC225, ESC230, ESC307*, ESC321, and ESC436*.
• in geology: GEO101 (if taken with GEO104 will count as a lab science), GEO105*, or GEO204*.
• in physics: PHS100, PHS101*, PHS102*, PHS105*, PHS201*, or PHS202*.

Courses marked with * have a laboratory component.

Transfer Credits for GER’s
Although the College reserves the right to refuse incoming transfer credits, credits from accredited colleges normally will be accepted subject to these conditions:
1. No more than 94 semester hours or 135 quarter-hours of credit are acceptable from four-year colleges.
2. No more than 64 semester hours or 96 quarter-hours are acceptable from two-year colleges.
3. No junior- or senior-level credit will be allowed for courses from two-year colleges.
4. No “D” or “F” grades will be accepted.
5. No preparatory/developmental classes below 100-level will be accepted.

Second Degree
A student may earn a second bachelor's degree at Rocky Mountain College by taking a minimum of 30 additional credits in residence beyond the credits earned for the first bachelor's degree and by completing all requirements for a second major. Nine of the minimum additional credits for the second degree must be at the upper-division level. Students at the College may concurrently earn both bachelor of science and bachelor of arts degrees if they have a minimum of 150 credits and have fulfilled all requirements for both degrees. Students may also transfer to Rocky Mountain College to attain a second degree. These students must meet all degree requirements outlined for transfer students to Rocky Mountain College. Students wanting to obtain a second degree must file a written application to the office of student records.

Registration
Students are expected to register on the days specified in the academic calendar. Registration is not complete until financial arrangements are made with the business office. After one week of classes, permission from the instructor must be obtained before entering a course. After two weeks of classes, no student will be allowed to register in regular classes.

Classification of Students
Students are classified at the beginning of each semester in each academic year according to the following definitions of class standing:

- **Freshman**: A student who has earned fewer than 27 semester hours.
- **Sophomore**: A student who has earned 27 to 59 semester hours.
- **Junior**: A student who has earned from 60 to 89 semester hours.
- **Senior**: A student who has earned 90 or more semester hours.

Registration Status
- **Regular**: Admission requirements fulfilled and systematically pursuing a definite course of study toward a degree.
- **Conditional**: Does not meet requirements for regular admission. Must establish regular (non-probationary) standing by the end of the first semester in residence.
- **Special**: A student who is not a candidate for a degree at Rocky Mountain College.
- **Auditor**: A student who attends class regularly but does not receive credit or grade. A regular student may audit a course without charge, providing his or her course load remains within the 12- to 19-credit range.

Academic Advisors
Academic advisors are assigned to students based on their area of major interest upon entrance to Rocky Mountain College. Students are encouraged to meet with their advisors frequently to review graduation requirements, plan class schedules, and talk about their futures. Students may change academic advisors at any time during the year by filing a request for change of academic advisor available in the office of student records. For more information about academic advising, contact the director of academic advising at advising@rocky.edu.
Academic Programs

Art
James A. Baken, Professor
Mark S. Moak, Professor

Students who participate in the art program can expect to discover and explore materials, techniques, and cultures from the dawn of human artistic experience to today. They will be guided on their journey by faculty who are passionate about art and believe in the importance of individualized instruction and experience; creativity as a problem-solving endeavor; critical thinking; traveling to monuments and museums of the region, nation, and the world; alternative methods of learning; and the interrelatedness of the studio, art history, aesthetics, art criticism, and a variety of other disciplines. The ultimate goal is self-expression through self-discovery.

Committed to the liberal arts, the art department strives to provide a learning environment that is challenging, yet encouraging, to art majors and non-majors alike. Some will go on to graduate school, some to teach or work in an art-related field, some will acquire an avocational skill, others will become educated consumers of art; but all will look at, truly see, the world with all of its visual wealth and its amazing peoples in a new light.

Note:
1. Students with exceptional preparation in some area of art study may consult with faculty concerning substitutions or waivers of prerequisites.
2. Independent study, directed reading, field practica, among others, may not be taken in art until at least 15 semester hours of regular coursework have been satisfactorily completed.
3. Internship credits may be used for no more than three semester hours of the required total for the major or minor.
4. Art education majors must complete the professional education program for K-12 teaching. See the "education" section of the catalog.
5. Students wishing more depth in a studio course may take that course a second time at a higher level, with instructor's approval.
6. Additional expenses for tools and materials can be expected in most art courses.

Major in Art
Requirements include a minimum of 39 semester hours including the following 24 hours: ART101, ART121, ART220, ART221, ART222, ART243 or ART247, ART483, ART490 and one of the following: ART321, ART322, ART323. The additional 15 semester hours for the major to be chosen in consultation with academic advisor. Courses may include art courses, one business-related course (BSA318 or BSA425) and/or internships (Pass/No Pass) up to 6 semester hours.

Major in Art Education
Requirements include a minimum of 41 semester hours including the 39 hours listed under the major in art plus ART338. Discipline-based art education, art production, art history, aesthetics, and criticism are the focus for this major. Art education majors must complete the professional education program for K-12 teaching as described in the “education” section of the catalog.

Minor in Art
Requirements include a minimum of 21 semester hours including ART101 or ART121; two of the following: ART220, ART221, ART222; one of the following: ART243, ART247, ART321, ART322, ART323; ART338; ART483; ART490, and six semester hours of ART electives.

Minor in Art Education
Requirements include a minimum of 27 semester hours including ART101 or ART121; two of the following: ART220, ART221, ART222; one of the following: ART243, ART247, ART321, ART322, ART323; ART338; ART483; ART490, and six semester hours of electives in art. Discipline-based art education is the goal of this minor. Art education minors must complete the professional education program for K-12 teaching as described in the “education” section of the catalog.

Art courses

ART 101
Drawing I
Fall semester. 3 semester hours.
This foundation course explores basic drawing techniques in a variety of dry and wet drawing media. This studio course offers the student an opportunity to learn about pictures as language and expressions using the vocabulary of the elements of art: line, value, shape, form, texture, perspective, and composition. Students will create, critique, and display original works of art.

ART 114
Gallery
Fall and spring semesters. 1 semester hour.
This course is designed to provide the student with gallery experience. Responsibilities include preparing the gallery for all exhibits, providing and collecting entry forms, cataloguing, making and placing labels for all student show work, hanging the student show, organizing the artist's reception and advertising for the student show, helping with the hanging/reception/advertising of all other exhibits including senior shows and those of guest artists, and working with art faculty.

ART 121
Design
Spring semester. 3 semester hours.
This studio course closely examines both two- and three-dimensional design by studying the principles of design and the elements of art. Students will create, display, and formally present for criticism to the course academic exercises and works of art.

ART 214
Gallery
Fall and spring semesters. 1 semester hour.
This course is designed to provide the student with gallery experience. Responsibilities include preparing the gallery experience.
for all exhibits, providing and collecting entry forms, cataloging, making and placing labels for all student show work, hanging the student show, organizing the artist's reception and advertising for the student show, helping with the hanging, reception, and advertising of all other exhibits including senior shows and those of guest artists, and working with art faculty.

ART 222
May be taken separately.

ART 220
Art History Survey I
Fall semester. 3 semester hours.
This is a general survey of art historical periods including the Prehistoric in Europe, the Near East, and the Americas; Ancient Egypt; the Bronze Age and Ancient Greece; the Etruscans; and the Romans. Study focuses on the materials, techniques, style, historical context, aesthetics, and criticism of this wide variety of art. Traditional art historical methods of slide lecture, discussion, written exams, and papers are de rigueur as well as exploration of relevant topics on the Internet and via the course website. Though sequential, ART220, ART221, and ART222 may be taken separately.

ART 221
Art History Survey II
Spring semester. 3 semester hours.
This is a general survey of art historical periods including the Early Christian, Byzantine, Islamic, Early Medieval, Gothic, and Renaissance. Study focuses on the materials, techniques, style, historical context, aesthetics, and criticism of this wide variety of art. Traditional art historical methods of slide lecture, discussion, written exams, and papers are de rigueur as well as exploration of relevant topics on the Internet and via the course website. Though sequential, ART220, ART221, and ART222 may be taken separately.

ART 222
Art History Survey III
Fall semester. 3 semester hours.
This is a general survey of art historical periods and movements during the 17th, 18th, 19th, 20th, and 21st centuries. Study focuses on the materials, techniques, style, historical context, aesthetics, and criticism of this wide variety of art. Traditional art historical methods of slide lecture, discussion, written exams, and papers are de rigueur as well as exploration of relevant topics on the Internet and via the course website. Though sequential, ART220, ART221, and ART222 may be taken separately.
of design elements in the clay medium. They are also expected to be able to identify and articulate qualities that characterize notable ceramic works by studying both modern and historic ceramic pieces. Students will create, critique, and display original works of art.

**ART 252**  
*Jewelry and Metalwork I*  
Spring semester. 3 semester hours.  
This course is an introduction to basic jewelry and metalworking processes and techniques, such as lost wax casting, raising, forging, fabrication, and lapidary work. Copper, brass, bronze, sterling silver, and semi-precious stones are commonly used; more expensive materials may be used if the student can afford them. Functional and non-functional objects may be made with an emphasis on craftsmanship and aesthetics. Designs from nature, art history, and contemporary culture are encouraged. Students will create, critique, and display original works of art. ART352 is a continuation of ART252.

**ART 301**  
*Drawing II*  
On demand. 3 semester hours.  
This is primarily a life drawing class. Working mainly from the human nude and from animals, the student is allowed to explore techniques and create drawings in dry and wet media. "Nature as teacher" is the academic approach in these classes; however, other drawing approaches, subject matter, and advanced techniques may be explored. Students will create, critique, and display original works of art. Prerequisite: ART101.

**ART 314**  
*Gallery*  
Fall and spring semesters. 1 semester hour.  
This course is designed to provide the student with gallery experience. Responsibilities include preparing the gallery for exhibits, providing and collecting entry forms, cataloguing, making and placing labels for student show work, hanging the student show, organizing the artist's reception and advertising for the student show, helping with the hanging/reception/advertising of all other exhibits including senior shows and those of guest artists, and working with art faculty.

**ART/MUS 315**  
*Creativity*  
Fall semester, alternate years. 3 semester hours.  
This course approaches creativity as a skill to develop, not as a magical gift bestowed on a few select people. The last three weeks of the course will be devoted to a large-scale project in an area chosen by the student at the time of registration. Two important elements of the course involve a specific style of journaling, and a weekly artist's date. Through the activities in this course, students will bring a higher degree of creativity to their daily lives. This course may be taken either at the lower-division level or at the upper-division level, but not both.

**ART 317**  
*Art, Art History, and Archaeology*  
Summer semester. 3 semester hours.  
Students participate in the various aspects of archaeology at a particular locale – in the classroom and on site. Areas of study include but are not limited to the following: excavating, drafting, conservation, pottery analysis, history, art history and cataloging. In addition to working at an excavation, students will explore other historical sites and museums.

**ART 321**  
*Topics in Art History I*  
On demand. 3 semester hours.  
Choosing from the prehistoric (as early as 30,000 BC) through the Gothic (as late as AD 1500), this course may explore such topics as Ancient Egypt, Bronze Age and Classical Greece, Imperial Rome, or Medieval Europe. Study focuses on art materials, techniques, style, historical and historical context, aesthetics, and criticism. While traditional methods of studying art history are used (e.g. slide lectures, discussion, written exams, and papers), students are expected to authentically replicate an objet d'art from the studied historical periods as a major project. This course is also web-enhanced, with an interactive class website and required web research and project presentation.

**ART 322**  
*Topics in Art History II*  
On demand. 3 semester hours.  
The topic for this course is chosen from Western artistic traditions ranging from the Renaissance, Baroque, Rococo, the nineteenth, or the twentieth centuries. Study focuses on art materials, techniques, style, historical context, aesthetics, and criticism. While traditional methods of studying art history are used (e.g. slide lectures, discussion, written exams, and papers), students are expected to authentically replicate an objet d'art from the studied historical periods as a major project. This course is also web-enhanced, with an interactive class website and required web research and project presentation.

**ART 323**  
*Topics in Art History III*  
On demand. 3 semester hours.  
This is a study of the peoples and their art from the non-European traditions. Topics vary and may include Native American cultures such as the Anasazi, Mogollon, or Mimbres and/or the art of Africa or Asia, among others. Study focuses on art materials, techniques, style, prehistorical and historical context, aesthetics, and criticism. While traditional methods of studying art history are used (e.g. slide lectures, discussion, written exams, and papers), students are expected to authentically replicate an objet d'art from the studied historical periods as a major project. This course is also web-enhanced, with an interactive class website and required web research and project presentation.

**ART 331**  
*Painting III.*  
Spring semester. 3 semester hours.  
This studio course continues the exploration of techniques of oil, acrylic and mixed mediums. It allows students more time to develop techniques and pursue individual projects. Student and instructor will develop a mutually agreeable
ART 332
Painting IV.
Fall semester. 3 semester hours
This studio course allows the student to continue exploration in the watercolor medium. It allows students more time to develop techniques and pursue individual projects. The option of branching into other mediums is available near mid-semester. The student and instructor will develop a mutually agreeable plan of study at the beginning of the semester. Students will create, critique and display original works of art. Usually ART 332 is offered concurrently with ART 232. Prerequisite: ART 232

ART/EDC 338
Methods and Materials: Teaching Art in the Elementary School (and Secondary when Applicable)
Spring semester. 3 semester hours.
This course focuses on the methods and materials for teaching art in the elementary and middle school (and secondary schools when applicable). Prerequisite: Admission to the teacher education program or permission of the instructor.

ART 342
Printmaking
On demand. 3 semester hours.
This course is designed to help students develop the concept, philosophy, and direction of a body of work for their senior show. Students meet with professor(s) on a weekly basis. Prerequisite: permission of professor.

ART 347
Topics in Photography
Spring semester. 3 semester hours.
This course explores the methodology of digital photography as it applies to the fields of Adventure/Lifestyle/Commercial Photography. Camera selection, technology, and use are covered, as are field practices, editing techniques, and elements of composition. Students will create, critique, and present original works of art. Prerequisite: ART 101.

ART 350
Sculpture
Fall semester. 3 semester hours.
Students will explore the third dimension by creating works in a variety of materials such as clay, plaster, wood, metal, found objects, and mixed media. Processes and techniques include modeling, carving, lost wax casting, and construction. Students will create, critique, and display original works of art. Prerequisite: ART 121.

ART 351
Clay II
Fall semester. 3 semester hours.
This clay class offers the student an opportunity to expand ceramic skills according to individual interests. Student and instructor will develop a mutually agreeable plan of study at the beginning of the semester. Students will create, critique, and display original works of art. Usually ART 351 is offered concurrently with ART 251. Prerequisite: ART 251.

ART 352
Jewelry and Metalwork II
Spring semester. 3 semester hours.
Students are allowed to pursue areas of individual interest by investigating advanced techniques and/or by expanding basic jewelry and metalworking skills. Student and instructor will develop a mutually agreeable plan of study at the beginning of the semester. Students will create, critique, and display original works of art. ART 352 is a continuation of and is offered concurrently with ART 252. Prerequisite: ART 252.

ART 450
Internship
On demand. 1-12 semester hours.
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. Contract is required. Prerequisites: junior or senior standing.

ART 483
Senior Project
On demand. 1 semester hour.
For art majors and art education majors and minors, this course is designed to help students develop the concept, philosophy, and direction of a body of work for their senior show. Students meet with professor(s) on a weekly basis. Prerequisite: permission of professor.

ART 490
Art Seminar
Fall semester, alternate years. 2 semester hours.
Designed for art majors and art education majors and minors, this course explores what it means to be an art professional. Discussion, field trips (e.g., to museums, galleries, artists’ studios), art community service, and preparation of a resume, a portfolio, an artist’s statement, and a senior show are the focus of the course. The art seminar is further enhanced by visits from a career counselor and art professionals. The course not only serves as an opportunity for self-assessment by each student, but also requires the assessment of fellow classmates, the art program, and, in the case of art education majors and minors, the application of age-appropriate assessment formats. Prerequisite: permission of professor.

ART 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.
The mission of the Rocky Mountain College aviation program is to educate and train individuals to be professionals and leaders in the aviation industry.

The Rocky Mountain College aviation program provides students with the knowledge and skills required to enter the exciting world of professional aviation. Rocky Mountain College offers bachelor of science degrees in aeronautical science (professional pilot) and aviation management. Graduates are prepared to begin careers as pilots or managers in the airline, business, air cargo, military or other sectors in the aviation industry.

Flight training is conducted in Piper and Beechcraft aircraft owned by the College. Glass cockpit aircraft and sophisticated simulators are used in training to prepare graduates for competitive careers in aviation. Further training is conducted using state-of-the-art Canadair Regional Jet (CRJ) flight management system (FMS) simulation. The program emphasizes professional experiences, relevant classroom instruction and safe flight operations that will help transition the students to a successful career after graduation.

Majors are offered in aeronautical science and aviation management, and a minor is offered in aeronautical science. The aeronautical science major combines pilot certification with studies of the air transportation-operating environment. The aviation management major combines studies of aviation with business and economics. Pilot certification is elective under this major.

The minor in aeronautical science includes private pilot certification, plus the knowledge to safely and efficiently use air transportation as part of a business operation or for personal use.

The program emphasizes professional relationships with companies and individuals across the aviation industry and internship opportunities tailored to the desires of each individual student.

Program Accreditation
The Aeronautical Science major and Aviation Management major are both accredited by the Aviation Accreditation Board International (AABI). There are only 26 aeronautical science programs and 31 aviation management programs worldwide accredited by AABI. The organization sets standards for all aerospace programs taught in colleges and universities around the United States and around the world.

Pilot Certification
Flight education is conducted under Federal Aviation Regulation Part 141 certification. Classroom instruction is conducted on campus, and flight instruction is conducted at flight operations at nearby Billings Logan International Airport. Students majoring in aeronautical science may receive credit for prior learning for the private pilot certificate and the instrument rating completed prior to enrollment. Credit for other FAA certification is reviewed and determined on a case-by-case basis. Once students enroll in the aviation program, all subsequent flight instruction must be received through the Rocky Mountain College aviation program.

Medical Certification
Aeronautical science majors must obtain a minimum of a Class II FAA medical certificate prior to acceptance into the aviation program. A Class I certificate is recommended. Students minorin in aeronautical science must obtain at least a Class III FAA medical certificate, which is required for the private pilot certificate.

Admission Criteria
Admission to the aviation program is based on demonstrated academic leadership and responsibility, appropriate FAA medical certification, and admission to the College. The number of students admitted to the program each year may be restricted to balance classroom and flight instruction capabilities.

Program Costs
The cost of flight training is in addition to normal college tuition and fees. The fee for each flight laboratory course is payable at the time of registration. These fees are based on the cost for an average student to complete the flight instruction in the specified syllabus and include costs for FAA knowledge and flight exams. Flight lab completion may carry over from one semester to another.

Citizenship
All students must show proof of citizenship before beginning flight training. Acceptable forms of proof of U.S. citizenship include an original birth certificate or current passport. International students may take flight training but must comply with procedures established by the U.S. Transportation Security Administration. Contact flight operations for details.

Major in Aeronautical Science (Professional Pilot)
The following are required as part of the general education core courses: PSY101; PHS101 or PHS105 or PHS201; and MAT131. A minimum of 52 semester hours is required in the major, including AVS100, AVS101, AVS150, AVS153, AVS201, AVS202, AVS203, AVS205, AVS253, AVS272, AVS273, AVS274, AVS306, AVS308, AVS312, AVS317, AVS318, AVS376, AVS400, AVS404, AVS405, AVS419, and three semester hours of upper-division aviation electives. No internship is required, but is recommended. The first three credits of an internship will be graded. Additional credits up to a maximum of 9 will be graded pass/fail.

Major in Aviation Management
The following are required as part of the general education core courses: PSY101; PHS101, PHS105, or PHS201; and MAT131. A minimum of 51 hours is required, including AVS100, AVS101, AVS150, AVS170, AVS307, AVS308, AVS312, AVS400, AVS405, BSA201, BSA202, BSA311,
BSA321, BSA343, ECO201, ECO202, MAT210 and six semester hours of upper division electives in aviation or business. Three credits of internship are required and will be graded. Additional credits up to a maximum of 9 will be graded pass/fail.

**Minor in Aeronautical Science**

A minimum of 20 semester hours, including AVS101, AVS150, AVS153, AVS203, AVS308, and five semester hours of aviation electives. At least six semester hours must be in upper-division courses.

**Aviation courses**

**AVS 100**  
**Introduction to Professional Aviation**  
Fall semester. 1 semester hour.  
Introduces students to the aviation curriculum and the liberal arts core curriculum as a foundation for personal growth and development. Investigates aviation career options with an emphasis on the necessary knowledge, skills, and attributes of an aviation professional. Introduces aviation safety and human factor issues. Learning activities include professional reading and writing.

**AVS 101**  
**Private Pilot Ground School**  
Fall, spring, and summer semesters. 4 semester hours.  
Prepares the student for the FAA private pilot knowledge examination. The student is introduced to the principles of aerodynamics, aircraft systems and performance, meteorology and aviation weather data, aviation physiology, navigation, flight planning, and aviation decision-making. Corequisite: AVS153.

**AVS 150**  
**Aviation Meteorology**  
Spring semester. 3 semester hours.  
Provides a detailed knowledge of the environmental factors critical to safe flight operations. The course covers weather systems, upper-air characteristics, flight hazards, weather-related topics in flight safety, meteorological flight planning, use of weather information systems, and the reports and charts used for aviation weather reporting and forecasting.

**AVS 153**  
**Private Pilot Flight Lab**  
Fall, spring, and summer semesters. 2 semester hours. EL.  
Students complete all three stages of the Private pilot flight syllabus. This course includes dual and solo flight and covers pre-flight preparation, aircraft operation procedures, proper aircraft flight control, air and ground safety, flight maneuvers, air traffic control procedures and communication, and VFR navigation. This course prepares students for the FAA private pilot oral and flight examinations. The FAA private pilot certificate must be completed to fulfill course requirements. Corequisite: AVS101.

**AVS 170**  
**Flight Orientation Lab**  
Fall and spring semesters. 1 semester hour.  
This course is for students majoring in aviation management. The course provides students with guided observation of private, instrument, commercial, multi-engine and crew resource management flight training. It is designed to increase the student’s understanding of factors basic to flight operations, aviation meteorology, air traffic control, flight navigation, and the development of a professional pilot. Prerequisite: AVS101.

**AVS 200**  
**Intercollegiate Flight Team Competition**  
Fall and spring semesters. 1 semester hour.  
Students train for and participate in intercollegiate flight competition as a member of the Rocky Mountain College Flight Team. Additional fee required during semesters in which the team travels to competition.

**AVS 201**  
**Instrument Rating Ground School**  
Fall, spring, and summer semesters. 3 semester hours.  
This course prepares students for the FAA instrument rating knowledge examination, providing an in-depth study of flight instruments, physiology of flight, aviation weather reports and forecasting, radio navigation, instrument departure, en route and arrival procedures, flight planning, and emergency procedures. Prerequisites: AVS101, AVS153; or permission of the director of aviation. Corequisite: AVS253.

**AVS 202**  
**Commercial Pilot Ground School**  
Fall and spring semesters. 3 semester hours.  
This course prepares students for the FAA commercial pilot knowledge examination, covering meteorology, airspace, piloting, aviation physiology, advanced aerodynamics, commercial flight maneuvers, aircraft stability and performance, flight in complex aircraft, flight management and emergency procedures, and regulations related to commercial flight operations. Prerequisites: AVS201, AVS253; or permission of the director of aviation. Corequisite: AVS272.

**AVS 203**  
**Introduction to Air Traffic Control**  
Fall semester. 3 semester hours.  
This course provides a detailed study of the science of air traffic control for professional pilots and aviation managers. Topics include the national airspace system, air traffic control, navigation aids, communications and operations procedures, airport traffic control, radar operations, and ATC facility management. Prerequisite: AVS101.

**AVS 205**  
**Global Positioning System and Glass Cockpit Lab**  
Fall and spring semesters. 1 semester hour.  
Students complete hands-on global positioning system and glass cockpit training using software in the classroom and hardware in flight training devices in order to integrate and apply these systems in instrument flight. Prerequisites: AVS101, AVS153. Corequisite: AVS201 and AVS253.

**AVS/HST 231**  
**Aviation History**  
Spring semester. 3 semester hours.  
This course outlines the evolution of aviation from early
Academic Programs

This is a two-part course that prepares students for the FAA A VS 301 Fall and spring semesters. 3 semester hours. Fundamentals of Instruction and Flight Instructor Knowledge Examinations. Part one covers fundamentals of teaching and learning, including effective teaching methods, aerodynamics analysis, instructional syllabus development, and flight instructor responsibilities. Part two addresses the analysis of flight maneuvers involved in the private, commercial, and flight instructor certificates. Prerequisites: AVS201, AVS202, and AVS274; or permission of the director of aviation.

AVS 243 Aviation Winter Survival
Spring semester. 1 semester hour. This course consists of a trip to another town in Montana for training over a weekend in January. The course includes classroom and field work on how to survive in winter conditions. Training includes staying in the field overnight for one night. There is a small fee, plus cost of travel and one night lodging. Registration with the Montana Aeronautics Division, which is the sponsor, must be completed by Dec 1st. Pass/no pass grading. Prerequisite: AVS101.

AVS 253 Instrument Rating Flight Lab
Fall, spring, and summer semesters. 2 semester hours. This course provides flight instruction covering commercial navigation, cross-country flights, and night flying procedures allowing students to complete stage 1 of the flight syllabus. Prerequisites: AVS253. Corequisite: AVS201.

AVS 272 Commercial Pilot Flight Lab I
Fall, spring, and summer semesters. 1 semester hour. This course provides flight instruction covering commercial flight maneuvers allowing students to complete Stage two of the flight syllabus. Prerequisite: AVS272.

AVS 273 Commercial Pilot Flight Lab II
Fall, spring, and summer semesters. 1 semester hour. This course provides flight instruction covering commercial flight maneuvers allowing students to complete stage three of the flight syllabus and become prepared for the FAA commercial pilot oral and flight examinations. The FAA commercial pilot certificate must be completed to fulfill course requirements. Prerequisite: AVS273.

AVS 301 Certified Flight Instructor Ground School
Fall and spring semesters. 3 semester hours. This is a two-part course that prepares students for the FAA
AVS 317  
Aircraft Power Plants  
Fall semester. 3 semester hours.  
An in-depth study of reciprocating, turbine, and turbo-prop engines and propeller systems and the engine accessory equipment used on modern aircraft. Prerequisite: AVS202, PHS101 or PHS105 or PHS201, or permission of professor.

AVS 318  
Advanced Aircraft Systems  
Spring semester. 3 semester hours.  
An in-depth study of advanced aircraft systems including fuel, hydraulic, electrical, engine accessory, and auxiliary systems. Prerequisite: AVS202 or permission of professor.

AVS 325  
Advanced Flight Systems  
Fall and spring semesters. 3 semester hours.  
This course provides an introduction to modern cockpit technology used in air transport aircraft. The course addresses the function and operation of glass cockpit aircraft operating equipment such as satellite-based and inertial navigation systems, auto-pilots, flight management systems, electronic flight information systems, ground proximity warning systems, traffic collision avoidance systems, datalink systems, electronic flight bags, weather radar, enhanced/synthetic vision systems, flight data, cockpit voice recording systems and emergent technologies. Prerequisites: AVS201, AVS253.

AVS 343  
Altitude Chamber Training  
Spring semester. 1 semester hour.  
This course provides classroom instruction and hands-on training on the physiological effects and hazards associated with high altitude flight. The course includes a field trip to a U.S. Air Force base to participate in training in an altitude chamber. Pass/no pass grading. Prerequisite: AVS101, AVS153.

AVS 361  
Certified Flight Instructor Flight Lab (FAA Part 141)  
Fall, spring, and summer semesters. 2 semester hours.  
This course provides flight instruction under FAR Part 141 preparing students for the FAA flight instructor oral and flight examinations. The course includes dual flights covering all maneuvers necessary to instruct students for the private and commercial pilot certificates. The FAA flight instructor certificate must be completed to fulfill course requirements. Prerequisite: AVS274. Corequisite: AVS301.

AVS 362  
Instrument Flight Instructor (FAA Part 141)  
Fall, spring, and summer semesters. 3 semester hours.  
This course provides ground and flight instruction under FAR Part 141 preparing students for the FAA instrument flight instructor written, oral, and flight examinations. The FAA instrument instructor rating must be completed to fulfill course requirements. Prerequisite: AVS202, PHS101 or PHS105 or PHS201, or permission of professor.

AVS 363  
Multi-Engine Flight Instructor (FAA Part 141)  
Fall, spring, and summer semesters. 3 semester hours.  
This course provides ground and flight instruction under FAR Part 141 preparing students for the FAA multi-engine flight instructor rating oral and flight examinations. The FAA multi-engine instructor rating must be completed to fulfill course requirements. Prerequisite: AVS361 or AVS371.

AVS 371  
Certified Flight Instructor Flight Lab (FAA Part 61)  
Fall, spring, and summer semesters. 2 semester hours.  
This course provides flight instruction under FAR Part 61, preparing students for the FAA flight instructor oral and flight examinations. The course includes dual flights covering all maneuvers necessary to instruct students for the private and commercial pilot certificates. The FAA flight instructor certificate must be completed to fulfill course requirements. Prerequisite: AVS274. Corequisite: AVS301.

AVS 372  
Instrument Flight Instructor (FAA Part 61)  
Fall, spring, and summer semesters. 2 semester hours.  
This course provides ground and flight instruction under FAR Part 61, preparing students for the FAA instrument flight instructor written, oral, and flight examinations. The FAA instrument instructor rating must be completed to fulfill course requirements. Prerequisite: AVS361 or AVS371.

AVS 373  
Multi-Engine Flight Instructor (FAA Part 61)  
Fall, spring, and summer semesters. 2 semester hours.  
This course provides ground and flight instruction under FAR Part 61, preparing students for the FAA multi-engine flight instructor rating oral and flight examinations. The FAA multi-engine instructor rating must be completed to fulfill course requirements. Prerequisite: AVS361 or AVS371.

AVS 376  
Multi-Engine Rating Flight Lab  
Fall, spring, and summer semesters. 1 semester hour.  
This course provides flight instruction, preparing students for the FAA Multi-engine rating oral and flight examinations. Areas covered include emergency procedures, single engine operations, and control of the aircraft by sole reference to flight instruments. The FAA multi-engine rating must be completed to fulfill course requirements. Prerequisite: AVS274. Corequisite: AVS306.

AVS 380  
Aerospace Physiology and Human Factors  
Fall semester. 3 semester hours.  
The physiological and biomedical effects of altitude, acceleration, rotation, impact, noise, and vibration on human health and performance will be described in the context of atmospheric flight. Their effects on human performance, along with those of microgravity and radiation, will then be extended to spaceflight. The implications of human limitations for long term crewed spaceflight and human habitation of space will be considered. Prerequisite: PHS 101 or 105.
AVS 400
Aviation Professional Development
Fall and spring semesters. 1 semester hour.
This culminating course focuses on professional issues and integrates all facets of the student's college educational experience. Students explore issues in aviation including professional standards, ethics, and career advancement. Guest lectures will provide perspectives from leaders in the aviation industry. Prepares the graduate for transition to a career in aviation and develops job placement skills. Prerequisite: senior standing.

AVS 404
Crew Resource Management with Lab
Fall and spring semesters. 2 semester hours.
This course provides advanced ground and simulator instruction with an emphasis on the application of aviation and human factors in Crew Resource Management skills. The lab includes Line-Oriented Flight Training (LOFT) sessions in a flight-training device to develop crew resource management skills in a variety of realistic situations encountered by flight crews. Prerequisite: AVS376 or permission of the director of aviation.

AVS/BSA 405
Air Transportation Management
Fall semester. 3 semester hours.
This course provides a comprehensive experience for the aviation or business student by examining the air transportation industry. Areas of concentration: airline operation, maintenance, marketing, and economic factors affecting the industry. The class uses a simulation program where students create an airline and then compete with other students. Prerequisite: junior or senior standing.

AVS 410
Advanced Aerodynamics and Aircraft Performance
Spring semester, alternate years. 3 semester hours.
This course covers advanced theories of flight and performance factors including airfoil shape; theories of lift and drag; velocity; power and thrust; stability and control; high speed aerodynamics; Mach effects; advanced principles of performance, capabilities, and limitations; performance design criteria; and load factors. Prerequisites: AVS202 and MAT131; AVS274 is preferred.

AVS 419
Air Carrier Operations
Fall and spring semesters. 3 semester hours.
This course focuses on a study of transport category aircraft systems; flight planning; airport analysis; advanced weather analysis; and economic and safety issues related to transport category aircraft operations, including HMR 175 and FAR Part 135 and 121 regulatory requirements. This course provides the knowledge required to qualify for the FAA airline transport pilot and aircraft dispatcher knowledge examinations. Prerequisites: AVS202, AVS405.

AVS 443
Airline Dispatcher Certification
Spring semester. 2 semester hours.
This course is a culminating study of airline operations, preparing students for the FAA dispatcher certification knowledge and practical examinations. Students must be 21 years of age by the middle of the semester that the course is taken to meet FAA examination requirements. Prerequisites: AVS150, AVS201, AVS203, AVS205, AVS318, AVS419. The FAA dispatcher written exam (ADX) is also a prerequisite.

AVS 447
Boeing 737 Aircraft Systems
Fall, spring, and summer semesters. 1 semester hour.
This course is an in-depth study of the systems of the Boeing 737 aircraft, including hydraulics, avionics, electrics, air conditioning, and flight controls. Students work with computer-based training software as used by numerous airlines. This independent study course is conducted and tested much like initial 737 ground training at an airline. Prerequisite: AVS202. Corequisite: AVS318.

AVS 449
Regional Jet Aircraft Systems
Fall, spring, and summer semesters. 1 semester hour.
This course is an in-depth study of the systems of the Canadair Regional Jet (CRJ) aircraft, including hydraulics, avionics, electrics, air conditioning, flight controls, etc. Students work with computer-based training software as used by numerous airlines. This independent study course is conducted and tested much like initial CRJ ground training at an airline. Prerequisite: AVS202. Corequisite: AVS318.

AVS 450
Internship
Fall, spring, and summer semesters. 1-12 semester hours.
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student's major or minor area of study. Contract is required. Prerequisites: junior or senior standing and permission of the director of aviation.

AVS 499
Independent Study
On demand. 1-3 semester hours.
This course allows a strong student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Biology
Daniel Albrecht, Professor
Cristi Hunnes, Professor
Jennifer Lyman, Professor
Claire Oakley, Professor
Mark Osterlund, Associate Professor
Philip Jensen, Assistant Professor
Kayhan Ostovar, Assistant Professor

The biology program studies the breadth of life, from cellular mechanisms to ecosystem processes. Students are encouraged to view biological concepts from historical,
political, and ethical perspectives as they integrate new ideas and concepts with older ones. The faculty stresses the process of science and the ability to analyze the surrounding world by generating hypotheses, testing hypotheses, analyzing data, and drawing conclusions. Students develop oral and written communication skills through active participation in lecture/discussions and collaborative projects both in the classroom and in laboratory/field settings.

Biology students at Rocky Mountain College get a broad exposure to the three main areas of biology. Our goal is that graduates, no matter what career path they may choose, will have a solid understanding of the cellular and molecular basis of life, the design and function of individual organisms, and the ecological interactions between organisms. Furthermore, we emphasize research skills, experimental design, and data analysis throughout all courses. The program provides biology majors with a broad foundation, which prepares them for professional schools, the workplace or graduate school.

**Major in Biology:**

1. A minimum of 33 semester hours of biology courses;
2. Biology core: BIO111 and BIO112 (8 cr), BIO203 Genetics (3 cr), and BIO306 Evolution (3 cr);
3. One course from each of the following three categories:
   a) Cell and Molecular Biology: BIO250 Microbiology, BIO344/345 Molecular Genetics, BIO/CHM452 Biochemistry I, BIO/CHM460 Biochemistry II, BIO312 Cell Biology
4. Biology capstone course (5 cr). As students choose courses from the three categories listed above, they must take BIO/CHM452 (biochemistry) OR BIO415 (ecology) as their capstone course;
5. Internship: BIO450 credits do not count toward the 33 credit minimum.
6. In addition: IDS243 (Scientific Writing and Analysis), CHM101, CHM102, CHM251, CHM252, and either PHS101 and PHS102 or PHS201 and PHS202.

**Major in Biology Education**

Students must complete the above biology major and the required secondary education courses.

**Major in Science Broadfield Education Biology**

This major serves those who desire to teach the several sciences necessary in American schools. In addition to the science courses listed below, students must complete the professional education program for secondary teaching as described in the “education” section of the catalog.

Required are the following courses:

Biology: A total of 23 credits hours in biology including BIO111, BIO112, BIO203, BIO306; plus any two of the following: BIO250, BIO321, BIO415; and

Mathematics: MAT175 and MAT210; and

Chemistry: CHM101, CHM102, CHM251, and

Physics: PHS101, PHS102, PHS225, and

Geology: GEO101 and GEO104, and

Environmental Science: ESC105 and

**Minor in Biology**

A minimum of 20 semester hours in biology (6 credits of upper-division courses), IDS243, plus one course in chemistry with a laboratory component is required.

**Minor in Biology Education**

For students pursuing a teaching minor in biology, the following courses must be taken in addition to coursework required in the secondary education program: a minimum of 24 hours in biology including BIO111, BIO112, BIO203; a choice of BIO250 or BIO311 or BIO317; either BIO252 or BIO321; BIO306; and BIO415, IDS243. Additionally, one chemistry course with a laboratory component is required.

Note: The following courses are eligible for biology credit: ESC307, ESC314, and ESC325. EQS300 will be accepted as a biology elective for students who have successfully completed BIO111, BIO112, CHM101, and CHM102. Note: EQS300 and EQS400 are highly recommended for students pursuing veterinary school or graduate programs in animal science.

**Biology courses**

**BIO 102 Introduction to Biology**

Summer semester. 4 semester hours.

This course is a broad survey of biology approaching different levels of biological organization from the perspective of the organism in the environment. Specific topics include genetics, evolution, ecology, metabolism, and the cell. The laboratory emphasizes the process of scientific investigation, including the design, conduct, analysis, and presentation of biological experiments. This course is appropriate for non-biology majors and does not count toward a major or minor in biology.

**BIO 105 Current Biology**

Fall semester, even years. 3 semester hours.

This course for non-majors will explore concepts that are both rooted in biology and important in our everyday lives. One such example is the stem cell: what exactly are stem cells, and why are they important tools for biology and medicine? In this course we will examine a broad range of topics including stem cells, genetically modified organisms,
evolution, cancer, and the practice of science itself. These subjects will be addressed in a traditional classroom setting, but assignments will demand that students apply the course material to current happenings in our society. Points will be earned by completing quizzes, response papers, and projects. Prerequisites: none. This course has no laboratory component and does not count toward a major or minor in biology.

BIO 111
General Biology I
Fall semester. 4 semester hours.
An introductory survey emphasizes the cell, cellular respiration, photosynthesis, genetics, and molecular biology. The weekly laboratories teach basic laboratory skills, safety, experimental design, and the application of statistics. Three hours of lecture and one two-hour laboratory session per week.

BIO 112
General Biology II
Spring semester. 4 semester hours.
An introductory course emphasizes organization within the individual, population, and community levels of biology. Topics include basic genetics, population genetics, evolution, diversity of organisms, and ecology. The laboratory emphasizes the process of scientific investigation, including the design, analysis, and presentation of biological experiments. Field trips outside of regular class time may be required. Three hours of lecture and one two-hour laboratory session per week.

BIO 143
Introduction to Research I
Spring semester. 1 semester hour.
Introduction to Research I is a laboratory based course that teaches students the fundamentals of biological research. The course is limited to ten freshmen students who must submit an application and be accepted into the course. Those students gain exposure to several of the model organisms that are commonly used in research. They learn techniques for growing, handling and characterizing those organisms, along with routine procedures that are universally applicable for molecular biology. Students who complete Introduction to Research I are eligible to enroll in Introduction to Research II. Students must apply for acceptance to the course.

BIO 203
Genetics
Fall semester. 4 semester hours.
The course provides a detailed overview of the mechanisms of heredity. Topics include Mendelian, quantitative, and molecular genetics. Three hours of lecture per week and one two-hour laboratory session per week. Prerequisites: BIO111, BIO112, and CHM101. Corequisite: IDS243.

BIO 243
Introduction to Research II
Fall semester each year. 2 semester hours.
Introduction to Research II is a laboratory and lecture based course that meets for three hours once a week. As a continuation of Introduction I, sophomore students learn advanced biological research protocols in a laboratory setting. Protocols include DNA cloning and various forms of DNA and RNA hybridization. Students also participate in a weekly discussion format where they learn to read, analyze and present scientific journal articles. Students who have completed Introduction to Research I are eligible to enroll in Introduction to Research II. Students completing Introduction to Research II are eligible to enroll in Introduction to Research III. Prerequisite – Bio 143 Introduction to Research I

BIO 250
Microbiology
Spring semester. 4 semester hours.
This course focuses on the biology of microorganisms including bacteria, viruses, yeasts, protozoa, and fungi. An investigation of the structure, metabolism, and reproduction of microorganisms lays the groundwork for health-oriented microbial topics including epidemiology, immunology, immunity, antimicrobials, and major microbial diseases. In the laboratory, students learn techniques for the isolation, detection, identification, and characterization of bacteria within various types of samples. Three hours of lecture and one two-hour laboratory session per week. Prerequisites are BIO111 and CHM101.

BIO 252
Animal Physiology
On demand. 3 semester hours.
Designed for students pursuing studies in ecology, biodiversity, and environmental science. This class introduces students to the basic concepts of animal regulation. Feedback and homeostasis are foundational concepts in biology. An introductory biology and introductory chemistry class are highly recommended.

BIO 280
Bugs and Drugs
Fall semester. 3 semester hours.
This course will focus on antimicrobial drugs and their use in fighting bacterial infections. Topics will include the history of antibiotics, antibiotic resistance of bacteria, including resistance mechanisms, development of new antibiotics and the drug development pipeline, how antibiotics work, antibiotic stewardship, and use of antibiotics in the animal industry. Bacteria of particular public health concern, such as methicillin-resistant Staphylococcus aureus (MRSA), and Pseudomonas aeruginosa, will be featured. Prerequisites include BIO 111 and CHM 101.

BIO 305
General Vertebrate Zoology
Fall semester, odd years. 4 semester hours.
This course provides a detailed overview of the species diversity, natural history, and evolution of vertebrates. These concepts are highlighted through comparisons within and between vertebrate groups. Special emphasis is placed on evolutionary relationships to track key innovations in morphology, physiology, and ecology that have contributed to vertebrate diversification. Three hours of lecture and one two-hour laboratory session per week. Prerequisite: BIO306.
BIO 111
Botany
Spring semester, odd years. 4 semester hours.
This course provides a detailed exploration of plant anatomy and physiology. Microscope study allows for detailed observation of roots, stems and leaves and their component tissues. Examination of flowers, fruits, and seeds provides the details of pollination, fertilization, dispersal and germination. During the laboratory, students explore topics such as plant physiological responses to hormones and nutrients, characteristics and mechanisms of genetic inheritance, and ecological aspects of plant competition. The course emphasizes the relationship between plant form and function. Prerequisites: BIO111, BIO112, and CHM101.

BIO 311
Evolution
Spring semester. 3 semester hours.
A broad but detailed discussion of the genetic, ontogenetic, and morphologic changes inherent in populations. Topics include population genetics, molecular evolution, natural selection, genetic drift, gene flow, speciation, phylogenetics, and coevolution. Three hours of lecture per week. Prerequisites: BIO203 or BIO344 and MAT110 or above.

BIO 312
Cell Biology
Spring semester. 3 semester hours.
Cells are the basic units of life, and understanding cells is important for many disciplines within biology. This course examines fundamental cell biology, with emphasis on the mechanisms of molecular biology, cellular trafficking, and cell-to-cell signaling. The semester will culminate with the discussion of complex cellular behaviors such as regulation of the cell cycle, renewal of stem cells, and the progression of cancer. Each of these concepts will be discussed in the context of experimentation and hypothesis-driven research. Prerequisites: BIO111 and either BIO203 or BIO344. Three hours of lecture per week.

BIO 317
Ornithology
On demand. 4 semester hours.
A lecture and field/laboratory course detailing anatomy and physiology, ecology, evolution, and identification of birds. Topics include morphology, flight, foraging, migration, mating systems, and bird conservation. Three hours of lecture and one two-hour laboratory session per week. Prerequisite: BIO111, BIO112, and BIO306.

BIO 321
Human Anatomy and Physiology I
Fall semester. 4 semester hours.
A course requiring students to incorporate concepts from physics, chemistry, and biology to understand the interface between human structure and function and the regulatory mechanisms in play. Topics include tissue types, skeletal, muscular, nervous, respiratory, and reproductive anatomy and physiology. Three hours of lecture and one two-hour laboratory session per week. Human cadavers are used in the laboratory. Prerequisites: BIO111 and CHM101 required. CHM252 and PHS102 or PHS 202 highly recommended.

BIO 322
Human Anatomy and Physiology II
Spring semester. 4 semester hours.
In this continuation of BIO321, topics include digestive, cardiovascular, renal, urinary acid-base balance, endocrine, and immune system anatomy and physiology. Three hours of lecture and one two-hour laboratory session per week. Human cadavers are used in the laboratory. Prerequisite: BIO321.

BIO 324
Developmental Biology
Spring semester, odd years. 4 semester hours.
How do many animals develop from a fertilized egg into complex animals, some with trillions of cells? This course examines the development of complex animals from embryo to adult. In this course you will explore the mechanisms behind how an embryo establishes a body plan, grows new structures, and determines its sex. The course concludes by considering environmental effects on this process, as well as its implications for medicine and evolutionary biology. Each of these concepts will be discussed in the context of experimentation and hypothesis-driven research. Students will apply their knowledge by conducting novel research during the laboratory portion of the course. Prerequisites: BIO 111 required; BIO 203 strongly recommended. Three hours of lecture and two hours of laboratory per week.

BIO 343
Introduction to Research III
Spring semester. 2 semester hours.
Introduction to Research III is a laboratory and lecture based course that prepares students for independent upper division research. By working with individual faculty members, each student will develop an independent research project. Using techniques learned in Introduction to Research I and II, students will perform preliminary research associated with their projects, and they will learn to write and present formal research proposals for those projects. Students enrolled in Introduction to Research III will also act as mentors to students enrolled in Introduction to Research I. Students must complete Introduction to Research I and II to be eligible to enroll in Introduction to Research III. Prerequisite: BIO 243

BIO 344
Molecular Genetics
Fall semester. 3 semester hours.
Students will study the molecular mechanisms that compose the Central Dogma of Molecular Biology. Special attention will be given to genomic structure, DNA replication, transcription, RNA processing, translation, and post-translation modification. Basic techniques in molecular biology will be discussed, and these techniques will be practiced during BIO345, which is a co-requisite course. (Note: Students who have completed BIO143 and who are enrolled in BIO243 are exempt from the BIO345 laboratory course.) Co-requisite: BIO345. Pre-requisite: BIO111. Three hours of lecture per week.
BIO 345
Molecular Genetics Laboratory
Fall semester. 1 semester hour.
This course includes a hands-on, laboratory-based introduction to basic molecular biology techniques, with special emphasis on cloning and manipulation of DNA. Techniques include electrophoresis, restriction digestion, polymerase chain reaction (PCR), ligation, transformation, DNA extraction, and Southern blotting. Co-requisite: BIO344. Prerequisite: BIO111. Students who have completed BIO143 and who are enrolled in BIO243 are exempt from this course. Two hours of laboratory per week.

BIO 347
Animal Behavior
Fall semester, even years. 3 semester hours.
This course provides a broad overview of the development, expression, and control of behavior. This course provides a foundation for understanding animal ecology, revealing evolutionary relationships, and managing fish and wildlife populations. Topics include communication, predation, foraging, mating, parental care, and sociality. Prerequisite: BIO306.

BIO 349
Animal Behavior Lab
Fall semester, even years. 1 semester hour.
This course provides a broad overview of the development, expression, and control of behavior. This course provides a foundation for understanding animal ecology, revealing evolutionary relationships, and managing fish and wildlife populations. Topics include communication, predation, foraging, mating, parental care, and sociality. One two-hour laboratory session per week. Corequisite: BIO347.

BIO 410
Conservation Biology
Spring semester, odd years. 2-3 semester hours.
Students experience a multi-disciplinary approach to conservation encompassing genetics to ethics. Discussions emphasize biological diversity, extinction probability theory, reserve design, management, and reintroduction strategies. Written and oral presentations are required. Prerequisite: BIO306.

BIO 415
Ecology
Fall semester. 5 semester hours.
Students are provided with an overview of the interactions among biotic and abiotic environments. Topics include climate and vegetation, resource acquisition and allocation, demography, population growth and regulation, sociality, competition, niche theory, predation, and community and ecosystem ecology. Three hours of lecture and one two-hour laboratory session per week. Prerequisites: BIO306 and MAT110 or above.

BIO 420
Methods and Materials of Teaching Secondary Science
On demand. 2 semester hours.
This course requires focused study with a science teacher in an accredited secondary school or other acceptable professional. Hours will be arranged in consultation with the content area professor, the secondary education professor, the student, and the professional mentor. The course provides competence for the delivery and evaluation of planned learning activities. Areas of concentration include active hands-on experiences, reviewing texts for content appropriate to various grade levels, and the use of technology in the classroom. Prerequisites: acceptance in the teacher education program; senior standing required.

BIO 450
Internship
On demand. 1-12 semester hours.
Pass/fail. An internship is arranged between a member of the discipline’s faculty and the student. The internship will not count as part of the minimum number of required credits to the major or minor. Contract required. If an internship is two or more credits, the student will typically be required to write a paper. The contract will specify the minimum length of the paper and the required scholarly sources. Prerequisite: junior or senior standing.

BIO/CHM 452
Biochemistry I
Fall semester. 5 semester hours.
Biochemistry focuses on the study of the molecules and chemical reactions of life, bringing together principles learned in biology and chemistry. After an introduction to the chemistry and structure of carbohydrates, lipids, and proteins, discussions of enzyme structure and kinetics set the stage for a detailed exploration of metabolism and its regulation. The laboratory component of this course involves a semester-long integrated project that requires independent student work. This project incorporates many different types of instrumentation, including low pressure chromatography, electrophoresis, UV-Visible spectroscopy, electrochemistry, and ultrafiltration. Three lecture hours plus one laboratory lecture hour per week. Significant time working independently in the laboratory is required. Prerequisites: CHM252 with a grade of C or higher and BIO111 or permission of instructor.

BIO/CHM 460
Biochemistry II
On demand. 3 semester hours.
An introduction to the chemistry and structure of nucleotides and nucleic acids is followed by a detailed study of DNA replication and repair, RNA transcription and processing, protein synthesis, and the regulation of these processes. Bioethics, an important and interesting topic, is covered as an extension to the scientific content. This course covers topics in more depth and with a different emphasis than genetics. Prerequisites: CHM252 and either BIO/CHM452 or BIO203.

BIO 483
Dissection
Summer semester, May term. 2-3 semester hours.
Students begin to learn how to dissect a human cadaver. Each student chooses or is assigned to a region. By permission of the instructor only. Prerequisites: BIO322.
Academic Programs

BIO 490
Seminar
Spring semester. 1 semester hour.
Selected topics in biology are explored.

BIO 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Business Administration and Accountancy

Sandra L. Barz, Professor
James I. McDowell, Professor
Anthony R. Pilz, Professor
James Smith, Professor
Scott Severance, Associate Professor
Karen Beiser, Assistant Professor
Clete Knaub, Assistant Professor
Rockland John Tollefson, Visiting Assistant Professor

The objective of the business administration program is to provide graduates with the skills necessary for successful careers in business. To this end, several degree options are available, all of which are built on a traditional liberal arts foundation. Students may explore interests in business management and accounting. These options are designed to provide not only a strong business background, but also basic foundational skills. In combination with the liberal arts core, the major provides students with the opportunity to develop communication and teamwork skills. Graduates should also be prepared to be effective problem solvers, ready to face the challenges of an ever-changing business environment.

An important part of the major for many students is the opportunity to apply what they have learned through an internship experience. As a part of the major, students work in organizations and earn credit for the experience. The internship requirement provides students with valuable, real-world, practical experiences that are helpful in finding and performing well in later employment. Another hands-on learning opportunity is available through an investment course in which the students determine how to invest $100,000 of the Anderson Special Endowment.

Major in Business Management
BSA201, BSA202, BSA311, BSA321 or BSA422, BSA343, BSA450, ECO201, ECO202, ENG325, MAT210, and nine semester hours of upper division BSA electives.

Major in Managerial Accounting
BSA201, BSA202, BSA311, BSA320, BSA321, BSA324, BSA351, BSA352, BSA371, BSA422, BSA450, ECO201, ECO202, and MAT210.

Minor in Business Management
Required: BSA201, BSA202, BSA321 or BSA422, ECO201, MAT210. One elective from the following: AVS405, BSA311, BSA315, BSA318, BSA331, BSA343, BSA347, BSA361, BSA371, BSA412, BSA422, COM306, ECO301, ECO345, ECO346

Minor in Accounting
BSA201, BSA202, BSA324, BSA351, BSA352, and BSA371.

Minor in Economics
ECO201, ECO202, ECO345, ECO346, ECO402, and one of the following: ECO301, ECO305, ECO354, ECO401.

Master of Accountancy
The accountancy program at Rocky Mountain College is designed to prepare students for careers in public, governmental, not-for-profit, or industrial accounting. The program is designed to allow students to build on skills and knowledge developed through undergraduate coursework to become skilled, entry-level professional accountants upon graduation. The curriculum is based on the American Institute of Certified Public Accountants (AICPA) core competencies and prepares students to sit for the certified public accountant exam. In its entirety, the program is comprised of both undergraduate and graduate study, which leads, ultimately, to the master of accountancy degree.

Students who begin the accountancy program as undergraduates will graduate, upon completion of all requirements, with both a bachelor of science in business management and a master of accountancy. The entire curriculum consists of 150 semester hours, and students are required to meet all Rocky Mountain College degree requirements. In addition to the College’s general education requirements, degree candidates must complete the following coursework for the bachelor of science:

Master of Accountancy with a BS in Business Management
Required courses include: BSA201, BSA202, BSA311, BSA321 or BSA422, BSA343, BSA450, ECO201, ECO202, ECO301, MAT210, and nine semester hours of electives. To ensure CPA Exam eligibility, candidates should take care to select electives in business administration and accountancy disciplines other than accounting. BSA331 is highly recommended as one of these electives. In addition to the requirements noted above, candidates should also complete BSA371. In all cases, CPA exam eligibility requirements for the state in which the candidate intends to sit for the exam should be consulted to ensure that the candidate’s educational program satisfies exam eligibility requirements.

Master of Accountancy
Degree candidates must complete the following: BSA505, BSA507, BSA521, BSA522, BSA553, BSA608, BSA653, BSA672, and BSA673. BSA352 is a prerequisite for the master-level courses. Students who enter the accountancy program as baccalaureate degree holders from an institution other than Rocky Mountain College must meet only the master of accountancy requirements and will graduate only with the master of accountancy. These students should consult with their academic advisor to ensure that, in total, their academic preparation makes them eligible for the CPA exam. Depending upon the student’s academic background, addi-
tional courses may be necessary to become eligible for the CPA exam.

**Business Administration and Accountancy Courses**

**BSA 101**  
**Introduction to Business**  
Fall semester. 3 semester hours.  
A beginning business course designed to introduce students to the areas of business study: historical foundations of America's free enterprise system, ethics and social responsibility in the business setting, entrepreneurship, the legal structures of business, marketing, and general management.

**BSA 201**  
**Principles of Accounting I**  
Fall and spring semesters. 3 semester hours.  
A course designed to develop an understanding of the uses and limitations of accounting for economic measurement in decision-making. This course includes basic transactions, adjusting entries, preparation of worksheets and financial statements, receivables, inventory, fixed assets, and payroll.

**BSA 202**  
**Principles of Accounting II**  
Fall and spring semesters. 3 semester hours.  
A continuation of BSA201, which includes long-term liabilities, partnerships, corporate accounting, statement of cash flow, basic financial statement analysis, and the use of accounting data in decision-making. Prerequisite: BSA201.

**BSA 291**  
**Field Practicum**  
On demand. 1-3 semester hours.  
This course provides practical experience in an organization for students interested in exploring career opportunities. The course does not satisfy the experiential learning requirement, nor does it count toward the major. Prerequisite: permission of professor.

**BSA 311**  
**Principles of Finance**  
Fall semester. 3 semester hours.  
Students are introduced to the principles of business finance. Topics covered include financial analysis and planning, working capital management, the time value of money, and capital budgeting. Prerequisites: ECO201, ECO202, BSA201, and BSA202.

**BSA 313**  
**Students in Free Enterprise**  
Fall and spring semesters. 3 semester hours.  
Students will develop skills in leadership, communication, and teamwork through learning and practicing the principles of free enterprise. Students select, plan, and implement real-world projects and compete annually at the regional SIFE competition. This course can be taken a maximum of three times, but only three credits may count toward the major.

**BSA 315**  
**Principles of International Business**  
Spring semester. 3 semester hours.  
Introduction to the principles of international business with an emphasis on the influence of culture, rules and regulations, language, use of modern technology in the management of international firms, international finance, and monetary problems. Case studies show how major corporations have been organized in foreign markets. The roles of the IMF/World Bank, WTO, and other international agencies are discussed. Problems relating to globalization are stressed. Class participation and research of important roles and problems facing international corporations in the world's markets are an important part of this course. Prerequisites: BSA201, BSA202, ECO201, ECO202; and junior standing.

**BSA 318**  
**Entrepreneurship**  
Fall semester. 3 semester hours.  
Students will learn the characteristics of successful entrepreneurs, how to seek and evaluate opportunities for new ventures, how to prepare a complete business plan, and how to plan strategies and gather resources to create business opportunities.

**BSA 320**  
**Management Information Systems**  
Spring semester. 3 semester hours.  
Students study information technology and its relationship to the business world. Designed to provide business students with general insights into information technology beyond the introductory level. This course is often required as a prerequisite for master’s level business programs.

**BSA 321**  
**Principles of Management**  
Fall and spring semesters. 3 semester hours.  
Students examine the management functions and basic concepts and principles of management, including planning, organization, coordination, control, job design, and human resource management. Topics in human resource management include recruitment, selection, administration of personnel policies, and dismissals. Prerequisite: junior or senior standing. This course is often required as a prerequisite for master’s level business programs.

**BSA 324**  
**Taxation for Managers**  
Spring semester. 3 semester hours.  
This course provides an analysis of the effects of tax law upon business transactions and related decision-making. Emphasis is placed on tax planning and tax minimization strategies. Prerequisite: BSA202.

**BSA 331**  
**Business Law**  
Fall semester. 3 semester hours.  
A course that explores the legal principles relating to business transactions: contracts, sales, commercial paper, intellectual property, and e-commerce. A study of the legal environment of business is emphasized. This course is often required as a prerequisite for master’s level business programs.
BSA 336  
**Human Resource Management**  
Spring semester. 3 semester hours.  
Introduction to the Human Resource functions of workforce planning, legal requirements, work design, recruiting, selection, training and development, performance management, labor and employee relations.

BSA 343  
**Principles of Marketing**  
Fall and spring semesters. 3 semester hours.  
This course studies the marketing process from product development through consumer purchase. Includes examination of consumer buying behavior, marketing channels, physical distribution, pricing policies and promotion along with their role in the marketing process. Prerequisite: junior or senior standing.

BSA 347  
**Principles of Investing**  
Spring semester. 3 semester hours.  
This course explores those financial institutions that serve our free market society. Along the way, students will learn about common stocks and bonds and how to analyze those instruments. Students will be exposed to "contrary thinking" and will be encouraged to think for themselves. All of these issues will be interwoven with logical lessons about life and the pursuit of high ethical standards.

BSA 351  
**Financial Reporting I**  
Fall semester. 3 semester hours.  
A course which covers proper income statement and balance sheet presentation in accordance with current professional pronouncements. Other topics included are current value concepts, inventory, cash and receivables, plant assets, and intangible assets. Prerequisite: BSA202.

BSA 352  
**Financial Reporting II**  
Spring semester. 3 semester hours.  
This course, a continuation of BSA351, considers proper accounting for current and long-term liabilities, investments, pensions, and leases. Various aspects of stockholders' equity and the analysis of financial statements are also included. Prerequisite: BSA351.

BSA 356  
**Economic Decision Making**  
Fall and spring semesters. 3 semester hours.  
This course provides an introduction to the principles of sound economic and financial decision making both for organizations and for individuals. Students also become familiar with the foundational principles of management, planning, and performance assessment. This course does not count toward a major or minor in business management or accounting.

BSA 361  
**Retailing**  
Fall semester. 3 semester hours.  
This course focuses on the study of retail institutions, basic principles of retail merchandising, buying and selling products, the importance of store location and layout, and the principles of store and personnel management. Prerequisite: junior or senior standing.

BSA 362  
**Professional Sales**  
Fall semester. 3 semester hours.  
This course teaches the basic concepts required to become successful in the field of sales, focusing primarily on business-to-business selling. It includes such topics as understanding the sales cycle, how to make successful sales presentations, understanding the importance of relationships in the sales process, handling objections, and how to close. Prerequisites: Junior or senior level.

BSA 371  
**Managerial Accounting**  
Fall or spring semester. 3 semester hours.  
Students examine how managers use accounting information and how that information should be gathered and provided. Topics include the measurement and use of cost information, cost control, budgeting, performance appraisal, and decision-making using accounting information. Prerequisites: BSA202 and ECO202.

BSA 380  
**Doing Business in and with China**  
Fall semester. 3 semester hours.  
This course and trip will provide students with an opportunity to study and learn about dynamics of a rising economic system. A portion of the course will consist of preparation time during the fall semester, and the class will culminate in a trip to China in December 2011. Class members will study and observe the Chinese economy as well as its society, business, culture, and people and will understand opportunities, challenges, and problems that exist in China today, especially China as new member of World Trade Organization (WTO). Students will have opportunities to communicate and exchange ideas with Chinese business students and business professionals. Furthermore, an opportunity will be created for students to visit Chinese organizations and to discuss opportunities for partnerships and joint ventures. Of course, students will also visit historical and cultural sites such as The Great Wall and Forbidden City. The group will spend time in Beijing and Shanghai and have the opportunity to acquaint themselves with Chinese culture and life.

BSA/AVS 405  
**Air Transportation Management**  
Fall semester. 3 semester hours.  
This course provides a comprehensive experience for the aviation or business student by examining the air transportation industry. Areas of concentration: airline operation, maintenance, marketing, and economic factors affecting the industry. The class uses a simulation program where students create an airline and then compete with other students. Prerequisite: junior or senior standing.

BSA 412  
**Business Ethics**  
Fall semester. 3 semester hours.
A study of the ethical problems that evolve in the modern business world, including a brief history of ethics and the practical ethical problems associated with running a business. Knowledge of ethical concepts as they apply to business management is explored through case studies and student class presentations. Emphasis is on the role of management as it affects stockholders, employees, customers, and competitors. Issues such as product safety, plant closures, advertising, doing business in other countries, and the overall role of business and society are discussed. Prerequisite: junior or senior standing.

BSA 421
Strategic Management
Spring semester. 3 semester hours.
The primary goal of this course is to prepare students to think like general managers. Through discussions, supplemental readings and case studies, we will explore the strategies that cause some businesses to fail and others to succeed. This course provides a capstone experience for the business management major. Prerequisite: senior standing.

BSA 422
Production and Operations Management
Spring semester. 3 semester hours.
An introduction to various aspects of production, resource, and operations management, which focuses on production methodologies, scheduling, inventory control, quality control, and project management. Performance evaluation and resource planning are also emphasized. This course is often required as a prerequisite for Masters-level business programs. Prerequisites: BSA202, ECO202.

BSA 450
Internship
On demand. 3 semester hours.
Guided work experience and study of a professional nature in an established business, government agency, or other institution. Contract is required. A minimum of three semester hours is required, but no more than three semester hours will count toward the major. Prerequisites: junior or senior standing and consent of the business faculty.

BSA 480
Topics in Leadership
Fall semester. 1 credit.
This course is designed to expose students to a variety of leadership styles and traits through the use of guest speakers. Students will have the opportunity to gain insight into various careers; insight that goes beyond typical classroom exploration. Furthermore, students will have the opportunity to practice critical analysis skills through a variety of case studies.

BSA 490
Seminar
On demand. 1-3 semester hours.
Selected topics in business are explored.

BSA 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

BSA 505
Cost Accounting
Spring semester, alternate years. 3 semester hours.
This course introduces the primary principle of cost management – costs do not just happen; they are the results of management decisions. Topics of study include cost concepts and applications, costing methods, the value chain, cost-profit-volume analysis, best cost management practices and other techniques to aid management in planning and controlling business activities. Prerequisite: BSA352.

BSA 507
Taxation of Individuals
Fall semester, alternate years. 3 semester hours.
A study of federal income tax law as it applies to individual taxpayers, including sole-proprietorship business entities. The course also includes an introduction to the tax research process. Cases will be used to apply the tax research process. Prerequisite: BSA352.

BSA 521
Advanced Financial Management
Spring semester, alternate years. 3 semester hours.
An advanced study of financial management issues as they pertain to public and private corporations. Topics include capital budgeting, cost of capital, capital structure, financing strategy, dividend policy and business valuation. Prerequisite: BSA352.

BSA 522
Accounting Information Systems
Spring semester, alternate years. 3 semester hours.
Students explore the elements of both manual and computerized accounting information systems. Topics include system development, internal control, and the role of database and network technology in accounting information systems. Prerequisite: BSA352.

BSA 553
Financial Reporting III
Fall semester, alternate years. 3 semester hours.
Students examine advanced topics in the financial reporting process including leases, post-retirement benefits, deferred taxes, revenue recognition, and investments. The FASB standard setting process will also be discussed, and accounting research processes will be introduced. Prerequisite: BSA352.
BSA 608  
**Taxation of Partnerships, Corporations, Estates and Trusts**  
Spring semester, alternate years. 3 semester hours.  
A study of federal income tax law as it applies to partnerships, corporations, estates and trusts. Further application of the tax research process through case analysis is also addressed. Prerequisite: BSA352.

BSA 653  
**Financial Reporting IV**  
Spring semester, alternate years. 3 semester hours.  
This course introduces the theory and practice relative to business combinations, mergers, consolidations, and acquisitions. Other topics include partnerships, foreign operations, financial reporting and the Securities and Exchange Commission, segment and interim reporting, legal reorganizations and liquidations, estates and trusts, and governmental and not-for-profit accounting. Prerequisite: BSA352.

BSA 672  
**Auditing**  
Fall semester, alternate years. 3 semester hours.  
This course addresses the many changes implemented in the corporate sector and the auditing profession since the passage of the Sarbanes-Oxley Act and the implementation of the Public Company Accounting oversight Board (PCAOB). Areas of study include professional ethics, auditor's legal liability, the auditing environment, internal controls, working papers, the auditor's report, and the accounting profession's credibility crisis. Prerequisite: BSA352.

BSA 673  
**Not-For-Profit Accounting**  
Fall semester, alternate years. 3 semester hours.  
This course provides the fundamental knowledge necessary to learn about the operation of governments, universities, hospitals, and other nonprofits. The specific accounting, auditing, and financial reporting practices and standards used by these entities will be emphasized. Prerequisite: BSA352.

**Economics courses**

ECO 201  
**Principles of Macroeconomics**  
Fall and spring semesters. 3 semester hours.  
This course is the study of aggregate economic problems, including an introduction to the economics of full employment, economic growth, and price stability.

ECO 202  
**Principles of Microeconomics**  
Fall and spring semesters. 3 semester hours.  
Students study individual economic problems. This course offers an introduction to production and exchange, pricing policies, and resource allocation under alternative competitive situations.

ECO 301  
**Money and Banking**  
Fall or spring semester. 3 semester hours.  

This course provides a critical analysis of the theoretical and practical operations of modern financial intermediaries and their relation to the Federal Reserve Bank and international money markets. Prerequisite: ECO201.

ECO 305  
**American Economic History**  
On demand. 3 semester hours.  
Students explore a history of the American economy from colonial to modern times with emphasis on industrial growth, government policy, and agriculture.

ECO 345  
**Intermediate Microeconomics**  
Fall semester, alternate years. 3 semester hours.  
Students explore a theoretical study of industry, business, and household decision-making in the context of perfect and imperfect competition. The theory of production, exchange, and distribution under static and dynamic conditions will be examined. Prerequisite: ECO202.

ECO 346  
**Intermediate Macroeconomics**  
Fall semester, alternate years. 3 semester hours.  
This course examines an analysis of Keynesian and post-Keynesian economic theories of national income, employment, and growth. Prerequisite: ECO201.

ECO 354  
**Environmental Economics**  
Spring semester, alternate years. 3 semester hours.  
Students examine the application of microeconomics to problems of the environment. This course is offered both for the major and for those interested in environmental problems. Prerequisite: ECO202.

ECO 401  
**International Trade**  
Spring semester, alternate years. 3 semester hours.  
The structure of world trade, the effect of international trade upon national income, exchange rates, problems of foreign aid and investment, and industrialization of underdeveloped countries. Prerequisites: ECO201 and ECO202.

ECO 402  
**Development of Economic Ideas**  
Fall semester, alternate years. 3 semester hours.  
Historic development of economic theory. Emphasis is analytical; consideration is given to institutional and philosophical backgrounds.

ECO 450  
**Internship**  
On demand. 1-12 semester hours.  
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student's major or minor area of study. Contract is required. Prerequisites: junior or senior standing.
Chemistry

Chemistry is the central science and an important component of a liberal arts education. The program emphasizes a molecular view of matter and reactions, a view that combines the intrigue of theories and the power of practical applications. Our own bodies, the clothes we wear, the medicines we take, the food we eat, and the fuel we pump into our vehicles - all are various combinations of incredibly tiny particles called molecules, that are themselves composed of atoms. The knowledge of substances and chemical reactions is essential to the practice of the other physical and health sciences. Our program teaches the fundamentals of general chemistry, analytical chemistry, organic chemistry, physical chemistry, and biochemistry with a consideration of the molecular view of matter and reactions, a view that combines the intrigue of theories and the power of practical applications. In addition, our students develop critical thinking skills and problem-solving skills, both desirable attributes for graduates.

Chemistry is an experimental science, and laboratory work is a key component to many of the courses in our program. Students are trained to propose hypotheses, test them qualitatively and quantitatively by experiments, and form conclusions. In addition to learning the classical laboratory techniques, our students also obtain hands-on experience in operating a variety of modern chemical instrumentation including the gas chromatograph and the nuclear magnetic resonance spectrometer. Students are also encouraged to participate in research projects within the department.

The chemistry program prepares students for graduate study in chemistry and for acceptance into graduate programs at medical, veterinary, pharmacy, physical therapy, or law schools. The program also prepares graduates for direct entry into several chemistry-related careers. Graduates of our chemistry program have excelled in graduate and professional schools and in their careers.

Major in Chemistry

A minimum of 37 semester hours in chemistry including CHM101, CHM102, CHM251, CHM252, CHM336, CHM338, CHM401, and CHM452. In addition, IDS243, MAT175, MAT176, PHS201, and PHS202 are corequisites. All electives must be 200-level and higher chemistry courses. Internship credits do not count towards the 37 chemistry credits required in the major.

Minor in Chemistry

A minimum of 24 semester hours in chemistry including CHM101, CHM102, CHM251, and choice of CHM336 or CHM338. All electives must be 200-level and higher chemistry courses. Internship credits do not count towards the 24 chemistry credits required in the minor.

Major in Science Broadfield Education Chemistry

This major serves those who desire to teach the several sciences necessary in American schools. In addition to the science courses listed below, students must complete the professional education program for secondary teaching as described in the “education” section of the catalog.

Required are the following courses:

Chemistry: A total of 20 hours in chemistry courses including CHM101, CHM102, CHM251; plus any two of the following: CHM252, CHM336, CHM338, CHM340, CHM401; and

Mathematics: MAT175, MAT176, and MAT210; and

Biology: BIO111, BIO112, BIO203, and BIO306; and

Physics: PHS201, PHS202, and PHS225; and

Geology: GEO101 and GEO104, and

Environmental Science: ESC105 and

Chemistry courses

CHM 100

Chemistry of Everyday Life

Spring semester, even years. 4 semester hours.

An introductory course for students interested in learning about the major role that chemistry plays in our modern society and in our daily lives. Emphasis will be on how chemical principles relate to topics such as diet and nutrition, food additives, pharmaceutical compounds, household chemicals, natural and synthetic fibers, pesticides, batteries, and alternative energy sources. This course is a lab science elective for non-science majors but does not count as credit toward a chemistry major or minor. A previous background in science or college-level mathematics is not required for enrollment. Three hours of lecture and one two-hour laboratory session per week.

CHM 101

General Chemistry I

Fall semester. 4 semester hours.

This course introduces students to the science of chemistry. The concepts of atoms, molecules, bonding, and energy successfully explain the properties of matter and how reactions happen. Goals of this course include introducing students to...
representative materials and reactions, to important models and theories of the science, and to the symbols and language of chemists. The laboratory will involve observations of elements, compounds and their reactions (including synthesis), and quantitative measurements of properties or amounts of matter. Three hours of lecture, one two-hour laboratory session, and one hour of recitation per week. Prerequisite: MAT100 or higher mathematics course or placement into MAT110 or higher mathematics course.

**CHM 102 General Chemistry II**
Spring semester. 4 semester hours.
This course will further develop the principles presented in CHM 101 with the emphasis on the following core concepts: molecular structure and bonding theory, gas laws, chemical kinetics, catalysis, chemical equilibrium, solutions, acids and bases, and reaction thermodynamics. Students will apply the concepts learned in the general chemistry sequence to a poster presentation of the chemistry and properties of their selected molecule, related to contemporary issues in society. The laboratory experiments are designed to explore chemical principles and to expose students to more advanced chemical instrumentation in the department. Three hours of lecture, one hour of recitation, and one two-hour laboratory session per week. Prerequisite: CHM101 with a grade of C or higher.

**CHM 105 Chemical Magic**
Fall semester. 1 or 2 semester hours.
This course will involve the student in chemistry demonstrations and chemistry magic shows to the community and to students in the CHM 101 lectures. Students will not only learn the “secrets” behind visually spectacular reactions, but they will also learn aspects of chemical preparation, presentation of chemistry to the general public, safe handling of chemicals, and proper clean-up after the show. Much of this course is dedicated to selecting, testing and development of chemical demonstrations in the laboratory. Students taking this course for 2 semester hours will be required to participate in off-campus chemical magic shows. One one-hour laboratory session per week. Prerequisite: CHM102 with a grade of C or higher.

**CHM 123 Introduction to Chemistry Research I**
Spring semester. 1 semester hour.
This course is a laboratory-based introduction to the common techniques of research in the chemical sciences. Students will learn about safety, chemical hygiene, laboratory organization, solution and sample preparation, storage and labeling of chemical bottles, separation and purification methods, use of equipment, and about keeping records in a notebook. In addition, an introduction to the use of handbooks, databases, and common software including structure-drawing programs will be presented. The student will also begin selecting a research project with a chosen faculty member of the chemistry department. One two-hour laboratory session per week. Prerequisites: CHM101 with a grade of C or higher, and students must apply for acceptance to the course.

**CHM 223 Introduction to Chemistry Research II**
Fall semester. 2 semester hours.
This course will further develop laboratory, experimental, instrumental, and computational techniques from Introduction to Research I. The use and capabilities of selected instruments in the department will be explored according to the interests and projects of the students. Students will begin working on research with close supervision by a faculty mentor. In addition, students will participate in a weekly discussion to learn how to read, analyze and present articles from scientific journals. One one-hour lecture/discussion and one two-hour laboratory session per week. Prerequisite: CHM123.

**CHM 224 Introduction to Chemistry Research III**
Spring semester. 2 semester hours.
This course is designed to prepare students for independent research, so that less immediate supervision by their faculty mentor is required. They will continue working on research with supervision by a faculty mentor. Students in this course will also learn about research proposals and funding agencies. They will use their background and planning from Introduction to Research I and II to develop and present their proposal of a research project, in consultation with their individual faculty mentor. Students will formally present preliminary results of their research to faculty and students in a seminar or poster presentation. In addition, students in this course will be expected to mentor students in Introduction to Research I. One one-hour lecture and one two-hour laboratory session per week. Prerequisite: CHM223.

**CHM 251 Organic Chemistry I**
Fall semester. 4 semester hours.
An introduction to the chemistry of carbon-containing compounds, concentrating on the structures, properties, and reactions of some of the important families of organic compounds. Considerable emphasis is placed on reaction mechanisms and stereochemistry. The laboratory experiments introduce techniques for the isolation and preparation of compounds. Three hours of lecture and one three-hour laboratory session per week. Prerequisite: CHM102 with a grade of C or higher.

**CHM 252 Organic Chemistry II**
Spring semester. 4 semester hours.
This course, a continuation of Organic Chemistry I, concentrates on the chemistry of additional important families of organic compounds, emphasizing reaction mechanisms, synthesis, stereochemistry, and biological molecules. The laboratory experiments include the synthesis and analysis of compounds with biological and industrial importance and qualitative analysis. Prerequisite: CHM251 with a grade of C or higher.

**CHM 260 History of Chemistry: Chemical Connections**
Fall semester, even years. 3 semester hours.
Considering history as a web of related events rather than as
a series of unrelated time-lines allows interesting connections between seemingly unrelated historical events. This course looks at how seemingly unrelated historical events are connected to various chemical discoveries, and also how these discoveries led to unforeseen future results. Chemistry will be the recurring thread throughout the connections made in the course but the discussions of chemical concepts and discoveries will be at a level easily understandable by students with just a basic background in chemistry and science.

**CHM 336 Instrumental Analysis**
Fall semester. 4 semester hours.
A course to introduce the student to the theory and practice of using advanced chemical instruments available in the department, including UV-visible spectrophotometers, atomic absorption (AA) spectrometer, infrared (FTIR) spectrometer, nuclear magnetic resonance (NMR) spectrometer, gas chromatograph (GC), liquid chromatograph (LC), ion-selective electrodes (ISE), and cyclic voltammetry (CV). Basic theory of each instrument and interpretation of the output will be presented. Students will also learn sample preparation and loading for each instrument, as well as have the opportunity to explore the effects of changing operating conditions. Three hours of lecture and one three-hour laboratory session per week. Prerequisite: CHM252 with a grade of C or higher.

**CHM 338 Chemical Equilibrium & Analysis**
Spring semester. 4 semester hours.
The classical methods of chemical analysis of samples rely on stoichiometry and various classes of chemical reactions introduced in CHM101 and CHM102. In particular, the concept of chemical equilibrium and Le Châtelier’s principle will be further explored in this course as it is central to chemical analyses, both classical and instrumental. The lectures will also include chemical calculations, statistical testing, and error analysis of experimental data. The principles of precipitation, acid-base neutralization, complex-formation, and redox reactions presented in the lecture will be applied in the laboratory to titrimetric, gravimetric, and potentiometric analyses of samples in the laboratory. The laboratory will also emphasize methods to enable accurate and precise determinations of composition. Three hours of lecture and one three-hour laboratory session per week. Prerequisite: CHM102 with a grade of C or higher.

**CHM 340 Environmental Chemistry**
Spring semester, odd years. 4 semester hours.
An upper-level science elective for science students interested in seeing the fascinating role that chemistry plays in many current challenges to our environment (air, water, and soil) and to our energy needs. The chemistry of natural processes will be discussed, along with causes of, and potential solutions to, various environmental problems. The laboratory portion of this course includes analytical techniques, separations, chemical synthesis, and modeling. Three hours of lecture plus one three-hour laboratory session per week. Prerequisite: CHM252. Completion or concurrent enrollment in CHM338 is advised.

**CHM 401 Chemical Thermodynamics**
Fall semester. 4 semester hours.
The relationship between heat and work (thermodynamics) is enormously powerful for predicting the behavior of material systems in chemistry and biology. Students will explore the properties of matter (gases, solids, liquids, solutions, and mixtures) using classical thermodynamics enriched with the molecular insight from chemistry. State functions such as enthalpy, entropy, and Gibbs free energy will be explored and used for predicting the spontaneous direction of physical transformations and chemical reactions. Students will also explore a complementary view of chemistry from kinetics, or the rate at which changes happen. The use of rate laws to discern the mechanism of reactions will be explained, as well as the importance of catalysis to life and industry. Laboratory experiments will emphasize the measurement of physical properties of materials, as well as experimental design and development towards this purpose. Three lectures and one 3-hour lab session per week. Prerequisites: CHM252 with a grade of C or higher. Corequisite: PHS201.

**CHM 402 Quantum Chemistry**
Spring semester. 4 semester hours.
The experimental behavior of tiny, nanoscopic objects like electrons and atoms are best explained by quantum theory developed in the early 20th century. This course will give the historical overview and an introduction to applying quantum theory to simple systems like a particle confined in a box. The use of wavefunctions, operators and Schrödinger’s equation will be explained. Students will explore systems like electrons in conjugated bonds, the harmonic oscillator, the hydrogen atom, multielectron atoms, and molecules. Since spectroscopy probes the quantized energy levels in chemical species, the basics of modern molecular spectroscopy will also be discussed and will be the focus of laboratory experiments. There will also be exercises in computational modeling of molecules. Three lectures per week and one three-hour lab per week. Prerequisites: CHM401 and PHS201, both with a grade of C or higher. Previous or concurrent enrollment in PHS202 is advised.
CHM 443
Organic Spectroscopic Analysis
On demand. 3 semester hours.
The characterization and structure elucidation of organic compounds by spectral methods including mass spectrometry, infrared spectroscopy, ultraviolet spectroscopy, and nuclear magnetic resonance spectroscopy. Prerequisite: CHM252.

CHM 450
Internship
On demand. 1-12 semester hours.
A maximum of three semester hours can be counted toward the major in chemistry. This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with a chemistry advisor and the office of career services. The internship should relate to the student's major or minor area of study. Contract is required. Prerequisite: junior or senior standing.

CHM/BIO 452
Biochemistry I
Fall semester. 5 semester hours
Biochemistry focuses on the study of the molecules and chemical reactions of life, bringing together principles learned in biology and chemistry. After an introduction to the chemistry and structure of carbohydrates, lipids, and proteins, discussions of enzyme structure and kinetics set the stage for a detailed exploration of metabolism and its regulation. The laboratory component of this course involves a semester-long integrated project that requires independent student work. This project incorporates many different types of instrumentation, including low pressure chromatography, electrophoresis, UV-Visible spectroscopy, electrochemistry, and ultrafiltration. Three lecture hours plus one laboratory lecture hour per week. Significant time working independently in the laboratory is required. Prerequisites: CHM252 with a grade of C or higher and BIO 111 or permission of instructor.

CHM/BIO 460
Biochemistry II
On demand. 3 semester hours.
An introduction to the chemistry and structure of nucleotides and nucleic acids is followed by a detailed study of DNA replication and repair, RNA transcription and processing, protein synthesis, and the regulation of these processes. Bioethics, an important and interesting topic, is covered as an extension to the scientific content. This course covers topics in more depth and with a different emphasis than genetics. Prerequisite: CHM252 and either BIO/CHM452 or BIO203.

CHM 490
Seminar
Fall or spring semester. 1-3 semester hours.
This course is a discussion of a specialized area in chemistry. The subject matter and requirements of the course will vary semester to semester and by instructor. Students should see the instructor of that semester's seminar for information about the course description and the prerequisites. Students may take this course up to three times for credit; a maximum of three credit hours can count toward the major or minor.

CHM 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Communication Studies
Victoria Christie, Professor
Erin Reser, Associate Professor
Shelby Jo Long-Hammond, Assistant Professor

In studying communication, students learn to express themselves, to develop critical thinking skills and to explore ethical issues. Students become articulate and intentional communicators, respecting the power of the spoken and written word. Communication Studies is a strong stand-alone major, and is also common as a double-major or minor. The skills learned when studying communication are some of those most sought after by employers. Careers available to the Communication Studies major include diverse professions such as public relations, event planning, graduate school, teaching, sales, or law, just to name a few.

Major in Communication Studies
A minimum of 39 semester hours, including COM101, COM102, COM240, COM250, COM260, COM306, COM310, COM355, COM402, one rhetoric course at the 300 or 400 level, COM490, and two out of the following four: COM308, ENG325, ENG365, or any three credit COM special topics course at the 300 or 400 level. A maximum of three semester hours of internship may be applied toward the major.

Minor in Communication Studies
A minimum of 24 semester hours, including COM101, COM102, COM240, COM250, COM260, COM306, COM310, COM402, and one course from the following: COM308, COM355 or another 300- or 400-level course, chosen in consultation with a faculty member in Communication Studies, in Theatre, English, or Communication Studies. A maximum of three semester hours of internship may be applied toward the minor.

Communication courses

COM 101
Interpersonal Communication
Fall semester, alternate years. 3 semester hours.
This course examines how intimate, personal, and professional relationships are created and maintained. Students develop an increased awareness of and sensitivity to behaviors, which facilitate effective interpersonal communication as well as to those behaviors, which serve as obstacles. The course addresses topics such as perception, self-concept, listening, and interpersonal conflict.
COM 102
Public Speaking
Fall and spring semesters. 3 semester hours.
In this skills-based course, students deliver informative and persuasive speeches. The course examines audience analysis, speech organization and delivery, developing support materials, and persuasive appeals. By the end of the course, students are able to speak competently and confidently to many types of audiences.

COM 240
Rhetoric of Western Thought
Fall semester, alternate years. 3 semester hours.
Language is a series of symbols that allows us to communicate with other people. Language symbols also enable the comprehension of feelings, intentions, persuasion, and meaning. The study of rhetoric explores how communication shapes our culture, our leaders, our ethics and our society. The course investigates the evolution of rhetorical theories from ancient Greece to contemporary models of communication. Additionally, the course will focus on the application of theories to contemporary communication events.

COM 247
Communication Projects
On demand. 1 semester hour.
Students pursue special research in communication studies. Prerequisite: permission of professor.

COM 250
Small Group Communication
Fall and spring semesters. 3 semester hours.
This course explores how and why people come together in groups, how groups develop norms for acceptable behavior, and how individuals can help groups work efficiently. Students examine group processes, learning the reasons why groups succeed or fail. Students learn how to run meetings fairly and efficiently.

COM 257
Intercollegiate Forensics
Fall and spring semesters. 1 semester hour.
This course is designed for students actively preparing for, and/or participating in, individual intercollegiate events or debate. Pass/no pass grading.

COM 260
Debating Contemporary Issues
Fall and spring semesters. 3 semester hours.
The course explores how people reason and what makes a good persuasive speaking style. After choosing topics on current events, students prepare their arguments and then debate. Students learn to develop effective persuasive speaking skills and to constructively analyze the arguments of others. Prerequisite: COM 102.

COM 306
Organizational Communication
Fall semester, alternate years. 3 semester hours.
Organizational communication is the study of how communication occurs in large cooperative networks, especially in work settings. Students learn how to supervise people, attract customers and clients, and understand the values and cultures of the organization within which they work. Knowledge of organizational communication is especially useful for future employees of corporate and non-profit organizations, since effective communication is a critical skill for success. Prerequisite: COM 102.

COM 308
Intercultural Communication
Fall semester, alternate years. 3 semester hours.
Language, thought, and a particular way of viewing the world are all conveyed through culture, which can refer to people bound together by a shared language or to a sub-set of people contained within a larger society. Intercultural communication examines the way in which culture influences communicative practices behaviorally, affectively, and cognitively. Students who expect to participate in an international work place will better understand the importance of intercultural communication. Prerequisite: COM 102.

COM 310
Communication Theory
Fall semester, alternate years. 3 semester hours.
This course explores theories that explain communication behavior in relationships, in group decision-making, in work organizations, and in the media. Communication theory explains how and why people construct meaning, how theories explain fact patterns, and what constitutes an appropriate test of a theory. Students will appreciate some of the strange and wonderful things humans do as we create and interpret symbols. Prerequisite: COM 102.

COM 355
Mass Media
Spring semester, alternate years. 3 semester hours.
This course explores how communication media, whether smoke signals, newspapers, television or the Internet, influence human communication. We are different people than in the past because we can instantaneously reach people around the globe. With each change in technology, communication changes. These changes alter what it means to be human. Students must be able to understand the power of media to better manage its influence in their personal and professional lives. Prerequisite: COM 102.

COM 402
Interviewing
Spring semester, alternate years. 3 semester hours.
Interviewing is a skill with both theoretical and practical applications. This course prepares students to be excellent interviewers and interviewees in employment, informational, survey, and performance appraisal interviewing. Students also learn resume writing and how to write recommendations, as well as how to create and sustain supportive networks in the work-world. Prerequisite: COM 102.

COM 404
Rhetoric of Protest and Dissent
Spring semester, alternate years. 3 semester hours.
Throughout history, people have protested injustice, prejudice, inhumanity, and colonialism. They have tried, and even sometimes succeeded, in protesting without violence.
Academic Programs

Persuasion is an alternative to physical aggression. This course examines why and how protest occurs, the challenges protesters face rhetorically, and the available options from which protesters can choose. Students will emerge with an appreciation of how difficult protest is and how important it is for a vital society. Prerequisite: COM102, COM240.

COM 447
Communication Projects
On demand. 1 semester hour.
Students pursue special research in communication studies. Prerequisite: permission of professor.

COM 450
Internship
On demand. 1-12 semester hours.
This course is a guided work experience in an established institution such as a non-profit or for-profit organization or a governmental institution. The student must arrange the internship in agreement with the instructor and the office of career services, and the internship must be a learning experience that is connected with the professional communication degree. A contract is required. A maximum of three semester hours can be counted toward the major in communication. Prerequisites: junior or senior standing.

COM 457
Intercollegiate Forensics
Fall and spring semesters. 1 semester hour.
This course is designed for students actively preparing for, and/or participating in, individual intercollegiate events or debate. Pass/no pass grading.

COM 490
Seminar in Communication
Spring semester, alternate years. 3 semester hours.
At the basis of communication is the creation of community. Through writing and speaking, students in this capstone course explore why and how people create communities and what kind of communities they create. Each seminar will focus upon a special theme, such as the implications of free speech or postmodern organizational ethics. For example, in the free speech seminar, students analyze the origins and controversies surrounding free speech, and the consequences free speech, or the lack of it, has upon self-government. Prerequisite: COM102

COM 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Computer Science
K. Stuart Smith, Associate Professor
Andrew Wildenberg, Associate Professor

The computer science program combines the analysis of computing systems with the art and science of creating computer software. The program emphasizes the development of software solutions and the study of the hardware and software systems that provides the execution environment for those solutions. We firmly believe that the development of software has two distinct components: creation of programs to solve problems and the subsequent translation of those programs into code using an appropriate language.

Students choosing computer science will receive education far beyond the ability to write functional programs. The program is designed to serve as a basis for obtaining employment in industry or as a foundation for graduate studies through required internships and undergraduate research opportunities.

Major in Computer Science
A minimum of 38 semester hours in computer science is required, including either CSC130 and CSC131 or CSC143; also required are CSC214, CSC251, CSC330, CSC351 or CSC360, CSC344, CSC352, CSC353, and either CSC450 or CSC499 (CSC450 is very strongly preferred). An additional 9 semester hours of elective computer science coursework is required to complete the major, of which at least 6 semester hours must be upper-division coursework.

A minimum grade of “C” is required in each of the non-elec-
tive computer science courses. Computer science prerequisite courses must have a minimum grade of “C” to continue to dependent coursework.

Notes:
• CSC352 and CSC353 may each be taken twice and applied to the major requirements so long as each study represents a different programming language. At least one credit each of CSC352 and CSC353 are required for completion of the major.
• No more than 3 semester hours of CSC450 can be applied towards completion of the Computer Science major requirements and a “pass/fail” grade will be awarded for CSC450 after the first 3 semester hours.

Minor in Computer Science
A minimum of 19 semester hours in computer science including either CSC130 and CSC133; or CSC143; also required are CSC251, plus two of (CSC344, CSC352, CSC353) and 6 semester hours of upper-division computer science coursework.

Computer Science courses
CSC 130
Fundamentals of Programming I
Fall semester. 4 semester hours.
Students are introduced to the fundamental concepts of computer programming and the practical aspects of composing, testing, proving, and documenting computer programs. Topics covered include development of programmable processes, representation and manipulation of foundation data types, simple input/output processing, and elementary program control structures.
CSC 131
Fundamentals of Programming II
Spring semester. 4 semester hours.
This course builds upon the foundation established in Fundamentals of Programming I with treatments of arrays, exception handling, event models and elementary GUI frameworks. Students are introduced to basic object-oriented design patterns. Prerequisite: CSC130.

CSC 143
Programming Foundations
Fall semester. 5 semester hours.
This course, intended for students with significant prior programming experience, provides a foundation in object-oriented programming through an accelerated presentation, including the use of APIs, basic design patterns, and IDEs. Formal models for program development, including flowcharts, requirements models, and state models are introduced. Three hours of lecture and two hours of lab per week. Prerequisite: permission of the department.

CSC 214
Technology and Society
Fall semester. 3 semester hours.
Accelerating development in technology (computer-centric technology in particular) underlies enormous changes in the acquisition, application and extension of knowledge and information, impacting virtually every aspect of modern life in ways that are often under-appreciated by a generally-unaware public. Even those involved in the development of technology are often inconsiderate of the social implications of the technologies they introduce. This course explores technology development from several perspectives. Students consider several past and present visions of the near future as expressed in the writings of several notable (and less notable) futurists, particularly as related to computer-based technologies. Topics include consideration of why we’re not living in the future predicted only several decades ago, what today’s technology futurists are envisioning as our unavoidable future and how accelerating technological change is impacting every facet of modern life, from the playground to the workplace and from home to school, while technological rifts open across semi-generations. Great potential benefits are balanced against equally impressive opportunities for abuse; society expects that those responsible for the creation and application of technology accept the role of faithful stewards. Therefore this course includes a concurrent exploration of the personal, organizational and legal decisions encountered in the development and deployment of computer-based technology.

CSC 251
Data Structures
Fall semester. 3 semester hours.
Data structures and their characteristic algorithms are studied including analysis of performance predictions and “Big-O” characterizations inherent to the various data organizations. Lists, stacks, queues, trees, and elementary graphs are considered. Fundamental sorting algorithms are also treated. Prerequisite: CSC131 or CSC143.

CSC 256
Discrete Structures and Computability
On demand. 3 semester hours.
The mathematical and theoretical underpinnings of computer science will be explored. Students will be introduced to Boolean algebra and elementary logic and their application to computer implementation and algorithm development. This course explores the historical development of computer science from its roots in mathematical models including early models of computation, such as Turing machines and other finite state machines.

CSC 258
Topics in Computer Science
On demand. 3 semester hours.
This occasional offering will study special areas of computer science not otherwise covered in the curriculum. Prerequisite: permission of professor.

CSC 309
Computer Organization and Architecture
Every third semester. 3 semester hours.
Modern computers represent a powerful synergy of hardware and software, represented in deeply nested abstraction layers. In this course, students study computer architecture and organization as influenced by hardware-software interfaces. The organization of processors to support the fundamental execution cycle is explored. Additional topics include computer arithmetic, pipelines, performance factors and specialized architectures. Prerequisite: CSC344.

CSC 320
Numerical Methods
On demand. 3 semester hours.
The study of numerical methods involves the design and use of algorithms for solving large mathematical problems with a computer. Topics include estimation of accuracy, the use of series and approximation, and numerical integration and differentiation. Prerequisites: CSC251 and MAT176.

CSC 326
Graphics
Every third semester. 3 semester hours.
The use of computer technology to create and display information in a visual manner is studied. Topics include display technology, graphic user interfaces (GUI), graphics algorithms, and computer-based imagery. Exercises will involve the use of current graphics software and systems. Prerequisite: CSC251 and CSC344.

CSC 330
Computer Networking
Fall semester. 3 semester hours.
The organization of computer systems into networks and the theory of computer communication across those networks will be studied. Communications protocols from design to implementation perspectives will be considered with a focus on current technology and software. Students will construct and test software implementations of the technologies as they are discussed. Prerequisite: CSC251. CSC344 is recommended.
Network Programming
On demand. 3 semester hours.
Network Programming picks up where CSC330 leaves off. The goal of the course is to provide students with an in-depth look at network application programming and the techniques and tools that are used therein. The student is assumed to have a fundamental knowledge of the protocol layering model of networking as well as an understanding of the network, transport and application layers of the Internet protocol stack. The material for the course focuses on Java’s streams and IP-based protocols. The discussion is extended to include topics such as RMI, servlets, and other components from the Java API. Prerequisite: CSC330.

CSC 335
Database Systems
On demand. 3 semester hours.
This course will introduce the student to the fundamental concepts and implementation of modern database systems, including relational and object-oriented databases. Topics include entity relationship models, transaction processing, concurrency, and query processing. Prerequisite: CSC251.

CSC 344
Programming in C and Assembler Language
Spring semester. 4 semester hours.
This course introduces two of the most fundamental languages for computer programming: assembler language, the language most closely related to the hardware of the computer; and C, the language most commonly used for operating systems and whose syntax has influenced most modern programming languages. Students will study the representation of data and programs in the processor and memory of modern computers and be led to understand how the basic operations in high-level languages are implemented. Topics will include data structure definition and reference mechanisms, and using libraries for I/O and operating system interfaces. This course has a substantial programming component. Prerequisite: CSC131 or CSC143.

CSC 345
Advanced Algorithms and Parallel Processing
Annually. 3 semester hours.
Most programming problems encountered by undergraduate computer science students are solvable using straightforward approaches. There are a number of important and challenging problems whose efficient solutions demand more sophisticated techniques. This course presents an organized study of major algorithmic strategies (Divide and Conquer, Dynamic Programming, Backtracking, Greedy, Branch and Bound) and introduces students to advanced topics including computability, fixed-point algorithms, and NP-complete problems. Algorithms for parallel processing are explored through the use of a Beowulf® processor cluster as a target platform for programming exercises. Prerequisites: CSC251, CSC344, and senior standing.

CSC 351
Algorithms
On demand. 3 semester hours.
This course of study extends the study of algorithms that began in CSC251, focusing on algorithmic paradigms (back-tracking, greedy, dynamic programming, branch and bound, etc.) and patterns that have general application in both theoretical and practical computer science. Solutions for classical optimization problems, P and NP characterization, and shortest path algorithms will be considered. Prerequisites: MAT110 and CSC251.

CSC 352
Programming Language Study I (Traditional Languages)
Fall semester. 1 semester hour.
This course provides instruction and experience using modern computer programming languages. Students are required to implement basic and intermediate programming tasks in order to explore the syntax, semantics, and dominant paradigm of the topic language. Students cannot apply more than two semester hours of CSC352 toward completion of the CS major requirements. Prerequisite: either CSC131 or CSC143.

CSC 353
Programming Language Study II (Web Languages)
On demand. 1 semester hour.
This course provides instruction and experience using modern computer programming languages. Students are required to implement basic and intermediate programming tasks in order to explore the syntax, semantics, and dominant paradigm of the topic language. Students cannot apply more than two semester hours of CSC353 toward completion of the CS major requirements. Prerequisite: either CSC131 or CSC143.

CSC 360
Programming Paradigms
Annually. 3 semester hours.
The history, development and evolution of programming languages are studied in this course, which deals with the programming paradigms utilized by modern languages. Experience with alternative paradigms is gained through programming exercises. Related topics covered in this course include regular expressions, interpreters and compilers, and tools for language processing. Prerequisite: either CSC131, CSC143, or CSC251.

CSC 376
Object-Oriented Analysis and Design
On demand. 3 semester hours.
This course will introduce the student to techniques for performing requirements analysis and design using object-oriented approaches. Topics include the role of modeling, creation of use cases, risk analysis, the "unified software development process," and iterative design. Prerequisite: permission of the professor.

CSC 410
Operating Systems
On demand. 3 semester hours.
This course will introduce the student to the principles, mechanisms, and algorithms underlying modern operating systems. Topics will include management of memory, I/O and processor resources, elementary queuing theory, and inter-process communication. Prerequisite: CSC344.

CSC 430
**Advanced Networking and Security**  
On demand. 3 semester hours.  
Participants will explore the techniques and study issues relevant to maintaining and securing computers in a modern networked environment. The course will focus on techniques and methods used to compromise networked computer systems and the methods that are used to counter these attacks. Topics covered will include human and automated intrusion, viruses, and social engineering. Prerequisite: CSC330.

**CSC 433 Compiler Construction**  
On demand. 4 semester hours.  
This course considers algorithms and data structures used in translation of high-level languages to executable machine language. Topics include general organization, lexicographic analysis, management of name spaces and storage, error detection and recovery, code generation and optimization. This course requires significant programming. Evaluation is heavily dependent upon the successful development of substantial portions of a compiler. Students should expect to spend a minimum of 10 hours weekly on this course. Prerequisites: CSC344, CSC360. Senior standing is recommended.

**CSC 450 Internship**  
Fall, spring, and summer semesters. 1-12 semester hours.  
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student's major or minor area of study. A maximum of three semester hours will be counted toward a computer science major and a "pass/fail" grade will be awarded for CSC450 after the first three semester hours. Contract is required. Prerequisite: junior or senior standing or permission of the department.

**CSC 490 Computer Science Research Seminar**  
On demand. 3 semester hours.  
Students participate in ongoing research and development projects. Areas of focus vary as projects are undertaken and evolve. Participants are expected to be active contributors to research and development teams operating under the guidance of faculty sponsors, and are required to make both formal and information presentations based on team progress, and participate in critical project reviews. Students should expect to contribute at least nine hours each week toward team efforts. Prerequisite: junior standing. Note: CSC 490 is required to fulfill the requirements of the major in computer science; CSC 490 may be taken a second time to fulfill an upper-division elective in the major.

**CSC 499 Independent Study**  
On demand. 1-3 semester hours.  
Under the guidance of a faculty sponsor, students may study facets of computer science not available for study through offered CS courses. Independent study is an ideal vehicle for students wishing to explore interdisciplinary applications of computer-related technology. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

**Economics**  
For course listings, see the "business administration and accountancy" section of this catalog.

**Education**  
Barb Vail, Director of Education  
Shelley M. Ellis, Professor  
Paul A. Roper, Professor  
Jo Swain, Associate Professor  
Mark Damico, Assistant Professor  
Stevie Schmitz, Director of M.Ed. and Distance Education

The goal of Rocky Mountain College's education program is to provide students with the knowledge, skills, and dispositions necessary to be successful as beginning teachers in schools today and to continue as life-long reflective professionals. To achieve this goal, Rocky Mountain College provides students with a strong liberal arts background, in-depth study in the fields in which they plan to teach, the professional knowledge and skills essential for effective teaching, and extensive school-based experience in a variety of school settings.

The teacher education program at Rocky Mountain College will enable its graduates to:
- apply their knowledge of human growth, development, and learning to the individual learning styles of all students;
- demonstrate a thorough knowledge of the professional literature and the current trends, issues, research, and research methods across disciplines and in each pertinent content area;
- communicate clearly, accurately, and professionally, in speech and writing, to peers, colleagues, parents/families, community persons, and other community organizations;
- demonstrate knowledge of the legal and ethical responsibilities of educators as well as the underlying foundations and history of education in the United States;
- engage students in learning activities that promote critical as well as creative thinking;
- describe major educational aspects of the American school, including its purpose, administrative organization, financial aspects, board functions, and general operations;
- reflectively analyze their teaching and learning in order to improve throughout their careers;
- diagnose and remediate reading deficiencies in their students and confidently select age- and skill-level appropri-
Academic Programs

Program Basics for Admittance to the Teacher Education Program

The competencies expected by the Rocky Mountain College teacher education program include:

1. Communication: Communication competencies are demonstrated by such behaviors as using the appropriate syntax, inflection, and word choice in oral communication; speaking distinctly and with confidence; and using correct spelling, standard English language mechanics, and meaningful word choice in written expression. Further, communication with students and families is demonstrated by sensitivity to the situation and family circumstances of the students.

2. Intellectual ability (conceptual, integrative, and quantitative) for problem solving and effective teaching: The student must have the cognitive abilities necessary to master relevant content in subjects commonly taught in K-12 schools and pedagogical principles and their application in field settings at a level deemed appropriate by the faculty. These skills may be described as the ability to comprehend, memorize, analyze, and synthesize material. Students must be able to develop reasoning and decision-making skills appropriate to the practice of teaching.

3. Dispositions: The candidate must demonstrate the professional, behavioral, and social dispositions necessary for the effective performance of a teacher.

Admission to the Teacher Education Program

To be admitted to the teacher education program, students must do the following:

1. successfully complete ENG119 or an equivalent writing course, EDC202, PSY205 or PSY206, earning at least a grade of “C-” in each;

2. successfully complete the first of two required field practica (EDC291E or EDC291S);

3. receive a passing score on the education department’s supervised writing examination;

4. conduct a satisfactory interview with representatives of the teacher education committee; and

5. have an overall minimum GPA of 2.50 with a minimum GPA of 2.75 in the major field and in the education courses.

Students who receive a grade lower than “C-” in any required course, even if that grade does not result in a GPA lower than the required 2.75 GPA, must re-take that course(s). A grade of C- or better will be required for the repeated course(s).

Students admitted to the teacher education program must continue to meet minimum program standards or they will be dropped from the program. These standards include maintaining the required GPA (see #5 above) and demonstrating responsible dispositions toward learning in all college work as indicated under the “dispositions” section of the teacher education program handbook. The teacher education program handbook is on the College’s website under the “academics” and then “education” links. All education students are required to adhere to the requirements and guidelines in the handbook.

Praxis II Exam

Students in elementary education and those wishing to be endorsed in a minor subject must take and pass the appropriate Praxis II exam (consult your advisor) in order to be licensed. Secondary and K-12 education majors are encouraged to take the PRAXIS exam appropriate to their major.

Admission to Student Teaching

To be admitted to student teaching, students must meet the following requirements:

1. admission to the teacher education program (see the teacher education program handbook for details);

2. senior standing with a minimum overall GPA of 2.50 and a GPA of 2.75 in major, minor, and professional education courses;

3. completion of all required coursework except student teaching and its related seminar; and

4. approval of the teacher education committee.

Transfer Courses

All transfer courses used to substitute for courses required in the teacher education program must be approved by the teacher education committee. An official transcript must be sent directly to the office of student records from any previous institution(s).

Transfer Students

Students transferring into the teacher education program must meet all Rocky Mountain College requirements for transfer students and must complete a minimum of 12 semester hours in the Rocky Mountain College teacher edu-
cation program prior to student teaching;

**Students with Degrees from Other Colleges**

1. must complete a minimum of 12 semester hours at Rocky Mountain College before student teaching;
2. must meet all Rocky Mountain College teacher education program requirements for student teaching; and
3. must meet all Rocky Mountain College teacher education program requirements for the teaching major and minor and be recommended by the respective department before student teaching.

**Major in Elementary Education**

A major in elementary education prepares students for teaching at the elementary school level (K-8). Prerequisite courses for entry into the elementary teacher education program are ENG119, PSY205 or PSY206, EDC202, and EDC291E. Required courses in the elementary education program are EDC302, EDC310, EDC330, EDC336, EDC341, EDC342, EDC/ART338, EDC/MUS344, EDC349, EDC350, EDC355, EDC356, EDC360, EDC365, EDC370, EDC391E, EDC402, EDC427, EDC453, and EDC490E. Other related required courses are HST211 or HST212, MAT103, and MAT104.

The assessment for content knowledge required by the No Child Left Behind Act for elementary education majors consists of the following multiple measures:

1. Thirty credits of content coursework. A GPA of that coursework will be calculated on a 0 to 4 point scale prior to program completion. The range will be 3.00-4.00=4 points; 2.50-2.99=3 points; 2.00-2.49=1 point; below 2.00=0 points;
2. Assessment of content knowledge demonstrated during student teaching by a highly qualified teacher and a college supervisor on a scale of 0 to 3 based on demonstration of content knowledge. The following descriptors will be used: "knowledge is advanced"=3 points; "knowledge is proficient"=2 points; "knowledge is basic"=1 point; "knowledge is unacceptable"=0 points.

Score on the PRAXIS II Elementary Content Knowledge Test determined as follows: 164-200=6 points; 154-163=5 points; 139-153=3 points; 125-138=1 point; 100-124=0 points.

Rocky Mountain College's education department will use the above components to develop a Content Knowledge Score (CKS) to be calculated as follows: CKS=Content GPA points + Student Teaching Assessment points + PRAXIS points. The possible range for the CKS is 0-13. Students scoring lower than CKS=8, or who score zero on any of the three multiple measures, shall not be recommended for licensure.

A score of one (1) on any of the multiple measures will trigger an individualized review of the student's content knowledge and teaching skill by Rocky Mountain College's teacher education program faculty before recommending that student for licensure.

**Major in Secondary Education**

A major in secondary education prepares students for teaching at the secondary school level (5-12). Prerequisite courses for entry into the secondary teacher education program are ENG119, PSY205 or PSY206, EDC202, and EDC291S. Required courses in the secondary education program are EDC302, EDC310, EDC330, EDC336, EDC353, EDC365, EDC370, EDC391S, EDC402, EDC427, EDC452, and EDC490S.

Students must complete an education major in one of the following fields: biology, English, history, mathematics, psychology, social studies broadfield, science broadfield-biology, or science broadfield-chemistry.

Students must complete an education minor in one of the following fields: biology, English, history, mathematics, political science, psychology, reading, or theatre arts. In some cases, an extended single-field education major of at least 40 credits may be substituted for the major-plus-minor plan. Secondary education students should carefully study departmental requirements listed under the various departments in the catalog, since in many cases, requirements for teaching licensure are different from general majors or minors.

**Major in K-12 Education**

To become a teacher of art, music, or physical education and health, the student must be prepared to teach at all levels, K-12. Students must complete an education major in one of the following fields: art, music, or physical education and health. Prerequisite courses for entry into the K-12 teacher education program are ENG119, PSY205 or PSY206, EDC202, and EDC291S or EDC291E. Required courses for the K-12 education major are: EDC302, EDC310, EDC330, EDC336, EDC353, EDC365, EDC370, EDC391S or EDC391E, EDC402, EDC427, EDC454, and EDC490S.

**Note:** K-12 majors must have one elementary-level practicum experience and one secondary-level practicum experience.

**Nonteaching Major in Education**

A student who wants to graduate in education, but does not plan to teach, must complete the requirements for the elementary, secondary or K-12 major with the exception of student teaching. An educationally related internship is required. The courses required for the elementary, secondary, and K-12 majors are listed above. Nonteaching education majors do not need to take EDC452, EDC453, EDC454, EDC490E or EDC490S. The nonteaching major must also take EDC450 Internship.

**Minor in Reading**

The Rocky Mountain College reading minor is targeted at K-12 education majors aspiring to obtain a K-12 reading endorsement. Upon successful completion of the required courses, the candidate is eligible to apply for the State of Montana Reading Specialists K-12 endorsement. Following the completion of eight required courses, Rocky Mountain College students are eligible for the reading endorsement. Required courses: EDC305, EDC318, EDC350, EDC353, EDC357, EDC360, EDC362, and EDC376.
Education courses

EDC 202
Foundations of Education
Fall and spring semesters. 2 semester hours.
This is an introductory course for students considering teaching as a career. It provides an overview of the purposes of education, the legal basis for schools, school organization and finance, the job of the teacher, general curriculum concepts, school-community relationships, partnering with parents, multicultural education, gender equity in the classroom, and other issues in education today. Students are assisted in clarifying their career goals related to teaching and in planning an educational program to meet those goals. Corequisite: ENG119 or equivalent.

EDC 291E
Field Practicum: Elementary School
Fall and spring semesters. 1 semester hour.
This course provides practical field experience in an elementary classroom. Each credit hour requires 40 hours of experience. Students must complete the practicum during the fall or spring semester over a period of between 10-14 weeks. Students must complete a field practicum before they can be admitted to the teacher education program. Sophomore standing is required. Students must be able to schedule 2-3 hour blocks of time twice a week, and provide their own transportation.

EDC 291S
Field Practicum: Secondary and/or K-12 School
Fall and spring semesters. 1 semester hour.
This course provides practical field experience in a middle or secondary school. Each credit hour requires 40 hours of experience. Students must complete the practicum during the fall or spring semester over a period of between 10-14 weeks. Students must complete a field practicum before they can be admitted to the teacher education program. Sophomore standing is required. Students must be able to schedule 2-3 hour blocks of time twice a week, and provide their own transportation.

EDC/PSY 302
Educational Psychology
Fall and spring semesters. 3 semester hours.
This course is designed to aid the student in continuing to develop an understanding of human behavior, especially as that understanding applies to elementary and secondary classrooms. Emphasis will be on why and how human learning takes place and how that learning relates to schools and teaching situations where the needs of each student must be considered. The course also includes participation in and the analysis of interpersonal relations and communication skills. Students must complete EDC302 before they can be admitted to the teacher education program. Prerequisite: PSY205 or PSY206.

EDC 305
Emergent Literacy
Spring and summer semesters. 3 semester hours.
This course will provide students with in-depth information regarding the acquisition of language as it pertains to the reading process. Primary focus will be on birth to age 5 and the importance of expressive and receptive language acquisition as it relates to the reading and writing process. Particular emphasis will be placed on key research relating to English as a Second Language, Limited English Proficient, and bilingual learners as that research relates to overall reading and writing achievement. Students will be required to administer reading and writing assessments that will guide instruction for the emergent reader. The alphabetic principle and phonemic awareness will be of primary focus. Prerequisite: admission to the teacher education program.

EDC 310
Classroom Management
Spring semester. 2 semester hours.
This course reviews the fundamental skills of classroom management. Students will be presented with a systemic approach to classroom management. Enforcing classroom standards, building patterns of cooperation, maximizing learning, and minimizing disruptions in order to establish and maintain an effective and safe classroom-learning environment will be emphasized. Prerequisite: admission to the teacher education program.

EDC 318
Diagnostic Assessment of Reading
Spring semester. 3 semester hours.
This course will provide students with extensive knowledge relating to reading assessment tools. Students will become knowledgeable about reading diagnostic tools that provide information about placing children at instructional and independent reading levels, improving sight word vocabulary (DIBELS), improving oral reading fluency (DIBELS) and miscue analysis (running records). Students will also become skilled in the use of criterion and norm-referenced reading and writing assessments to drive reading and writing instruction. Students will be required to acquire all reading data on a specific student, create, and then implement both an enrichment and remediation plan for the student(s). Must be taken concurrently with EDC357. Prerequisite: admission to the teacher education program.

EDC 330
Introduction to Teaching Exceptional Learners
Fall semester. 3 semester hours.
This course introduces students to the characteristics, legal requirements, programming, and service requirements for exceptional learners, including gifted and talented students. Categories of disabilities addressed will be those outlined within PL94-142. Emphasis will be given to education within the least restrictive environment. Prerequisite: admission to teacher education program.

EDC 336
Educational Technology
Fall and spring semesters. 1 semester hour.
This course is designed to prepare preservice elementary, secondary, and K-12 teachers in the appropriate use of instructional technology, thus fostering an intellectually
active and technologically supportive classroom. Students will explore and evaluate instructional software packages, assess Internet resources, build a portfolio of resources appropriate to a grade level and content area, design lesson plans, create and explore tests and other evaluative tools, and learn ways of creating strong parental contacts. The course will culminate in a comprehensive, student-designed multimedia presentation. Prerequisite: admission to the teacher education program.

EDC/ART 338  
Methods and Materials:  
Teaching Art in the Elementary School  
(and Secondary when Applicable)  
Spring semester. 3 semester hours.  
This course focuses on the methods and materials for teaching art in the elementary and middle school (and secondary schools when applicable). Prerequisite: admission to the teacher education program or permission of the instructor.

EDC 341  
Methods and Materials:  
Teaching Health in the Elementary School  
Fall semester. 2 semester hours.  
This course provides competency in the delivery and evaluation of planned learning programs for elementary school children. Content will include knowledge of the purpose and scope of a health curriculum, appropriate health topics, and lesson planning. Multimedia based learning will be examined. Prerequisite: admission to the teacher education program.

EDC 342  
Methods and Materials:  
Teaching Physical Education in the Elementary School  
Spring semester. 2 semester hours.  
This course provides competency in the delivery and evaluation of planned learning programs for elementary school children. Content will include knowledge of the physiological, psychological, and motor developmental needs of elementary-age children and the implication for curriculum development and implementation. Includes experience working with children in an on-campus Saturday morning program. Prerequisite: admission to teacher education program.

EDC/MUS 344  
Methods and Materials:  
Teaching General Music in the Elementary School  
Fall semester. 3 semester hours.  
This course provides a study of trends in philosophy, curriculum and program development, traditional instructional materials, Orff/Kodaly, and other innovative teaching techniques for elementary school and early childhood general music. Prerequisite: admission to the teacher education program.

EDC 349  
Methods and Materials:  
Teaching Mathematics in the Elementary School  
Spring semester. 3 semester hours.  
This course focuses on the methods and materials for teaching mathematics in the elementary school based on the National Council of Teachers of Math standards. Prerequisites: MAT103, MAT104, and admission to the teacher education program.

EDC 350  
Methods and Materials:  
Teaching Reading and Language Arts in the Elementary School  
Fall semester. 4 semester hours.  
This course provides an integrated approach to the language arts curriculum of listening, speaking, reading, and writing, an approach which corresponds to the development of language skills. Methods of teaching the language arts; the use of books, other written materials, and audiovisual materials; the use of computer programs; methods of assessing and evaluating achievement; and ways of organizing the curriculum form a major portion of the course. The course provides increased familiarity with literature appropriate for elementary school children. Prerequisite: admission to the teacher education program. Junior standing required.

EDC 353  
Methods and Materials:  
Teaching Reading and Writing in the Content Areas  
Spring semester. 2 semester hours.  
This course provides K-12 music, art, and physical education and health preservice teachers as well as secondary-level preservice teachers with the tools to teach listening, speaking, grammar, vocabulary, spelling, writing, and study skills with the aim of helping their future students achieve content area literacy and basic necessary reading skills. Learners with special reading needs are addressed, and the writing process and the use of literature in the content classroom are examined. Students also evaluate content-based materials for their reading difficulty level and appropriateness and apply the 6-Traits Writing Projects’ techniques across disciplines. Prerequisites: admission to the teacher education program.

EDC 355  
Methods and Materials:  
Teaching Social Studies in the Elementary School  
Fall semester. 3 semester hours.  
This course provides an integrated approach to the social studies K-8 curriculum in elementary and middle schools. Emphasis is on the development of daily, weekly, and unit lesson plans. A variety of instructional strategies will be reviewed and practiced. Methods of organizing the curriculum, methods of teaching, and the use of various technological tools are emphasized. The scope and sequence of various curricula will be examined. Prerequisite: admission to the teacher education program.

EDC 356  
Methods and Materials:  
Teaching Science in the Elementary School  
Fall semester. 3 semester hours.  
This course is designed to provide an integrated approach to the science K-8 curriculum in elementary and middle schools. Emphasis is on the development of daily, weekly,
Academic Programs

and unit lesson plans. A variety of instructional strategies, including hands-on activities, will be reviewed and practiced. Students will be expected to participate in a teaching team and create integrated thematic lessons. Prerequisite: admission to the teacher education program.

EDC 357
Reading Clinic
Fall and spring semesters. 2 semester hours.
May be taken more than once.
This course will provide students the opportunity to work with off level readers in a clinical setting. Students will complete 40 hours of clinical instruction for a reluctant or underachieving reader or writer. Individualized prescriptive plans will be developed based on reading and writing assessments given in the clinical setting. Special attention will be placed on reading and writing assessment driving reading and writing instruction through the use of one-to-one instruction. Students will become familiar with K-12 reading/writing curriculum to use for instruction. A written clinical report will be the culminating project for the reading clinic course. Prerequisite: admission to the teacher education program.

EDC 360
Children's Literature
Spring semester. 3 semester hours.
This course is designed to increase familiarity with a variety of genres of literature appropriate to the elementary classroom: traditional, modern fantasy, contemporary realistic fiction, poetry, historical fiction, biography, and multi-ethnic literature. Students will evaluate literature for its personal, social, and aesthetic values and will develop effective reading selection criteria. Prerequisite: admission to the teacher education program.

EDC 362
Adolescent Readers
Summer and fall semesters. 3 semester hours.
This course will provide information on how to work with struggling readers at the middle and high school level. Students will become familiar with high-interest/low-vocabulary literature and how to infuse this tool as part of a remediation plan. Students will be required to develop and implement an individualized remediation plan for a middle or high school student who is reading off level. Prerequisite: admission to the teacher education program.

EDC 365
Native American Education: History and Best Practices
Spring semester. 3 semester hours.
This course examines the forms of traditional American Indian education, historic federal schools, and sectarian and public school approaches to American Indian education. Federal educational policies are reviewed, including 1930's Indian school reform, 1960's community control, civil rights related developments, and 1970's tribal control of education. American Indian education best practices include approaches to language and culture issues, intergenerational learning, dropout prevention, American Indian student educational experiences, and pedagogical practice that works best with Indian students. Prerequisite: admission to the teacher education program.

EDC 370
Student Health and Safety
Spring semester. 2 semester hours.
This course focuses on the recognition of issues that obstruct student learning and on referral to appropriate services, since teachers must help ensure a healthy and safe learning environment. Topics to be studied are classroom safety, communicable diseases, drug abuse, first aid, nutritional deficiencies, physical and emotional abuse, psychological disorders and school violence. Prerequisite: admission to the teacher education program.

EDC 376
Writing Process for K-12 Students
Fall semester. 3 semester hours.
This course will provide students with knowledge about the writing process starting from the emergent level to the advanced level. In addition, students will become knowledgeable about numerous researched-based writing models, which implement both an analytical and holistic rubric for assessment. Focus will be how writing assessment drives the writing instructional process. Using literature to teach writing will be a key component of this course. Topics will include student conferencing, conducting a writing assessment and revision and editing process. Prerequisite: admission to the teacher education program.

EDC 391E
Field Practicum: Elementary School
Fall and spring semesters. 1 semester hour.
This course provides practical field experience in an elementary classroom. Each credit hour requires 40 hours of experience. Students are required to take an active part in classroom activities by teaching a minimum of two full lessons. Students must complete the practicum during the fall or spring semester over a period of between 10-14 weeks. Prerequisites: admission to the teacher education program. Junior standing is required. Students must be able to schedule 2-3 hour blocks of time twice a week, and provide their own transportation.

EDC 391S
Field Practicum: Secondary or K-12 School
Fall and spring semesters. 1 semester hour.
This course provides practical field experience in a middle or secondary school. Each credit hour requires 40 hours of experience. Students are required to take an active part in classroom activities by teaching a minimum of two full lessons. Students must complete the practicum during the fall or spring semester over a period of between 10-14 weeks. Prerequisites: admission to the teacher education program. Junior standing is required. Students must be able to schedule 2-3 hour blocks of time twice a week, and provide their own transportation.

EDC 402
Contemporary issues in Curriculum
Spring semester. 3 semester hours.
This course blends both theory and practice to provide a comprehensive overview of the foundations, principles, and issues of curriculum. The philosophical, historical, psychological, ethical, and theoretical foundations of curriculum
will be explored as well as present issues, trends, ethical concerns, and future directions. An integrated case study approach to studying curriculum and instruction, grades K-12, will emphasize planning, classroom communication, student motivation, positive classroom management, instructional methods, individualizing instruction, teaching culturally diverse students, and professionalism as it applies to the job of the teacher. Prerequisite: admission to the teacher education program. Junior standing required.

EDC 427 Standards, Instruction, and Student Assessment
Spring semester. 3 semester hours.
This course focuses on various forms of assessment including federal, state, and local testing and the appropriate use of assessment results. Ways of establishing meaningful and fair assessments will be explored. The reliability and validity of some assessment tools will be examined, and methods of item analysis discussed. Prerequisite: MAT100 or equivalent, and admission to teacher education program or permission of instructor. Junior standing strongly recommended. Prerequisite: admission to the teacher education program.

EDC 450 Internship
On demand. 6 semester hours.
This course serves as a capstone course for nonteaching education majors, and will consist of a field experience for qualified senior students graduating with this major. Internships will take place in non-traditional educational settings and be supervised by education faculty. Prerequisites: completion of all required education courses in elementary education, secondary education, or K-12 education except student teaching (EDC452, EDC453, or EDC454, and EDC490E or EDC490S); permission of the Teacher Education Committee; and an internship contract.

EDC 452 Student Teaching in the Secondary School
Fall and spring semesters. 9 semester hours.
This course requires a minimum of 15 weeks of practice teaching at the 5-12 grade level; student teachers are required to modify their assignment according to the host school's calendar. Students must pay a student teaching fee in addition to regular college expenses. Prerequisite: admission to student teaching (see the education department's handbook under the "education" link on the College's website). Prerequisite: admission to the teacher education program.

EDC 453 Student Teaching in the Elementary School
Fall and spring semesters. 9 semester hours.
This course requires a minimum of 15 weeks of practice teaching at the K-8 grade level; student teachers are required to modify their assignment according to the host school's calendar. Students must pay a student teaching fee in addition to regular college expenses. Prerequisite: admission to student teaching (see the education department's handbook under the "education" link in "academics" on the College's website). Prerequisite: admission to the teacher education program.

EDC 454 Student Teaching (Grades K-12)
Fall and spring semesters. 9 semester hours.
This course requires a minimum of 15 weeks of practice teaching at both the K-8 and 5-12 grade levels for physical education and health, art, and music education majors. Student teachers are required to modify their assignment according to the host school's calendar. Students must pay a student teaching fee in addition to regular college expenses. Prerequisite: admission to student teaching (see the education department's handbook under the "education" link on the College's website). Prerequisite: admission to the teacher education program.

EDC 490E Seminar: Elementary Education
Fall and spring semesters. 3 semester hours.
This course examines selected topics in elementary education at regularly scheduled meetings. Registration in this seminar is mandatory for all elementary education student teachers. Corequisite: EDC453. Prerequisite: admission to the teacher education program.

EDC 490S Seminar: Secondary/K-12 Education
Fall and spring semesters. 3 semester hours.
This course examines selected topics in secondary and K-12 education at regularly scheduled meetings. Registration in this seminar is mandatory for all secondary and K-12 students. Corequisite: EDC452 or EDC454. Prerequisite: admission to the teacher education program.

Master of Educational Leadership
Stevie Schmitz, Director
Jo Swain, Associate Professor
Christine Unquera, Program Assistant

The master of educational leadership program at Rocky Mountain College is designed to prepare educational leaders for careers as principals or superintendents. This cohort-based program incorporates state and national standards for educational leadership and is based on Effective School Research. Blending theory and practice through coursework and intensive internship, candidates will be prepared to be instructional leaders at the K-12 level. The program is 34 credits in length depending on previous coursework and has a minimal residency requirement. Graduates of this program will meet the educational requirements for licensure as a principal or superintendent. Candidates should check with the Office of Public Instruction for other licensure requirements.

EDL 500 Foundations of Leadership
Fall semester. 2 semester hours.
The focus of this course is on public school education, past, present and future. Course content will include exploration of the roles of federal, state, and local governance systems as they pertain to leadership roles in public education. No Child Left Behind legislation will be discussed and analyzed from the perspective of the building or district leader. In addition, participants will be introduced to the process of creating a school ethnography, and exploring the school culture, climate, and dynamics from the perspective of a school as a social organization. This experiential course invites class participation, team building and group activities, role-playing, guest lecturers, and group dynamics.

EDL 505  
Dimensions of Leadership I  
Fall semester. 3 semester hours.  
The focus of this course is on the roles and responsibilities of K-12 school administrators including leadership styles and behaviors. Additionally, the influence leadership has on the overall operation of a school building will be explored. Participants will discuss such topics as defining school climate and culture, sustaining partnerships and building collegial teams, and sharing leadership.

EDL 510  
Dimensions of Leadership II  
Spring semester. 3 semester hours.  
The focus of this course is to build on the knowledge and understanding of how leadership influences instruction and teacher practice. Participants will explore the leadership skills required to nurture instructional improvement in schools.

EDL 520  
Supervision of Educational Personnel  
Spring semester. 3 semester hours.  
The focus of this course is on improving, coordinating, and evaluating modern trends of supervisory practice. Students will evaluate and develop instruments for use in the formative and summative evaluation of teaching, as well as for support roles within the school environment. Participants will explore best practice instructional models from which to base the evaluation instrument or process. Participants will become familiar with the evaluation process as it pertains to marginal staff. Students will be required to recommend specific staff development options aligned to improvement of instruction.

EDL 530  
Public School Law  
Fall semester. 3 semester hours.  
This course will study the legal framework of public education (Constitutional law, case law and Montana law) with emphases on Montana and national legislation and case law pertaining to public education and the rights of board members, administrators, students, and parents.

EDL 554  
Public School Finance  
Spring semester. 3 semester hours.  
This course will focus on the development of educational budgets within the confines of available revenue. Taxation, policy analysis, applicable case law, and reporting will be covered.

EDL 560  
Organizational Change  
Fall semester. 3 semester hours.  
The focus of this course is on topics such as the theory of management, communication, human relations, social systems, motivation, decision-making, and change. A particular focus in this course is on the role of the building administrator in improving student achievement in a school reform effort. Practical application of analyzing school data followed by program intervention will be explored. Participants will explore how today's leaders must create and nurture a culture of collaboration, collegiality, and continuous improvement.

EDL 570  
School Curriculum  
Spring semester. 3 semester hours.  
The focus of this course is on the role of leadership in curriculum planning and development with topics including educational and cultural foundations, curricular outcomes, K-12 alignment, standards and community values, developing, managing, and evaluating curriculum, multicultural education, equal access, differentiated instruction, academic freedom, technology, scheduling, censorship, and curriculum associated with various student populations.

EDL 575  
Public School and Community Relationships  
Fall semester. 3 semester hours.  
This course will focus on the interdependence of school and community; identifying and defining societal expectation of schools and the effects of those expectations on educational policy; impact of social, political, economic, and demographic changes on public school policy.

EDL 590  
Leadership Seminar I  
Fall semester. 1 semester hour.  
The focus of this course will be reflection and inquiry regarding the administrative practicum. Problem-solving and best practices will be a component of this course. Discussions will evolve around the ISLLC, ELCC, and PEPP standards. Initial development of the administrative portfolio will be completed during this course. Corequisite: EDL 591.

EDL 591  
Administrative Practicum I  
Fall semester. 2 semester hours.  
A directed internship experience designed to relate theories and concepts explored in coursework to educational settings is the primary focus of the field experience. Practical application of theories will be implemented in fieldwork. Corequisite: EDL 590.

EDL 592  
Leadership Seminar III  
Fall semester. 1 semester hour.  
The focus of this course will be reflection and inquiry
regarding the administrative practicum. Problem-solving and best practices will be a component of this course. Discussions will evolve around the ISLLC, ELCC, and PEPP standards. Initial development of the administrative portfolio will be completed during this course.

EDL 593
Administrative Practicum III
Fall semester. 2 semester hours.
A directed internship experience designed to relate theories and concepts explored in coursework to educational settings is the primary focus of the field experience. Practical application of theories will be implemented in fieldwork.

EDL 683
Educational Leadership Capstone
Spring semester. 2 semester hours.
This course will be the culminating experience for students in the educational leadership program. A comprehensive review of material covered as well as an exit interview will be components of this experience. Theories and principles of advanced leadership practiced in educational settings will be explored within the context of the overall program.

EDL 690
Leadership Seminar II
Spring semester. 1 semester hour.
This course is a continuation of EDL590 and will focus on problem-solving and best practices in the administrative practicum. Practical application of theories will be implemented in fieldwork. Discussions will evolve around the ISLLC, ELCC and PEPP standards. Initial development of the administrative portfolio will be completed during this course. Continued review and development of the school ethnography will be a part of the seminar. Corequisite: EDL690.

EDL 691
Administrative Practicum II
Spring semester. 2 semester hours.
A directed internship experience designed to relate theories and concepts explored in coursework to educational settings are the primary focus of the field experience. Practical application of theories will be implemented in fieldwork. Corequisite: EDL690.

English
Linaya L. Leaf, Professor
Susan McDaniel, Professor
Andrew Kirk, Professor
Stephen Germic, Associate Professor
Jacqueline Dundas, Associate Professor
Nicholas Plunkey, Assistant Professor
Cara Chamberlain, Instructor

The English program offers major concentrations in Literary Studies, English Education, and Creative Writing. Students who focus on Literary Studies will immerse themselves in principal works of the Western and non-Western traditions. Whether analyzing themes, characters, styles, or synthesizing ideas, students develop the analytical and communication skills that are exceptional preparation for rich and rewarding personal and professional lives. English Education students take extensive coursework in English and Education curricula to prepare them for careers as middle school and/or high school English teachers. We are pleased to say that our English Education program has an excellent record of placing students in teaching jobs. Finally, students who pursue Creative Writing will discover and refine their own voices in poetry, fiction, and playwriting. Studying both literature and the complex craft of writing, they learn to view texts as a bridge to self-discovery and creative engagement with the world and its rich literary traditions.

Major in Literary Studies Option
A minimum of 36 semester hours. The following courses are required: ENG252, ENG272, ENG273, ENG282, ENG283, ENG319 and ENG471. Also, 15 additional English credits, at least nine of which must be at the 300-level or higher.

Major in English Education Option
A minimum of 42 semester hours. The following courses are required: ENG252, ENG272, ENG273, ENG282, ENG283, ENG319, ENG331, ENG 338, ENG359, ENG420, and ENG471. One of the following courses is required: ENG223, ENG224, or ENG291. One of the following courses is required: ENG445, ENG447, or ENG452. Students must also take one upper-division elective. To fulfill the degree students must complete the professional education program for secondary teaching (grades 5-12) as described in the “education” section of the catalog.

Major in Creative Writing Option
A minimum of 42 semester hours. The following courses are required: ENG223, ENG224, or ENG291; one of the following two courses: ENG282 or ENG283; one of the following two courses: ENG445, ENG447, or ENG452; and one of the following four: ENG445, ENG447, ENG452, ENG456.

Minor in Literary Studies Option
A minimum of 18 semester hours, including ENG252 and ENG331; one of the following two courses: ENG272 or ENG273; one of the following two courses: ENG282 or ENG283; plus six additional upper-division credits in literature.

Minor in Writing Option
A minimum of 18 semester hours, including ENG251, ENG319, ENG325, ENG365, ENG451, and ENG490-W (Writing).

Minor in English Education Option
A minimum of 27 semester hours. The following courses are required: ENG252; one of the following three courses: ENG223, ENG224, or ENG291; ENG272 or ENG273; ENG282 or ENG283; ENG319; ENG331; ENG 338; ENG420; and ENG471.

ENG 090
Support ESL I
On demand. 3 semester hours.
These credits will count for the semester in which it is taken
but will not be counted toward the 124 credits needed for graduation. Students for whom English is a second language may request this course or may be required to take this course, which will help build intermediate academic English skills. The course will be customized to meet the needs of a particular student or group of students.

ENG 091
Support ESL II
On demand. 3 semester hours.
These credits will count for the semester in which it is taken but will not be counted toward the 124 credits needed for graduation. Students for whom English is a second language may request this course or may be required to take this course which will help build intermediate academic English skills. The course will be customized to meet the needs of a particular student or group of students.

ENG 103
Advanced ESL I
On demand. 3 semester hours.
These credits will count for the semester in which it is taken but will not be counted toward the 124 credits needed for graduation. This advanced level course is offered to students for whom English is a second language and who wish to refine their English language skills. The course will be customized to meet the needs of a particular student or group of students.

ENG 104
Advanced ESL II
On demand. 3 semester hours.
These credits will count for the semester in which it is taken but will not be counted toward the 124 credits needed for graduation. This advanced level course is offered to students for whom English is a second language and who wish to refine their English language skills. The course will be customized to meet the needs of a particular student or group of students.

ENG 118
Basic Composition
Fall semester. 3 semester hours.
This course introduces students to the basic skills necessary for writing effectively at the college level and prepares students for the writing demands of other college courses. Students explore many types of writing projects, beginning with a personal essay and ending with a formal critique. Using writing theory, the course emphasizes writing as a process, the importance of revising, and the value of peer editing and evaluating. Sponsored by services for academic success (SAS), this course is linked with Introduction to the Humanities as part of the Rocky Freshman Experience. ENG118 may not be taken to satisfy general education requirements.

ENG 119
First-Year Writing
Fall and spring semesters. 3 semester hours.
This course is an introduction to college writing. Students critically read and discuss texts, learn that writing is a process, experiment with academic prose, develop the skills necessary to create and support a thesis, practice incorporating research into their analysis, and develop grammatical and stylistic competence. Further, working in collaboration with a second discipline, students learn to integrate knowledge. Students keep a portfolio of their work, which includes a self-evaluation of their writing progress. Required of all students entering as freshmen as part of the Rocky Freshman Experience. This course fulfills a general education requirement. It cannot be used to fulfill any major or minor requirement.

ENG 120
Critical Reading and Evaluative Writing
Fall and spring semesters. 3 semester hours.
Designed to follow First-Year Writing, students analyze texts and create effective writing based on their insights. Students practice generating questions that lead to the formation of complex thesis and effective support. Building on the idea of integrated knowledge, students develop strategies aiding them in cross-disciplinary and multi-cultural reasoning. They compose essays deploying diverse strategies, such as definition, classification, comparison/contrast, analysis, and argumentation. Students keep a portfolio of their work, which includes a self-evaluation of their writing progress. Prerequisite: ENG119. This course fulfills a general education requirement. It cannot be used to fulfill any major or minor requirement.

ENG 223
Introduction to Native American Literature
Fall semester, alternate years. 3 semester hours.
An examination of selected literature produced by such Native American writers as Momaday, Welch, Erdrich, McNickle, Silko, and others. Students will consider issues of genre, history, and politics as they relate to American literature. Special emphasis is given to the oral tradition and its relationship to contemporary American writing.

ENG 224
Introduction to African American Literature
Fall semester, alternate years. 3 semester hours.
This course is a study of selected topics in African American literature and criticism. Topics vary but may include such areas as the literature of civil rights, African American memoir, captivity and freedom narratives, African American poetry, theories of race and class, and Black feminist writing, among others.

ENG 236
Literature and Photography
Fall semester, alternate years. 3 semester hours.
This course is an interdisciplinary study of the relationship between photography and the literature, art, politics, and history from the nineteenth-century to the present. It introduces theories of photography as well as works of individual artists.

ENG/THR 242
Modern Dramatic Literature
Fall semester, alternate years. 3 semester hours.
Focusing on script analysis, students consider diverse trends in play-writing and theatrical performances over the past
Eng 245
Writing Consultant Practicum
Fall semester. 1 semester hour.

This course encourages cross-cultural understanding.

Eng 254
Writing Consultant Practicum
Fall semester. 1 semester hour.

Students learn the theory and practice of peer tutoring. Along with traditional classroom discussions and reading assignments, students train for and eventually lead tutoring sessions at the campus writing center. Prerequisites: ENG119, ENG120, COM250; letter of recommendation from faculty member.

Eng 247
War Literature
Spring semester, alternating years. 3 semester hours.

Students explore how a variety of writers through time have represented the tragedy, trauma, and psychology of war. The course covers fictional and non-fictional works from various historical and literary periods as well as genres such as epic and lyric poetry, romance, and drama.

Eng 251
Imaginative Writing
Fall semester. 3 semester hours.

This introduction to imaginative writing explores poetry and short fiction. The course is a workshop focusing on the stages of free writing, drafting, presenting, and revising poems and prose. Elements of poetry discussed include tone, voice, image, metaphor, and devices of sound, meter, traditional structure, and innovations. Elements of fiction emphasized include setting, character development, dialogue, plot, and conflict. Prerequisite: ENG119.

Eng 252
Close Reading of Poetry
Fall semester. 3 semester hours.

Students are introduced to the genre of poetry. The course provides students with a foundation in the methods of detailed reading and analysis essential to an understanding of poetry and, more broadly, to the study of literature. The course addresses the basics of prosody, poetic devices such as diction, metaphor, image, tone, and major verse forms such as the sonnet, elegy, ode, ballad, dramatic monologue, and free verse. The texts reflect the continuity and variation in the history of British and American poetry and provide a sample of works from the 16th century to the present.

Eng/TRH 253
Classical Dramatic Literature
Fall semester, alternate years. 3 semester hours.

Focusing on script analysis, this course provides a chronological study of the major theatrical periods of dramatic literature from the emergence of Greek tragedy in the 5th century BC to the development of European realism in the late 19th century. The course also encourages cross-cultural understanding.

Eng 254
Writing Consultant Practicum
Fall semester. 1 semester hour.

Students learn the theory and practice of peer tutoring. Along with traditional classroom discussions and reading assignments, students train for and eventually lead tutoring sessions at the campus writing center. Prerequisites: ENG119, ENG120, COM250; letter of recommendation from faculty member.

Eng 258
Topics in Language and Literature
On demand. 3 semester hours.

Content varies, including comparative literature topics, problems in literature topics, and language topics. This course may be taken more than once.

Eng 270
Literature of Montana and the American West
On demand. 3 semester hours.

This course examines literature written by and about people living in Montana and the western United States, including American Indians, women, and immigrants.

Eng 272
British Literature: 800 to 1800
Fall semester. 3 semester hours.

The first in the sequence of two British literature surveys, this course provides an introduction to the formative period of British language and literature. Students read representative works from the Anglo-Saxon, Middle English, Renaissance, Restoration, and 18th century periods against their literary, historical, linguistic, and philosophical backgrounds.

Eng 273
British Literature: 1800 to Present
Spring semester. 3 semester hours.

The second in the sequence of two British literature surveys, this course introduces students to Romantic, Victorian, Modern and Postmodern literature, analyzing selected texts, from the end of the 18th century to the end of the 20th, against their literary, historical, ideological, and cultural backgrounds.

Eng 282
American Literature: Origins to 1865
Fall semester. 3 semester hours.

This course provides a survey of major literary works from the Puritan, Enlightenment, and Romantic periods. Emphasis is placed on such figures as Edwards, Franklin, Emerson, Hawthorne, Poe, Thoreau, Jacobs, Whitman, Douglass, Melville, and Dickinson. The literature is examined in the context of literary, historical, and philosophical backgrounds.

Eng 283
American Literature: 1865 to Present
Spring semester. 3 semester hours.

This course provides a survey of major literary works since the Civil War. Emphasis is placed on such figures as Twain, James, Crane, DuBois, Chopin, Wharton, Toomer, Cather, Hughes, Hemingway, and Stevens. The literature is examined in the context of literary, historical, and philosophical backgrounds.
ENG 291
Contemporary World Fiction
Spring semester. 3 semester hours.
This course introduces students to recent prose fiction, with special attention paid to non-Western and non-American works.

ENG 319
Creative Nonfiction Writing
Fall semester. 3 semester hours.
Students study examples of creative nonfiction and practice writing their own. They also gain experience-incorporating research into their prose. Prerequisite: ENG119.

ENG 322
Renaissance Literature
Fall semester, alternate years. 3 semester hours.
Students examine the Renaissance as expressed in British literature. Typical subjects of study include the early humanism of More, the courtly poetry of Wyatt and Surrey, the sonnets of Drayton, Sidney, and Wroth, the chivalric romance of Spencer, the satire of Nashe, the drama of Kyd, Marlow, Shakespeare, Webster, Jonson, and Ford, the essays of Francis Bacon, and the poetry of Donne, Herbert, Herrick, and Marvel.

ENG 325
Professional Writing
Fall semester. 3 semester hours.
This course teaches concepts, practices, and skills for communicating technical, scientific, or business-related information. Topics include understanding how people read, designing documents, incorporating graphics, writing about statistical results, rewriting, editing, and using the Internet. This course may be especially useful for non-English majors, providing them with the tools and techniques to communicate their messages effectively. Prerequisite: ENG119.

ENG 331
Literary Criticism
Fall semester. 3 semester hours.
This course introduces students to current controversies in literary criticism. The course discusses approaches to literary analysis such as deconstruction, cultural criticism, and post-colonialism. Students typically use a casebook method, observing how critics from divergent backgrounds interpret a single text. Students critique these various approaches and refine their own critical practices.

ENG 333
British Romantic Literature
Fall semester, alternate years. 3 semester hours.
This course examines a wide range of British Romantic texts. Students read and analyze selected works against the literary, historical, and philosophical background of late 18th and early 19th century England. Representative authors include Blake, Radcliffe, Wordsworth, Wollstonecraft, Coleridge, Byron, Shelley, Keats, and DeQuincy.

ENG 334
The British Novel
Spring semester, alternate years. 3 semester hours.
This course surveys the rise and development of the British novel. It includes an analysis of such Eighteenth-century writers as Defoe, Sterne, Fielding, Radcliffe, and Burney; early Nineteenth-century writers such as Austen, Shelley, and Scott; such Victorian novelists as Dickens, the Bronte sisters, Eliot, Thackeray, Trollope, and Hardy; and such Modernists as Conrad, Woolf, Joyce, Forster, and Lawrence.

ENG 338
Literature, Film, and Media
Spring semester, alternate years. 3 semester hours.
This course investigates interrelations among literature, film, and other forms of non-print media. Subject matter will include literary works, films, television, web-content, and emerging technologies through which cultural narratives are increasingly transmitted and developed. Theories of audience reception, textual production, and modes of critical interpretation will be emphasized.

ENG 344
Literature and the Environment
Spring semester, alternate years. 3 semester hours.
This course is a comparative study of the environmental imagination as expressed in literature. By reading and discussing a wide range of literary texts, students investigate timeless and more urgent questions, such as “What is nature?”; “What is our responsibility to the environment?”; “How do various cultures express their relation to the natural world?”.

ENG 347
The American Renaissance
Fall semester, alternate years. 3 semester hours.
Students examine the extraordinary quickening of American writing in the years before the Civil War. Of central concern are the different visions of "America" these literary texts propose. Authors may include Emerson, Hawthorne, Poe, Thoreau, Child, Fuller, Douglass, Whitman, Jacobs, Melville, and Dickinson.

ENG 347
Writing Consultant Practicum
Spring semester. 1 semester hour.
Students learn the theory and practice of peer tutoring. Along with traditional classroom discussions and reading assignments, students train for and eventually lead tutoring sessions at the campus writing center. Prerequisites: ENG119, ENG120, COM250; letter of recommendation from faculty member.

ENG 355
Mass Media
Spring semester, alternate years. 3 semester hours.
This course explores how the communication medium, whether smoke signals, newspapers, television or the Internet, influences human communication. With each change in technology, communication changes. These changes alter what it means to be human. Students must be able to understand the power of the media to better manage its influence in their personal and professional lives.
ENG 356  
**American Naturalism and Realism**  
Spring semester, alternate years. 3 semester hours.  
Considers literary realism and naturalism in terms of its philosophy, influence, and development during the period in American culture that Mark Twain called "The Gilded Age."  
Authors may include Twain, James, Jewett, Chopin, London, Norris, DuBois, Crane, Frederick, and Dreiser.

ENG 358  
**Topics in Language and Literature**  
On demand. 3 semester hours.  
Content varies, including comparative literature topics, problems in literature topics, and language topics. This course may be taken more than once.

ENG 359  
**History and Grammar of English**  
Fall semester, alternate years. 3 semester hours.  
Students are introduced to the linguistic and theoretic approaches to the study of English, including phonology and morphology. Students pursue an in-depth study of syntax, focusing on the grammar of words, phrases, clauses, and sentences. Students also review the history of English from proto-Germanic to the development of regional dialects, cultural variations, and "global" English.

ENG 362  
**Literary Modernism**  
Fall semester, alternate years. 3 semester hours.  
Students examine the major movement in Western art in the first half of the twentieth century as reflected in representative literary texts. Attention focused on the questions: What is modernism? What is its relation to naturalism and realism? How does literary art fuse with the other arts during this period? Authors may include Joyce, Stein, Pound, Eliot, Williams, Cather, Toomer, Ford, Lawrence, Woolf, Hemingway, Fitzgerald, and Faulkner.

ENG 365  
**Journalism**  
Fall semester. 3 semester hours.  
Providing an introduction to writing print, broadcast, and multimedia articles and producing a professional publication, this course is strongly recommended for all students participating on the student newspaper.

ENG/PHR 370  
**Religion and Literature**  
On demand. 3 semester hours.  
A study of religious issues, conflict, and hopes in modern literature. Studied works will vary from year to year, but they may include texts by authors such as Melville, Tolstoy, Hemingway, Flannery O'Connor, and John Updike. This is a writing-intensive course.

ENG 418  
**Writing and Publishing in New York City**  
Spring semester. 3 semester hours.  
Students will meet regularly throughout the term and spend eight days in New York City attending workshops and seminars on publishing, editing, and freelance writing. They meet professional writers, editors, and agents who introduce them to all aspects of the writing and publishing professions. Students also visit museums and attend cultural and literary events. Prerequisite: ENG120.

ENG 420  
**Methods and Materials**  
**Teaching English in the Secondary School**  
Fall semester, alternate years. 3 semester hours.  
This seminar requires focused study and consultation with a public school English/language arts teacher or other acceptable professional in the field. Hours will be arranged in consultation with the content area professor, the appropriate education professor, the student, and the professional mentor. The course focuses on English pedagogy with special attention to reading and writing instruction. Students study methods for creating a classroom conducive to learning, select materials for motivational and instructional purposes, incorporate technology in classroom strategies, evaluate and assess student work, integrate the language arts with other content areas, and examine the scope and sequence of literature and writing for grades 5-12. This seminar strongly emphasizes practical methodologies and is the capstone course for the English education major. Prerequisites: admission to the teacher education program, senior standing.

ENG 445  
**The American Novel**  
Spring semester, alternate years. 3 semester hours.  
Students examine American novels from the nineteenth-century to the present. Attention is given both to the genre of the novel as well as to the individual literary works. Content varies, but representative topics include the way in which personal and national identities are shaped or defined in the fictional texts, the role of the marketplace in influencing literary practice, and the relation between American fiction and philosophy.

ENG 447  
**The American Short Story**  
Spring semester, alternate years. 3 semester hours.  
Students are introduced to the genre of the short story, emphasizing major American writers from the nineteenth century to the present. Particular attention is directed to historical and cultural backgrounds. Students cultivate skills in critical analysis by focusing on issues of character, plot, theme, point of view, setting, tone, style, and other literary devices as they function within the context of individual stories.

ENG 450  
**Internship**  
On demand. 1-12 semester hours.  
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student's major or minor area of study. Contract is required. Prerequisites: junior or senior standing.
ENG 451
Advanced Imaginative Writing
Spring semester. 3 semester hours.
This course offers extensive imaginative work in a broad range of genres. Students explore the creative process and challenge themselves with longer and more complex assignments than in Imaginative Writing. They experiment with points of view other than their own and with styles of writing. They also work independently to produce a significant amount of polished work in a writing portfolio. Students keep a writing journal and have considerable input into the development of assignments. Prerequisite: ENG251.

ENG 452
American Poetry in the 20th-Century
Fall semester, alternate years. 3 semester hours.
An in-depth study of American poetry in the twentieth-century, focusing on representative poets in the context of literary and cultural history. Representative poets include Pound, Lowell, HD, Eliot, Frost, Stevens, Williams, Oppen, Niedecker, Sexton, Rich, Kerouac, Rexroth, and Ronan. Particular emphasis is on developing and strengthening students' skills in the close reading of poetry.

ENG 456
Studies in Drama
Fall semester, alternate years. 3 semester hours.
Students examine authors, themes, and/or movements significant in British, American, European, or world drama. It includes reading and analysis of selected plays. Focus is on variety in period, type, and technique. Content varies.

ENG 458
Major Authors
On demand. 3 semester hours.
Students explore, in-depth, one major writer from the British or American literary tradition. Content varies. This course can be taken a maximum of two times.

ENG 471
Studies in Shakespeare
Spring semester. 3 semester hours.
Students engage in the advanced study of Shakespeare's works, analyzing them within their literary, historical, theatrical, linguistic, and cultural contexts. Particular attention in this course is devoted to the major critical and theoretical approaches to Shakespeare, providing a foundation for students intending to go to graduate school in English or teach English at the secondary level.

ENG 490-L
Seminar in Literary Studies
Fall semester, alternate years. 2-3 semester hours.
Intensive work is done in a selected area of literary studies. This course includes a major research essay or creative project. Students are encouraged to visit a research library while completing their major project.

ENG 490-W
Seminar in Writing
Spring semester. 3 semester hours.
This seminar examines writing as a communicative art form from three points of view: creator, editor, and performer. Students submit their revised work to the student writing competition; take responsibility for the literary journal, Soliloquy; and organize the "Focus on Rocky Writers" evening, where selected works are shared with an audience. The goal of the course is to have students own and share the meaning of their lives.

ENG 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Environmental Management and Policy

Tim Lehman, Professor
Jennifer Lyman, Professor
Anthony Piltz, Professor
Scott Severance, Professor
David Strong, Professor
Stephen Germic, Associate Professor
Karen Beiser, Assistant Professor
Matthew O’Gara, Assistant Professor
Kayhan Ostovar, Assistant Professor

Program Description
The Program in Environmental Management and Policy provides the theoretical knowledge and practical skills future leaders will need to address the pressing challenges of creating and maintaining a sustainable world. Such challenges include climate change, scarce resource management, pollution and waste management, environmental design, and population growth. The program offers students a core foundation in business and economics, social science, humanities, and natural science. Students are also free to develop their interests with additional environmentally focused coursework in any or all of these areas. Environmental Management and Policy majors will be prepared for careers in a wide variety of fields, including public safety and regulation, corporate and industrial environmental compliance, environmental consulting, and non-governmental environmental advocacy.

Program Student Learning Outcomes
Graduates with a degree in Environmental Management and Policy will
• Apply fundamental theories from the disciplines of business, the natural science and social sciences, and the humanities to environmental issues;
• Demonstrate knowledge of political, legal, and economic processes associated with environmental management and policy;
• Demonstrate knowledge of the ethical implications of environmental management and policy decisions.
Major in Environmental Management and Policy
Core Requirements: EST101, ESC105, ESC225, ECO201, ECO202, ECO354, BSA321, ENG344, PHR304, POL313. Student must also choose three of the following: BSA331, BSA412, BSA318 or BSA425, ECO401, ESC209, ESC314, ESC330, ESC436, GEO320, HST365, IDS205, POL301, or relevant Special Topics course with permission of faculty.

Environmental Science
Jennifer Lyman, Professor
Kayhan Ostovar, Assistant Professor
Toby Anderson, Associate Professor

Mission
The environmental science and studies program at Rocky Mountain College, while simultaneously cultivating skills in critical thinking and effective communication, provides students with the intellectual training necessary for understanding the complexity of natural ecosystems as they interface with human concerns.

Program Description
Environmental science and studies majors pursue a liberal arts education by taking relevant courses in the natural sciences, social sciences, and humanities. Students in the program first enroll in a core of introductory courses designed to familiarize them with the diversity and complexity of environmental issues. Each student then selects between one of two baccalaureate degree tracks—the BA in environmental studies or the BS in environmental science. Upon graduation, students in both tracks are prepared for a wide and rapidly evolving range of careers concerned with the interface between human beings and their environment. Similarly, for those students whose career choices require graduate or professional study, the environmental science and studies program provides the training and discipline necessary for the pursuit of an advanced degree.

Environmental Science
The curriculum for the bachelor of science in environmental science includes an interdisciplinary core that encourages students to explore the scientific, ethical, and social aspects of environmental questions. Students are then encouraged to pursue specialization in a focused discipline within environmental science to gain expertise in approaching questions using more technical tools and in-depth knowledge.

Internships and faculty-mentored research projects are vital parts of the program, providing real-world experience. Environmental science majors at Rocky Mountain College have completed internships with government agencies such as the US Forest Service and the Bureau of Land Management, local environmental consulting firms, and other environmental organizations.

Major in Environmental Science
Core requirements: EST101, ESC105, ESC209, ESC225, ESC251, ESC257, ESC321, ESC330, ESC436, ESC450, and one of the following ESC314 or ESC325. Other required courses: BIO112, BIO311, CHM101, CHM102, MAT210; and GEO101 and GEO104 or GEO105. Two of the following are required: HST365, PHR304, ENG344, PHR378. One of the following is required: POL313, ECO354. An internship is required and can be used for up to 4 credits of science electives with permission from faculty.

Minor in Environmental Science
The following is required: ESC105. In addition, either CHM101, BIO112, or GEO101 and GEO104 or GEO105. ESC225 and ESC251 are required. In addition, 12 semester hours in upper-division courses are required from any upper division ESC course.

Environmental Science courses

ESC 105
Environmental Science: Sustainable Communities
Fall and spring semesters. 4 semester hours.
An introductory course designed for students entering the environmental sciences and studies program and for other students who would like to take an ecology lab course. Topics address the central concepts of ecology including the physical environment in which life exists. Students will explore the properties and processes of populations and communities, ecosystem dynamics, biogeography and biodiversity, as well as issues in conservation and restoration ecology. In laboratory students will apply these concepts to ecological studies in the natural environment and learn how to present their results in a scientific report. Three hours of lecture and one two-hour laboratory session per week.

ESC 207
Field Botany/Spring Wildflowers
Spring semester. 4 semester hours.
Students receive an intensive introduction to the evolutionary relationships of vascular plants and their classification. The course emphasizes plant identification based on use of taxonomic keys and focuses on angiosperm species in the Yellowstone River watershed, particularly the prairie habitats, the Pryor Mountains, the riparian habitats of the Yellowstone, and the foothills of the Beartooth Mountains. Field trips are required. This course may be taken at the lower-division level or at the upper-division level, but not both. Prerequisite: BIO112 or ESC105.

ESC 209
Field Survey Techniques in Zoology
Spring semester, even years. 4 semester hours.
A field and laboratory course covering basic field techniques to survey and inventory areas to assess biodiversity, with an emphasis on Montana mammal, bird, reptile, amphibians and fish fauna. Topics include species identification, survey and trapping, experimental design, data analysis, and report completion. Once identification and survey skills are learned, field teams will be formed and assigned to survey and inventory local habitats of concern with the goal of helping guide local management and restoration of these habitats. Additional fee required. Prerequisite: ESC105 and/or BIO112.
ESC 225
Energy and Society
Spring semester, alternate years. 3 semester hours.
Students are introduced to the concepts of energy, power and the physical laws that control their transformations. This understanding is applied to analyze human use of energy. Issues considered include the various sources of energy and their limits, the technologies of energy conversion, the end uses of energy, and the environmental consequences of energy use.

ESC 230
Rainforest Ecology
Spring semester. 3 semester hours.
This course introduces students to the concepts of population and community ecology through studies of rainforest geography, flora, and fauna. Students read scientific papers focusing on rain forest plants and animals and the complex interactions of these organisms in rainforest environments. Students discuss environmental issues such as sustainable agriculture, global cycling of air and water, and conservation biology as those issues pertain to rainforest issues today. Prerequisites: ENG119 and ENG120.

ESC 243
Environments of Costa Rica
Spring semester. 4 semester hours.
This field course takes place in Costa Rica during spring break. In lectures and in Costa Rica over spring break students will learn about the complexity and diversity of tropical forest ecosystems. Lectures and field activities focus on those ecological concepts particular to rainforests, natural history walks, bird studies, field activities that explore adaptations of plants and animals to tropical ecosystems, and examination of issues of tropical conservation. Students stay at field stations in different tropical forests environments. No prerequisites. Additional travel fees required.

ESC 244
Island Biogeography in the Galapagos
Spring semester. 4 semester hours.
This field course takes place in the Galapagos Islands over spring break. Students will have the opportunity to examine various islands and their associated species in the Galapagos from a small sleep-aboard boat. Lectures and readings will cover the theory of island biogeography, unique flora and fauna of the islands, speciation of Darwin’s Finches, conservation in developing countries, ecotourism and marine ecosystems. Opportunities will exist for nature hikes, bird watching and snorkeling. No prerequisites. Additional travel fees required.

ESC 247
Biogeography
On demand. 3 semester hours.
Biology, geology, geography, paleontology, and ecology form the roots of this multidisciplinary science. One of the most intriguing problems facing life scientists today is how to explain the diversity of organisms and their varying patterns of distribution over the surface of the earth now and through time. Why are there so many species of grasses in one field in Montana? What factors determine how many species may be present on an island at any particular time? What does the fossil record tell about the changing patterns of distribution of organisms? How do interactions between organisms affect the likelihood of species occurring in communities? What changes in species distribution are taking place on our planet today? Biogeography has relevance to many contemporary problems regarding species conservation. An understanding of the process that have influenced successes and failures of other species in other times and circumstances will help us to understand particular contemporary ecological challenges.

ESC 251
Environmental Document Writing and Review
Spring semester. 3 semester credits.
This course will help participants learn to identify the writing and editing requirements unique to environmental and National Environmental Policy Act (NEPA) documents including making graphics, writing chapters, and reviewing documents for accuracy. Participants will also practice interdisciplinary team skills as they relate to each phase of the analysis and documentation process. Students will also learn how to review the full range of NEPA documents including Environmental Impact Statements (EISs), Environmental Assessments (EAs), Findings of No Significant Impacts (FONSI s), and Records of Decisions (RODs). We will also review documents in support of NEPA such as Biological Survey Reports. Participants will concentrate on setting review priorities, reviewing for compliance with the law and for quality and clarity. Prerequisite: ESC105 or EST101.

ESC 280
Arctic Ecology-Polar Bears of Churchill
Fall semester. 3 semester hours.
This course is designed to expose students to the arctic environment. Lectures will focus on polar bear biology, arctic wildlife management, boreal, tundra and coastal ecology, periglacial geology, sea ice and tides, climate change and polar bears, and Inuit and Eskimo culture. Students will be required to attend a fall break field trip to Churchill, Canada. In Churchill we will search for polar bears and other wildlife and talk to village elders about the challenges of living with North America’s largest predator. No prerequisites. Additional travel fee required to cover transportation to Winnipeg, hotel on the way to Winnipeg, roundtrip Winnipeg/Churchill airfare, and food and lodging in Churchill.

ESC 307
Advanced Field Botany/Spring Wildflowers
Summer semester. 4 semester hours.
Students receive an intensive introduction to the evolutionary relationships of vascular plants and their classification. The course emphasizes plant identification based on use of taxonomic keys and focuses on angiosperm species in the Yellowstone River watershed, particularly the prairie habitats, the Pryor Mountains, the riparian habitats of the Yellowstone, and the foothills of the Beartooth Mountains. Field trips are required. Students in the 300-level course will collect, identify, and prepare a greater number of plants for the herbarium. This course may be taken at the lower-divi-
cation level or at the upper-division level, but not both. Prerequisite: BIO112 or ESC105.

ESC 314
Range Ecology
Fall semester, alternate years. 4 semester hours. Range ecology is the study of mixed grass prairies of the West and an introduction to ecological concepts applicable to that area. Topics include historical and current land use, ecosystem responses to change, methods for maintaining natural prairie habitats, the use of prairies as rangelands, and determinations of ecological conditions and trends on rangelands. The laboratory focuses on identification of common prairie plant species and their importance for both wildlife and domestic animals. Three hours of lecture and one two-hour laboratory session per week. Prerequisites: BIO112, CHM101, and CHM102.

ESC 321
Introduction to Geographic Information Systems
On demand. 4 semester hours. This course introduces students to the theory and practical application of geographic information systems (GIS). Topics include fundamentals of cartography, GIS data types, data input, GIS database structure and management, analysis of spatially distributed data, and report preparations using GIS. Prerequisite: MAT100 and a previous science course.

ESC 325
Wetlands and Riparian Ecology
Fall semester, alternate years. 4 semester hours. The biology and chemistry of wetlands is studied in this course. Topics include the investigation of wetland structure, wetland functions, and the ecological value of wetlands. The laboratory introduces protocols for analyzing wetland plant communities and includes a field study of a wetland in the Billings community. Students learn legally acceptable methods for determining wetland boundaries. The course examines the ecology of rivers and compares differences in hydrological processes of rivers and wetlands. Three hours of lecture and one two-hour laboratory session per week. Prerequisites: BIO112, CHM101, and CHM102.

ESC 330
Wildlife Ecology and Conservation
Spring semester, alternate years. 4 semester hours. A multidisciplinary approach to conservation and management issues encompassing genetics to ethics. Topics include population genetics, evolutionary mechanisms, biodiversity, reserve design, and re-introduction strategies. Written reports and oral presentations required. Additional fee required. Prerequisites: BIO112 and ESC105.

ESC 345
Soil Science
Fall semester, alternate years. 4 semester hours. This course provides an introduction to the physical, chemical, and biological properties of soils; soil formation and classification; nutrient cycling; and land resource planning and protection. The laboratory includes field trips. Three hours of lecture and one two-hour laboratory session per week. Prerequisites: CHM101, GEO101 and GEO104.

ESC 380
Bird Conservation and Management
Fall semester. 4 semester hours. This is a field and laboratory course covering bird evolution, life histories, behavior, populations and conservation. Lab time will focus on survey techniques and bird observations and identification in the field. The primary objective of this course is to teach students the role of evolution in the development of special adaptations of bird characteristics and systems as well as the importance of conservation and management of populations and bird habitat around the world. Specific case studies will examine complex conservation issues related to North America species. Students will be required to design a field study project to address a bird conservation question. (required weekend fieldtrip) Prerequisite: ESC209 or BIO112. Additional field trip fee of $225.00.

ESC 401
Application of Geographic Information Systems
Spring semester. 4 semester hours. Application of GIS is used to produce a professional report using real world data in cooperation with a business, an industry, or a government agency. Software and projects vary from year to year. Three two-hour sessions per week. Prerequisite: ESC321.

ESC 436
Yellowstone Winter Ecology
Spring semester, alternate years. 4 semester hours. This course focuses on the ecology of Yellowstone National Park, particularly emphasizing the complex interactions of large mammals with the forest and range plant communities. Students explore the methods used by the National Park Service to establish natural resource policies and examine the Park’s scientific research priorities. Two extended weekend laboratories provide research opportunities that include topics in winter ecology and aspects of the role of large mammals in the Yellowstone ecosystem. Additional fee required. Prerequisites: ENG119, ENG120, and BIO112.

ESC 450
Internship
On demand. 1-4 semester hours. A maximum of three semester hours can be counted toward a major in environmental studies or a major or minor in environmental science. This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. Contract is required. Prerequisite: junior or senior standing.

ESC 480
Advanced Field Research Techniques
Fall semester. 4 semester hours. Designed as an advanced research techniques class. The focus will be on in-depth student developed field projects that will include several overnight field trips in Montana. Additional skills learned will include, forestry field techniques, marking animals and population assessments, survey and trapping techniques for specialized species such as bats and insects, and radio-telemetry tracking practice. The
development of independent or team projects implemented locally will be required for the latter portion of the semester. Prerequisite: ESC209.

ESC 490
Seminar
On demand. 2-3 semester hours.
Selected topics in environmental sciences or environmental studies are explored.

ESC 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Environmental Studies
The environmental studies major provides students with an interdisciplinary opportunity to investigate the relationship between humans and their environment. As distinct from Environmental Science, the curriculum in Environmental Studies is based in the arts, humanities, and social sciences, emphasizing the political, economic, and social organization of human cultures in relation to the natural world, as well as the artistic, philosophical, and experiential responses to natural and built environments.

Major in Environmental Studies
A minimum of 37 credits required. Core requirements: EST101, ESC105, ESC209, ESC490, PHR304, ENG344, POL313, HST365, PHR378. One of the following courses are required: ART222, or ART243; one of the following COM404, COM355, ENG355, and one additional course chosen in consultation with an Environmental Studies advisor.

EST 101
Introduction to Environmental Studies
Fall semester. 3 semester hours.
This course explores the complexity of environmental issues as approached from the perspectives of the arts, humanities, and social sciences. Since environmental issues are inherently complex, attention is focused on how human beings perceive, understand, and respond to environmental change. Emphasis is placed on developing students' abilities to investigate matters critically and to respond in original, thoughtful, and imaginative ways.

Equestrian Studies
Gary Mullen, Director of Equestrian Studies, Assistant Professor
Marilyn Randall, Associate Professor
Ray Randall, DVM, Assistant Professor
Scott Neuman, Assistant Professor
Nona Austin, Instructor
Christi M. Brown, Instructor
Amy Neuman, Assistant Professor

The equestrian studies program at Rocky Mountain College provides the student a venue for his or her passion for horses. The program offers a firm foundation in equitation to increase skills as a rider; a progressive training approach to encourage the student to form a valuable structure for educating a horse using generally accepted training principles; and a solid background in equine management fundamentals. These fundamentals include a broad-based series of courses designed to give each student exposure to the reality of living with and being responsible for horses. From the basic care of the horse through veterinary courses and stable management to responsible breeding program development with selection and reproduction or managing a program of therapeutic riding, the program encourages each student to find his or her place.

When core subjects are met, the student can choose a program increasingly more tailored to his or her interests whether it is teaching, training, writing, business, therapeutic riding, technology implementation, or marketing. Combined with Rocky Mountain College's traditional liberal arts program, students are provided a variety of experiences promoting lifelong learning and an understanding of the world around them. This multifaceted approach not only prepares the equine student to succeed in a complex and ever-changing global equestrian industry but to meet the challenges of life in a world of diversity as well.

Equestrian facility use fees are not included in basic tuition and are charged in addition to tuition, college fees, and other incidental expenses normally charged during registration (see the "tuition and fees" section).

Major in Equestrian Studies
Students have a choice of one of five options:

Equitation and Training Option
A minimum of 45 semester hours is required in EQS courses, including EQS101, EQS102, EQS121, EQS122, EQS201, EQS225, EQS226; either EQS231 and EQS232 or EQS251 and EQS252; EQS300, EQS302, EQS321, EQS322, EQS402, and EQS450. Students in this major are strongly recommended to take EQS401, EQS421, and EQS422 as electives.

Equine Business Option
A minimum of 42 semester hours is required in EQS/BSA/ECO courses, including EQS101, EQS102, EQS121, EQS122, EQS201, EQS302, EQS402, EQS450, BSA201, BSA202, ECO202, and nine hours of upper-division electives in business administration and accountancy or economics. Other recommended courses include EQS231 and EQS232 or EQS251 and EQS252.
Equine Writing and Publications Option
A minimum of 45 semester hours is required in EQS/ENG/COM courses, including EQS101, EQS102, EQS121, EQS122, EQS201, EQS202, EQS402, EQS450, ENG251 or ENG451, ENG319, ENG325, ENG365, ENG490W (Writing), COM355, and COM402. Other recommended courses include EQS231 and EQS232 or EQS251 and EQS252.

Riding Instructor Option
A minimum of 45 semester hours is required in EQS/PSY/EDC courses, including EQS101, EQS102, EQS121, EQS122, EQS201, EQS231, EQS232, EQS321, EQS322, EQS401, EQS402, EQS405, EQS450, EDC302, and PSY312. Recommended electives are EQS225, EQS226, EQS421, and EQS422.

Therapeutic Riding Option
A minimum of 52 semester hours in EQS/EDC/PEH courses is required, including EQS100, either EQS101 or EQS102, EQS121, EQS122; EQS201, either EQS251 and EQS252 or EQS231 and EQS232; EQS302, EQS309, EQS401, EQS405, EQS410, EQS450 (6 semester hours), EDC330, PEH122, PEH204, and PEH315. In addition, a minor in psychology must be completed.

Minor in Equestrian Studies
A minimum of 21 semester hours is required, including EQS101, EQS102, EQS121, EQS122, EQS201, EQS302, and either EQS300 or EQS402.

Equestrian Studies courses
EQS 100
Volunteer Experience in Therapeutic Riding
Fall semester. 1 semester hour.
All students interested in entering the therapeutic riding program must first participate in the volunteer experience. Students will volunteer in an established therapeutic riding program.

EQS 101
Introduction to Equestrian Studies
Fall semester. 3 semester hours.
The student focuses on the basic anatomy and physiology of the horse. Equine evolution, the study of various breeds, and genetics are also emphasized, along with an overview of the horse industry.

EQS 102
Equine Conformation and Selection
Spring semester. 3 semester hours.
This course focuses on equine structure and the evaluation of how structural anomalies relate to lameness. Students learn and practice selecting horses best suited for intended uses in terms of breed, structure, and temperament. Prerequisite: EQS101.

EQS 121
Fundamental Horsemanship I
Fall semester. 3 semester hours.
This class introduces the basic theories of horsemanship, the centered seat, and balanced riding. While these theories apply equally to both English and Western disciplines, only Western tack is used. Additionally, students develop strength, agility, and coordination as well as maintain their assigned horse in a show barn atmosphere with emphasis on stall maintenance and safe feeding practices.

EQS 122
Fundamental Horsemanship II
Spring semester. 3 semester hours.
This class is a continuation of Fundamental Horsemanship I and builds on those skills with further emphasis upon developing proficiency. A logical training progression is established within a variety of Western venues. The emphasis upon maintaining a healthy horse in a show barn atmosphere is continued. Prerequisite: EQS121.

EQS 201
Equine Preventive Medicine
Fall semester. 3 semester hours.
Students study common equine health practices including parasitology, diseases, pre-purchase examinations, lameness, first aid measures, and the establishment of horse health programs. Prerequisites: EQS101 and EQS102.

EQS 209
Principles of Therapeutic Riding
Spring semester. 3 semester hours.
In this introductory course to therapeutic riding, students will explore the basic principles of therapeutic riding: medical terminology; physical, cognitive, and sensory impairments; and the use of safety and adaptive equipment. Interaction with therapy students, their parents, and health professionals will be stressed. Students will have the opportunity to participate in a variety of hands-on experiences.

EQS 214
Equine Judging
Fall semester. 3 semester hours.
Students learn and actively practice the evaluation of horses and riders in various types of competition, including classes in halter, Western pleasure, and hunter under saddle. There is a strong speech and critical thinking component in this course as students learn to develop oral reasons for defending class placement. Prerequisites: EQS101 and EQS102.

EQS 225
Basic Colt Training I
Fall semester. 3 semester hours.
Through practical application, the student develops skills and techniques by following a logical progression of training for a two- or three-year-old colt in a stress-free atmosphere. Prerequisites: sophomore standing and EQS122.

EQS 226
Basic Colt Training II
Spring semester. 3 semester hours.
This course, a continuation of Basic Colt Training I, will cover the assessment of a colt’s capabilities and begin advanced training techniques. Prerequisites: sophomore standing and EQS225.
Academic Programs

EQS 231  
**Hunter Seat Equitation I**  
Fall semester. 3 semester hours.  
Through the development and assessment of rider and horse skill level, this course establishes a training program for starting a horse over fences. Show ring etiquette develops fundamentals for successful competition and deepens the student's understanding of the equine industry. Prerequisite: EQS122.

EQS 232  
**Hunter Seat Equitation II**  
Spring semester. 3 semester hours.  
This course is a continuation of Hunter Seat Equitation I. By furthering the skills necessary to show a hunter over fences, students gain in strength, balance, and control. Prerequisite: EQS231.

EQS 251  
**Fundamental Horsemanship III**  
Fall semester. 3 semester hours.  
This course offers a continuation of the skills developed in Fundamental Horsemanship I and II with emphasis on both equitation and training skills, including advanced lateral and collection exercises, extension and collection at all gaits with and without contact, spinning, and stopping. Students expand equitation skills through rigorous physical work with and without stirrups and through riding multiple horses. Attention is given to skills involved in riding and the presentation of the show horse. Students are exposed to show ring etiquette, terminology, and riding styles as they work on a variety of specific events including Western riding, trail, hunter under saddle, Western pleasure, equitation, horsemanship, reining, and showmanship. This course features horses ridden in Western tack, emphasizing Western riding strategies. Prerequisite: EQS122.

EQS 252  
**Fundamental Horsemanship IV**  
Spring semester. 3 semester hours.  
This course is a continuation of Fundamental Horsemanship III featuring English tack and English riding. Students not only ride but evaluate other horse/rider combinations to develop an eye for equine talent as well as equitation skills. Prerequisite: EQS251.

EQS 300  
**Reproduction and Growth**  
Spring semester. 3 semester hours.  
Anatomy and physiology of reproduction in the horse, endocrinology, principles of artificial insemination, embryo transfer, genetics, breeding systems, application of the scientific method, care and management of breeding stock. This course will be accepted as a biology elective, provided students have completed BIO111, BIO112, CHM101, and CHM102. This course is highly recommended for students pursuing veterinary school or graduate studies in animal science. Prerequisites: EQS101, EQS102, and EQS201.

EQS 302  
**Nutrition, Stable and Ranch Management**  
Fall semester. 3 semester hours.

The student masters the fundamental principles of equine nutrition, learning the management skills necessary to run a successful stable, including establishing a budget and record keeping. Prerequisites: EQS101 and EQS102.

EQS 309  
**Advanced Therapeutic Riding Instructor Training**  
Fall semester. 2 semester hours.  
All aspects of being a therapeutic riding instructor, including teaching to the appropriate therapeutic level of a student's physical and cognitive abilities, the precautions and contraindications to therapeutic riding, therapy student assessment and program development, and facility and therapy horse management. Students will organize and teach lessons, assign students to horses and volunteers, and maintain progress notes. Prerequisites: PEH122, EQS100, EQS209.

EQS 310  
**Equeine Journalism**  
Fall semester. 3 semester hours.  
The student writes articles suitable for publication in equine publications. Attention is also given to page and ad layout and ad copy. Prerequisites: ENG119 and ENG120.

EQS 315  
**Intermediate Equine Judging**  
Fall semester. 3 semester hours.  
Students engage in and practice the evaluation of horses and riders for competition on an advanced level, including classes in trail, Western riding, reining, hunter hack, and working hunter. Students continue developing oral reasoning and presentation skills for defending class placement. Prerequisite: EQS214.

EQS 321  
**Advanced Horse Training I**  
On demand. 3 semester hours.  
Students learn and practice advanced training procedures and the selection of proper horses for individual events, perfecting both the rider's and the horse's skills to an intermediate competitive level. Prerequisites: junior standing, EQS121, EQS122, EQS225, EQS226, EQS231, and EQS232.

EQS 322  
**Advanced Horse Training II**  
On demand. 3 semester hours.  
This course is a continuation of Advanced Horse Training I with a higher level of skill and expertise employed. Prerequisite: junior standing.

EQS 400  
**Advanced Reproduction**  
Spring semester. 3 semester hours.  
The student focuses on common breeding problems such as organizing and operating a routine teasing program, natural breeding, artificial insemination, and improving conception rates. Students engage in practical application in this course. Class is limited to six students. This course is highly recommended for students pursuing veterinary school or graduate studies in animal science. Prerequisite: EQS300.
Academic Programs

EQS 401

Techniques of Teaching Riding
Fall semester. 3 semester hours.
Students practice methods of teaching riding and engage in practical experience as a tutor or aide in teaching basic equitation. The student also learns and practices the scope and sequence of planning lessons and teaching student skills. There is a strong speech component in this course. Prerequisites: EQS121, EQS122, EQS231, and EQS232. Recommended prerequisites: EQS225 and EQS226.

EQS 402

Equine Marketing
Spring semester. 3 semester hours.
This class is an introduction to the marketing process involved in the horse industry. The student examines consumer buying behavior, marketing channels, and promotional techniques and their role in the marketing process. Recommended prerequisites: BSA343 and EQS302.

EQS 405

Advanced Techniques of Teaching Riding
Spring semester. 3 semester hours.
The student furthers his or her teaching techniques through experience as an equitation tutor or aide with an emphasis upon the development of riding activities such as clinics or riding camps. There is a strong speech component in this course. Prerequisite: EQS401.

EQS 410

Therapeutic Riding, Issues and Ethics
Spring semester. 2 semester hours.
Students will focus on the administration of and teaching in a therapeutic riding program, including organization, emergency procedures, safety regulations, risk management, documentation, and written policies and procedures. Students will learn to provide proper documentation for recognized legal business structures and organization including those for corporations and 501(c)(3)'s as well as the standards for NARHA centers. Students with the required amount of instructional hours will be prepared to take the NARHA national registered instructor examination upon completion. This course includes a senior project.

EQS 415

Advanced Equine Judging
Fall semester. 3 semester hours.
Students review the principles learned in Equine Judging I and Intermediate Equine Judging and broaden their knowledge of competition rules. They further develop oral and thinking skills for the presentation of reasons at the intercollegiate competitive level. There may be opportunities for intercollegiate judge competition. Prerequisites: EQS214 and EQS315.

EQS 421

Advanced Horse Training III
On demand. 3 semester hours.
For the furthering of training and riding skills, this course leads the student toward a more independent development of his or her own training program. Students are expected to develop, organize, and produce a training plan suited to their specific goals. Prerequisite: senior standing.

EQS 422

Advanced Horse Training IV
On demand. 3 semester hours.
This course is a continuation of Advanced Horse Training III. Prerequisite: EQS421.

EQS 450

Internship
On demand. 1-12 semester hours.
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student's major or minor area of study. Contract is required. Prerequisite: junior or senior standing.

EQS 499

Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Foreign Languages and Literature

The foreign languages and literatures program introduces students to other languages and cultures. Learning another language within the context of its culture promotes understanding and acceptance of others and their culture and helps us understand our own culture, individually and as a group.

The program uses the four basic language acquisition skills of reading, writing, listening, and speaking to learn at each successive level. In addition to being instrumental and vital to learning another language, honing these skills also advances English language development.

The program is integral to the liberal arts mission of the College. Students discover that one cannot categorize meaning into compartmentalized boxes. Language and the culture in which those words are imbedded help students comprehend economic systems, the fine arts, and history/political science.

The aim of the foreign languages and literatures program is for the student to be able to read, write, and converse with increasing ability as he or she moves to the next course. The goal of this gradual improvement is to make the student an effective communicator in a native-speaking environment. Toward this end, Rocky Mountain College strives to make opportunities available for travel and study abroad.

The foreign languages and literatures program offers a minor in Spanish. Courses in Italian language and culture are offered on demand. French courses will be offered on demand. Opportunities to study other languages, such as Greek, are periodically available.
Minor in Spanish
This program is currently under moratorium and is not accepting new students.

A minimum of 20 semester hours is required, six of which credits must be upper-division hours.

French courses

FRN 131
Beginning French I
Fall semester. 4 semester hours.
This is a beginning French course. Emphasis is on basic language structure, pronunciation, and simple conversation.

FRN 132
Beginning French II
Spring semester. 4 semester hours.
Continuing development of basic skills with an introduction to the historical and cultural background of France.

FRN 231
French Conversation and Composition
On demand. 3 semester hours.
Selected readings on aspects of French arts and sciences with continued practice in writing and conversation. Prerequisite: FRN132 or appropriate background in French.

FRN 250
Culture and Civilization
On demand. 3 semester hours.
This course provides an overview of the culture of France through representative literary works of authors from the continent. Works examined will include short stories, poetry and excerpts of longer works. The course will consider the culture and historical milieu, and students will discuss, present and write about both the literary movements and corresponding areas of art, music, and popular culture. Prerequisite: FRN231 or appropriate background in French.

FRN 301
The Culture and Literature of France and Francophone Countries
On demand. 3 semester hours.
A continuation of French culture explored in FRN250, with the addition of a cultural broadening into the diversity of other francophone countries through literature, art, history and music and modern media. Students will expand their knowledge of continental French culture, then compare and contrast it to cultures around the world influenced by French: Africa, island nations (Haiti), Canada, and more. Students will research an area of interest from specific countries and report to the class. Prerequisite: FRN250 or appropriate background in French.

Greek courses

GRK 131
Introduction to 5th-Century B.C.E. Attic Greek I
On demand. 4 semester hours.
Students will learn the ancient Greek language of Thucydides, Plato, Herodotus, Homer, and the 5th-century dramatists. This course is also excellent preparation for students who wish to read New Testament (Koine) Greek.

GRK 132
Introduction to 5th-Century B.C.E. Attic Greek II
On demand. 4 semester hours.
Students will continue to learn the ancient Greek language of Thucydides, Plato, Herodotus, Homer, and the 5th-century dramatists. This course is also excellent preparation for students who wish to read New Testament (Koine) Greek. Prerequisite: GRK131.

Italian Courses

ITN 110
From Caesar to the Mafia (Restricted to RFE)
Fall semester. 3 semester hours. Crosslisted as HST110.
An introduction to the culture and history of Italy, the course highlights major historical, literary, and artistic periods. The course examines the Roman Republic and Empire, Medieval and Renaissance thought and literature, the Unification of Italy, the Mafia and its influence, and Fascism and World War II. Students will explore the works of selected Roman writers, Dante and Machiavelli, and modern writers Leonardo Sciascia and Giorgio Bassani.

ITN 131
Beginning Italian I
Fall semester. 4 semester hours.
This course provides an introduction to Italian speech, language, culture and communication through listening, speaking, reading, and writing. The approach integrates culture and language with emphasis on vocabulary acquisition and basic grammatical structures. Class work emphasizes participation, small group work, and opportunities for hearing and speaking Italian.

ITN 132
Beginning Italian II
Spring semester. 4 semester hours.
The course builds on foundations established in Beginning Italian I. Through the use of the four language skills – listening, speaking, reading, and writing – students acquire greater proficiency in Italian vocabulary, grammar, and culture. Emphasis is on oral and written expression, with a variety of learning experiences to reinforce language acquisition. Prerequisite: ITN131, permission of professor, or a placement exam in the Rocky Mountain College Program.

Spanish courses

SPN 131
Beginning Spanish I
Fall semester. 4 semester hours.
This course provides an introduction to Spanish speech, language, culture, and communication through reading, writing, listening, and speaking. A culture- and language-integrated approach with an emphasis on vocabulary acquisition and basic grammatical structures is used.
SPN 132
Beginning Spanish II
Spring semester. 4 semester hours.
This course builds on the foundation established in SPN131. Through the use of the four language skills of reading, writing, listening, and speaking, basic grammar skills, vocabulary acquisition, and cultural readings will increase. Greater emphasis is placed on oral and written expression. Prerequisite: SPN131.

SPN 211
Intermediate Spanish I
Fall semester. 3 semester hours.
This course utilizes the methodical review and practice of basic vocabulary and grammatical structures, combined with the integrated development of proficiency in the four language skills. Expansion of cultural knowledge and functional vocabulary will occur through intermediate-level reading and discussions. Emphasis is on intermediate-level grammar and reading proficiency. Prerequisite: SPN132.

SPN 212
Intermediate Spanish II
Spring semester. On demand. 3 semester hours.
As a continuation of SPN211 in which students continue to review, expand, and practice basic vocabulary and grammatical structures, while more advanced grammatical structures are introduced and practiced. Expansion of cultural knowledge and functional vocabulary continues through increasingly advanced intermediate-level readings and discussions. Emphasis is on intermediate-level grammar, reading, and communicating proficiency. Prerequisite: SPN211.

SPN 301
Culture and Literature of Spain
On demand. 3 semester hours.
This course provides an overview of the culture of Spain through representative literary works of peninsular authors. Works will be examined from the Middle Ages, the Siglo de Oro, and contemporary authors, including an introduction to literary genres. Poetry, short stories, and excerpts of longer works will be studied, via both written works and film. Students will take part in classroom discussions as well as write analytical essays in Spanish. Prerequisites: SPN131, SPN132, and SPN211.

SPN 302
Cultures and Literature of Latin America
On demand. 3 semester hours.
This course provides an introduction to the richness and diversity of the different countries and cultures of Latin America through their writers. Forms of expression and of preserving knowledge used by ancient civilizations to contemporary writers will be explored. Carvings, ancient writings, short stories, and excerpts from novels and plays will be studied via both written works and film. Students will take part in classroom discussions as well as write analytical essays in Spanish. Prerequisites: SPN131, SPN132, and SPN211.

SPN 311
The Art of Spanish Conversation and Composition
On demand. 3 semester hours.
This course, conducted in Spanish, is an interactive communication course where students will work with the syntax and the syntactical analysis of spoken and written Spanish. Pronunciation, vocabulary, and fluency will be enhanced through textbook and simulated situations as well as on-campus and off-campus excursions. These real-life situations and dialogue encounters will be used to encourage conversation and elicit discussion, and students will follow up on the situations by writing well-formulated and coherently arranged written works describing their experience. These essays will be marked, shared with the class, and then analyzed for correctness. This analytical exercise will be done individually as homework and then collectively as class discussions. In addition to readings, research, and discussion, students will make oral presentations in class or at special events. Prerequisites: SPN131, SPN132, and SPN211.

SPN 450
Internship
On demand. 1-12 semester hours.
Students are provided with an on-site, hands-on language experience where students are paired with schools, churches, businesses, government, and/or non-profit organizations in the Billings area, the state(s) or abroad. Contract is required. Contact and feedback will be maintained throughout the course. The student must arrange the internship in agreement with the instructor and the office of career services. Prerequisite: SPN131, SPN132, and SPN211 and junior or senior standing.

Geology
Thomas J. Kalakay, Associate Professor and O. A. Esther T. Seager, Chair in Geology Derek Sjostrom, Assistant Professor

The science of geology integrates physics, chemistry, mathematics, and biology in order to better understand the planet earth. Students typically choose geology because of an interest in the natural world and a desire to work outdoors. Some geologists explore for energy, mineral, and water resources; some evaluate the potential hazards of earthquakes, floods, landslides, and volcanic eruptions; and others locate, contain, or remove pollutants. The geology program prepares students for professional careers in the geosciences and provides the background required for graduate studies. The program offers a major and a minor in geology. A geology emphasis is also offered with the environmental science degree.

The geology program is broadly based in the traditional geologic disciplines with an emphasis on field studies in the Rocky Mountains. Graduates are highly prized by the oil, gas, mining, and environmental industries. Rocky Mountain College geology students work on independent study/research projects with individual faculty. Students have access to state-of-the-art laboratories and analytical equipment within the geology department and through collaboration with other academic institutions.
Major in Geology
A minimum of 47 semester hours is required, including either GEO101/104 or GEO105, GEO204, GEO302, GEO305, GEO343, GEO411, GEO490, CHM101, PHS101 or PHS201, MAT175 or MAT210; and 12 semester hours from GEO209, GEO301, GEO310, GEO320, GEO350, GEO409, GEO415, GEO483, or other courses approved by the geology faculty.

Minor in Geology
A minimum of 19 semester hours is required including either GEO101/104 or GEO105, GEO204, GEO302, GEO343, IDS243, plus four semester hours of geology electives approved by the geology faculty (of which at least two semester hours must be upper division).

Geology courses

GEO 101 Fundamentals of Geology, Option 1
Fall and spring semesters. 3 semester hours.
This course provides an introduction to the science of earth materials, earth systems, and earth history, including the study of minerals, rocks, volcanoes, earthquakes, rock deformation and metamorphism, weathering, and erosion within the modern paradigm of plate tectonics. Special emphasis is placed on interpreting the geologic landscape and history of the Rocky Mountains through an understanding of Earth processes. Three hours of lecture and one recommended two-hour laboratory per week, plus field trips. This course fulfills a natural lab science general education requirement if taken concurrently with GEO104. Students cannot take both GEO101 and GEO105 for credit.

GEO 104 Fundamentals of Geology Laboratory
Fall and spring semesters. 1 semester hour.
Focus on description of the earth materials and earth systems within the framework of plate tectonic theory. Introduction to identification of minerals, rocks, geologic maps and structures. Corequisite: GEO101.

GEO 105 Fundamentals of Geology, Option 2
Annually. 4 semester hours.
This course is designed for students who want to get out and do geology. Participants will hike hills, hug rocks, ford rivers, climb canyons, whatever it takes to get first-hand experience and understanding of geology and geologic problems. Students are introduced to earth materials, earth systems, and earth history within the modern paradigm of plate tectonics. Topics include minerals, rocks, volcanoes, earthquakes, rock deformation, metamorphism, deposition, weathering, and erosion. Special emphasis is placed on interpreting the geologic landscape and history of the Rocky Mountains. Three hours of lecture and one two-hour field trip or lab per week. Students will not receive credit for both GEO101 and GEO105.

GEO 204 Earth Materials I
Fall semester. 4 semester hours.
This course involves detailed study of rocks and minerals and the environments in which they form. The course is very hands-on with emphasis placed on the identification of minerals and rocks in hand specimens and under the optical microscope. Three hours of lecture, one two-hour laboratory per week, and occasional all-afternoon field trips. Prerequisite: either GEO101/104 or GEO105; corequisite: CHM101.

GEO 209 Student Research
On demand. 2-4 semester hours.
Students complete an independent research project under the mentorship of a geology faculty member. Prerequisite: permission of instructor.

GEO 280 Historical Geology
Spring semester. 3 semester hours.
Introduction to interpreting Earth history and a survey of the origin and evolution of Earth’s systems and its life. Includes interpretation of fossils, geologic maps, and stratigraphic sections. Field trips required. Prerequisite: GEO101 or permission of professor.

GEO 301 Paleontology
On demand. 4 semester hours.
This course explores the morphology, classification, paleoecology, biogeography and biostratigraphy of important fossil groups. Three hours of lectures and one two-hour laboratory per week, plus fossil collecting trips. Prerequisites: either GEO101/104 or GEO105, and GEO204.

GEO 302 Stratigraphy and Sedimentology
Alternate years, 4 semester hours.
This course provides an introduction to the properties, classification, depositional environments, and diagenesis of sediments and sedimentary rocks and their stratigraphic nomenclature and correlation. Field trips required. Three hours of lecture and one two-hour laboratory per week. Prerequisites: GEO204 and GEO343.

GEO 305 Earth Materials II
Spring semester. 4 semester hours.
Build on skills learned in Earth Materials I with emphasis on origin and makeup of igneous and metamorphic rocks. Recognition, description, and classification using hand specimen and optical microscopy. Textures, occurrences, and processes are emphasized in practical exercises. The course provides an introduction to geochemical data and field occurrences of igneous and metamorphic rocks. Three hours of lecture, one two-hour laboratory per week, and occasional all-afternoon field trips. Final project is a poster presentation involving literature review and synthesis of a major igneous or metamorphic region (e.g., Yellowstone, Hawaii, Beartooth Mountain Range). Prerequisite: GEO204.
GEO 310
Geomorphology
Annually. 4 semester hours.
Students study landforms and the processes that create them. Topics include surface processes of erosion and deposition by rivers, glaciers, wind, waves, and mass wasting. Field trips required. Three hours of lecture and one two-hour laboratory per week. Prerequisites: GEO305 and GEO343.

GEO 320
The Geology of Natural Resources
Spring semester, alternate years. 4 semester hours.
This course involves the study of geologic processes that produce mineral, coal, crude oil and natural gas (e.g. coal-bed methane) deposits and environmental issues associated with their extraction and use. Emphasis is placed on regional deposits with field trips to appropriate sites. Two hours of lecture per week and field trips. Prerequisite: either GEO101/104 or GEO105.

GEO 343
Field Methods for Geoscientists
Annually. 2 semester hours.
This practical course in basic field techniques focuses on the use of the fundamental tools of geologic field work including topographic and geologic maps, air photos, the Brunton compass, hand-held GPS, and Jacob's staff. Students draft cross-sections, geologic maps, and stratigraphic columns, and prepare geologic reports using proper scientific writing and data analysis techniques. This course should be taken during sophomore or junior year. One hour of lecture and a two-hour laboratory per week. Prerequisites: GEO101/104 or GEO105, and MAT110 or satisfactory score on a math placement exam. This course does not serve as a substitute for GEO350 or equivalent.

GEO 350
Applied Field Geology
Summer semester, on demand. 6 semester hours.
Geologic mapping methods are explored, including the use of aerial photographs, geologic compass, and GPS. Students learn the preparation and interpretation of geologic maps and cross sections, and the measurement and interpretation of stratigraphic sections. A special emphasis is placed on using appropriate methods to solve a variety of complex geologic problems. Five or six weeks. Additional field fee required. Prerequisites: GEO305, GEO302, GEO411, and GEO343.

GEO 380
Geochemistry
Fall semester. 4 semester hours.
Chemistry of inorganic, natural, and contaminated aqueous systems. Topics include the thermodynamics of aqueous systems, oxidation-reduction reactions, phase diagrams, and stable isotope geochemistry. Field trips required. Prerequisites: GEO101, CHM102; MAT111 recommended.

GEO 409
Student Research
On demand. 2-4 semester hours.
Students complete an independent research project based upon course material covering the theory, methodology, and practice of geo-science research. Prerequisites: junior or senior standing and permission of instructor.

GEO 411
Structural Geology and Tectonics
Annually. 4 semester hours.
This course involves the study of rock deformation at all scales, from microscopic analysis of fault rocks to mountain building processes. Topics include the classification and characterization of structural elements such as faults, folds, foliations and lineations. Emphasis is placed on methods of structural analysis including stereographic projection, construction of accurate cross sections, and kinematic analysis. Three hours of lecture, one two-hour laboratory per week, and occasional all-afternoon field trips. Final project is a poster presentation involving literature review and synthesis of a major orogenic belt. Prerequisites: GEO204, GEO343, MAT110 or satisfactory score on a math placement exam.

GEO 415
Hydrogeology
On demand. 4 semester hours.
Students explore the qualitative and quantitative relationships among geologic materials, geologic processes, and water. Includes precipitation, evapotranspiration, runoff, streamflow, aquifers, groundwater flow, wells, water chemistry, water quality, and contamination. Field trips required. Three hours of lecture and one two-hour laboratory per week. Prerequisites: either GEO101/104 or GEO105, and MAT175.

GEO 450
Internship
On demand. 1-12 semester hours.
This course is a guided experience either in industry or governmental work or as a teaching assistant in Geology. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student's major or minor area of study. Pass/no pass grading. Contract is required. Prerequisites: junior or senior standing and permission of instructor.

GEO 483
Thesis in Geology
On demand. 3 semester hours.
This course provides research in geology resulting in a formal written paper, oral presentation, and approval by faculty. Prerequisites: junior or senior standing and permission of professor.

GEO 490
Geology Field Seminar
On demand. 1-4 semester hours.
This capstone course in the geology degree program combines literature reviews with local field research to focus on practical methods for the investigation of real geologic field problems. Oral and written presentations are emphasized. Prerequisite: senior standing in geology.
GEO 499
Independent Study
On demand. 1-3 semester hours. This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.0 or greater. Prerequisite: junior or senior standing.

History and Political Science
Timothy Lehman, Professor
Matthew O’Gara, Associate Professor
Jenifer Parks, Assistant Professor

The program in history and political science prepares students for professional work in the disciplines and supports the liberal arts mission of the College. Whether serving the major or a general education requirement, courses are characterized by attention to careful reading of texts, analysis of important issues of interpretation and meaning, and effective writing. Most classes are moderate in size, which allows ample opportunity for discussion and the development of critical thinking. These habits of mind are essential for success in professional life and prepare students for an active and engaged life as a citizen of our region, the nation, and the world.

The history and political science majors prepare students for graduate study or for careers in teaching and public service. In recent years, the program has sent students to law school, careers in teaching, graduate study in history and political science, political consulting, and careers in government and public service.

Major in History
A minimum of 33 semester hours, including at least two courses in world or European history, at least two courses in American history, HST/POL490, HST236/POL231 and a series of electives chosen in consultation with faculty in the program.

Major in History and Political Science
A minimum of 33 semester hours chosen in consultation with faculty in the program, and including HST/POL490.

Major in History Education
A minimum of 34 semester hours, including at least one course in world history, at least two courses in European history, at least two American history courses, one course in the regional history of the American West, HST422, HST/POL490, and electives chosen in consultation with faculty in the program.

Minor in History
A minimum of 18 semester hours chosen in consultation with faculty in the program.

Minor in Political Science
A minimum of 18 semester hours chosen in consultation with faculty in the program.

Minor in History Education
A minimum of 21 semester hours, including one course in world history, one course in European history, two courses in American history, one course in western regional history, HST/POL490, and electives chosen in consultation with faculty in the program.

Minor in Political Science (Government) Education
A minimum of 21 semester hours is required, including POL101, POL203, POL321, and 12 semester hours of electives. In addition, students must complete the professional education program for secondary teaching (grades 5-12) as described in the “education” section of the catalog.

Major in Social Studies Broadfield Education
This major serves those who desire to teach in smaller school districts. Required is a minimum of 25 credits in history, 15 in political science, and 12 psychology. In addition, students must complete the professional education program for secondary teaching as described in the “education” section of the catalog. Required are the following courses:

History: HST103 or HST104; HST260 or HST311; one of the following: HST303, HST304, HST313; HST/POL490; and two of the following: HST211, HST212, HST363, HST365; HST422; plus six credits history electives; and

Political Science: POL101, POL203, POL321, and six credits of upper-division electives; and

Psychology: PSY101, PSY206, and six credits of upper-division electives.

History courses

HST 103
History of Civilization I
Fall semester. 3 semester hours. This course provides a survey of the origin and development of world culture, with an emphasis on basic ideas. The relevant geography of each area will be covered.

HST 104
History of Civilization II
Spring semester. 3 semester hours. This course provides a survey of the origin and development of world culture, with emphasis on basic ideas. Relevant geography of each area will be covered.

HST 110
From Caesar to the Mafia (Restricted to RFE)
Fall semester. 3 semester hours. Crosslisted as ITN110. An introduction to the culture and history of Italy, the course highlights major historical, literary, and artistic periods. The course examines the Roman Republic and Empire, Medieval and Renaissance thought and literature, the Unification of Italy, the Mafia and its influence, and Fascism and World War II. Students will explore the works of select-ed Roman writers, Dante and Machiavelli, and modern writers Leonardo Sciascia and Giorgio Bassani.
HST 211
American History I
Fall semester. 3 semester hours.
An exploration of vital issues and ideas in American History from the contact of cultures through Reconstruction. Students will consider such issues as the formation of American identities, native responses to European colonization, slavery and race relations, the growth of democracy, and United States political culture from the Revolution through the Civil War.

HST 212
American History II
Spring semester. 3 semester hours.
An exploration of vital issues and ideas in American history from the Gilded Age to the present. Students will consider such issues as industrialism, reform movements, and the role of American in the world.

HST 227
History of Modern Asia
On demand. 3 semester hours.
Students study the major trends in the political and cultural development of Asian countries. Emphasis will be on their contact with the West and the influence of imperialism, nationalism, and communism.

HST/AVS 231
Aviation History
Spring semester. 3 semester hours.
This course outlines the evolution of aviation from early glider and balloon flights to modern jets and the space age. The course examines the multiple ways that technology advances and warfare have advanced aviation. Topics of study include specific flights, significant aviators, and particular aircraft that have improved general, commercial, and military aviation. The course discusses current developments and future trends in aviation.

HST 232
The World Since 1945
On demand. 3 semester hours.
This course explores the major developments in world society from the end of World War II to the present. Major themes of emphasis include the Cold War, decolonization, revolution, nation-building, civil war, social movements, political repression, genocide, terrorism, and globalization.

HST 236/POL 231
Research Design
Spring semester. 3 semester hours.
An introduction to the fundamentals of academic research. Students will learn to select relevant topics, formulate analytical questions, evaluate scholarly claims, and understand how to properly utilize and synthesize appropriate academic sources. Note: this course is a prerequisite for the HST/POL 490 Seminar

HST 260
Montana and the West
Spring semester, alternate years. 3 semester hours.
Students survey the history of Montana in its regional context, focusing on the nineteenth and twentieth centuries.

HST 303
Reformation, Absolutism, and Enlightenment Europe, 1500-1789
Spring semester, alternate years. 3 semester hours.
This course will trace the major political, economic, social, intellectual, and cultural developments in Europe from the late Middle Ages to the eve of the French Revolution.

HST 304
The Age of Revolution Europe, 1789-1914
Fall semester, alternate years. 3 semester hours.
This course provides a study of the French Revolution, the Napoleonic era, the movement toward national unification in Germany and Italy, and the impact of political democracy, capitalism, socialism, and imperialism on European culture.

HST/POL 309
The United States in World Affairs
On demand. 3 semester hours.
This course studies United States foreign policy and diplomacy, including other American international activities, from 1917 to the present.

HST 311
History of Western America
Spring semester, alternate years. 3 semester hours.
The development of the American West from the first explorations to the 20th century is examined.

HST 313
Europe Since 1914
Spring semester, alternate years. 3 semester hours.
Students examine political, cultural, social, and economic developments in Europe from the beginning of World War I to the present. Themes under examination will include nationalism, industrialization, capitalism, liberalism, imperialism, socialism, secularization and urbanization as well as the period's major wars and revolutions.

HST 315
Latin American History
On demand. 3 semester hours.
This course surveys the contact of cultures, independence, and economic/cultural perspectives.

HST 317
Archaeology and History of the Holy Land
Summer semester. 3 semester hours.
This course is designed for students participating in the Bethsaida Excavation and tour of selected sites in Israel. Students will engage in activities including excavating at the site; attending pottery reading, laboratory and evening lectures at the kibbutz; learning archaeological methodology; and learning about kibbutz living on the Galilee. Students are also expected to participate in all guided group tours of important sites and museums in Israel.

HST 324
History of Europe to 1861
Fall semester, alternate years. 3 semester hours.
Focusing upon the medieval origins of early East Slavic
societies and the formation of the Muscovite state and Russian Empire, this course emphasizes the political, economic, social, and cultural components of pre-revolutionary Russia from the tenth through the nineteenth centuries. Special attention will be given to themes of state-building, ethnicity, empire-building, and the role of gender, class, religion, and ideology.

HST 325
History of Russia and the Soviet Union since 1861
Spring semester, alternate years. 3 semester hours.
This course offers an in-depth exploration of Russian and Soviet political, social, and cultural history from the abolition of serfdom in 1861 to the present. Themes of emphasis include the rise of democratic and revolutionary movements in the late tsarist period, the Bolshevik Revolution of 1917, industrialization and collectivization, political repression, late Soviet society, Cold War relations, the collapse of the Soviet empire, and post-Soviet society and culture.

HST 335
Indigenous Responses to Colonialism
Fall semester, alternate years. 3 semester hours.
An exploration of the variety of military, political, and cultural responses by indigenous people to colonialism, especially in response to settler societies such as those in the Americas, South Africa, Australia, or New Zealand. Topics will include violence, strategies of resistance and accommodation, the formation of racial identities, environmental degradation, and ongoing struggles for autonomy in a global context.

HST 358
Topics in History
On demand. 3 semester hours.
An exploration of selected historical ideas, issues, and events. Topics will vary according to instructor interest and student demand, but will focus on central historical texts, important interpretive issues, and emerging scholarship. If the topic is different, students may take this course more than once.

HST 363
Recent America
Fall semester, alternate years. 3 semester hours.
This course is an exploration of major currents in American society since 1945, including war, reform, the rise of welfare, civil rights, Vietnam, feminism, and conservative reaction to these issues.

HST 365
American Environmental History
Fall semester, alternate years. 3 semester hours.
This course examines the interrelationship of human society and nature in American history. Topics will include ecology as it relates to European conquest of the Americas, Native American peoples, public lands policies, American national character, technological society, conservation, and the modern environmental movement.

HST 370
Medieval History
Fall semester, alternate years. 3 semester hours.
This course examines the history of Europe and the Mediterranean world during the Middle Ages (ca. 300-1500), beginning with the transformations of the Roman world in late antiquity and concluding with the origins of the early modern era. Special attention will be devoted to religious, social, and cultural topics, including the Roman papacy, monastic life, the crusades, the problem of heresy, the rise of persecutions, peasant society, and trends in late medieval spirituality.

HST 422
Methods and Materials Teaching History/Social Studies in the Secondary School
On demand. 2 semester hours.
This course requires focused study and consultation with a public school history or social studies teacher, or other acceptable professional. Hours will be arranged in consultation with the content area professor, the secondary education professor, the student, and the professional mentor. Methods of teaching history/social studies content appropriate for grades 5-12 are explored. Appropriate use of technology and implications of current research in history education are discussed. Prerequisites: admission to the teacher education program, senior standing.

HST 450
Internship
On demand. 1-12 semester hours.
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student’s major or minor area of study. Contract is required. Prerequisite: junior or senior standing.

HST/POL 490
Seminar
Fall semester. 3 semester hours.
This seminar explores such topics as the methods and materials of research, trends in historical research and writing, and a survey of historiography and the philosophy of history. A major research paper is required. Prerequisite: HST236/POL231.

HST 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Political Science courses

POL 101
Introduction to Political Science
Fall semester. 3 semester hours.
This course provides an examination of the basic concepts of political science in light of contemporary political events. Students approach such important concepts as freedom,
poll, democracy, authority, revolution, and dictatorship.

**POL 203**
**American National, State, and Local Government**
Spring semester. 3 semester hours.
This course provides an analysis of the American system of government on three levels. Students will examine the origins of our system of government, the nature and role of our Constitution with its functional and territorial distribution of powers, and the importance of government at the three levels.

**POL 220**
**Political Leadership**
Spring semester, alternate years. 3 semester hours.
This course will survey various theories of leadership as applied to politics, as well as explore the biographies of the men and women who have shaped both local as well as global events. Theory is grounded to practical application, with an emphasis on the various styles, methods, and particular contexts within which individual leaders have come to power, and how the exercise thereof has altered or reinforced their original goals and programs.

**POL 225**
**Film and Politics**
On demand. 3 semester hours.
Serves as an introduction to the study of politics and power relations through the modern medium of cinema. Films are treated as texts, and cover a wide-ranging and diverse set of themes, such as electoral politics, race relations, education, censorship, political violence, capitalism, and gender issues.

**POL 231/HST 236**
**Research Design**
Spring semester. 3 semester hours.
An introduction to the fundamentals of academic research. Students will learn to select relevant topics, formulate analytical questions, evaluate scholarly claims, and understand how to properly utilize and synthesize appropriate academic sources. Note: this course is a prerequisite for the POL/HST490 Seminar.

**POL 301**
**International Relations**
On demand. 3 semester hours.
This course examines the way nations interact with one another and how the necessities of power and the desire to regulate the use of power in the international arena have influenced twentieth-century world politics. Prerequisite: a lower-division history course.

**POL/HST 309**
**The United States in World Affairs**
On demand. 3 semester hours.
This course studies United States foreign policy and diplomacy, including other American international activities, from 1917 to the present.

**POL 313**
**Environmental Politics**
Spring semester. 3 semester hours.
Political problems associated with the human impact on the natural environment: pollution, natural resources, public lands, land use, energy, cultural/social justice, and population.

**POL 318**
**Visions of Utopia**
On demand. 3 semester hours.
An exploration of the persistent yet elusive quest for the ideal system of governance. The course explores how “perfect” systems have been visualized in theory, attempted in practice, and often lamented in retrospect. Readings are drawn from a variety of historical examples, dating back to the ancient world, and include several utopian and dystopian novels that illuminate the inherent conflict between necessary order and perfect freedom.

**POL 321**
**History of Political and Social Thought**
On demand. 3 semester hours.
The development of political and social ideas from ancient Greece to the present is examined. Prerequisite: POL 101.

**POL 327**
**Race and Class in America**
On demand. 3 semester hours.
Despite substantial efforts to provide economic opportunity for all Americans, a large and ethnically-diverse underclass remains. In an effort to explain this phenomenon, this course directly confronts American perceptions on wealth, poverty, and race, in order to more fully understand the consequences and contradictions among them. Course materials will include historical accounts, personal narratives, and sociopolitical analyses that explore concepts such as whiteness and blackness, and explain the cultural and structural factors which limit life-chances and prevent many from claiming their share of the elusive “American Dream.”

**POL 343**
**Bross Peace Seminar**
Spring semester. 3 semester hours.
The Drs. John R. and Helen H. Bross Peace Seminar develops a theme that stems from the mission statement of the Rocky Mountain College Institute for Peace Studies which explores alternatives to violence in the behavior of individuals, groups, and nations. This upper division course is interdisciplinary, inter-generational, and team taught. We have presenters from Rocky Mountain College and Montana State University-Billings, with international guest speakers and guest speakers from the professional and business communities. Enrollment is limited to 20 students and 20 auditors to allow for active discussion and exchange. Prerequisite: junior standing

**POL 405**
**Mass Movements and Global Terrorism**
Spring semester. 3 semester hours.
An advanced seminar which focuses upon the sociocultural causes of violent mass movements. Terrorism is more properly understood as a specific type of political violence, and thus the course will seek to explain and understand the dynamic power struggles that underlie the phenomenon. Ultimately, strategies of counterterrorism and the prospect...
for peaceful reconciliation will be considered.

**POL 412**  
**Constitutional Law**  
Fall semester, alternate years. 3 semester hours.  
A case-method approach to the landmark decisions of the Supreme Court, with an emphasis on the doctrine of judicial review and the role of the Court in interpreting the Constitution and shaping American legal culture. The course will focus on the exercise and limitations of federal power in the areas of the economy, civil rights, and individual liberties, as well as the Constitutional basis on which statutes and other regulatory provisions are adjudicated. Special attention will be given to Constitutional clauses related to free speech, due process, and equal protection under the law.

**POL 422**  
**Revolutions and Revolutionaries**  
On demand. 3 semester hours.  
An advanced seminar that seeks to answer one of the most important questions in the field: why men rebel. Relying heavily on primary sources, readings will include works of political theory, political biography, and narrative accounts of various historical examples of revolution as well as several profiles of the men and women engaged in both violent and non-violent rebellion.

**POL 427**  
**The Crisis of Modernity**  
On demand. 3 semester hours.  
The dawn of the scientific revolution is much heralded as a turning point in world history, at which time man was emancipated from earlier forms of traditional rule. However, the divorce between tradition and the modern world is wrought with challenges and contradictions, such as the often dichotomous relationships between religion and secularism, science and faith, technology and nature. A primary goal of this course is to question whether mankind is headed in the right direction, or if modernity has resulted in a net-negative for the human condition.

**POL 450**  
**Internship**  
On demand. 1-12 semester hours.  
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student’s major or minor area of study. Contract is required. Prerequisites: junior or senior standing.

**POL 483**  
**Research Assistantship**  
On demand. 1-3 semester hours.  
As an advanced research course designed primarily for students considering further study at the graduate level, this is an opportunity for students to work individually and in close consultation with a member of the faculty, based on the supervising advisor’s particular research agenda. Principal tasks include data collection, literature review, preliminary analysis, and/or other duties stipulated in an initial course contract. Prerequisite: junior or senior standing.

**POL/HST 490**  
**Seminar**  
Fall semester. 3 semester hours.  
This seminar explores such topics as the methods and materials of research, trends in historical research and writing, and a survey of historiography and the philosophy of history. A major research paper is required. Prerequisite: POL231/HST236.

**POL 499**  
**Independent Study**  
On demand. 1-3 semester hours.  
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

**Honors Program**  
*Susan McDaniel, Director*

The honors program enhances the education of some of our finest students within an eight-credit-hour curriculum that allows them to work intensively with a single professor in the production of a project relevant to their career or graduate education interests. The projects vary widely in scope. Some students elect creative works in music, drama, or spatial arts. Others may do specialized research on historical or literary topics. Students in the sciences may wish to complete original research. Often, topics will be interdisciplinary. In all cases, students’ projects are begun and completed with the approval and close support of the honors committee, their divisions, and their readers, as explained in the sequence below.

Successful honors students find that participation in this program not only brings them closer to professionals in their chosen fields, but also grants them substantial credentials in their applications to graduate schools or employment opportunities.

The honors program at Rocky Mountain College is open to students who, at completion of the second semester of their sophomore year, have achieved a GPA of 3.40 or better or are recommended by a faculty member. Interested students may also petition the honors committee for admittance to the program.

Honors students enjoy reserved carrels in the library, freedom from academic overload fees (students are exempt from overload fees due to enrollment in their honors courses; any extra credits students taken beyond the 19 non-honors credits would normally be subject to the overload fee), and an increase in scholarship assistance as they pursue projects during their senior year (honors students enrolled in HON490 are eligible for a $300 scholarship each semester they are enrolled in HON490).

**Spring semester junior year**  
Approved entrants participate in HON309, Honors Proposal Development. Students will spend the semester selecting
and developing topics related to their major field of study, and will produce a research proposal to be presented to the Honors committee for approval. Only well-developed proposals will be approved for academic support and possible funding by the committee. Students who successfully defend their proposals then move forward with their projects, taking two semesters of HON490 as well as HON409 (Fall) and HON491 (Spring) during their senior year.

Fall semester senior year
Honors students commence work on their projects in HON490, Senior Honors Project, as well as participate in a leadership course, HON409.

Spring semester senior year
Honors students register for a second semester of HON490, Senior Honors Project as well as HON491, Project Presentation, a rehearsal seminar climaxing in the graded public presentation of the completed project. In cases of mid-year graduation, HON491 will also be provided for the fall semester.

Honors courses
HON 309 SPRING
Honors Proposal Development
Spring semester, junior year. 2 semester hours.
The goal of this course is to produce a research proposal of the highest academic caliber. Students will spend the semester selecting and developing relevant topics, learning the methodology of research design, formulating analytical research questions, and gathering scholarly research related to their chosen course of study. At the end of the semester the proposal is presented to the Honors committee for approval, and only proposals approved by the committee will receive academic support. Proposals not approved may be resubmitted, at the discretion of the committee, with appropriate modifications.

HON 409 FALL
Leadership
Fall semester, senior year. 1 semester hour.
A course that considers classical and contemporary leadership issues and focuses on an issue determined by students and the faculty instructor. Corequisite: HON490.

HON 490
Senior Honors Project
Fall and spring semesters.
4 semester hours (2 credits each semester).
Students undertake senior papers/projects approved by the honors committee and their divisions. Students sign a contract with their faculty readers (mentors) outlining their objectives, timelines and final project. Students are expected to finish a rough draft of their projects by midterm of their second semester. Copies of the completed paper or a description of the project are due to the first (and second) reader and the director of the honors program by 4 p.m. on the second Friday in April (fourth Friday in November for those planning to graduate in December). Students present their projects to the college community in the second week before finals in each semester. Pre- and Corequisites: HON309 and HON409.

HON 491
Project Presentation Seminar
Spring semester (fall on demand). 1 semester hour.
A regular meeting of honors students preparing to deliver graded public presentations of their senior honors projects. Rehearsals, student and mentor critiques, use of audio/visual aids, and presentation techniques constitute the foci of these workshops. Corequisite: HON490.

Interdisciplinary Studies
Interdisciplinary Studies courses
IDS 101
Campus Compass
Fall semester. 1 semester hour.
This course introduces the freshman student to college life and academics. Topics include note taking, study techniques, test taking, time management, personal growth, and more. The course meets twice a week for the first six weeks of the semester.

IDS 105
Humanities Enrichment
Spring semester. 1 semester hour.
This course introduces students to the humanities and familiarizes them with cultural opportunities in that area. Students will investigate museums, poetry, painting, live performances, reading, and music.

IDS 110
Introduction to the Humanities
Fall semester. 3 semester hours.
This course introduces students to the humanities through a series of basic lectures and discussions on history, mythology, philosophy, religion, drama, poetry, literature, music, art, and politics along with an emphasis on the importance of these subjects in contributing to our development as humans. This course does not fulfill a general education requirement. The credits will count toward the 124 needed to graduate.

IDS 112
Student Leadership
Fall semester. 1 semester hour.
This course assists student leaders in confronting campus issues and challenges. Emphasis is on student development theory, basic leadership skills, communication, and social issues. It is mandatory for resident assistants but greatly beneficial to all students in or aspiring to campus leadership roles. Recommended for ASRMCl, hall council, and other club officers.

IDS 115
Indispensable Qualities of Leadership
Fall semester. 3 semester hours.
This course is the study of the art of leadership and how leadership skills can be developed. We will study leaders throughout history, from Sun Tzu (of over 2,000 years ago) to the latest leadership examples. This course will utilize reading, classroom discussions, group participation efforts, and two films in the attempt to dissect the idea of leadership. This course will also look at "personal leadership" character-
Academic Programs

istics that will enable the student to achieve success at Rocky Mountain College and in society.

IDS 120
College Study Skills/Developmental Reading
Fall and spring semesters. 2 semester hours.
Sponsored by services for academic success (SAS), this course introduces major learning strategies which lead to academic success. Key topics include note-taking systems, scheduling methods, memory principles, academic resources and test-taking strategies. Students are provided with class-related assignments that encourage study skills mastery. In addition, students are provided individualized reading programs based on their present reading skills.

IDS 131
Habitat Mission
Fall semester. 1 semester hour.
This weekend will serve as an introduction both to Habitat for Humanity and a local affiliate program. Students will be invited to learn about both the goals and intentions of a service program (by reading a book by the program’s founder) and the personal impact it has in communities and the impact it has on a volunteer (through active participation). By meeting a family who will be living in the home we are building, students will be able to hear first-hand accounts of the struggles of low-income families and the difference programs such as Habitat for Humanity make in the lives of individuals and families.

The program is designed for students in their first or second year, but will not be limited to underclassmen. The local Habitat for Humanity affiliate may need to supplement our volunteer group with other local volunteers while we are on site, including those who are accepted by the affiliated Habitat for Humanity to receive a home. This interaction allows students to work side by side with future homeowners, past homeowners and volunteers who have a lot of experience with construction and the Habitat for Humanity program.

Students will learn more details about on-site safety, accommodations, dining, transportation, and packing lists at the required orientation. All registered students will receive a message regarding the day and time of this mandatory orientation during the first weeks of class. After the add/drop period, students may join the group without taking the course for credit.

IDS 180
Arabic I
Fall semester. 3 semester hours.
This course provides an introduction to Arabic language through mastering the alphabet system. It emphasizes on the four language skills of reading, writing, listening and speaking. It presents basic vocabulary acquisition and it is an exploration of the Arab World culture. Textbook: Alif Baa with DVDs

IDS 180
Arabic II
Fall semester. 3 semester hours.
This course continues the focus on improving the proficiency of the four language skills and establishes intensive grammatical structure. Cultural exposure expands and functional vocabulary acquisition increases. Communication and interaction techniques develop through encouraging group encounters and expressive discussions. Textbook: Al-Kitaab fii ta'allum al-Arabiyya with DVDs (Part One)

IDS 202
Career Exploration and Planning
On demand. 2 semester hours.
This course focuses on the various facets of career search and choice. Students will assess their skills, values, interests, and aptitudes to see where they fit in the world of work. Topics include information about job market trends, job search skills, resume writing, and interviewing.

IDS 205
Negotiations
Fall semester. 2 semester hours.
Negotiation constitutes the primary form of dispute resolution. Negotiation is a comprehensible social process, not a mystical process in a black box; it can be analyzed, understood, and modeled. Negotiation is a learnable and teachable skill. Negotiator's are made not born, and skills can be improved and relearned throughout life. The goal of this course is to empower the student, to become a comfortable negotiator—to appreciate the professional and personal enjoyment to be derived from negotiating.

IDS 220
College Newspaper
On demand. 1-3 semester hours.
Requires permission of the faculty advisor. Pass/no pass grading.

IDS 243
Scientific Writing and Analysis
Fall and spring semesters, 2 semester hours.
Students will write clear and concise scientific papers and reports. Writing assignments will focus on grammatical requirements for formal scientific writing: abstracts; outlines and organization including paper, paragraph, and sentence structure; paraphrasing and citation usage; and methods of data presentation. A portion of the course will be devoted to data analysis, drafting of tables, and preparation of graphs. IDS243 is required for Biology and Chemistry majors and minors. Prerequisite: ENG120 and declared major or minor in a natural science, or permission of instructor.

IDS 276
Irish Protest
Spring semester. 1 semester hour.
The contentious political culture of Ireland has transitioned multiple times throughout the last three hundred years. Governmental, non-governmental, religious, and local groups have emerged in the debate about governmental power in Ireland and Northern Ireland. This course will trace the current developments in Irish politics through a history of the IRA, Sinn Fein, Ulster Unionist, and Irish Nationalist party. The protest rhetoric in these social movements has framed the political identity of the citizens of
these two countries. This course will track the progression of current developments in Irish politics by examining communication attributes of the various organizations that have engaged in the political protests. We will travel to Dublin, Belfast, Derry, Galway and Dingle to gain diverse political and religious perspectives in the respective countries. Introductory material will be presented prior to departure so students have a historical and political context in which to understand the political protest and the cultural tours.

IDS 278
The Rhetoric of Irish Protest
Summer semester. 1 semester hour.
This credit is earned by the students during the 12 day trip to Ireland in the May session. The contentious political culture of Ireland has transitioned multiple times throughout the last three hundred years. Governmental, non-governmental, religious, and local groups have emerged in the debate about governmental power in Ireland and Northern Ireland. This course will trace the current developments in Irish politics through a history of the IRA, Sinn Fein, Ulster Unionist, and Irish Nationalist party. The protest rhetoric in these social movements has framed the political identity of the citizens of these two countries. This course will track the progression of current developments in Irish politics by examining communication attributes of the various organizations that have engaged in the political protests. We will travel to Dublin, Belfast, Derry, Galway and Dingle to gain diverse political and religious perspectives in the respective countries. Introductory material will be presented prior to departure so students have a historical and political context in which to understand the political protest and the cultural tours. Prerequisite: IDS276.

IDS 305
Mediation
Spring semester. 3 semester hours
Mediation is an interdisciplinary field. Mediators come from all disciplines and walks of life. A potential mediator ought to possess including; the patience of Job, the hide of a rhinoceros, and the wisdom of Solomon. Mediation is an alternative to a decision rendered by a judge, arbitrator, or other decision maker. Mediators help the parties in a dispute to engage in constructive and creative communication, which will allow them to explore the issues and reach a mutually acceptable resolution of their dispute. The goal of the course is to provide those basic skills necessary to further pursue mediation, either as a profession or as another arrow in the student’s quiver of practical and life skills.

IDS 422
Methods And Materials: Teaching Natural Science In The Secondary School
Fall semester. 2 semester hours.
This course emphasizes the teaching of biology or chemistry at the secondary 5-12 level. Methods of teaching these subjects (including incorporation of active hands-on experiences), reviewing texts for content appropriate to various grade levels, and the use of technology in the classroom will constitute major parts of the course. Particular attention will be paid to thinking, reading, listening, writing, and speaking instruction. Teaching diverse and at-risk student populations will also be discussed. This course is the capstone course for the biology or chemistry education major. Corequisite: EDC420.

IDS 443
Literature of Leadership
On demand. 3 semester hours.
This course reviews current literature regarding leadership. Different leadership theories are explored in the context of current literature.

IDS 483
Organizational Leadership
Spring semester, even years. 3 semester hours.
This course operates on a format of open discussion, risk-taking, initiative, honest self-assessment, experiential exercises, and observation of real-life leadership practice. It will challenge students to craft their own perspectives strengthened through critical examination of case studies, workshops, readings, and local public leaders who will share their own leadership perspectives.

Mathematics
Debra Wiens, Professor
Ulrich Hoensch, Associate Professor
Robyn Cummings, Associate Professor
Mathematics is one of the most intellectually challenging and academically pure subjects. Mathematical thought is a creative process of the mind that uses only logical deduction and established results which, in turn, have been derived from a few unarguable assumptions (axioms). Mathematical modeling is the process of critically investigating a given object (e.g., the functioning of a biological system); and of choosing or creating mathematical structures that explain the observed behavior and allow for prediction and manipulation of this object.

The mathematics program at Rocky Mountain College emphasizes both the pure and applied aspects of mathematics. At its core, its curriculum is designed to provide students with a solid foundation in the art of providing mathematically sound arguments, and with a thorough knowledge of the most important modern mathematical tools and methods. In addition, the mathematics program offers elective courses that give students the opportunity to branch out and pursue their own interests. Many elective courses emphasize connections to other fields (such as computer science, engineering, finance, and the natural sciences).

All mathematics prerequisite courses must be completed with a grade of at least “C”.

Major in Mathematics
A minimum of 38 semester hours, including MAT175, MAT176, MAT212, MAT275, MAT276, MAT311, MAT313, MAT317, MAT318, MAT481, and two electives numbered 219 or above.

Major in Mathematics Education
A minimum of 40 semester hours, including MAT175, MAT176, MAT212, MAT220, MAT256, MAT275,
MAT276, MAT306, MAT310, MAT312, MAT317, MAT318, MAT422, and MAT481. In addition, students must complete the professional education program for secondary teaching (grades 5-12) as described in the “education” section of the catalog.

NOTE: If a student majors in both mathematics and mathematics education, he or she must complete the requirements of both majors but does not need to take additional credits within the mathematics department. Majoring in both mathematics and mathematics education requires a minimum of 46 semester hours.

Minor in Mathematics
A minimum of 21 semester hours, including MAT175, MAT176, MAT275, and three courses from the following list: MAT212, MAT256, MAT310, MAT311, MAT313, MAT317, MAT320, and MAT481.

Minor in Mathematics Education
A minimum of 29 semester hours, including MAT175, MAT176, MAT210, MAT212, MAT220, MAT306, MAT312, MAT317, and MAT422. In addition, students must complete the professional education program for secondary teaching (grades 5-12) as described in the "education" section of the catalog.

Mathematics courses

MAT 090
Refresher Math: Algebra
Fall and spring semesters. 3 semester hours.
Sponsored by services for academic success (SAS), this course is designed to prepare students for college algebra. Elementary algebra topics are covered, which include solving equations and inequalities, simplifying algebraic expressions, simplifying expressions involving integers and rational numbers, and graphing equations. This course will not satisfy the math general education requirements and will not count toward the 124 credits required for graduation.

MAT 100
College Algebra
Fall and spring semesters. 3 semester hours.
This is a basic course in intermediate and advanced algebra. Prerequisite: satisfactory score on a placement exam.

MAT 103
Mathematics for Elementary School Teachers I
Fall semester. 3 semester hours.
A survey of various mathematical topics normally taught in grades K–8, specifically numeration systems, number theory, patterns and relationships, and fractions. This course is intended for elementary education students only. Students must earn a grade of "C-" or better to fulfill requirements for the elementary education program. Prerequisite: MAT100 or satisfactory score on a placement exam.

MAT 104
Mathematics for Elementary School Teachers II
Spring semester. 3 semester hours.
A survey of various mathematical topics normally taught in grades K-8, specifically probability and statistics, geometric basic concepts and structures, measurement, and coordinate geometry. This course is intended for elementary education students only. Students must earn a grade of "C-" or better to fulfill requirements for the elementary education program. Prerequisite: MAT100 or satisfactory score on a placement exam.

MAT 110
Elementary Functions
Fall and spring semesters. 3 semester hours.
A standard pre-calculus course emphasizing the function concept. Special attention is paid to trigonometric, exponential, and logarithmic functions. Prerequisite: MAT100 or satisfactory score on a placement exam.

MAT 131
Trigonometry and Applied Calculus
Fall semester. 3 semester hours.
This course is available to aeronautical science majors and aviation management majors only. This course introduces applied trigonometry, vectors, and basic differential and integral calculus to model and solve real-world problems. Prerequisite: MAT100 or satisfactory score on a placement exam.

MAT 152
To Infinity and Beyond
On demand. 3 semester hours.
Exploration of a variety of modern mathematical topics. Topics will illustrate mathematics as a way of representing and understanding patterns and structures, as an art, as a tool in other disciplines and as a historical force. Topics may include infinity, chaos, fractals, symmetry, networks and others. Prerequisite: MAT100 or the equivalent.

MAT 175
Calculus I
Fall semester. 5 semester hours.
This course is a study of the functions of one real variable and includes a brief review of circular functions. The ideas of limit, continuity, and differentiation are explained and applied to physical problems. Topics include the use of approximations and problem solving. The use of graphing calculators is required. Prerequisite: satisfactory score on a placement exam or MAT110.

MAT 176
Calculus II
Spring semester. 5 semester hours.
Continuing the study of the functions of one real variable, the idea of integration is applied to physical problems. Introduction to sequences and series. The use of graphing calculators is required. Prerequisite: MAT175.

MAT 210
Probability and Statistics
Fall, spring, and summer semesters. 3 semester hours.
This course provides a non-calculus-based study of discrete probability theory and its statistical applications. Distribution theory and its applications in hypothesis testing and setting confidence intervals are discussed. Prerequisite: MAT100 or satisfactory score on a placement exam.

MAT 212
How to Read and Write Proofs
Spring semester, alternate years. 3 semester hours.
Students are introduced to the different methods of mathematical proofs. Emphasis is placed on critical reading of proofs and the ability to correct errors as well as on writing correct proofs. This course is designed as a precursor to advanced math courses and should be taken during the freshman or sophomore year. Prerequisite: MAT175.

MAT 219
Graph Theory
On demand. 3 semester hours.
Topics include paths, Euler and Hamiltonian problems, planar graphs, trees, directed and undirected graphs, networks, and connectedness. Applications to various disciplines will be included. Computational algorithms will be developed as appropriate. Prerequisite: MAT100 or satisfactory score on a placement exam.

MAT 220
Elementary Number Theory
Fall semester, alternate years. 3 semester hours.
Topics include axiomatic development of the positive integers, construction of the real number system, and study of equations with integral solutions. Divisibility properties, prime numbers, and the analysis of congruencies will be studied. Prerequisites: MAT175 and MAT212.

MAT 256
Discrete Structures and Computability
On demand. 3 semester hours.
The mathematical and theoretical underpinnings of the science of computer science will be explored. Students will be introduced to Boolean algebra and elementary logic and their application to computer implementation and algorithm development. This course explores the historical development of computer science from its roots in mathematical models including early models of computation, such as Turing machines and other finite state machines. Prerequisites: CSC131 or CSC143 and either MAT110 or MAT175.

MAT 275
Calculus III
Fall semester. 3 semester hours.
Vector functions of one or more real variables, scalar functions of several variables, multiple integration, and surface theory via vectors are among the topics studied. Increasing emphasis on modeling of physical problems and the analysis of geometrical problems in higher dimensional space. Prerequisite: MAT176.

MAT 276
Introduction to Mathematica
Fall semester. 1 semester hour.
This course provides an introduction to the basic structures and components of computer algebra systems (CAS). Lists, functions, graphics and programming in Mathematica will be covered. Students are required to purchase a student copy of the software and install it on a personal computer. Prerequisite: MAT176. Corequisite MAT275.

MAT 306
History and Philosophy of Mathematics
Fall semester, alternate years. 3 semester hours.
This course provides a survey of mathematicians of historical note, including their motivations and studies. Students will also examine classical problems and how they were solved. Unsolved problems in mathematics will be discussed. Prerequisite: MAT175.

MAT 310
Mathematical Statistics
Spring semester, alternate years. 3 semester hours.
A calculus-based introduction to statistical methods and theory. The course covers basic probability rules; random variables and probability distributions; limit theorems; sampling distributions; point and interval estimation methods; hypothesis testing, including t-and chi-square tests; the simple linear regression model and analysis of variance. Prerequisite: MAT275.

MAT 311
Linear Algebra
Spring semester, alternate years. 3 semester hours.
This course introduces students to the basic structures of linear algebra, which include the following: matrices, determinants, vectors and vector spaces, inner product spaces, eigenvalues and eigenvectors. Applications and computational aspects of these topics will be presented. Prerequisite: MAT175. Corequisite: MAT176.

MAT 312
Modern Geometric Theories
Spring semester, alternate years. 3 semester hours.
This course provides a study of Euclidean and non-Euclidean geometries. Prerequisites: MAT175 and MAT212.

MAT 313
Differential Equations
Fall semester, alternate years. 3 semester hours.
This course examines analytic, numerical, and geometric techniques for solving first-order differential equations; bifurcations of first-order autonomous differential equations; second-order differential equations, with emphasis on the harmonic oscillator; Laplace transforms; eigenvalue/eigenvector and geometric methods for linear systems with constant coefficients; equilibrium point analysis of nonlinear systems; analysis of limit cycles. Applications from biology, physics, and economics are presented. Prerequisite: MAT311.
Complex Variables
On demand. 3 semester hours.
This is a basic undergraduate course in complex variables. Topics will include analytic functions, Cauchy's integral formula, the residue calculus, and conformal mapping. Prerequisite: MAT275.

MAT 317
Abstract Algebra I
Fall semester, alternate years. 3 semester hours.
This course provides an introduction to algebraic structures via group theory. Students explore a careful development of the concept of a group and elementary properties of groups. Emphasis is placed on creating mathematical proofs. Some applications to physical problems are included. Prerequisites: MAT275 and MAT212.

MAT 318
Abstract Algebra II
Spring semester, alternate years. 3 semester hours.
This course is an extension of Abstract Algebra I, with ring, ideal, and field theory introduced and examined. Prerequisite: MAT317.

MAT 320
Numerical Methods
On demand. 3 semester hours.
The study of numerical methods involves the design and use of algorithms for solving large mathematical problems with a computer. Topics include estimation of accuracy, the use of series and approximation, and numerical integration and differentiation. Prerequisites: CSC251 and MAT176.

MAT 325
Combinatorics
On demand. 3 semester hours.
This basic course in enumerative Combinatorics emphasizes developing combinatorial reasoning skills and applying these to solve problems in various areas of math and computer science. Topics covered will include basic counting principles, generating functions, recurrence relations, the principle of inclusion/exclusion, estimation, and modeling. Prerequisite: MAT219.

MAT 422
Methods and Materials
Teaching Mathematics in the Secondary School
On demand. 2 semester hours.
This course requires focused study and consultation with a public school mathematics teacher, or other acceptable professional. Hours will be arranged in consultation with the content area professor, the secondary education professor, the student, and the professional mentor. Methods of teaching mathematical content appropriate for grades 5-12 are explored. Appropriate use of technology and implications of current research in mathematics education are discussed. Current NCTM curriculum standards are used as the foundation of the course. Prerequisites: admission to the teacher education program, senior standing.

MAT 450
Internship
On demand. 1-12 semester hours.
An internship in mathematics arranged between a member of the math faculty and the student. The internship will not count as part of the minimum number of credits required in the major. The requirements will be based on the number of credits. Contract is required. Prerequisites: junior or senior standing, permission of instructor, a cumulative GPA of at least 2.00 and a major GPA of at least 2.25.

MAT 481
Real Variables I
Spring semester, alternate years. 3 semester hours.
Standard introductory course in real variables. Topics include: axioms of real numbers, cardinality of sets, topology of the real number line, supremum and infimum, Bolzano-Weierstrass theorem, sequences of real numbers, convergence of sequences, Cauchy sequences, limit theorems, continuity and uniform continuity of functions. Prerequisites: MAT275 and MAT212.

MAT 482
Real Variables II
On demand. 3 semester hours.
Further topics in real variables, including: Riemann integration, differentiation of functions, mean value theorem and the fundamental theorem of calculus, sequences of functions, pointwise and uniform convergence, limit theorems, special functions. Other topics if time permits may include the following: metric spaces, uniform norm, spaces of functions, series of real numbers, and others. Prerequisite: MAT481.

MAT 490
Seminar
On demand. 2-3 semester hours.
Selected topics in mathematics are explored. Prerequisite: permission of professor.

MAT 499
Independent Study
On demand. 1-3 semester hours.
This course allows interested students to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor in mathematics or mathematics education and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Military Science
Captain Paul Fowler,
Assistant Professor of Military Science

Army ROTC prepares students with the leadership skills and abilities through an applied model of training and mentorship to face the challenges of an ever changing environment. Students who accept the challenge to become an Army Officer may be eligible for a four year scholarship to include: 100% Tuition & fees (minus aviation), $1200 per year book allowance and a tax free stipend based on academic status ( $300/month – Freshman, $350/month – Sophomore, $450/month – Junior, $500/month – Senior). Army ROTC courses are categorized as a Basic Course (Freshman and Sophomore courses) or Advance Course (Junior and Senior courses). Any student may take Basic
Course and physical fitness classes without military obligation or pre-requisites. Advance Course classes are limited to qualified contracted students (see Cadre for details). Typically, ROTC students take one three-credit class (2 to 3 hours per week), one workshop/leadership laboratory per week, and one overnight field exercise per semester in addition to their other classes. ROTC students also participate in physical fitness training (3 hours per week). The program provides opportunities to attend confidence-building courses during the summer such as the Air Assault or Airborne Schools, Mountain Warfare and summer internships. The program works with its Army ROTC host Battalion at Montana State University – Bozeman. ROTC (Military Science) is neither a major nor a minor. All cadets who seek a commission must graduate with one of Rocky Mountain College’s recognized majors. Cadets also plan and conduct other military events and participate in various leadership experiences each semester.

**ROTC Curriculum**

A maximum of 12 credits from the advanced courses in the Military Science curriculum may be applied as electives towards your degree. There are various other Military Science courses that may be available but not part of the required ROTC curriculum. These include 404 Practicum (1-3 semester hours) and 405 Leadership Special Topic (1-4 semester hours).

**The Basic Course**

The ROTC program is divided between the Basic Course and the Advance Course. The Basic Course consists of Freshman and Sophomore classes. Any student may take any Basic Course and the physical conditioning classes without pre-requisites or military obligation. The Basic Courses classes are:

- MLS101 Introduction to Military Leadership Skills (2 semester hours)
- MLS102 Basic Leadership Skills and Concepts (2 semester hours)
- MLS201 Leadership Development and Life Skills (3 semester hours)
- MLS202 Leadership Management and Team Building (3 semester hours)

The physical conditioning class is:

- MLS106 Army Physical Conditioning and Training (co-requisite taken every semester with Basic and Advanced courses. 1 semester hour)

**The Advance Course**

Only qualified, contracted ROTC cadets may take Advance Course classes:

- MLS301 Small Unit Tactics and Operations (3 semester hours)
- MLS302 Applied Leadership and Tactics Training (3 semester hours)
- *MLS303 Warrior Forge (3 semester hours)
- MLS401 The Army Officer: Roles and responsibilities (3 semester hours)

*Advance Course cadets must also complete Leadership Development and Assessment Course (5 paid weeks at Fort Lewis, Washington. Usually taken during the summer between their Junior and Senior year)

After the successful completion of ROTC requirements and graduation, Cadets commission as 2nd Lieutenants in the US Army. Cadets have the option of going into Active Duty, the Army Reserves, or the National Guard. Stipulations do apply. Contact Paul Fowler at: 406-461-6929 or paul.fowler@montana.edu for more information regarding commissioning, scholarships and enrollment options.

**MLS 101 Introduction to Military Leadership Skills**

Fall, spring, and summer semesters. 2 semester hours. Establishes a framework for understanding officerhood, leadership, Army values and physical fitness, time management, communications theory and practice (written and oral), and interpersonal relationships. These initial lessons form the building blocks of progressive lessons in values, fitness, leadership, and officerhood. A laboratory component is required which includes physical fitness training, and other outdoor skills. Corequisite: MLS106.

**MLS 102 Basic Leadership Skills and Concepts**

Fall, spring, and summer semesters. 2 semester hours. Establishes a foundation of basic leadership fundamentals such as: problem solving, communications, military briefings, effective writing, goal setting, techniques for improving listening and speaking skills, in addition to an introduction to counseling. Provides students with a basic understanding of situational leadership as it applies to the military and how the basic concepts and practices relate to individuals and organizations. A laboratory component is required which includes physical fitness training, and other outdoor skills. Corequisite: MLS106.

**MLS 106 Army Physical Conditioning and Training**

Fall, spring, and summer semesters. 1 semester hour. Develops confidence and discipline in mind and body through a regimented and challenging physical conditioning course. Designed to provide students a framework of fitness skills, planning and testing for a lifetime of health. The course consists of three Physical Training (PT) sessions per week that include: running, swimming, upper body, core development, sports, and team building exercises. Corequisite: enrollment in another MLS course.

**MLS 201 Leadership Development and Life Skills**

Fall, spring, and summer semesters. 3 semester hours. Develops an understanding of how to build teams, influence, communicate, a process for effective decision making, teaches creative problem solving, and the fundamentals of planning. Students identify successful leadership character-
ististics through observation of others and self through experien-
tional learning exercises. A laboratory component is re-
quired which includes physical fitness training, and other
outdoor skills. Corequisite: MLS106.

MLS 202
Leadership Management and Team Building
Fall, spring, and summer semesters. 3 semester hours.
Provides an advanced look at leadership principles and the
application and practice of those principles. Examines
building successful teams, various methods for influencing
action, effective communication and achieving goals.
Additionally, stresses the importance of timing the decision,
creativity in the problem solving process, and obtaining
team buy-in through immediate feedback. A laboratory
component is required which includes physical fitness train-
ing, and other outdoor skills. Corequisite: MLS106.

MLS 203
Ranger Challenge – Practicum
Fall semester. 1 semester hour.
Provides a forum to execute and evaluate the leadership
skills and abilities developed in practical exercises, tactical
scenarios and peer mentorship. This course evaluates the
tactical, technical, communication skills and duties common
to all branches of the Army. Development of leadership and
the ability to function effectively in small unit operations. A
laboratory component is required which includes physical
fitness training, and other outdoor skills. Offered Fall
Semester. Prerequisite: consent of instructor. Corequisite:
MLS101, MLS201, MLS301, MLS401.

MLS 204
Leadership Training Course – Practicum
Summer semester. 3 semester hours.
Provides a forum for the development of Military
Leadership fundamentals. LTC is four weeks of intense
classroom and field training held in the summer at Fort
Knox, KY. This course is an accelerated version of the two
years of leadership development training Cadets receive in
the Basic Course of ROTC. By transforming yourself
through this rigorous training, you will qualify for enroll-
ment in the Army ROTC Advanced Course on campus-pro-
vided you have two years of college remaining (undergradu-
ate or graduate). Prerequisite: consent of instructor.

MLS 301
Small Unit Tactics and Operation
Fall semester. 3 semester hours.
Provides for the study, evaluation and practice of the adap-
tive leadership model in order to acquire the same. The
Leadership Development Program (LDP) is used to develop
self-awareness, behavior modification and critical thinking.
Battle drills serves to assist in preparing the Student/Leader
for Warrior Forge. Students conduct self-assessment of
leadership style, develop personal fitness regimen, and learn
to plan and conduct individual/small unit tactical training
while testing reasoning and problem-solving techniques.
Students receive direct feedback on leadership abilities.
Restricted to contracted Military Science students. A labo-
atory component is required which includes physical fitness
training, and other outdoor skills. Prerequisites: MLS101,
MLS102, MLS201, MLS202, or MLS204. Corequisite:
MLS106.

MLS 302
Applied Leadership and Tactics Training
Spring semester. 3 semester hours.
Provides a forum in order to execute and evaluate the lead-
ership skills and abilities developed in practical exercises,
tactical scenarios and mentorship. Evaluate the tactical,
technical, administrative skills and duties common to all
branches of the Army. Development of leadership behaviors
and the ability to function effectively in small unit opera-
tions. Examines the role communications, values, and ethics
play in the leadership role. Topics include: ethical decision-
making, consideration of others, spirituality in the military,
and case studies of effective leaders. Explores the leader’s
role in planning, directing and coordinating the efforts of
individuals and small groups in tactical missions. A labora-
tory component is required which includes physical fitness
training, and other outdoor skills. Prerequisite: MLS301.
Corequisite: MLS106.

MLS 303
Warrior Forge
Summer semester. 3 semester hours.
Provides an environment in which to evaluate and enhance
Students’ leadership abilities in a controlled and challenging
environment. This serves as U.S. Army Cadet Command’s
flagship training and assessment exercise held at Ft. Lewis,
Washington each summer. Every Army ROTC Cadet hoping
to pin-on the gold bar of an Army lieutenant must suc-
cessfully complete Warrior Forge. After graduation, most
attendees will go back to their colleges or universities to fin-
ish their degrees and then be commissioned. Offered during
summer session. Prerequisite: MLS302.

MLS 401
The Army Officer: Roles and Responsibilities
Fall semester. 3 semester hours.
Develops proficiency in planning and executing complex
operations, functioning as a member of a staff, and mentor-
ing subordinates. Students explore training management,
methods of effective team collaboration, and developmental
counseling techniques. The application of leadership princi-
ples and techniques involved in leading young men and
women in today’s Army. Restricted to contracted Military
Science students. Prerequisite: permission of instructor.
Corequisite: MLS106.

MLS 402
Officrship: Ethics and Justice in the Army
Spring semester. 3 semester hours.
Focuses on case study analysis of military law and practical
exercises on establishing an ethical command climate.
Future Leaders must complete a semester long Senior
Leadership Project that requires them to plan, organize, col-
laborate, analyze, and demonstrate their leadership skills.
Understanding of the ethical components of the Uniform
Code of Military Justice and civil rights legislation. Study of
the Military justice system and Army law administrations.
Exploration of the dynamics of leading in complex situa-
tions. Preparation for transition from college student to

Page - 106 -
commissioned Officer in the Army. A laboratory component is required which includes physical fitness training, and other outdoor skills. Corequisite: MLS106.

**MLS 404**  
**Advanced Leadership Practicum**  
Fall, spring, and summer semesters. 1-3 semester hours. Provides a study in military tactics, leadership and organizational behavior. Closely supervised by military Officers in order to provide one-on-one developmental counseling and mentorship. Restricted to contracted Military Science students. Prerequisite: consent of instructor.

**MLS 405**  
**Leadership Special Topic**  
Fall, spring, and summer semesters. 1-4 semester hours. Provides a course of study not required in any curriculum for which there is a particular one-time need. Serves the needs of the Instructor and/or Student(s) otherwise not covered in any other class or curriculum. Prerequisite: consent of instructor.

**Music**  
*Steven Hart, Associate Professor*  
*Samuel J. Hamm, Associate Professor*  
*Jennifer Bratz, Assistant Professor*  
*Anthony Hammond, Visiting Instructor*

The music program at Rocky Mountain College offers degrees in music education and music performance with concentrations in vocal, instrumental, piano, and composition studies, all fully integrated in the liberal arts tradition. Students receive comprehensive training in music theory, history, ear training, pedagogy, and piano study along with instruction in solo and ensemble performance. The music program strives to develop disciplined musicians, teachers, and performers through coaching in private lessons and in the classroom. The music education degree, taken in conjunction with the fulfillment of state education requirements, qualifies graduates to teach choral and instrumental music in K-12 grades. The performance curriculum prepares students for graduate study or entrepreneurial activity in performance or private teaching.

Rocky Mountain College offers all students the opportunity to participate in musical activities available within the department. Students in all majors are encouraged to participate in ensembles and private voice or instrumental instruction. The music minor is available to students in other disciplines looking to continue their previous musical instruction or expand their musical knowledge.

**Major in K-12 Vocal and Instrumental Music Education**  
A minimum of 59 semester hours is required. Courses in Music: MUS020 (successfully completed six times), MUS030, MUS040, MUS111, MUS112, MUS140, MUS141, MUS142, MUS153, MUS201, MUS202, MUS211, MUS212, MUS241, MUS242, MUS311, MUS312, MUS361, MUS362, MUS402, six semester hours of ensemble participation with at least six semester hours in an instrumental chamber group or MUS376 (in a professional or community group as approved by the music faculty) and eight semester hours in ensemble participation with at least six semester hours in Concert Band.

**Major in Music Performance, Piano Emphasis**  
A minimum of 59 semester hours is required, including MUS020 (successfully completed six times), MUS030, MUS040, MUS111, MUS112, MUS141, MUS142, MUS201, MUS202, MUS211, MUS212, MUS241, MUS242, MUS311, MUS320, MUS321, MUS322, MUS361, MUS402, twelve semester hours of applied study in piano (four semester hours of MUS251/MUS252 and eight semester hours of MUS351/MUS352), and eight semester hours of ensemble participation in either Concert Choir or Concert Band.

**Major in Music Performance, Composition Emphasis**  
A minimum of 59 semester hours is required, including MUS020 (successfully completed six times), MUS030, MUS040, MUS111, MUS112, MUS141, MUS142, MUS201, MUS202, MUS211, MUS212, MUS241, MUS242, MUS311, MUS320, MUS321, MUS322, MUS361, MUS402, twelve semester hours of applied study in composition (four semester hours of MUS251/MUS252 and four semester hours of MUS351/MUS352), six semester hours of applied study on a primary instrument or voice (four semester hours of MUS251/MUS252 and two semester hours of MUS351/MUS352), four semester hours of piano (in either class piano or private lessons as appropriate to the ability of the student) and eight semester hours in ensemble participation in either Concert Choir or Concert Band.

**Major in Music Performance, Instrumental Emphasis**  
A minimum of 59 semester hours is required, including MUS020 (successfully completed six times), MUS030, MUS040, MUS111, MUS112, MUS141, MUS142, MUS201, MUS202, MUS211, MUS212, MUS241, MUS242, MUS311, MUS320, MUS321, MUS322, MUS361, MUS402, twelve semester hours of applied study on a primary instrument (four semester hours of MUS251/MUS252 and eight semester hours of MUS351/MUS352), and eight semester hours of ensemble participation with at least six semester hours in Concert Band.

**Major in Music Performance, Vocal Emphasis**  
A minimum of 59 semester hours is required including MUS020 (successfully completed six times), MUS030, MUS040, MUS111, MUS112, MUS141, MUS142, MUS201, MUS202, MUS211, MUS212, MUS241, MUS242, MUS311, MUS319, MUS325, MUS326, MUS344, and MUS415. Music education majors must also complete the professional education program for K-12 teaching as described in the "Education" section of the catalog, except that music education majors are not required to take EDC420.

**Major in Music Performance, Piano Emphasis**  
A minimum of 59 semester hours is required, including MUS020 (successfully completed six times), MUS030, MUS040, MUS111, MUS112, MUS141, MUS142, MUS201, MUS202, MUS211, MUS212, MUS241, MUS242, MUS311, MUS312, MUS361, MUS362, MUS402, eight semester hours in applied study in composition (four semester hours of MUS251/MUS252 and four semester hours of MUS351/MUS352), six semester hours of applied study on a primary instrument or voice (four semester hours of MUS251/MUS252 and two semester hours of MUS351/MUS352), four semester hours of piano (in either class piano or private lessons as appropriate to the ability of the student) and eight semester hours in ensemble participation in either Concert Choir or Concert Band.
by the music faculty) and eight semester hours of ensemble participation with at least six semester hours in Concert Choir.

Minors in Music
A minimum of 25 hours is required (with six semester hours in upper division courses), including MUS020 (successfully completed three times), MUS111, MUS112, MUS141, MUS142, MUS201, MUS202, four semester hours of applied study in voice or a principal instrument, four semester hours of participation in Concert Band or Concert Choir (or a combination of the two), and an upper-division music elective.

Piano Proficiency Requirement
Music Education and Performance majors must pass a piano proficiency exam as a graduation requirement. Elements of the exam include but are not limited to: major and minor scales, chord progressions, score reading, transposition, harmonization, accompanying voice and instrumental repertoire, accompanying choral literature, and playing solo repertoire. A piano placement exam will be given to each music major to determine placement within the either the class piano sequence or private instruction as appropriate to the student and at the instructor’s discretion. The proficiency exam is given after the four-semester class piano sequence or as appropriate for students in private lessons.

Primary Instrument or Voice Study
All music majors are required be enrolled in private lessons during each semester of study. A minimum of eight semester hours of MUS251, MUS252, MUS351, or MUS352 are required, of which, six semester hours must be completed on a primary instrument or voice and registered for under the same section number, regardless of course number. Music minors are required to complete four semester hours of private lessons and are not required to have a primary instrument or voice.

Performance Requirements
All music majors must participate in at least one performing ensemble in each semester of enrollment. No more than eight semester hours of ensemble credit may be applied to the major. Music education majors must complete a minimum of two semester hours in the concert choir and a minimum of two semester hours in the concert band. Music majors must perform a junior and senior recital on their primary instruments or voice after passing a recital hearing for the music faculty. This recital hearing should be done no less than four weeks before the intended recital date. Half recitals will be comprised of 30 minutes of music (actual playing time, not the length of the event), and full recitals 50 minutes of music. Music education majors will complete a half junior and a half senior recital. Music performance majors with a vocal, instrumental, or piano emphasis will complete a half junior recital and a full senior recital. Music performance majors with a composition emphasis will complete a half junior recital on their primary instrument and a full senior recital in composition.

Juries
Music majors and minors will be required to perform a jury in each semester of enrollment in either MUS251, MUS252, MUS351, or MUS352, unless a junior or senior recital is given in that semester.

Upper-division Qualification
Admission to upper division applied lessons and courses requires the passing of an upper division qualification on the music major’s respective instrument at the end of the sophomore year. This is done during the week of final exams. Each degree and concentration has its own requirements for achieving upper-division standing.

Recital Attendance
Music majors and minors are required to attend all music department recitals in each semester of enrollment. Included are student junior and senior recitals, faculty recitals, departmental recitals, and guest recitals and lectures. Attendance is monitored through MUS020, which must be passed successfully a total of six times.

Music courses
MUS 020 Recital Attendance
Fall and spring semesters. 0 semester hours.
Music majors and minors are required to attend all departmental recitals throughout their program of study. Music majors and minors enrolled in MUS111, MUS112, MUS201, and MUS202 co-enroll in MUS020. Written reviews are required.

MUS 030 Junior Recital
Fall and spring semesters. 0 semester hours.
Junior recital.

MUS 040 Senior Recital
Fall and spring semesters. 0 semester hours.
Senior recital.

MUS 100 Elements of Music
Fall semester. 2 semester hours.
This course provides an introduction to the fundamentals of music, including basic music reading (notation), rhythm, meter, and harmony. Not open to music majors.

MUS 101 Introduction to Music
On demand. 3 semester hours.
This course provides a historical overview of the way music has developed in Western culture. It is designed for non-music majors and begins with the elements and principles of music, including notation, rhythm, melody, harmony, color, texture, and form. Students will develop listening skills and study selected pieces of music from a variety of periods in history to learn how they relate to the culture in which they were created. This course is not applicable to music major requirements, but it may be used to satisfy general education requirements.
MUS 111
Theory I
Fall semester. 3 semester hours.
This course examines the fundamental elements of music—melodic, rhythmic, harmonic—through hearing, playing and writing of theoretical material. Music majors and minors must concurrently enroll in MUS141. Music majors must concurrently enroll in the appropriate piano course as outlined in the “Piano Study” section.

MUS 112
Theory II
Spring semester. 3 semester hours.
This course examines the fundamental elements of music—melodic, rhythmic, harmonic—through hearing, playing, and writing of theoretical material. Aural perception of scales, intervals, and rhythmic patterns is developed further. Prerequisite: MUS111. Students enrolled in MUS112 should be concurrently enrolled in MUS142 if the prerequisites for that course have been met.

MUS 131
Class Piano I
Fall semester. 1 semester hour.
This course is designed for the student with little to no previous piano experience. It introduces the keyboard, music reading in treble and bass clef, basic rhythm, theory, and technique. Students play easy repertoire pieces, harmonization, transposition, scales, and chord progressions. This course is designed for music majors to facilitate the piano proficiency exam and is open to non-majors space permitting.

MUS 132
Class Piano II
Spring semester. 1 semester hour.
This course is a continuation of MUS131. Prerequisite: MUS131 or consent of the instructor.

MUS 140
Introduction to Music of the World’s Peoples
Spring semester. 3 semester hours.
This course is an introduction to music from non-Western civilizations, including music from Montana, and is designed for both the non-music major and music education major. Students study how people make music in other cultures and how the product often becomes a basis of culture. In addition, students will develop listening skills and study selected pieces of music from a variety of geographic areas. This course is a requirement for music education majors, music minors, and can be used to satisfy general education requirements.

MUS 141
Musicianship I
Fall semester. 1 semester hour.
Students develop skills in comprehensive musicianship through a variety of exercises in listening, dictation, sight-singing, and keyboard. Music majors and minors must concurrently enroll in MUS111.

MUS 142
Musicianship II
Spring semester. 1 semester hour.
Students develop skills in comprehensive musicianship through a variety of exercises in listening, dictation, sight-singing, and keyboard. Prerequisites: MUS111 and MUS141.

MUS 153
Beginning Group Guitar
Spring semester, odd years. 1 semester hour.
Group guitar is designed to acquaint the student with the basic knowledge of fretted guitar performance. Emphasis is placed on learning to tune and care for the instrument and acquiring the basic skills necessary to accompany folk songs and children's songs.

MUS 201
Music Through the Centuries I
Fall semester. 3 semester hours.
This course provides a study of Western music history and literature from the medieval world through the cultural milieu of the Renaissance and Baroque eras.

MUS 202
Music Through the Centuries II
Spring semester. 3 semester hours.
This course provides a study of Western music history and literature from the Rococo through contemporary compositional trends.

MUS 204
History of Jazz
On demand. 3 semester hours.
Students examine the evolution of jazz from its roots to contemporary trends. This course may be taken either at the lower-division or the upper-division level, but not both.

MUS 205
History of Rock
On demand. 3 semester hours.
Students study rock and roll, from its roots in blues through its social and musical evolution to the present day. Period context, performer personality, and extensive recorded examples constitute the course content. This course may be taken either at the lower-division or the upper-division level, but not both.

MUS 211
Theory III
Fall semester. 3 semester hours.
Students are trained in more advanced melodic, harmonic, and rhythmic aspects of music through hearing, playing, and writing. Further ear training and sight singing of scales, harmonies, and intricacies are developed. Prerequisite: MUS112.

MUS 212
Theory IV
Spring semester. 3 semester hours.
Students are trained in more advanced melodic, harmonic, and rhythmic aspects of music through hearing, playing, and writing. Further ear training and sight singing of scales, harmonies, and intricacies are developed. Prerequisite:
MUS211.

**MUS/ART 215**  
**Creativity**  
Fall semester. 3 semester hours.  
This course approaches creativity as a skill to develop, not as a magical gift bestowed on a few select people. The last three weeks of the course will be devoted to a large-scale project in an area chosen by the student at the time of registration. Two important elements of the course involve a specific style of journaling, and a weekly artist's date. Through the activities in this course, students will bring a higher degree of creativity to their daily lives. This course may be taken either at the lower-division level or at the upper-division level, but not both.

**MUS 218**  
**Jazz Theory and Improvisation**  
Fall semester, odd years. 2 semester hours.  
A performance oriented course providing a basic understanding of jazz harmony, improvisation, and performance practice. Work in the course includes transcription, and small ensemble playing. Open to all instrumentalists with prior experience on keyboard, woodwind, brass, strings, guitar, or pitched percussion (xylophone and vibraphone).

**MUS 231**  
**Class Piano III**  
Fall semester. 1 semester hour.  
This course is a continuation of MUS132. Prerequisite: MUS132 or consent of the instructor.

**MUS 232**  
**Class Piano IV**  
Spring semester. 1 semester hour.  
This course is a continuation of MUS231. Prerequisite: MUS232 or consent of the instructor. The piano proficiency exam is administered at the end of this course.

**MUS 241**  
**Musicianship III**  
Fall semester. 1 semester hour.  
Students develop skills in comprehensive musicianship through a variety of exercises in listening, dictation, sight-singing, and keyboard.

**MUS 242**  
**Musicianship IV**  
Spring semester. 1 semester hour.  
Students develop skills in comprehensive musicianship through a variety of exercises in listening, dictation, sight-singing, and keyboard.

**MUS 251**  
**Applied Music**  
Fall and spring semesters. 1 semester hour.  
Private vocal and instrumental lessons are offered for music majors, music minors and non-music majors. In the area of instrumental music, instruction is offered on wind instruments, strings, percussion and keyboards. Majors and minors register for 200 level lessons prior to completion of upper-division qualification. Non-music majors register at the 200 level. Students who enroll for MUS351 receive 13 half-hour lessons. Specific lesson requirements for each major are listed with the descriptions of the major.

**MUS 252**  
**Applied Music**  
Fall and spring semesters. 2 semester hours.  
Private vocal and instrumental lessons are offered for music majors, music minors and non-music majors. In the area of instrumental music, instruction is offered on wind instruments, strings, percussion and keyboards. Majors and minors register for 200 level lessons prior to completion of upper-division qualification. Non-music majors register at the 200 level. Students who enroll for MUS352 receive 13 one-hour lessons or 26 half-hour lessons. Specific lesson requirements for each major are listed with the descriptions of the major.

**MUS 271**  
**Concert Choir**  
Fall and spring semesters. 1 semester hour.  
The Rocky Mountain College Choir is dedicated to the study and performance of choral literature. Repertoire will be selected from the history of Western choral music as well as contemporary literature and music from a global perspective. Although there is no prerequisite, students are expected to have had prior high school or collegiate experience in performing ensembles. Six semesters of concert band or concert choir will fulfill one three credit fine arts general education requirement.

**MUS 283**  
**Concert Band**  
Fall and spring semesters. 1 semester hour.  
The Rocky Mountain College Concert Band is dedicated to the study and performance of wind ensemble literature. Repertoire will be selected from the traditions of Western instrumental music and include music composed from a global perspective. In addition, the ensemble will perform at a limited number of athletic events as a pep band. Students should have prior performing experience at the high school or college level on their instrument. Those who have not played in a high school or collegiate ensemble will need to complete an audition to enroll in the course. Six semesters of concert band or concert choir will fulfill one three-credit fine arts general education requirement. Prerequisite: prior performing experience on the student’s instrument.

**MUS 286**  
**Jazz Ensemble**  
Fall and spring semesters. 1 semester hour.  
The jazz ensemble is dedicated to the study and performance of jazz literature and jazz improvisation. Repertoire will be selected from the global history of jazz. Although there is no prerequisite, students are expected to have had prior high school or collegiate experience in performing ensembles. Membership is by permission of professor.

**MUS 293**
Symphony Orchestra
Fall and spring semesters. 1 semester hour.
Students participate in the Billings Symphony Orchestra under college supervision. Admission is only by audition and by contract with the Symphony. Auditions are typically held in the early spring before the concert season begins in the autumn.

MUS 295
Chamber Ensemble
Fall and spring semesters. 1 semester hour.
Selected groups such as brass, woodwind, string, vocal, instrumental, piano, percussion, or other mixed combinations form with the intention of performing a specific musical genre.

MUS 304
History of Jazz
On demand. 3 semester hours.
For music majors. Students examine the evolution of jazz from its roots to contemporary trends. This course may be taken either at the lower-division or the upper-division level, but not both.

MUS 305
History of Rock
On demand. 3 semester hours.
For music majors. Students study rock and roll from its roots in blues through its social and musical evolution to the present day. Period context, performer personality, and extensive recorded examples constitute the course content. This course may be taken either at the lower-division or the upper-division level, but not both.

MUS 319
Pedagogy of Voice
Spring semester, odd years. 3 semester hours.
Use of the singing voice; basic principles of singing, physiology of breathing, tone production, resonance, diction; application of basic principles to the singing voice; pronunciation, articulation, intonation, attack of tone, legato and sostenuto, flexibility, and dynamics.

MUS 320
Pedagogy and Literature of Piano
On demand. 2 semester hours.
This course examines methods and materials for beginning to intermediate piano students and studies the practical aspects of teaching private lessons. Surveys of keyboard literature repertoire at the intermediate and advanced level and examinations of style, genre and performance practice is included.

MUS 321
Accompanying I
On demand. 2 semester hours.
This course offers study techniques for improving sight-reading skills at the keyboard with practical work in solo, duet, instrumental, ensemble, and choral literature. Students will learn score reading and transposition techniques as well as how to work with instrumentalists, vocalists, and ensembles. This course requires instructor consent and may be taken multiple times.

MUS 322
Accompanying II
Spring semester, on demand. 2 semester hours.
This course is an overall study of the art of accompanying with an emphasis on working with vocalists, instrumentalists, ensembles, and repertoire. Requires weekly rehearsals and lessons with student vocalists and/or instrumentalists to be critiqued and coached by instructor. Prerequisite: MUS321.

MUS 325
Instrumental Methods I
Fall semester, even years. 3 semester hours.
This course provides a comprehensive approach to the performance and pedagogy of brass and percussion instruments for music education majors in preparation for teaching elementary and secondary instrumental music. Trumpet, horn, trombone, baritone, euphonium, tuba, bass drum, snare drum, xylophone, marimba, cymbals, and drum set are some instruments covered in this course. Emphasis is on tone production, development of technical proficiency, understanding pedagogical principals, and basic instrument care and maintenance. Prerequisites: MUS112, permission of the instructor.

MUS 326
Instrumental Methods II
Spring semester, odd years. 3 semester hours.
This course provides a comprehensive approach to the performance and pedagogy of string and woodwind instruments for music education majors in preparation for teaching elementary and secondary instrumental music. Flute, piccolo, oboe, bassoon, clarinet, saxophone, violin, viola, cello and...
string bass are some of the instruments covered in this course. Emphasis is placed on tone production, development of technical proficiency, the understanding of pedagogical principals, and basic instrument care and maintenance. Prerequisites: MUS112, permission of the instructor

MUS/EDC 344
Methods and Materials
Teaching General Music in the Elementary School
Fall semester. 3 semester hours.
This course provides a study of trends in philosophy, curriculum and program development, traditional instructional materials, Orff/Kodaly, and other innovative teaching techniques for elementary school and early childhood general music. Prerequisites: K-12 music education major status and admission to the teacher education program.

MUS 351
Applied Music
Fall and spring semesters. 1 semester hour.
Private vocal and instrumental lessons are offered for music majors, music minors and non-music majors. In the area of instrumental music, instruction is offered on wind instruments, strings, percussion and keyboards. Majors and minors register for 200 level lessons prior to completion of upper-division qualification. Non-music majors register at the 200 level. Students who enroll for MUS351 receive 13 half-hour lessons. Specific lesson requirements for each major are listed with the descriptions of the major. Prerequisite: upper-division standing in music

MUS 352
Applied Music
Fall and spring semesters. 2 semester hours.
Private vocal and instrumental lessons are offered for music majors, music minors and non-music majors. In the area of instrumental music, instruction is offered on wind instruments, strings, percussion and keyboards. Majors and minors register for 200 level lessons prior to completion of upper-division qualification. Non-music majors register at the 200 level. Students who enroll for MUS352 receive 13 one-hour lessons or 26 half-hour lessons. Specific lesson requirements for each major are listed with the descriptions of the major. Prerequisite: upper-division standing in music

MUS 361
Form and Analysis
On demand. 3 semester hours.
Analysis of melodic structures and homophonic forms of the common practice period including binary, ternary, rondo and sonata-allegro forms; analysis of contrapuntal forms of canon, motet and fugue; study of musical forms in the 20th century. Prerequisite: MUS212

MUS 362
Orchestration and Arranging
On demand. 3 semester hours.
This course examines orchestration, transcription, and arranging for a variety of ensembles including full band and orchestra. The entire process is explored, including praration of parts for performance.

MUS 364
Diction I
Fall semester, odd-numbered years. 2 semester hours.
Study of fundamental principles of pronunciation and basic phonetic and structural understanding of the Italian and English languages. Accompanied by an introduction to IPA, the International Phonetic Alphabet. Participants will be expected to sing and perform relevant classical repertoire in these languages.

MUS 365
Diction II
Spring semester, even-numbered years. 2 semester hours.
Study of fundamental principles of pronunciation and basic phonetic and structural understanding of the French and German languages. Participants will be expected to sing and perform relevant classical repertoire in these languages. Prerequisite: MUS364.

MUS 371
Concert Choir
Fall and spring semesters. 1 semester hour.
The Rocky Mountain College Choir is dedicated to the study and performance of choral literature. Repertoire will be selected from the history of Western choral music as well as contemporary literature and music from a global perspective. Although there is no prerequisite, students are expected to have had prior high school or collegiate experience in performing ensembles. Six semesters of concert band or concert choir will fulfill one three-credit fine arts general education requirement. Prerequisite: upper-division standing in music

MUS 375
Opera Workshop
On demand. 1 semester hour.
Students are involved with the production of chamber opera and opera scenes, or participate in a professional production of an opera as approved by the music faculty.

MUS 383
Concert Band
Fall and spring semesters. 1 semester hour.
The Rocky Mountain College Concert Band is dedicated to the study and performance of wind ensemble literature. Repertoire will be selected from the traditions of Western instrumental music and include music composed from a global perspective. In addition, the ensemble will perform at a limited number of athletic events as a pep band. Students should have prior performing experience at the high school or college level on their instrument. Those who have not played in a high school or collegiate ensemble will need to complete an audition to enroll in the course. Six semesters of concert band or concert choir will fulfill one three-credit fine arts general education requirement. Prerequisites: prior performing experience on the student’s instrument and upper-division standing in music

MUS 386
Jazz Ensemble
Fall and spring semesters. 1 semester hour.
The jazz ensemble is dedicated to the study and performance
Academic Programs

of jazz literature and jazz improvisation. Repertoire will be selected from the global history of jazz. Although there is no prerequisite, students are expected to have had prior high school or collegiate experience in performing ensembles. Membership is by permission of professor. Prerequisite: upper-division standing in music

MUS 393
Symphony Orchestra
Fall and spring semesters. 1 semester hour.
Students participate in the Billings Symphony Orchestra under college supervision. Admission is only by audition and by contract with the Symphony. Auditions are typically held in the early spring before the concert season begins in the autumn.

MUS 395
Chamber Ensemble
Fall and spring semesters. 1 semester hour.
Selected groups such as brass, woodwind, string, vocal, instrumental, piano, percussion, or other mixed combinations form with the intention of performing a specific musical genre. Prerequisite: upper-division standing in music

MUS 402
Conducting
Fall semester, odd years. 3 semester hours.
This course provides an introduction to the fundamentals of baton technique; choral, orchestral, and symphonic score reading; and choral and instrumental rehearsal and conducting techniques. Prerequisite: MUS212.

MUS 406
Choral Literature
On demand. 3 semester hours.
This course examines selected sacred and secular works of the choral repertoires. Emphasis is placed upon the practical realization of the works studied. Prerequisite: MUS212.

MUS 415
Methods and Materials
Teaching Music in the Secondary School
Spring semester, even years. 3 semester hours.
This course is designed to prepare teachers to develop innovative secondary music programs and explores the philosophy, methodology, and materials for teaching band, orchestra, choir, and general music at the secondary level. This is a seminar-style course that covers a variety of topics, including conducting, classroom management, professionalism, rehearsal preparation, budgets, literature, marching band, jazz ensemble, concert choir, show choir, general music, and other aspects of running a music program. This class is designed to be one of the final classes taken in the music education curriculum. Prerequisites: MUS212, MUS325, MUS326, MUS402, and EDC/MUS291E or EDC/MUS291S.

MUS 450
Internship
On demand. 1-12 semester hours.
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor of record and the office of career services. The internship should relate to the student's major or minor area of study. Contract is required. Prerequisite: junior or senior standing.

MUS 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Organizational Leadership

This interdisciplinary minor covers a range of leadership concepts: self-management, which includes values, ethics, and attitudes; problem-solving; decision-making; and creative thinking skills; management of others, which includes creative and collaborative management; delegation; management of change; and communication and feedback; team management, which includes the development and growth of group dynamics; and the critical competency of leading by serving, which includes empathy, persuasion, foresight, humility, and the ethical use of power and influence.

Minor in Organizational Leadership

BBA 356 - Economic Decision Making
This requirement can also be completed by completing a major in business administration, accounting, equine business, aviation management, or sports management
COM250 - Small Group Communication
ENG325 - Professional Writing
ART/MUS/THR215 - Creativity
PHR303 - Ethics or PHR340 - Christian Ethics
POL220 – Political Leadership
Choose one of the following two courses:
· PSY101 General Psychology
· SOC101 Introduction to Sociology
IDS483 – Organizational Leadership

Philosophy and Religious Thought

Jay Cassel, Professor
David Strong, Professor
Elizabeth McNamer, Assistant Professor

Literally, "philosophy" means "love of wisdom." Pursuing wisdom through carefully reasoned reflection, philosophy inquires into questions concerning the meaning of life, virtue, morality, freedom, God, and death. Religious thinkers ask the same questions, but in the context of religious traditions and sacred texts. On more theoretical levels, philosophy is concerned with reality and knowledge, often examining the unstated assumptions underlying other disciplines. Both religion and philosophy are vitally interested in ethics.

This combined program is designed to give students an introduction to the issues of religious thought and philosophy; to allow them to investigate the philosophical and religious implications of what they are studying, doing, and thinking; and to prepare majors for a wide variety of possible further study, including graduate school, seminary, or professional fields such as law school. We encourage capable students to double major in philosophy and religious thought and some other field, such as English education.
Major in Philosophy and Religious Thought
A minimum of 27 semester hours, selected in consultation with department faculty, normally to include at least one course in the Biblical tradition (PHR210, PHR220, or PHR310), at least one course in the philosophical tradition (PHR211, PHR212, PHR312, PHR321, PHR375, or PHR378), one course in ethics (PHR303, PHR304, or PHR340), and at least one course at the 400-level. Students considering graduate school are urged to do an independent project (PHR499).

Minor in Philosophy and Religious Thought
A minimum of 18 semester hours, at least 15 above the 100-level and nine above the 200-level, normally to include one course in ethics (PHR303, 304, or 340).

Philosophy and Religion courses

PHR 100
Introduction to Philosophy and Religious Thought
Fall and spring semesters. 3 semester hours.
This course attempts to address the question “Does thinking about the meaning of one's life help us live better?” by studying a particular issue and some thought-provoking responses to it. The particular issue and texts will vary from year to year. Not open to juniors and seniors without instructor's permission.

PHR 120
Classic Texts in Western Thought
Fall semester, alternate years. 3 semester hours.
Intensive readings in primary texts crucial to the Western tradition. Students will read from such authors as Homer, the Bible, the Greek dramatists, Plato, Aristotle, Augustine, Dante, Shakespeare, Hobbes, Freud, and Nietzsche.

PHR 205
Logic
On demand. 3 semester hours.
An introductory course in the principles and methods used to distinguish correct from incorrect reasoning. This course aims to help students think and read critically and to write argumentative papers. Both inductive and deductive logic will be studied.

PHR 210
Genres of Biblical Literature
Fall and spring semesters. 3 semester hours.
This course provides an investigation of one specific genre of Biblical literature. Students have recently studied Biblical narrative, Gospels, the Psalms and Paul.

PHR 211
Ancient Philosophy
Fall semester, alternate years. 3 semester hours.
This course introduces students to some great primary philosophical texts of the Western tradition, such as Plato's Republic, and provides them with an overview of philosophy during this early period of its development.

PHR 218
Modern Philosophy
Spring semester, alternate years. 3 semester hours.
Students examine a study of major philosophers, ideas, and movements in philosophy from the Renaissance through the nineteenth century. This course is a continuation of Greek and Early Christian Philosophy and will be similarly designed to promote a study of primary texts from Descartes, Hume, Kant, and others, as well as to present an overview of the period from secondary sources.

PHR 220
Topics in Catholicism
Spring semester. 3 semester hours.
This course explores the central principles of the Catholic religion. From year to year the course focuses on a different aspect of Catholicism. Topics covered might include the creation of basic beliefs in the first three centuries, issues in modern Catholic thinking, Catholics and the Bible, a history of the Church, or great figures in Catholicism.

PHR 220
Jesus
Every three years. 3 semester hours.
Students will look at both Biblical sources and modern literary and theological interpretations to answer the question “Who was, or is, Jesus?” Questions to be addressed include the quest for the “historical Jesus,” classical and contemporary christology, and hermeneutics of Biblical texts.

PHR 236
Religions of The World
On demand. 3 semester hours.
This course examines the central religious principles and ideas of major non-Christian religions. From year to year, the focus may be on different religions or areas of the world.

PHR 303
Ethics
Spring semester, alternate years. 3 semester hours.
A study relating ethics, as traditionally conceived in philosophy, to one or more current philosophical works in ethics. This course will provide students with a solid background in ethics from Plato to Nietzsche. A discussion of a contemporary work in ethics will introduce students to topics that may be covered in depth in later seminars.

PHR 304
Environmental Ethics
Spring semester, alternate years. 3 semester hours.
This course will address issues such as whether natural beings and the natural world have rights or whether only humans have rights. Students will determine what is ethically appropriate for humans in their relationship with the environment as well as what environmental ethics must take account of to be consequential in the world today.

PHR 310
Issues in Biblical Scholarship
Every three years. 3 semester hours.
This course provides an introduction to a current problem in Biblical study and scholarship. Examples of topics are apocalyptic literature; narrative studies; Biblical hermeneutics,
text, and history; and Biblical theology. Where PHR210 concentrates on the Biblical texts themselves, PHR310 introduces students to the way contemporary scholars study the Bible.

**PHR 312**  
Modern Philosophy  
Spring semester, every 3 years. 3 semester hours.  
Students examine a study of major philosophers, ideas, and movements in philosophy from the Renaissance through the nineteenth century. This course is a continuation of PHR211 and will be similarly designed to promote a study of primary texts from Descartes, Hume, Kant, and others, as well as to present an overview of the period from secondary sources.

**PHR 317**  
Archaeology and Philosophy of the Holy Land  
Summer semester. 3 semester hours.  
This course is designed for students participating in the Bethsaida Excavation and tour of selected sites in Israel. Students will engage in activities including excavating at the site; attending pottery reading, laboratory and evening lectures at the kibbutz; learning archaeological methodology; and learning about kibbutz living on the Galilee. Students are also expected to participate in all guided group tours of important sites and museums in Israel.

**PHR 320**  
Major Religious Figures  
Fall semester, alternate years. 3 semester hours.  
This course provides a study of the writings and the life of a major religious thinker in the Western tradition. Examples might be Luther, Augustine, or C. S. Lewis. In each case, students will relate the thinker to the general history of Judaeo-Christian thought. This course may be taken more than once.

**PHR 321**  
Major Philosophical Figures  
On demand. 3 semester hours.  
This course provides a study of the writings and, in some cases, the life of a major philosophical thinker in the Western tradition.

**PHR 330**  
Movies, Morals, and Meaning  
On demand. 3 semester hours.  
Analysis of several classic and modern films to understand their implications for ethics, religious meaning, and the nature of humanity. We will study films like The Maltese Falcon, Paths of Glory, The Godfather, Crimes and Misdemeanors, and Jesus of Montreal.

**PHR 340**  
Christian Ethics  
Spring semester, alternate years. 3 semester hours.  
How can a Christian make moral decisions? We will study the biblical basis for ethics, and several modern Christian ethicists to understand how they move from the beliefs of Christianity to recommendations for specific ethical action.

**PHR 362**  
Theology and Christian Beliefs  
Every three years. 3 semester hours.  
What does it mean to believe in God? When we talk about God, are we talking about anything more than ourselves and our ideals and aspirations? This course investigates classical and modern Christian answers to this basic question.

**PHR/ENG 370**  
Religion and Literature  
Spring semester, alternate years. 3 semester hours.  
A study of religious issues, conflict, and hopes in modern literature. The works read will vary from year to year but will include such authors as Melville, Tolstoy, Hemingway, Flannery O'Connor, and John Updike.

**PHR 375**  
Styles of Contemporary Philosophy  
On demand. 3 semester hours.  
The 20th century is characterized by a plurality of philosophical styles such as postmodernism, phenomenology, existentialism, hermeneutics, deconstruction, analytic philosophy, pragmatism, and systematic philosophy. This course involves intensive study and critical evaluation of one or two of these styles.

**PHR 380**  
Philosophy of Technology and Modern Culture  
Fall semester, alternate years. 3 semester hours.  
It is often a difficult task to understand one’s own culture and age. Recent philosophical work offers profound insights into our age and places these insights within a much wider context.

**PHR 421**  
Philosophy of Religion  
Every three years. 3 semester hours.  
This course provides an investigation of some of the crucial philosophical ideas about religion. Students will study such issues as the idea of God, the arguments for and against the existence of God, the idea of revelation, and the problem of religious language.

**PHR 450**  
Internship  
On demand. 1-12 semester hours.  
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student's major or minor area of study. Contract is required. Prerequisites: junior or senior standing.

**PHR 460**  
Issues in Contemporary Religious Thought  
Every three years. 3 semester hours.  
This course provides an inquiry into major issues in current theology and new interpretations of basic religious ideas and texts. The specific content of this course will vary from year to year.
Academic Programs

PHR 483
Senior Project
On demand. 1-3 semester hours.
Students complete a senior project in consultation with a faculty member.

PHR 490
Seminar
On demand. 2-3 semester hours.
Intensive study of a selected area or figure in philosophy or religion is explored.

PHR 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Physical Education and Health
Clarece M. Lacy, Professor
Paul A. Roper, Professor
Amanda Botnen, Visiting Assistant Professor

The physical education and health program examines the many dimensions of health and human performance. The major goal of the program is to enable students to make informed health decisions. The program prepares students to become competent entry-level professionals, as well as advanced study candidates.

To achieve these outcomes, the student will analyze the structure and function of the human body, apply physiological and biomechanical concepts to human movement, examine the acquisition of motor skills, explore the multi-dimensional nature of the health and human performance discipline, examine ethical issues and culturally diverse values related to the discipline, achieve the specific physical skills required to be competent in their profession, acquire a lifelong quest for knowledge, and develop a commitment to act responsibly in one's profession and on behalf of one's community.

The physical education and health program offers varied opportunities for guided work experiences with schools, hospitals, sports medicine clinics, wellness centers, corporate fitness programs, and fitness facilities. These capstone opportunities allow students to express their multidisciplinary education by applying creative problem solving and communication skills in professional settings.

Major in Physical Education and Health
Five options are offered under the major:
1. athletic training
2. K-12 education
3. exercise science
4. physical education and health studies
5. sport management

Athletic Training Option
A minimum of 43 semester hours is required, including PEH122, PEH181, PEH182, PEH204, PEH210, PEH211, PEH222, PEH281, PEH282, PEH320, PEH322, PEH345, PEH356, PEH381 or PEH382, PEH425, and PEH481. Related requirements are PHA247 and PSY101. (Note: BIO132 may substitute for PEH204.)

This program is designed to prepare students for an entry-level graduate program in athletic training that will lead to eligibility to sit for the National Athletic Training Association Board of Certification examination. The coursework will establish a knowledge base in sports medicine and develop techniques in sports injury evaluation, management, and rehabilitation.

K-12 Education Option
A minimum of 43 semester hours is required, including PAC108, PEH106, PEH107, PEH122, PEH210, PEH211, PEH222, PEH315, PEH320, PEH356, PEH391, PEH412, PEH420, PEH421, PEH441, EDC341, and EDC342. Related requirements are BIO321 or PEH204, and COM102.

This option meets Montana's health certification requirements. In addition, students must complete the professional education program for K-12 education majors as described in the "education" section of the catalog. Students seeking an endorsement in K-12 physical education must earn a minimum grade of "C" in all required PEH courses, including prerequisites.

Exercise Science Option
A minimum of 44 semester hours is required, including three semester hours chosen from PAC activities (in consultation with department faculty), PEH122, PEH210, PEH211, PEH222, PEH315, PEH320, PEH343, PEH345, PEH356, PEH412, PEH441, PEH450 (eight credits), and PEH490. A related requirement is either BIO321 or PEH204.

Certification either as a health/fitness instructor by the American College of Sports Medicine or as a certified strength and conditioning specialist by the National Strength and Conditioning Association is strongly recommended. This option is designed to prepare individuals for work with fitness and health promotion programs in corporate, community, hospital, and health club settings.

Physical Education and Health Studies Option
A minimum of 35 semester hours is required, including four semester hours chosen from PAC activities, PEH106, or PEH107; additional requirements are PEH122, PEH210, PEH222, PEH315, PEH320, PEH356, PEH412, PEH450 (three semester hours), PEH490, and six semester hours of electives approved by faculty in the program. Related requirements are BIO321 or PEH204. This option requires a core of foundation courses with electives to be chosen dependent upon the student’s career goal.

Sport Management Option
A minimum of 47 semester hours is required, including BSA201, BSA202, BSA321, BSA331, BSA343, BSA362, BSA371, ECO201 or ECO202, PEH300, PEH412, PEH421, COM102, COM306, SOC101, PSY101, BSA450 or PEH450 (3 credits).
Minor in Physical Education and Health
Three options are offered under the minor in physical education and health:
1. athletic training
2. coaching
3. physical education and health studies

Athletic Training Option
A minimum of 25 semester hours is required, including PEH122, PEH204, PEH210, PEH222, PEH281, PEH322, PEH381 or PEH382, PEH425, and PEH481. This option includes 600 hours working with a certified trainer and is designed to complement a major in areas such as teacher education, psychology, exercise science, and physician's assistant. The coursework will establish a knowledge base in sports medicine and develop techniques in sports injury evaluation, management, and rehabilitation.

Coaching Option
A minimum of 25 semester hours is required, including PEH122, PEH222, PEH300, PEH315, PEH320, PEH344, PEH356, PEH412, and two of the following: PEH301, PEH302, PEH303, PEH305, PEH306, PEH307, PEH311. Many state education departments do not require a coach to be a certified teacher but do require that coaches meet qualification standards. This option prepares students to meet those qualification standards.

Physical Education and Health Studies Option
A minimum of 25 semester hours is required, including three semester hours chosen from PAC activities, PEH106, or PEH107; additional requirements are PEH122, PEH204, PEH210, PEH222, PEH320, PEH356, and PEH412. This option, when combined with majors such as business or psychology, allows the student to prepare for physical education-related careers.

3+2 Athletic Training Program
The 3+2 Athletic Training program allows students to complete 3 years of course requirements at Rocky Mountain College and then transfer to MSU Billings and enroll in the 2-year entry-level master’s program in Athletic Training. After successful completion of the first year at MSU-B, the student will be awarded a Bachelor’s degree from Rocky Mountain College. After completing the program at MSU-Billings, the student will be awarded the Master of Athletic Training degree. Students entering this program at Rocky, must major in Exercise Science and minor in Athletic Training, and must complete the pre-requisites for the Master’s program at MSU-B.

Required courses: Exercise Science: Three semester hours of Physical Activity courses (PAC), PEH122, PEH210, PEH211, PEH222, PEH315, PEH320, PEH322, PEH343, PEH345, PEH356, PEH412, PEH425, PEH441, and 8 credits of PEH450. Choose one: PEH181, PEH182, PEH281, PEH282, PEH381, PEH382, PEH481, or PEH482. Related Requirements: 8 credits of Anatomy and Physiology.

Physical Education Activities
Fall semester and spring semester. 1 semester hour.

Select from a variety of activities. A specific activity may be taken twice for credit. Pass/no pass. No more than eight PEH activity credits may count toward graduation. This rule does not apply to activities required in a PEH major.

PAC101 Strength Conditioning for Football
PAC102 Weight Conditioning for Football
PAC103 Conditioning for Men’s Basketball
PAC104 Conditioning for Women’s Basketball
PAC105 Strength Conditioning for Skiers
PAC106 Conditioning for Soccer
PAC107 Conditioning for Volleyball
PAC108 Swimming
PAC109 Step/Pilates/Water Aerobics
PAC110 Cardio Resistance Training
PAC111 Karate
PAC112 Team Activities
PAC113 Racquet Sports
PAC114 Scuba
PAC115 Strength Training for Women
PAC116 Fitness for Life
PAC117 Hiking/Photography Weekend in Yellowstone
PAC118 Bicycle in the Beartooths
PAC119 Winter Break Ski Adventure
PAC120 Leave No Trace Camping
PAC121 Wilderness First Aid
PAC122 Big Sky Ski Weekend
PAC123 Red Lodge Ski Weekend
PAC124 Beginning Ski/Snowboarding
PAC125 Hot Springs/Geyser in Yellowstone
PAC126 Rock Climbing
PAC127 Cross Country Ski Weekend
PAC128 Ice Climbing
PAC129 Kayaking
PAC130 Fly Fishing
PAC131 Yoga

Physical Education and Health courses

PEH 100
Varsity Sports
Fall and spring semesters. 1 semester hour.
Students can elect to obtain credit for conditioning and participation in varsity sports.

PEH 106
Professional Activities I
Fall semester. 3 semester hours.
This course is designed to introduce and direct students toward a level of proficiency in team-sports activities such as soccer and team-handball, and individual sport activities such as badminton and pickleball. Students are expected to show increases in, and are assessed on, their level of skill, knowledge of rules, and application of strategies within each activity.

PEH 107
Professional Activities II
Spring semester. 3 semester hours.
This course is designed to introduce and direct students toward a level of proficiency in the following life-time and
fitness activities: orienteering, ultimate frisbee, cooperative activities, American Indian and multi-cultural games, fitness testing, and educational gymnastics. Students are expected to show increases in, and are assessed on, their level of skill, knowledge of rules, and application of strategies within each activity.

PEH 115
Introduction to Wellness Concepts
Fall and spring semesters. 1 semester hour.
Becoming fit and well affects the quality of one's life. Through class sessions and activity labs, students evaluate their fitness and plan for and initiate change in their exercise habits. Additional topics include nutrition and weight management, risk factor analysis and control, and major wellness concerns.

PEH 122
First Aid/CPR/Safety Education
Fall and spring semesters. 2 semester hours.
This course focuses on the procedures and practices for emergency care in the case of accident or sudden illness, and awareness of safety and accident prevention. Upon successful completion of this course, students earn certification in first aid through the American Red Cross and certification in CPR through the American Heart Association.

PEH 181
Athletic Training Field Practicum
Fall semester. 2 semester hours.
Students complete 200 clinical hours under the supervision of a certified trainer. Corequisite: PEH222.

PEH 182
Athletic Training Field Practicum
Spring semester. 2 semester hours.
Students complete 200 clinical hours under the supervision of a certified trainer. Corequisite: PEH222.

PEH 204
Foundations of Human Structure and Function
Fall and spring semesters. 4 semester hours.
Students examine the basic foundations and functions of the human body, including the skeletal, muscular, nervous, cardiovascular, digestive, and respiratory systems. Lab experiences focus on the nomenclature, structure, and function of these systems.

PEH 210
Health and Wellness
Fall and spring semesters. 4 semester hours.
Topics include community/environmental health, consumer issues, death and dying, healthy lifestyles, infectious diseases, medical ethics, psychological health, risk factor management, sexuality, and substance abuse.

PEH 211
Nutrition
Fall and spring semesters. 3 semester hours.
This course focuses on the essential nutrients and their principal sources and functions; the assessment, analysis, and modification of dietary intake; the relationship between nutrition and fitness; and the stages of the life cycle. This is not a chemistry-based course.

PEH 222
Beginning Athletic Training
Fall and spring semesters. 3 semester hours.
Students learn procedures and practices in prevention, immediate care, treatment, and rehabilitation of injuries and sudden illness. Topics include taping, bandaging, and conditioning for athletic competition.

PEH 281
Athletic Training Field Practicum
Fall semester. 2 semester hours.
Students complete 200 clinical hours under the supervision of a certified trainer. Corequisite: PEH222.

PEH 282
Athletic Training Field Practicum
Spring semester. 2 semester hours.
Students complete 200 clinical hours under the supervision of a certified trainer. Corequisite: PEH222.

PEH 300
Current Issues and Practices in Coaching
Spring semester, odd years. 2 semester hours.
Topics include philosophy, sport psychology and sociology, and team management skills. Course includes ACEP certification materials.

PEH 301
Officiating High School Sports
Fall semester. 2 semester hours.
Students demonstrate knowledge and practical skills in officiating a minimum of three high school sports from the following: football, soccer, volleyball, basketball, softball and wrestling. Upon successful completion of the course, students can be certified by the Montana Officials' Association, which permits immediate employment as middle school, high school, or youth sports officials.

PEH 302
Basketball Coaching
Spring semester. 2 semester hours.
Coaching theories of basketball are examined, including fundamentals, techniques, strategies, practice sessions, utilization of personnel, and the ethics of coaching.

PEH 303
Football Coaching
Fall semester, even years. 2 semester hours.
Coaching theories of football are examined, including skills, systems of play, practice sessions, strategies, conditioning, personnel utilization, off-season programs, and the ethics of coaching.

PEH 305
Track and Field Coaching
On demand. 2 semester hours.
Students examine the following topics: mechanical analysis
of track and field events; conditioning and training methods; teaching, coaching, and officiating techniques including practical experience in these areas; and management of track and field meets.

**PEH 306**  
**Volleyball Coaching**  
Fall semester, even years. 2 semester hours.  
Mechanical analysis and study of coaching theories, including but not limited to skills, strategies, and systems of play.

**PEH 307**  
**Baseball and Softball Coaching**  
On demand. 2 semester hours.  
Theories of coaching baseball and softball are examined, including skills, strategies, practice sessions, conditioning, teaching, and coaching the young athlete.

**PEH 311**  
**Soccer Coaching**  
On demand. 2 semester hours.  
Theories of coaching soccer are examined, including skills, strategies, practice sessions, conditioning, teaching, and coaching the young athlete.

**PEH 315**  
**Motor Learning**  
Spring semester. 2 semester hours.  
This course focuses on the factors that influence the learning of motor skills. Content includes features of skill development, processes of perception, and components of action as these relate to the acquisition and teaching of goal-directed movement. Practical application of theory is a central part of the course.

**PEH 320**  
**Biomechanics**  
Fall semester. 3 semester hours.  
This course focuses on the principles of human movement. Emphasis is placed on demonstrating the ability to analyze human motion in terms of improving human movement performance. Included are concepts of biological/mechanical aspects of musculoskeletal structures. Prerequisite: BIO321 or PEH204.

**PEH 322**  
**Advanced Athletic Training**  
Spring semester, even years. 3 semester hours.  
This course includes techniques of rehabilitation, use of modalities, advanced techniques of injury evaluation, advanced taping techniques, administration and management of injuries and provides hands-on experience required under the supervision of an ATC (certified athletic trainer). Prerequisites: PEH204 or BIO321, PEH222, PEH356, and approval of the program advisor.

**PEH 342**  
**Methods and Materials: Teaching Physical Education in the Elementary School**  
Spring semester. 3 semester hours.  
This course provides competency in the delivery and evaluation of planned learning programs for elementary school children. Content will include knowledge of the physiological, psychological, and motor developmental needs of elementary-age children and the implication for curriculum development and implementation. Includes experience working with children in an on-campus Saturday morning program. Prerequisite: admission to teacher education program or permission of instructor. This course is for PE majors only.

**PEH/PSY 343**  
**Psychology of Physical Activity and Exercise**  
Fall semester. 3 semester hours.  
The purpose of this course is to promote understanding of psychological theory, research, and intervention strategies in psychology of physical activity and exercise. In studying both theory and practice, students are expected to develop their own views and ideas within the realm of their chosen field. The exchange and development of ideas is encouraged and at the same time grounded in the current knowledge base in this field. Students are expected to undertake extensive reviews within various health fields.

**PEH 345**  
**Fitness Science**  
Spring semester. 3 semester hours.  
In this course students examine the various aspects of health-related fitness and the relationship of fitness to health. The course includes an individual fitness assessment, development of exercise programs, and proper exercise technique. Students become prepared for the American College of Sports Medicine certification exam as a health/fitness instructor. Prerequisites: PEH204, PEH210, PEH211.

**PEH 356**  
**Physiology of Exercise**  
Spring semester. 3 semester hours.  
Students explore the effects of exercise on the cardio respiratory and neuromuscular systems. Physiological aspects of various training methods are examined. Laboratory experience is included.
PEH 381
Athletic Training Field Practicum
Fall semester. 2 semester hours.
Students complete 200 clinical hours under the supervision of a certified trainer. Prerequisites: PEH281 or PEH282. Corequisite: PEH322.

PEH 382
Athletic Training Field Practicum
Spring semester. 2 semester hours.
Students complete 200 clinical hours under the supervision of a certified trainer. Prerequisites: PEH281 or PEH282. Corequisite: PEH322.

PEH 391
Field Practicum
On demand. 1 semester hour.
Forty-five hours of experience on the job are required for one semester hour of credit. Majors in the K-12 education option can register for one credit earned as a teaching assistant in PEH115.

PEH 412
Management of Health Enhancement and Sport Programs
Spring semester. 3 semester hours.
Students explore the organization, supervision, and administration of various health enhancement and sport programs.

PEH 420
Methods and Materials
Teaching Secondary Health Enhancement
On demand. 3 semester hours.
This course requires focused study and consultation with a public school physical education and health teacher, or other acceptable professional. Hours will be arranged in consultation with the content area professor, the secondary education professor, the student, and the professional mentor. This course provides competence for delivery and evaluation of planned learning activities. Areas of concentration include emotional/mental health, healthy lifestyles, nutrition, weight control, community/environmental health, medical ethical issues, team and individual activities, lifetime sports, cooperative games, and fitness activities. Prerequisites: admission to the teacher education program, senior standing, PEH105, PEH106, PEH107, PEH210, PEH211.

PEH 421
Historical and Contemporary Issues in Sport Sociology
Spring semester, odd years. 3 semester hours.
This course focuses on the study of historical and contemporary issues affecting physical education and sport, including ethical and gender issues.

PEH 425
Therapeutic Rehabilitation and Modalities
Spring semester, odd years. 3 semester hours.
The modalities portion of this course presents the theoretical and applied principles and techniques for the application of modalities in sports injury care. The rehabilitation portion is designed to explain the principles and apply the techniques of rehabilitation as they relate to athletic injury. Corequisite: PEH322.

PEH 441
Measurement and Evaluation in Health Enhancement and Exercise Science
Fall semester. 2 semester hours.
This course is designed to introduce students to, and engage them in, the process of measurement and evaluation as applied to the fields of health enhancement and exercise science. The course introduces students to the application of statistics, tests and measurement, report compilation, and interpretation of data. Students examine various types of assessment and test instrument design.

PEH 450
Internship
On demand. 1-12 semester hours.
Guided work experience in cooperation with an established health-related program. Forty-five hours of experience on the job are required for one hour of credit. Students in the exercise science option are required to earn seven credits in an off-campus program, and one credit as a teaching assistant in PEH115. The student must arrange the internship in agreement with the instructor and the office of career services. Contract is required. Prerequisite: junior or senior standing.

PEH 475
Advanced Theories of Strength Training and Conditioning
Spring semester. 2 semester hours.
This course prepares students for the National Strength and Conditioning Association's certification exam as a certified strength and conditioning specialist. Prerequisites: PEH122, PEH222, PEH320, PEH345, PEH356, and PEH441.

PEH 481
Athletic Training Field Practicum
Fall semester. 2 semester hours.
Students complete 200 clinical hours under the supervision of a certified trainer. Prerequisites: PEH281 or PEH282. Corequisite: PEH322.

PEH 482
Athletic Training Field Practicum
Spring semester. 2 semester hours.
Students complete 200 clinical hours under the supervision of a certified trainer. Prerequisites: PEH281 or PEH282. Corequisite: PEH322.

PEH 490
Senior Seminar
Fall semester. 2 semester hours.
This course encourages senior students in health and physical education to develop job marketing and search skills, as well as prepare for graduate school or a professional career.

PEH 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

National PA Certification (PANCE) Results

Only graduates from ARC-PA accredited PA programs are eligible to sit for the PANCE (Physician Assistant National Certifying Examination) and become licensed to practice. The PANCE is the entry-level exam that PA’s must pass to become nationally certified. Over the past five years, the program’s average pass rate for first-time PANCE testing is 94%. Pass rates for Program graduates (by year) are as follows:

</table>

The physician assistant (PA) is a primary healthcare provider who practices medicine under the supervision of a licensed physician. The concept of the physician assistant was developed from the basic premise that many tasks performed by physicians can be carried out with equal competence by other specially trained health professionals.

The Rocky Mountain College master of physician assistant studies program is an ARC-PA (Accreditation Review Commission on Education for the Physician Assistant) accredited program. The program is an integrated, full-time, 26-month program consisting of both campus-based didactic instruction and clinical experiential learning. It is an intensely challenging curriculum, both intellectually and physically; thus, it requires stamina as well as personal and financial sacrifice.

The program matriculates one class per year and the coursework begins in early July. The first 14 months of the program include the fundamental behavioral and clinical sciences required for the professional course of study, as well as courses designed to better prepare the students for expanded health care roles that meet the developing needs of today’s society. A total of 61 semester hours of credit are presented using a combination of lecture, demonstration, discussion, and laboratory formats requiring a significant time commitment. Students must successfully complete all components of the didactic phase prior to advancing to the clinical instruction phase.

The final 12 months of the program constitute the major period of clinical education, with an emphasis on primary care. The clinical instruction includes a 12-week family practice rotation plus other rotations in various specialties. Students must be willing and able to relocate at their own expense to places distant from Billings, Montana for up to 12 months during the clinical phase of their education.
Employment while enrolled is strongly discouraged.

The mission of the Rocky Mountain College master of physician assistant program is to educate primary care providers who embody a combination of academic talents of evidence-based medicine, clinical skills, and professionalism while providing compassionate health care services particularly to those in rural and underserved areas of this region. Our graduates distinguish themselves through an emphasis on patient safety and quality improvement.

The liberal arts tradition and objectives of lifelong learning, critical thinking, communication skills, recognition of other cultures, and exploration of ethical issues are valuable and necessary parts of the physician assistant academic process and profession.

Graduation Requirements
Students enrolled in the professional phase of the physician assistant program must satisfactorily complete all of the following requirements in order to successfully graduate and be awarded the master of physician assistant studies (MPAS) degree:

- All didactic phase coursework specified in the program of study (outlined below) with a minimum grade of C in each course
- A minimum cumulative program GPA of 3.00 for the entire didactic phase of the program of study
- An overall professional behavior evaluation rating of acceptable/satisfactory (or better) on each of the last two faculty evaluations of student professionalism, prepared during the last two semesters of the didactic phase of the program of study
- The minimum passing grade on each of the three components (knowledge, patient assessment, and clinical skills) of the first year comprehensive student evaluation performed at the end of the didactic phase of the professional program of study
- The minimum passing grade (B) in each of the individual clinical rotations specified in the program of study
- The minimum passing grade on each preceptor evaluation of student performance prepared near the conclusion of each clinical rotation
- The minimum passing grade on each end-of-rotation written examination
- The minimum passing grade on each of the three components (knowledge, patient assessment, and clinical skills) of the final summative student evaluation performed near the end of the program
- A cumulative program GPA of 3.00 or higher
- Satisfactory completion of PHA 636 (Patient Safety-Unifying Themes) and PHA 638 (Case Study and Community Education Project)

Program of Study

Master of Physician Assistant Studies
A minimum of 61 sequential semester hours is required in the didactic phase, to include the following:

Note: All courses listed for the master of physician assistant studies degree are restricted to those students admitted to the professional phase of the physician assistant program only.

Physician Assistant courses

PHA 247
Medical Terminology
On demand. 2 semester hours.
Open to any student. This course assists those studying in the fields of medicine and health care. Through textbook readings and the use of Web-related tools, the principles of medical terminology will be described and applied. The course offers a broad introduction to concepts underlying medical terminology. Medical examples will illustrate concepts and methods. This course does not meet general education requirements.

**PHA 425 Health Information Literacy**

On demand. 1 semester hour.

A critical component of health care practice is the ability to recognize needs for information and possessing the skills/ability to locate, evaluate and use the needed information effectively. This course is designed to enable students with the competencies needed to become independent lifelong learners able to make informed decision based on critical reasoning and evaluation of medical and scientific literature. The effects of public health information literacy on health care delivery and the role of primary care providers in promoting patient health information literacy are also explored.

**PHA 501 Introduction to Clinical Medicine**

Fall semester. 1 semester hour.

This course will introduce the PA student to general concepts of the study of clinical medicine. Terminology and evidence-based medicine will be reviewed.

**PHA 505 Evidence-Based Medicine: Research, Communications and Applications**

Fall semester. 3 semester hours.

A critical component of health care practice is the ability to recognize needs for information and possessing the skills/ability to locate, evaluate and use the needed information effectively. This course is designed to enable students with the competencies needed to become independent lifelong learners able to make informed decision based on critical reasoning and evaluation of medical and scientific literature and to communicate their knowledge in written and verbal forms. The effects of public health information literacy on health care delivery and the role of primary care providers in promoting patient health information literacy are also explored. Students are introduced to the principles of clinical research design and epidemiology, including literature search, methodology, data collection, data management, and reporting of results and conclusions.

**PHA 508 Biostatistics**

Summer semester. 1 semester hour.

This course is designed to acquaint the student with the basics of biostatistics and emphasizes how an understanding of these areas is important in clinical medicine. An understanding of biostatistics is important not only for analyzing the results of research but also for understanding and reducing errors. This course centers on cases to illustrate pertinent concepts and prepares the student to be a responsible dispenser of medical resources and a knowledgeable consumer of the medical literature. Pitfalls and biases of both medical practice and publications as they relate to statistics are a major focus.

**PHA 509 Professional and Medical Practice Issues**

Fall and summer semesters. 1 semester hour.

This course, which is taken in each of the three full didactic semesters, examines a professional’s obligations and a patient’s rights in regard to ethical and social issues in medicine. Thorny dilemmas, such as the role of using humans in research studies, decisions not to treat or to resuscitate, inherent conflicts in genetics and reproductive technologies, as well as professional concerns about paternalism, patient rights, and confidentiality are examined. Students learn to think critically, drawing upon their own experience, to develop an understanding of how to handle ethical dilemmas while practicing primary care medicine. Preparation includes understanding how to interpret medical literature and how to ethically apply research. Additionally, students learn the history of the PA profession and become culturally and socially aware of how professional credentialing, the regulation of caregiver’s clinical responsibilities, and ethical/legal considerations influence their interaction with patients, as well as their place in the profession.

**PHA 518 Allergy/Immunology**

Fall semester. 2 semester hours.

This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Allergy and immunology.

**PHA 520 Physical Assessment**

Fall semester. 3 semester hours.

This course prepares students to master the art of taking medical histories and performing physical examinations. The focus is on recognition of “normal” and the significance of “abnormal” findings. A systems approach is used and the material is taught using a lecture, demonstration, and lab practicum format. A laboratory session is scheduled weekly to incorporate/practice skills presented in the lectures.

**PHA 522 Hematology**

Fall semester. 2 semester hours.

This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of hematology.

**PHA 523 Pulmonology**

Spring semester. 2 semester hours.

This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Pulmonology.
Academic Programs

PHA 524  
Cardiology  
Spring semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Cardiology.

PHA 527  
Nephrology  
Spring semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Nephrology.

PHA 531  
Behavioral Dynamics  
Spring semester. 2 semester hours.  
The recognition and management of common psychosocial problems is a critical skill to develop as a primary care provider. The fundamental role of interviewing and history taking will be emphasized as students are introduced to several techniques that will facilitate communicating and developing rapport with the patient. Treatment will be discussed from a biopsychosocial perspective with reference to psychotherapies, psychopharmacology, and environmental intervention. The role that psychosocial dynamics play in all areas of medicine will be of major focus and case studies are used to emphasize the delicate interplay. Psychiatric topics covered will include anxiety disorders, mood disorders, psychoses, organic conditions, substance use disorders, personality disorders, eating disorders, and psychiatric emergencies and crises. Additionally, there is an introduction to the concepts of death, dying, and bereavement.

PHA 533  
Infectious Disease  
Fall semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of infectious disease.

PHA 535  
Gastroenterology  
Spring semester. 1 semester hour.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Gastroenterology.

PHA 538  
Clinical Human Anatomy and Physiology  
Summer semester. 4 semester hours.  
This course is designed to teach students the essentials of gross anatomy and physiology pertaining to clinical practice. Cadavers and cadaveric specimens will play a fundamental role as we relate lecture/discussions to laboratory study. Students will learn to relate anatomical structures in the human body, skeletons, and models to imaging studies. The surface anatomy component introduces the student to the clinical setting and describes the visible and palpable anatomy that forms the basis of physical examination. Through laboratory workshops, students will learn to visualize how their interaction with the body’s surface interplays with internal anatomy. Additionally, a thorough review of concepts of physiology as they pertain to health and disease will be provided with a focus placed on each major organ system. Both portions of this course are designed as a focused review and an approach to ensure physician assistant students entering the clinical medicine courses have a firm grasp of anatomical and physiological concepts and begin to apply physiological reasoning to clinical situations.

PHA 539  
Neurology  
Spring semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Neurology.

PHA 543  
Endocrinology  
Fall semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of endocrinology.

PHA 546  
Pediatrics  
Spring semester. 2 semester hours.  
The course will examine infant and child health and development, focusing on major common pediatric illnesses and their signs, symptoms, and management relative to the primary health care provider. The problem-oriented medical record is presented, i.e., the pediatric history and physical examination. Specific problems of the newborn and older child will be presented for discussion in such areas as immunity and allergy, pharmacotherapy, medical emergencies, preventive health care, and the psychosocial and developmental disabilities specific to pediatrics. Students will learn to perform and demonstrate an infant exam. Specific strategies for physical examination of the pediatric patient will be learned and practiced on live patients in a skills lab.

PHA 547  
Ophthalmology  
Fall semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of ophthalmology.

PHA 549  
Oncology  
Spring semester. 1 semester hour.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Oncology.
PHA 550  
**Introduction to Clinical Practice**  
Spring semester. 2 semester hours.  
This course introduces the student to the diverse practices of medicine including: Rehabilitative medicine, occupational medicine, and environmental medicine. It also introduces the student to the administrative functions associated with medical practice, such as various forms of medical documentation, patient charts, CPT/ICD-9 coding and third-party billing. Students will use their examination and history taking skills on standardized patient models in the campus physical assessment labs and then apply the administrative functions to the patient model scenarios. In addition, they will shadow volunteer medical providers or allied health professionals in the medical community throughout the semester.

PHA 551  
**Urology**  
Summer semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Urology.

PHA 556  
**Surgery**  
Summer semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Surgery.

PHA 557  
**Otorhinolaryngology**  
Spring semester. 1 semester hour.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Otorhinolaryngology.

PHA 561  
**Obstetrics/Gynecology**  
Summer semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Obstetrics/Gynecology.

PHA 562  
**Orthopedics**  
Summer semester. 2 semester hours.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Orthopedics.

PHA 572  
**Dermatology**  
Summer semester. 1 semester hour.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Dermatology.

PHA 574  
**Rheumatology**  
Summer semester. 1 semester hour.  
This course introduces the student to the pathophysiology, pathology, clinical medicine, diagnostic and therapeutic modalities, and preventive medicine aspects in the practice of Rheumatology.

PHA 575  
**Genetic & Molecular Basis of Health & Disease**  
Summer semester. 2 semester hours.  
The focus of this course is to gain an understanding of the biochemical, molecular, and genetic basis for health and disease with an emphasis on clinical applications. The purpose of this course is to provide students with a knowledge base that can be applied throughout their study of medicine.

PHA 610  
**Emergency Medicine**  
Summer semester. 3 semester hours.  
The course will present a systematic approach to the evaluation, recognition and management of medical and surgical emergencies which might be frequently encountered by the primary care physician assistant. Using a formal lecture/discussion format, the course will focus on etiology, evaluation, emergency treatment and stabilization of more common emergency injuries and disease presentations. The focus of the course is in providing students the necessary skill set to function in rural, underserved areas where the physician assistant might be responsible for identification of significant life threats, emergency treatment, and stabilization for evacuation to a higher level of care. Curriculum includes instruction and certification in the American Heart Association’s Basic Cardiac Life Support (BCLS), Advanced Cardiac Life Support (ACLS), and Pediatric Advanced Life Support (PALS) courses. Advanced training is provided in trauma assessment and stabilization which includes instruction and practical performance laboratory for all critical skills identified in the American College of Surgeon’s Advanced Trauma Life Support (ATLS) course.

PHA 621  
**Problem-Based Clinical Correlation**  
Summer semester. 2 semester hours.  
This course is designed to assist students in becoming critical thinkers who can apply the concepts of medical decision-making and problem solving. The course utilizes a Problem-Based Learning (PBL) approach to teach students to critically evaluate and apply the clinical information they derive through medical history, physical examination, diagnostic testing, and pertinent medical literature to the real-life resolution and management of health care problems.

PHA 636  
**Patient Safety—Unifying Themes**  
Fall semester. 3 semester hours.  
This class will employ the Institute of Healthcare Improvement Open School modules on leadership, patient safety, and quality improvement. Building upon concepts...
and discussions begun during the didactic year regarding evidence-based medicine, ethics, and professionalism the student will leave the program with a focus on enhancing patient safety through communication, data gathering, and quality improvement techniques.

**PHA 638**  
**Case Study and Community Education Project**  
Fall semester. 3 semester hours.  
Reading clinical literature and then being able to communicate the written word to patients, peers, and supervising physicians is an important skill for the physician assistant. Students will use and then enhance concepts and skills from Evidence-Based Medicine, Ethics, and Professional and Medical Practice Issues and apply them to a chosen case study developed and researched during the clinical rotations. The course will conclude with an oral presentation to the didactic-year students, their second year peers, and the faculty, of a literature supported case study and a written 3-5 page paper. Case study development will be mentored by the Director of Clinical Education and supported by the core faculty. The presentation will be critiqued with an eye toward having the student leave their clinical rotations with a presentation that is ready to be used in a community setting. The course will begin during the August Orientation to the Clinical Rotation with sessions on public presentations and leadership roles and will end during the May call-back session (1.5 weeks on campus between rotations).

**PHA 641**  
**Geriatrics**  
Summer semester. 2 semester hours.  
This course provides an introduction to gerontology with an emphasis on the normal biological, sociological, behavioral and environmental changes that occur with age. Consequences of aging from the perspective of primary health care providers will be presented. Principles and methods of multidimensional assessment relative to the recognition and management of medical disease and mental illness with an emphasis on maximizing functional independence is discussed. The skills of history taking and physical assessment in the geriatric population with hands on experience in nursing homes will be taught. Students will understand the End of Life Issues and ethics in palliative care with review of the model of Advanced Care planning. Hospice care and advanced directives will be presented.

**PHA 651**  
**Clinical Rotations I**  
Fall semester. 12 semester hours.  
Students complete clinical rotations as assigned by the physician assistant program.

**PHA 652**  
**Clinical Rotations II**  
Spring semester. 12 semester hours.  
Students complete clinical rotations as assigned by the physician assistant program.

**PHA 653**  
**Clinical Rotations III**  
Summer semester. 12 semester hours.  
Students complete clinical rotations as assigned by the physician assistant program.

*These rotations will include the following:

**Family Practice Rotation**  
This core rotation of 6 weeks is designed to provide an in-depth exposure to the illnesses and injuries sustained by children and adults that necessitate emergency care. The educational experiences emphasize the focusing of interview and examination skills and the performance of techniques and procedures essential to the proper management of life-threatening illnesses and injury. Ventilatory assistance, cardiopulmonary resuscitation, fluid and electrolyte replacement, and acid-base balance are stressed.

**General Internal Medicine Rotation**  
This core rotation of 6 weeks is designed to provide clinical practice experience with the various acute and chronic medical disorders/complications that necessitate hospitalization and further evaluation for patients of adult patients, with special emphasis on geriatric patients and the care provided in both acute and long-term care facilities.

**General Pediatrics Rotation**  
This required core rotation of 6 weeks is structured to provide the student with an in-depth exposure to the assessment and management of children and adolescents. Included will be a focus on the newborn physical, well-child care, and those acute processes unique to the pediatric patient.

**Obstetrics/Gynecology (Women’s Health) Rotation**  
This core rotation of 6 weeks provides exposure to the spectrum of problems and issues associated with women’s health care as well as routine prenatal, intrapartum, and postpartum obstetrical care. Learning experiences will also include family planning and birth control, recognition and treatment of sexually transmitted infections, cancer detection, and evaluation of common gynecological problems.

**General Surgery Rotation**  
This core rotation of 6 weeks provides an orientation to patients of various ages with surgically manageable diseases. The emphasis of the learning experiences are on the preoperative evaluation and preparation of patients for surgery, assistance during the intraoperative period to develop an understanding of team member roles and operative procedures, and post-operative patient management and care of surgical wounds and complications.
Psychiatry Rotation
This core rotation of 6 weeks is designed to provide an understanding of the behavioral components of health, disease, and disability. Exposure to patients with a variety of emotional illnesses and disabilities are used to develop informed history taking and mental status examination skills, the ability to recognize and categorize psychiatric disturbances, and techniques for early intervention and psychiatric referral.

Long-Term Care Rotation
This rotation of 2 weeks is designed to give students the opportunity of providing care to patients in a long-term care setting. Specific emphasis is placed on medical, social, and psychological problems which are unique to the long-term care patient. Additionally, students will have the opportunity to develop end-of-life educational and coping strategies.

Elective Rotation
This rotation of 4 weeks is designed to give students an opportunity to explore professional options as Physician Assistants and may include additional clinical practice in any of the core rotations, any medical or surgical subspecialty, or experiential learning in academic medicine.

Syllabi have been developed for common elective rotations. A student who desires to complete an elective rotation that is not included among those previously developed needs to have prior approval by the program director. An appropriate syllabus will be developed and must be approved by the Program Curriculum Committee before the rotation begins.

Physics
Toby Anderson, Associate Professor

The concepts and principles of physics form the foundation on which all other sciences are built. Developments in the field of physics have also influenced thinking in philosophy, politics, and art, among other areas.

Physics courses at Rocky Mountain College cover the major ideas of both classical and modern physics. Students can gain the understanding required for majors in other sciences, including biology, chemistry, environmental science, and geology. Physics courses are also necessary for students planning careers ranging from aviation and engineering to the health sciences. Other physics courses provide an option for non-science majors to satisfy general education requirements while learning to better appreciate the physical universe around them and also to be better-informed members of a technologically complex society living on an environmentally challenged planet.

Physics courses provide students the opportunity to learn and practice rigorous, quantitative, and mathematical analyses as well as careful and precise verbal discussions. Courses are offered on a wide range of mathematical levels. Some levels require a proficiency in calculus; other levels require little mathematics, but all levels expect students to have, or develop, some ability at quantitative thinking.

Minor in Physics
A minimum of 18 semester hours is required, including PHS201 and PHS202 and PHS300. Of these 18 semester hours at least six must be upper division.

Physics courses

PHS 100
Atoms to Stars
On demand. 3 semester hours.
A course designed for non-science majors. A selection of topics in physics will be discussed to give the student a greater understanding of the physical universe. This course provides the background for an appreciation of the laws and phenomena of physics, which control the universe, from the sub-atomic to the cosmological scale, including the scale of human existence. Topics discussed may include force and motion, energy, the nature of light, the structure of matter, and ideas of modern physics. Only minimal mathematics will be used.

PHS 101
Fundamental Physics I
Fall semester, alternate years. 4 semester hours.
Students examine a survey of the laws and phenomena of classical physics, including motion, force, energy, momentum, waves, and thermodynamics. This course is suitable for non-science majors who have a strong background in high school algebra and who wish to have a more rigorous understanding of physics than provided in most courses for non-science majors. The course will satisfy the requirements of geology and biology majors. Students considering graduate work in these areas should take PHS201 and PHS202 instead. Three lecture periods and one two-hour laboratory per week.

PHS 102
Fundamental Physics II
Spring semester, alternate years. 4 semester hours.
Students examine a survey of the laws and phenomena of classical and modern physics, including light, electricity, magnetism, and atomic and nuclear physics. This course is suitable for non-science majors who have a strong background in high school algebra and who wish to have a more rigorous understanding of physics than provided in most courses for non-science majors. This course will satisfy the requirements of geology and biology majors. Students considering graduate work in these areas should take PHS201 and PHS202 instead. Three lecture periods and one two-hour laboratory per week. Prerequisite: PHS101.

PHS 105
Principles of Physics
On demand. 4 semester hours.
A survey of the laws and phenomena of classical physics, including motion, force, energy, momentum, waves, and thermodynamics. This course is algebra-based, and is intended for aviation majors. Others admitted with permission of instructor when space allows. Three lecture periods and one two-hour laboratory period per week. Prerequisite: proficiency in high school algebra and trigonometry or MAT110 or MAT131.
PHS 201
General Physics I
Fall semester. 4 semester hours.
This course is a calculus-based introduction to the laws and phenomena of classical physics, including force and motion, energy and momentum, their conservation laws, and their oscillations. This sequence is required for chemistry majors and engineering students and is recommended for mathematics, biology, and geology students. Three lecture periods and one two-hour laboratory per week. Corequisite: MAT175.

PHS 202
General Physics II
Spring semester. 4 semester hours.
This course is a calculus-based introduction to the laws and phenomena of classical physics, including mechanics, waves, light, electricity, and magnetism. This sequence is required for chemistry majors and engineering students and is recommended for mathematics, biology, and geology students. Three lecture periods and one two-hour laboratory per week. Prerequisite: PHS201; corequisite: MAT176.

PHS 225
Modern Physics
Fall semester, odd years. 3 semester hours.
This course covers selected concepts from early twentieth century physics. Topics covered include special relativity, photoelectric effect, Compton scattering, and the wave nature of particles. Prerequisites: PHS202 or permission from the instructor.

PHS 300
Physics Lab Projects
On demand. 1-2 semester hours.
Builds on students' experience in introductory labs with more complex and sophisticated experiments selected by students in consultation with the instructor. Emphasis will be on experimental design, analysis, and presentation of results. The course will be available every semester on a directed independent study basis. Students may work alone or in teams of two or three students. Prerequisite: permission of professor.

PHS 310
Statics
On demand. 3 semester hours.
Required for engineering students; involves a thorough analysis of forces and stresses on particles, rigid bodies, structures, and fluids in static equilibrium. Three lecture periods per week. Prerequisite: PHS201.

PHS 311
Dynamics
On demand. 3 semester hours.
Required for engineering students; involves a thorough analysis of the kinematics and kinetics of particles, systems of particles, and rigid bodies. Three lecture periods per week. Prerequisite: PHS310.

PHS 320
Relativity Theory
Fall semester, alternate years. 2 semester hours.
Students are introduced to Einstein's theory of relativity with emphasis on the special theory. Prerequisite: PHS201.

PHS 321
Quantum Theory
Spring semester, alternate years. 2 semester hours.
Students are introduced to quantum mechanics, including the historical evolution of the theory. Emphasis will be on the wave mechanical formulation of the theory and Schrödinger's equation. Topics such as quantum tunneling and atoms will be analyzed. The impact of quantum theory on the scientific worldview will be considered. Prerequisite: PHS202.

PHS 325
Nuclear and Particle Physics
Fall semester, alternate years. 2 semester hours.
Introduction to nuclear physics, including theory, experiments, and nuclear processes, as well as a survey of modern particle physics, including quantum chromodynamics. Prerequisite: PHS202.

PHS 343
Classical and Modern Optics
Spring semester, odd years. 3 semester hours.
This course covers concepts in geometrical and modern optics. Topics covered include reflection, refraction, dispersion, image formation, diffraction, superposition, interference, and polarization. Prerequisite: PHS202 or permission from the instructor.

PHS 347
Introduction to Health Physics
Fall semester, even years. 3 semester hours.
This course is an introduction to radiation physics and the biological effects of radiation exposure. Topics covered include atomic and nuclear structure, radioactivity, interaction of radiation with matter, radiation dosimetry, and the biological effects of radiation. Prerequisite: PHS202 or permission from the instructor.

PHS 380
Human Biophysics I
Fall semester. 3 semester hours.
This 2 semester course applies the basic principles of physics in order to improve the understanding of human anatomy and physiology. In addition, the effects of forces and energies on the human body will be studied. Biophysical principles will be illustrated when possible by discussion of human disease as well as by normal medical practices and procedures.

The first semester considers biophysical principles based on the broad physical topics of mechanics, acoustics, and heat. The second semester considers biophysics based on electromagnetism and radiation, and then considers the biophysics of cancer and other human diseases.
PHS 380
Human Biophysics II
Spring semester. 3 semester hours.
This 2 semester course applies the basic principles of physics in order to improve the understanding of human anatomy and physiology. In addition, the effects of forces and energies on the human body will be studied. Biophysical principles will be illustrated when possible by discussion of human disease as well as by normal medical practices and procedures.

The first semester considers biophysical principles based on the broad physical topics of mechanics, acoustics, and heat. The second semester considers biophysics based on electromagnetism and radiation, and then considers the biophysics of cancer and other human diseases. Prerequisite: PHS380 Biophysics I.

Political Science
For course listings, see "political science" in the table of contents.

Pre-Law Minor
Matthew O’Gara, Assistant Professor and Pre-Law advisor

Students planning to attend law school after completing a degree at Rocky Mountain College are encouraged to supplement their major by taking a secondary Pre-Law minor. Along with the completion of all requirements for their major, Pre-Law students take core courses in government, law, and logic, and choose among electives in the four categories listed below.

Required courses are intended to foster critical thinking skills, develop advanced writing abilities, and acquire an understanding of the human condition as it relates to the issues of legal and social justice. Students in the program will also receive assistance with LSAT test preparation and the law school application process.

Required courses:
POL203, American Government
POL412, Constitutional Law
PHR205, Logic

Select one of the following:
   · ENG319, Creative Non-Fiction Writing
   · ENG325, Professional Writing
   · ENG359, History and Grammar of English

Select one of the following:
   · COM240, Rhetoric of Western Thought
   · COM260, Debating Contemporary Issues
   · COM404, Rhetoric of Protest and Dissent

Select one of the following:
   · PHR303, Ethics
   · PHR340, Christian Ethics

Select one of the following:
   · AVS312, Aviation Law
   · BSA331, Business Law

Psychology
Linda Scott DeRosier, Professor
Barbara Vail, Professor, Director of Education

Psychology reflects the study of human behavior. Whether describing, explaining or predicting this behavior, students come to see that people are the focus of the field. They struggle to comprehend what it means to be caught in the human condition and discover that they can make choices and take responsibility for those choices. They develop empathy with themselves, each other, and the diverse populations who live on this planet.

The program in psychology at Rocky Mountain College educates students in the basic principles, language, and theories of the science of psychology. Students learn to think critically, evaluating the evidence and reasoning upon which explanations of human behavior are based. They collect data, design and conduct studies, interpret and apply research, and discover what that research means in the real world of people. When analysis is completed, they learn to communicate their findings both orally and in writing. Such work prepares them for graduate work in psychology.

Whether using statistics to support experimental research, literary analysis to help explicate a psychological passage in a novel, or cultural history to broaden awareness of their field, students use the liberal arts as grounding for disciplinary knowledge.

Major in Psychology
A minimum of 30 semester hours in psychology courses is required, including PSY101, PSY205 or PSY206, PSY305, PSY312, PSY410, PSY431, PSY450 (at least three semester hours), PSY483, and six semester hours of psychology electives. MAT210 is also required. A course in biology and a course in chemistry are recommended.

Major in Psychology Education
A minimum of 30 semester hours is required, including PSY101, PSY205, PSY206, PSY302, PSY305, PSY312, PSY410, PSY420, PSY431, PSY450 (at least three semester hours), and PSY483. In addition, students must complete all of the requirements of the professional education program for secondary teaching (grades 5-12) as described in the "education" section of the catalog.

Minor in Psychology
A minimum of 21 semester hours is required, including PSY101, PSY205 or PSY206, PSY410, and 12 credits of psychology electives.
Minor in Psychology Education
A minimum of 21 semester hours is required including PSY101, PSY205, PSY206, PSY302, PSY410, and PSY420. PSY312, and PSY431 are recommended. In addition, students must complete all of the requirements of the professional education program for secondary teaching (grades 5-12) as described in the "Education" section of the catalog.

Psychology courses

PSY 101
General Psychology
Fall and spring semesters. 3 semester hours.
A survey of the field of psychology investigating such topics as learning, motivation, human development, personality, social psychology, and physiological psychology. In order to make inquiry into any academic discipline, the student must first learn the language and methodology of that discipline; the field of psychology is no exception. Therefore, this course will include the study of major psychological theories, terminology, and investigative methods, as well as limited opportunity to apply those methods.

PSY/SOC 201
Social Psychology
Spring semester. 3 semester hours.
Students study the behavior of individuals as it is controlled, influenced, or limited by the sociocultural environment, social interaction, and basic interrelations of the individual, society, and culture. This course is designed to enable students to see themselves as both shaping and being shaped by their culture. Attention is also focused on inclusion and diversity. Prerequisite: PSY101.

PSY 205
Human Development I
Fall semester. 3 semester hours.
Students examine a study of human growth from conception to puberty. Physical, cognitive, personality, and social development will be investigated from theoretical and practical perspectives. The student will explore stages of human development through adolescence, be able to apply the major developmental theories, and make better choices as a parent or teacher.

PSY 206
Human Development II
Spring semester. 3 semester hours.
Students examine a study of human development from adolescence through the lifespan, which makes use of recent research studies in physical, cognitive, personality, and social development. The student will demonstrate a basic understanding of the physical, cognitive, and psychosocial changes that occur as people move through the stages of adulthood.

PSY 212
Family Dynamics
Fall semester. 3 semester hours.
This course is a study of the main theories of family systems, family patterns, and family-of-origin work. Material studied will be taken from required texts, articles obtained at the library, and class activities. The course will require some knowledge of the therapy models utilized in psychotherapy. Prerequisite: PSY101.

PSY/EDC 302
Educational Psychology
Fall semester. 3 semester hours.
This course is designed to aid the student in continuing to develop an understanding of human behavior, especially as that understanding applies to elementary and secondary classrooms. Emphasis will be on why and how human learning takes place and how that learning relates to schools and teaching situations where the needs of each student must be considered. The course also includes participation in and the analysis of interpersonal relations and communication skills. Prerequisite: PSY205 or PSY206.

PSY 305
Abnormal Psychology
Fall semester. 3 semester hours.
This course reviews the history of mental illness from a western perspective, and surveys the types of research used in the field. The symptoms, causes, and treatment of the major mental disorders are investigated from a variety of theoretical perspectives. Prerequisite: PSY101.

PSY 306
Personality Theories
Fall semester, alternate years. 3 semester hours.
Designed to facilitate inquiry into the psychological theories of personality. Students will explore the basic concepts underlying major theories as well as apply those theories to hypothetical cases. Students will demonstrate a basic understanding of the fundamental principles underlying theories of personalities. Prerequisite: PSY101.

PSY 312
Behavior Management
Fall semester. 3 semester hours.
Students review behavior management techniques and therapies. Principles of operant conditioning and classical conditioning are investigated in depth. The student will be able to use behavioral principles appropriately and understand the ethical issues involved. Prerequisite: PSY101.

PSY 315
Community Problems/Contemporary Issues in Psychology
Fall semester, alternate years. 3 semester hours.
Provides students with the opportunity to research common issues facing mental health practitioners in today’s society. Students will read conflicting arguments on each issue, write a paper from each perspective, and explore their own biases in regard to a series of issues. Prerequisite: PSY101.

PSY 342
Psychology and The Soul
Spring semester. 3 semester hours.
This course, delivered online, with some face-to-face sessions, is designed as an introduction of faith and psychology concepts and theories through the development of current philosophers and psychologists. The focus is to explore con-
cepts, theories and research that support the reunification of faith and psychological understanding of thought and behavior. Attention will be given to methods of spiritual and psychosocial review of life development and methods of interviewing. Among authors work to be explored are Frattaroli, Schumacher, Wilber, Vaughan and Kabat-Zin. Prerequisite: PSY101 or PSY205 or PSY206.

PSY/PEH 343
Psychology of Physical Activity and Exercise
Fall semester. 3 semester hours.
The purpose of this course is to promote understanding of psychological theory, research, and intervention strategies in psychology of physical activity and exercise. In studying both theory and practice, students are expected to develop their own views and ideas within the realm of their chosen field. The exchange and development of ideas is encouraged and at the same time grounded in the current knowledge base in this field. Students are expected to undertake extensive reviews within various health fields. Prerequisite: PSY101.

PSY/PEH 344
Sports Psychology
Spring semester. 3 semester hours.
Sport psychology is the scientific study of people and their behavior in sport, and is concerned with the psychological determinants of behavior in movement situations, as well as the psychological effects of sport engagement. This course would address the fundamental areas within sports psychology, including, but not be limited to, the following topics - motivation, attributions, imagery, goal setting, confidence, attentional focus, team cohesion, leadership, anxiety and stress. Students taking this course will be expected to demonstrate understanding of, and the application of the topic when coaching children and youth. Prerequisite: PSY101.

PSY 360
History of Psychology
Spring semester, alternate years. 3 semester hours.
This course provides a detailed study of the important foundation of the science and art of psychology. Students will understand the history of the major fields of clinical psychology, psychometrics, physiological psychology, sensation perception, learning, and motivation. Prerequisites: PSY101 and junior standing.

PSY 380
Cognitive Psychology
Spring semester. 3 semester hours.
The purpose of this course is to familiarize the student with basic issues and recent advances in the cognitive bases of behavior. This course is aimed at giving the student an introduction to the scientific study of attention, knowledge representation, memory, problem solving, decision making, learning and expertise, reasoning, and language. Students will learn to understand and critically evaluate theory and research in cognitive psychology, apply recent developments in cognitive psychology to their own work and way of thinking about how the brain processes information, and understand sources of individual differences and diversity in cognitive abilities and processes.

PSY 410
Experimental Psychology
Fall semester. 3 semester hours.
Designed to acquaint the student with various methods used in psychological research. The student will learn to evaluate the quality of research, will design and execute various types of research, and will be able to document research using APA guidelines. Prerequisites: PSY101 and MAT210.

PSY 420
Methods and Materials
Teaching Psychology in the Secondary School
On demand. 2 semester hours.
This course requires focused study and consultation with a public school psychology teacher or other acceptable professional. Hours will be arranged in consultation with the content area professor, the secondary education professor, the student, and the professional mentor. This course deals with teaching high school psychology. Particular attention is focused on diverse and at-risk student populations. Methods of teaching psychology, reviewing psychology texts for content appropriate to various grade levels, and the use of technology in the classroom constitute majors parts of the course. Attention is also given to the performance of research in the field of psychology. Prerequisites: admission to the teacher education program, senior standing.

PSY 431
Psychological Testing and Assessment
Spring semester. 3 semester hours.
This course provides an introduction to the theory and practice of testing and clinical assessment procedures. Emphasis will be on the development and standardization of current psychological tests. The student will become acquainted with the strengths and weaknesses of the major tests in use today. Prerequisites: PSY101 and MAT210.

PSY 450
Internship
Fall and spring semesters. 1-12 semester hours.
An applied course in which interviewing techniques, listening skills, observation and assessment procedures, and counseling skills will be reviewed and practiced at a local agency. Observation of the student and feedback on developing skills will be shared throughout the training program. Pass/no pass grading. Contract is required. Prerequisites: PSY305; and PSY306 or PSY483.

PSY 483
Psychological Counseling
Fall semester. 3 semester hours.
Students examine the theories and techniques used in the field of counseling. The course includes the discussion of psychopathologies, cultural diversity, privacy issues, counselor ethics, professionalism, and personality characteristics of both counselor and client as well as the effects of these issues on the counseling process. Prerequisites: PSY101, plus six additional semester hours in psychology.
Students study the behavior of individuals as it is controlled, influenced, or limited by the sociocultural environment, and understand the biochemical principles that relate to the human nervous system and the physiology involved in phenomena such as sleep, memory, schizophrenia, and depression. Prerequisites: PSY101, one course in biology or one course in chemistry.

**Seminar in Physiological Psychology**  
Ronald P. Cochran, Professor  
Spring semester, alternate years. 3 semester hours.  
This course provides a study of the anatomical, biochemical, and physiological aspects of human psychology. Students will have a detailed knowledge of the anatomy of the human brain and nervous system, and understand the biochemical principles that relate to the human nervous system and the physiology involved in phenomena such as sleep, memory, schizophrenia, and depression. Prerequisites: PSY101, one course in biology or one course in chemistry.

**Independent Study**  
Ronald P. Cochran, Professor  
Psychology courses  
On demand. 1-3 semester hours.  
This course allows a superior student to devise and pursue independent study in an area agreed upon upon consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

**Sociology and Cultural Anthropology**  
Ronald P. Cochran, Professor  
This course investigates deviant (normative and statistical) social behavior. A variety of psychological, economic, sociological, and anthropological theories are used to analyze the causes, consequences, and social responses to behaviors such as sexual violence, suicide, mental illness, illegal drug use, homosexuality, and heterosexual deviance. Prerequisites: SOC101 and SOC242 or permission of the instructor.

**Introduction to Sociology**  
Fall semester. 3 semester hours.  
Students examine the nature of the sociological perspective, macro- and micro-sociological theory, and sociological methodology and research. Society's social organization, social structure, social interaction, socialization, social institutions, deviance and social control, social stratification, ethnic and racial minorities, gender, the family, education, religion, and other topics from a sociological perspective are also explored.

**Social Psychology**  
Fall semester. 3 semester hours.  
Students study the behavior of individuals as it is controlled, influenced, or limited by the sociocultural environment, social interaction, and basic interrelations of the individual, society, and culture. This course is designed to enable students to see themselves as both shaping and being shaped by their culture. Attention is also focused on inclusion and diversity. Prerequisite: PSY101.

**Cultural Anthropology**  
Spring semester. 3 semester hours.  
Students are introduced to anthropological analysis of human behavior. Topics will include a cross-cultural examination of the systemic relations among economic, social, political, and religious behaviors in various cultures.

**Social Stratification**  
Fall semester, alternate years. 3 semester hours.  
Students examine the causes and consequences of the differential distribution of power, property, and prestige within social groups. Consideration is given to conservative as well as radical sociological perspectives on social stratification. Prerequisite: SOC101 or SOC242 or permission of the instructor.

**Sociocultural Theory**  
Spring semester, alternate years. 3 semester hours.  
A study of the historical development of the fields of anthropology and sociology with an emphasis on the contributions of both classical and modern social theorists in the development of key concepts in the study of social and cultural behavior. Prerequisite: SOC101 or SOC242 or permission of the instructor.

**Deviance**  
Spring semester. 3 semester hours.  
This course investigates deviant (normative and statistical) social behavior. A variety of psychological, economic, sociological, and anthropological theories are used to analyze the causes, consequences, and social responses to behaviors such as sexual violence, suicide, mental illness, illegal drug use, homosexuality, and heterosexual deviance. Prerequisites: SOC101 and SOC242 or permission of the instructor.

**Introduction to Social Work**  
Spring semester, alternate years. 3 semester hours.  
This course will provide the student with a general understanding of the professional field of social work and social work practice. The roles and functions of the professional social worker, as well as intervention strategies, will be
addressed. The course will also acquaint students with important historical developments in, and the evolution of, social work as a profession. Students will learn from a variety of social workers from many different fields of social work.

SOC 384  
Evolution of Social Stratification  
Fall semester, alternate years. 3 semester hours.  
The objective of this course is to muse about how the widespread modern phenomenon of social stratification originally evolved. While humans lived as egalitarian hunters and gatherers for 99% of their history, and all scientifically studied hunters and gatherers have an egalitarian social structure, no one knows how unequal power and wealth developed. How did societies in which having more than others, or trying to tell others what to do, were considered sure signs of insanity, change into stratified societies? This course explores ideas that chieftoms, intermediate between tribes and states, hold some answers because they are the first to achieve non-kin based organization with stratified power and wealth. Prerequisites: SOC101 and SOC242 or permission of the instructor.

Sociology 408  
Introduction to Social Research  
Fall semester alternate years. 3 semester hours.  
Students will complete the tasks necessary for conducting sociological research prior to the collection of data. Students will write a research proposal to include the development of a research question (hypothesis), a literature review of existing research on this topic, identification of a population for study, choice of two research methodologies for data collection, choice of analytical tools, and a statement of expected results. After successful completion of this course students will be prepared for SOC409 Practicing Social Research. Prerequisite: SOC324

Sociology 409  
Practicing Social Research  
Spring semester alternate years. 3 semester hours.  
Students will complete an independent research project based on a research proposal. Data will be collected using two research methodologies and then statistically analyzed. Write a final report presenting the results of the research as compared to previous studies, a critique of the results, and suggestions for further work. Prerequisite SO408.

SOC 450  
Internship  
On demand. 1-12 semester hours.  
This course is a guided work experience in an already established place of business. The student must arrange the internship in agreement with the instructor and the office of career services. The internship should relate to the student’s major or minor area of study. Contract is required. Prerequisite: junior or senior standing.

SOC 477  
Sociocultural Analysis of Subcultures: Cults/Sects  
Spring semester, alternate years. 3 semester hours.  
Students write a major paper in which they present elements of social science thought from the related social science courses and connect this body of thought to traditions of sociological and anthropological thought. Prerequisites: one lower-division and one upper-division course in a related social science field: psychology, economics, or political science or permission of the instructor. SOC324 is recommended.

SOC 499  
Independent Study  
On demand. 1-3 semester hours.  
This course allows a superior student to devise and pursue independent study in an area agreed upon in consultation with, and supervised by, a faculty member. Students should be either a major or minor and have a cumulative GPA of 3.00 or greater. Prerequisite: junior or senior standing.

Theatre Arts  
Linaya L. Leaf, Professor  
Gearld B. Roe, Professor  
Sarah Brewer, Associate Professor

The College’s theatre program provides students with a liberal arts-based theatre education. Students explore their many faces through different characters they play using the creative process. The program encourages all students on campus to participate in theatre productions. It is hoped that students will develop a lifelong passion for this collaborative art form. By its very nature, theatre is multi-disciplinary.

The theatre program provides both majors and non-majors with experience as performers, technical contributors, and audience members. Whether building performance skills through the use of the imagination, the senses, emotion, movement, and voice or learning the technical side of theater through set, lighting, and costume design, students use the dramatic text as the basis for analysis. Both the canon and emerging multi-cultural texts are considered.

Theatre arts offers one major discipline, with two areas of emphasis, and a minor. Students may focus on performance or technical production. Either emphasis provides intensive professional training while preparing students for graduate school in theatre. Students must select their emphasis by the end of the sophomore year. The minor emphasizes general knowledge of theatre production, literature, and history.

Major in Theatre, Performance Emphasis  
A minimum of 42 semester hours is required, including THR132, THR232, THR240, THR242, THR250, THR253, THR335, three semesters of THR291, THR433, THR434, THR435 and THR483. Also required are electives totaling six semester hours selected from the following: THR135, THR203, THR230, THR347, THR432.

Major in Theatre, Technical Emphasis  
A minimum of 43 semester hours is required, including THR101; THR131; THR235; THR242; THR250; THR253; four semesters of THR291 or THR391; two of the following three courses: THR310, THR315, or THR320; THR433; THR434; and THR483. Also required are electives totaling six semester hours selected from the following: THR135, THR245, THR336, or THR391.
Minor in Theatre Arts
A minimum of 19 semester hours is required, including THR101, THR131, THR132, THR135, THR291, THR433, and THR434.

Theatre Arts courses

THR 101
Introduction to Theatre
Spring semester. 3 semester hours.
This course provides a survey of the unique world of live theatre. Students will examine theatre as an art, exploring its various components: the actor, the playwright, the designer, the director, the dramatic structure, and the history of theatre. Emphasis will be placed on students exploring the basic skills necessary for performance onstage. Students will be required to present both a monologue and duet acting scene for the course, as well as to critically review the performances of their peers and the current productions.

THR 110
Introduction to Cinema
Fall semester, alternate years. 3 semester hours.
This course is taught only in conjunction with the Rocky Freshman Experience. This course provides an introduction to the art of the cinema. Topics include history, genre, acting and directing styles, and the industry's response to cultural issues.

THR 131
Technical Production
Fall semester, alternate years. 3 semester hours.
Students examine a practical approach to the fundamentals of technical theatre. The course includes becoming familiar with tools, equipment, and the technology used in stage construction. Construction projects are required.

THR 132
Acting I: Beginning Acting
Fall semester. 3 semester hours.
The student receives the fundamental skills and techniques for an in-depth exploration of the acting process. Through monologue and scene work, improvisations and exercises, students will learn to communicate effectively with others on and off stage. Areas of concentration include the development of self-awareness, vocal production, physical flexibility, and emotional exploration.

THR 135
Stage Makeup
Fall semester. 3 semester hours.
Students receive practical training in the design and application of theatrical make-up. Class projects will include standard, corrective, animal, fantasy, monster, and other make-ups.

THR 203
Creative Drama
Spring semester, alternate years. 3 semester hours.
Creative drama is a student-centered, process-oriented form of drama in which the focus is on the personal development of the participant. Students do drama exercises, which help them to develop skills in building character, relating to a setting, improvisation, story dramatization, social drama, and applications of this process for more formal theatre work. Students create five scenes with fellow students, performing roles in those scenes before class peers. This course fulfills the general education requirement for fine arts.

THR 230
Movement for Theatre
On demand. 3 semester hours.
In this course, the focus is on the principles, practices, and exercises in body technique and stage movement. The student learns concentration, centering, balance, agility, and movement skills through various techniques.

THR 232
Acting II: Characterization
Spring semester, alternate years. 3 semester hours.
This course builds upon the principles developed in Acting I. It stretches the actor's range by exploring methods of creating a character. Scene analysis is examined to discover the essence of the character clarifying motivation and intention. Selected scenes from realistic texts by Chekhov, Ibsen, Strindberg, and Shaw will be incorporated. Prerequisite: THR132.

THR 235
Drafting for the Stage
Fall semester, even years. 3 semester hours.
A study of the drafting skills and techniques required for technicians and designers. Time will be spent in the study of hand-drafting as well as computer-aided drafting.

THR 240
Voice and Diction
Spring semester, alternate years. 3 semester hours.
Fundamental concepts of vocal production are examined. Students take an in-depth look at the vocal mechanism and its importance to the live stage performance. The course prepares the student to effectively produce audible, intelligible speech. Each student will become proficient utilizing "Standard Stage" speech.

THR/ENG 242
Modern Dramatic Literature
Fall semester, alternate years. 3 semester hours.
Focusing on script analysis, students consider diverse trends in play-writing and theatrical performances over the past hundred years as viewed through the works of the major playwrights of Europe and the United States. Trends studied include realism, expressionism, surrealism, cubism, and absurdism. This course encourages cross-cultural understanding.

THR 245
Scene Painting
Spring semester, alternate odd years. 3 semester hours.
An overview of various painting techniques used in a theatrical setting. These may include, but are not limited to: woodgraining, marble, brick, and stenciling. A fee for materials will be charged.
THR 247  
Puppetry  
On demand. 3 semester hours.  
The course examines the use of puppets in educational, recreational, therapeutic, and religious settings. Design, construction, and manipulation of various kinds of puppets will be covered. Students will be given opportunities to develop performance skills through theatrical processes. While the course will focus on fundamentals, students will be encouraged to pursue their special puppetry interests and needs.

THR 250  
Directing I  
Spring semester, alternate years. 3 semester hours.  
This course provides an introductory study of the numerous functions of a stage director from play selection to the final performance, emphasizing the development of directorial skills. Students will direct a one-act play.

THR/ENG 253  
Classical Dramatic Literature  
Fall semester, alternate years. 3 semester hours.  
Focusing on script analysis, this course provides a chronological study of the major theatrical periods of dramatic literature from the emergence of Greek tragedy in the fifth century BC to the development of European realism in the late nineteenth century. The course also encourages cross-cultural understanding.

THR 291  
Theatre Practicum  
Fall and spring semesters. 1 semester hours.  
Students participate in theatre productions under the supervision of the theatre faculty. Credit may be given for lighting, set construction, house management, costuming, publicity, and more. Grades are on a pass/no pass basis only.

THR 310  
Lighting Design  
Spring semester, alternate years. 3 semester hours.  
This course provides a study of the principles, technology, and aesthetics of designing stage lighting. Practical application is emphasized. Prerequisite: THR131.

THR 315  
Scene Design  
Spring semester, alternate years. 3 semester hours.  
This advanced course examines the principles and aesthetics of generating practical, working designs for the modern stage. Requirements include several models and their justifications. Prerequisite: THR131.

THR 320  
Costuming for The Stage  
On demand. 3 semester hours.  
This course will investigate the role of costumes in theatrical production. Topics include costume history, color theory, and light/fabric relationships. Practical designs and construction projects will be completed. Prerequisite: THR131.

THR 335  
Acting III: Shakespearean Techniques  
Fall semester, alternate years. 3 semester hours.  
Students will explore and apply the techniques necessary for the preparation and performance of Shakespeare. The focus of the work is on thorough script and verse analysis, interpretation, voice, and movement. Acting monologues and several scenes are required. Prerequisite: THR232.

THR 336  
Rendering for The Stage  
Spring semester, alternate even years. 3 semester hours.  
A study of the media and techniques used to present a theatrical design. Practical application in rendering a scenic, lighting, and costume design. Prerequisite: ART101.

THR 347  
Musical Theatre  
On demand. 3 semester hours.  
This course provides an introduction to musical theatre. Study includes such topics as musical conventions historical perspectives, act-ability of musical numbers and staging of numbers. The course will culminate in an evening performance of prepared audition numbers.

THR 391  
Advanced Theatre Practicum  
Fall and spring semesters. 2-3 semester hours.  
Students participate in theatre productions under the supervision of the theatre faculty. Credit may be given for lighting, set construction, house management, costuming, publicity, and more. Each project will be given a letter grade. Prerequisite: permission of professor.

THR 420  
Methods and Materials  
Teaching Theatre Arts in the Secondary School  
On demand. 3 semester hours.  
This course requires focused study and consultation with a public school theatre teacher or other acceptable professional. Hours will be arranged in consultation with the content area professor, the secondary education professor, the student, and the professional mentor. This course provides a study of curriculum development and theatre production in the secondary school. Students study production possibilities within various educational settings. Students also explore methods for creating instructional and motivational curricula. Prerequisites: admission to the teacher education program, senior standing.

THR 432  
Audition Preparation  
On demand. 3 semester hours.  
Cold readings, prepared auditions, and the interview will be scrutinized. Upon completion of this course, students will be equipped to present diversified auditions. Effective resumes and photographs will be examined. Prerequisite: THR132.
THR 433
Theatre History I
Beginnings through Neoclassicism
Spring semester, alternate years. 3 semester hours.
This course provides a chronological study of the history of
theatre from its origins to the 1850s. Critical theories, rep-
resentative plays, and the physical conditions that con-
tributed to the mainstream of theatrical history will be cov-
ered.

THR 434
Theatre History II
Romanticism to The Present
Spring semester, alternate years. 3 semester hours.
This course provides a chronological study of the history of
theatre from Darwinism through modern drama. Critical
theories, representative plays, physical conditions, theatrical
conventions, and cultural and social movements, which
affect the mainstream of theatrical history, will be covered.

THR 435
Acting IV
Period Acting Styles
Spring semester, alternate years. 3 semester hours.
Students examine and perform fundamental styles of move-
ment and expression dictated by specific historical periods.
Prerequisites: THR335.

THR 440
Performance/Design
On demand. 1-3 semester hours.
Performance Emphasis: Students prepare and perform a
major role in a Rocky Mountain College production. Each
role must be approved and supervised by faculty. A daily
rehearsal and performance journal and a major character
analysis paper are required. The paper will address the role
being undertaken and how it fits into the thematic structure
of the piece, as well as how the actor applies the arc of the
character in performance. Credit is dependent on role. This
course is repeatable to a maximum of three credits. Design
Emphasis: Students will prepare a design for a major ele-
ment in a Rocky Mountain College production. A daily
journal during the building process and technical rehearsals
is needed. A critical paper is required, addressing struggles
and successes within the process. Credit is dependent on
development and creation of the design.

THR 450
Internship
On demand. 1-12 semester hours.
This course is a guided work experience in an already estab-
lished place of business. The student must arrange the
internship in agreement with the instructor and the office of
career services. The internship should relate to the student's
major or minor area of study. Contract is required.
Prerequisites: junior or senior standing.

THR 471
Shakespeare
Spring semester, alternate years. 3 semester hours.
Students are provided with an advanced examination of rep-
resentative Shakespearean plays. Emphasis is placed equal-
ly on script analysis and the acting process.

THR 483
Senior Project
On demand. 3 semester hours.
A course designed for the senior as a culmination of study in
his/her area of concentration. Theatre faculty must approve
the project by the end of the student's junior year. Each proj-
ect will be closely supervised by faculty. Requirements for
this course can be met in one of four ways:
• Acting: A student will act a major role in a full-length play.
  Journals and analysis required;
• Directing: A student will direct a full-length play during
  Rocky Mountain College's main season. Journals and
  analysis required;
• Play writing: A student will write a play and arrange for a
  public reading of that play. Journals and analysis required;
• Technical: A student must complete a design for lights, cos-
tumes, and/or sets for a Rocky Mountain College or
  Billings Studio Theatre production. A technical student
  may also stage manage a major production. Journals and
  analysis required.

THR 490
Seminar
On demand. 1-3 semester hours.
Selected topics in theatre are explored.

THR 499
Independent Study
On demand. 1-3 semester hours.
This course allows a superior student to devise and pursue
independent study in an area agreed upon in consultation
with, and supervised by, a faculty member. Students should
be either a major or minor and have a cumulative GPA of
3.00 or greater. Prerequisite: junior or senior standing.
ADMINISTRATION AND STAFF

President, Michael R. Mace, BS

Faculty

Daniel Albano, Professor of Biology (2002). B.A., St. Olaf College, N.S., University of North Dakota, Ph.D., University of New Mexico.

Toby S. Anderson, Associate Professor of Physics (2004). B.S., Ball State University, N.S., Vanderbilt University.

Jean Broussard, Associate Professor of Chemistry (1997). B.A., The Catholic University of America, Ph.D., Texas A&M University.

Steven L. Bar, Professor of Business Administration/Economics (1994). B.S., N.D.A., University of Montana.

Karen Estes, Assistant Professor of Business Administration/Economics (2007). B.S., University of Michigan, M.B.A., St. Andrew's College, M.D., Oxford University.

Ami R. Besean, Assistant Professor of Physical Education (2010). B.A., St. Olaf College, M.S., Montana State University-Billings.

Jennifer Davis, Assistant Professor of Music (2003). B.N., M.D., Lutheran University, B.A., University of Colorado.

Sarah Brown, Associate Professor of Theatre (2007). B.S., Lawrence University, M.F.A., Western Illinois University.

Victoria Czarnecki, Professor of Communication Studies (1993). B.A., University of Montana, M.A., University of New Mexico, Ph.D., University of Kansas.

Bekah Cumming, Associate Professor of Mathematics (1994). B.S., M.S., North Dakota State University.

Mark Price, Assistant Professor of Elementary Education (2000). B.S., Carroll College, M.S., Syracuse University.

Linda Scott-Belton, Professor of Psychology (1997). B.S., Idaho State University, M.A., Eastern Kentucky University, B.S., University of Kentucky, Ph.D., Harvard University.

Leopoldo Romo, Associate Professor of English (1999). B.A., Rocky Mountain College, M.A., Montana State University-Billings.

Brian G. Hargrove, Director of Aviation/Professor of Aviation (2002). B.S., U.S. Air Force Academy, N.S., Montana State University-Billings.

Susan Hurt, Associate Professor of Music (2000). B.A., Western Michigan University, M.M., University of South Dakota.

Heather Huggins, Assistant Professor of Biomedical Education (2010). B.A., Montana State University.

Uchak Ikpa, Associate Professor of Mathematics (1993). B.S., Technical University, N.D.A., University of Montana.

Cheri N. Hui, Professor of Chemistry (1992). B.A., Carroll College, Ph.D., University of Illinois at Urbana-Champaign.

Basel Iqbal, Associate Professor of Aviation (2004). B.A., Auburn University, M.S., Eastern Michigan University, Ph.D., University of Nebraska-Lincoln.

Sherry J. Iken, Assistant Professor of Biology (2009). B.A., Montana State University-Billings, M.A., University of Wyoming.

Andrew Knoll, Professor of English (1997). B.A., University of Montana, N.D.A., University of Montana, Ph.D., University of California-Davis.

Gestin Kintz, Assistant Professor of History (2002). B.S., M.S., M.A., Australian National University.

Basil Klein, Medical Doctor/Associate Professor of Physical Education (2004). B.A., Dartmouth College, Ph.D., Harvard Medical School.

Cleta Kinz, Assistant Professor of Business and Aviation (2007). B.S., Montana State University-Billings, M.S., University of North Dakota, Ph.D., Air Force Institute of Technology.

Catherine L. Leary, Professor of Physical Education/Health (1996). B.S., Northern Arizona University, M.A., University of South Carolina.

Robert LeRoy, Associate Professor of Physical Education (2002). B.S., M.B., University of Minnesota, F.C.P., (South Africa).

M. Kelley Magne, Assistant Professor of Physical Education (2004). B.A., Carroll College, M.A., University of Montana.

M. Kelly McCauley, Assistant Professor of Physics (2004). B.S., Montana State University.
Susan R. McFarland, Professor of Humanities and Composition (1994). B.A., Smith College; M.A., Middlebury College; Ph.D., Yale University.

James I. McBurney, Professor of Business Administration/Economics (1963). B.S., Colorado State University; M.S., Oregon State University; Ph.D., Oklahoma State University.

Elizabeth McFadden, Assistant Professor of Religious Thought/Chair of Religious Thought (1998). B.A., Digby Street College, University of London; M.A., Governors University; M.A., Eastern Montana College; Ed.D., Montana State University-Bozeman.

Gray Miller, Director of Equine Studies and Assistant Professor of Equine Studies (2011). B.S., Cal Poly University; M.S., Colorado State University; Ed.D., Utah Valley University.

Matthew O’Gara, Associate Professor of Political Science (2008). B.A., California State University, Northridge; M.A., San Diego State University; Ph.D., University of Southern California.

Mark Ostermann, Associate Professor of Biology (2004). B.S., Clemson University; M.S., Ph.D., Yale University.

Kathryn Ostermann, Assistant Professor of Biology and Environmental Science (2007). B.S., North Carolina State University; M.S., Montana State University-Bozeman.

Bibbitt Oster, Assistant Director of Library (2000). B.S., Montana State University-Bozeman; M.L.S., Drake University.

Janet L. Puckett, Assistant Professor of History (2009). B.A., University of Mississippi; M.A., Ph.D., University of North Carolina at Chapel Hill.

Anthony R. Edlin, Associate Vice President/Professor of Business Administration/Economics (1990). B.S., Grand Canyon University; Ph.D., Northeastern University; CMA, CPA, CFA.

Donald Ekin, Assistant Professor of English (2010). B.A., University of Michigan-Flint; M.A., Ph.D., University of Nebraska.

Thomas Russel, Associate Professor of Physician Assistant Studies (2001). B.A., M.A., Colorado State University; Ph.D., Booth Graduate School of Business; M.D., Emory University School of Medicine.

Mark L. Russel, Associate Professor of Equine Studies (1993). B.S., Colorado State University; B.S., Northwest University.

Roy Russel, Assistant Professor of Equine Studies (1990). B.S., DVM, Colorado State University.

Brian Reger, Associate Professor of Communication Studies (2007). B.A., M.A., Colorado State University; Ph.D., University of Utah.

Stephanie "Stacie" Schwartz, Director of Educational Leadership and Distance Elementary Education (2004). B.S., Eastern Montana College; M.S., Montana State University-Billings; Ed.D., Montana State University-Bozeman.

Scott Sennet, Associate Professor of Business (1994). B.S., Rocky Mountain College; M.A., University of Nevada-Las Vegas.

Brad Sjostrom, Assistant Professor of Geology (2003-2006, 2003). B.S., University of Washington; M.S., University of Montana; Ph.D., Dartmouth College.

Dana Skol, Assistant Professor of Physician Assistant Studies (2011). A.S., Northwest College; B.S., University of North Dakota; P.A.C.

James Smith, Professor of Business (2001). B.S., Rocky Mountain College; M.A., University of Montana.

Dinah Stroh, Assistant Professor of Physician Assistant Studies/Director of Clinical Education (2007). B.A., Carroll College; M.D., University of Washington.

David Straus, Professor of Philosophy (1993). B.A., University of Montana; Ph.D., State University of New York-Stony Brook.

Jae Sung, Associate Professor of Elementary Education (2004). B.S., University of Montana; M.S., Eastern Montana College; Ed.D., Montana State University-Bozeman.

Bernard Wall, Associate Academic Vice President/Professor of Psychology, Director of Education (1994). B.A., Montana State University; M.S., Ph.D., Washington State University.

Emily Ward, Assistant Professor of Geology (2011). B.A., Indiana University; M.S., Washington State University; Ph.D., University of Montana.

Lisa Ward, Visiting Assistant Professor of Environmental Studies (2011). B.A., Whittier College; M.A., Ph.D., University of Colorado.

Bob Wilson, Professor of Mathematics (1990). B.S., Rocky Mountain College; M.S., Colorado State University.

Joy V. Wilson, Associate Professor of Computer Science (2005). B.S., University of Iowa; Ph.D., University of Oxford.

Robert Winters, Program Director, Physician Assistant Program (2000). B.A., University of Rochester; M.D., University of Illinois.

Scott Wilson, Professor of Aviation (1993). B.A., University of Colorado; M.S., Eastern Montana College; Ph.D., University of Montana.
Emeriti Faculty

Barrett, Professor Emeritus, History/Political Science (1972-2001). BS, University of Southern Mississippi. MA, PhD, University of South Carolina.

Drozd, Professor Emeritus, University of Cambridge. D. of Science, University of Aix-Marseille, France. Diploma of Spanish Language and Culture, University of Santiago, Spain.

Baker, Professor Emeritus, Music (1963-1994). BS, MS, Eastman School of Music of the University of Rochester.
